

## **Tevano Announces Subsidiary illuria Security, Inc. to Launch ProfilerX Alpha Product for Market Testing**

Vancouver, BC, April 11, 2022 - Tevano Systems Holdings Inc.'s (CSE: TEVO) (FSE: 7RB) (OTC Pink: TEVNF) ("**Tevano**", or the "**Company**") wholly owned subsidiary Illuria Security, Inc. ("**Illuria**") announces the alpha release of its cyber deception technology, "**ProfilerX**".

In advance of full commercialization, Illuria is launching an Alpha version of ProfilerX for market testing starting in April 2022. ProfilerX aims to give organizations an upper hand against cybercrime by creating virtual minefields with decoys and lures to break the attacker's decision cycle. illuria's deception technology forces attackers to reveal themselves, enabling organizations to detect an attack in its early stages and respond immediately with actionable intelligence.

This alpha version will contain the three core components of deception technology; deploying decoys and lures at scale, real time event tracing for early detection and threat intelligence feed, open API facility for accelerating incident response and automation of security operations.

As illuria's CTO Zareh Petrossian explains, "Several partners have expressed interest, and an alpha release will allow us to 'white-box' our product in real production environments and get users' feedback into loop ahead of launch time, which is just around the corner."

This product version will be made available to a private group of early users, partners, researchers, and security operators, providing them with the ability to deploy deception technology in live environments, detect and monitor malicious activity, and gain full visibility to respond to the attack accordingly. It will also be deployed in sandboxed environments for testing against recent ransomware campaigns, APT's (Advanced Persistent Threats) simulations and other sophisticated attacks and techniques.

The purpose of the Alpha release is to gather market intelligence and valuable insights to further enhance the product offering and features, and to deliver the highest possible value to customers.

To apply for our private alpha release, visit <https://www.illuriasec.com/demo>

### **About Tevano**

Tevano Systems Holdings Inc., through its operating subsidiaries, is a technology company with custom and proprietary hardware and software technologies. Its subsidiary, Illuria Security, Inc. is an early-stage software development company whose technology involves active cyber deception to protect critical network systems of enterprise systems of all sizes. Using deception technology, Illuria's software seeks to solve the challenge of cyber-attacks by detecting threats, systematically deceiving attackers, and actively deterring attacks. Its subsidiary Tevano Systems Inc. is the developer of Health Shield™, an AI-driven, electronic tablet that video displays a user with their body temperature and other information. It provides detailed reports of all scans done throughout an enterprise.

**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION:** This news release contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. These statements relate to future events or future performance. All statements other than statements of historical fact may be forward-looking statements or information. More particularly and without limitation, this news release contains forward-looking statements and matters. The forward-looking statements and information are based on certain key expectations and assumptions made by management of the Company. Although management of the Company believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information since no assurance can be given that they will prove to be correct.

Forward-looking statements and information are provided for the purpose of providing information about the current expectations and plans of management of the Company relating to the future. Readers are cautioned that reliance on such statements and information may not be appropriate for other purposes, such as making investment decisions. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to several factors and risks. These include, but are not limited to, the Company's ability to raise further capital, the success of the Company's software and product initiatives and the Company's ability to obtain regulatory and exchange approvals. Accordingly, readers should not place undue reliance on the forward-looking statements and information contained in this news release. Readers are cautioned that the foregoing list of factors is not exhaustive. The forward-looking statements and information contained in this news release are made as of the date hereof and no undertaking is given to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws. The forward-looking statements or information contained in this news release are expressly qualified by this cautionary statement.
