MANAGEMENT'S DISCUSSION AND ANALYSIS

This management's discussion and analysis ("MD&A") follows rule 51-102A of the Canadian Securities administrators regarding continuous disclosure for reporting issuers. It is a complement and supplement to the Corporation's unaudited consolidated interim financial statements and related notes for the period ended June 30, 2016 and should be read in conjunction with both the financial statements for the year ended December 31, 2015 and the annual MD&A for the year ended December 31, 2015. This MD&A represents the view of management on current activities and past and current financial results of the Corporation, as well as an outlook of the activities of the coming months. The Corporation prepared its financial statements in accordance with the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board.

DATE

This MD&A of Genius Properties Ltd.(formerly Synergy Acquisition Corp.)(the "Corporation") of the financial condition and results of the operation of the Corporation constitutes management's review, as at August 29, 2016, of the factors that affected the Corporation's financial and operating performance for the period ended June 30, 2016. Without contrary indication, all the amounts are in Canadian dollars. Additional information relating to the Corporation is available on the System for Electronic Document Analysis and Retrieval ("SEDAR") at www.sedar.com.

FORWARD LOOKING STATEMENTS

This MD&A contains forward-looking statements that are based on the Corporation's expectations, estimates and projections regarding its business, the mining industry in general and the economic environment in which it operates as of the date of the MD&A. These statements are reasonable but involve a number of risks and uncertainties, and there can be no assurance that they will prove to be accurate. Therefore, actual outcome and results may differ materially from those expressed in or implied by these forward-looking statements. The preliminary economic assessments contained in the Technical Reports referred to in this MD&A, and the estimates contained therein to date are preliminary in nature and are based on a number of assumptions, any one of which, if incorrect, could materially change the projected outcome. Factors that could affect the outcome include, among others: the actual results of current exploration, competition, general business, economic, political and social uncertainties, environmental issues, additional financial requirements and the Corporation's ability to meet such requirements. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ from those anticipated.

NATURE OF ACTIVITIES

On January 31, 2014, the Corporation announced that it had completed its previously announced name change from "Synergy Acquisition Corp" to "Genius Properties Ltd.". The common shares of the Corporation commenced trading on the Canadian Securities Exchange under the new corporate name and under the new symbol, "GNI", within the next two or three trading days. The Corporation has also continued into Quebec under the Canada Business Corporations Act from Alberta. The name change and the continuation were approved by shareholders of the Corporation at the special meeting of shareholders held on January 6, 2014.

The Corporation is at the exploration and evaluation stage and its operations include the acquisition, exploration, evaluation, development of production facilities and ultimately, the sale of exploration and evaluation assets.

The recovery of the exploration and evaluation assets is dependent upon: the discovery of economically recoverable reserves and resources, securing and maintaining title and beneficial interest in the properties, the ability to obtain the necessary financing to complete exploration, evaluation, development and construction of processing facilities, obtaining certain government approvals and proceeds from disposal of assets.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Genius is primarily targeting Quebec's excellent mineral potential to discover new world-class deposits and is the ideal partner for exploration companies and capital pool companies looking for qualified transaction projects of merit. The Company intends to enter various types of agreements on its available mineral properties.

DISCONTINUED OPERATIONS

On November 11, 2015, the Corporation announced that it would discontinue the distribution of consumable products under its subsidiary Zencig and the development of a geo-localisation software under its subsidiary Zippler to concentrate its effort on the acquisition and exploration of mineral properties

Despite the current boom in e-cigarettes, several factors had a negative effect on the distribution of Zencig products. First of all, the market soon shifted from an emphasis on disposable cigarettes to an emphasis on rechargeable cigarettes. The shift actually happened in less time than it took to address the very first orders. Moreover, the negative recommendations issued by the World Health Organization (WHO) advising against the use of e-cigarettes in public spaces, not to mention a number of admittedly isolated incidents that were the subject of lawsuits and which had an impact on insurance premium increases, are among the numerous other obstacles that arose to hinder the distribution of these products. In other words, a combination of unfavourable factors has made it more commercially viable for the Corporation to take a step back from diversification.

Reiva

On May 26, 2015, the Corporation acquired from an arm's-length third party all the assets of Reiva, composed primarily of a portfolio of proprietary brands and exclusive recipes of natural and functional beverages and related products.

All assets were purchased by the issuance of 30,000,000 common shares of the Corporation at a deemed value of \$0.11 per share for a total value of \$3,300,000. The common shares issued were subject to a thirty-six (36) month escrow, in accordance with CSE policies and applicable securities regulation.

On October 27, 2015, the parties agreed to cancel the agreement signed on May 26, 2015 and return to Treasury the 30,000,000 common shares issued previously. These common shares were returned to Treasury in February 2016 and are presented as shares to be cancelled as at December 31, 2015. Share capital was reduced by \$900,000 representing the fair value of the 30,000,000 common shares at the date of the cancellation and the Corporation recorded a loss on cancellation on acquisition of assets in the consolidated statements of comprehensive loss of \$2,400,000.

OVERVIEW OF BUSINESS

Building

The decision to steer away from these activities will prompt the immediate need to sell off the commercial building.

Vehicule

In August 2015, the Corporation returned its leased GMAC vehicle, thus terminating the lease that was scheduled to end in August 2016.

MANAGEMENT'S DISCUSSION AND ANALYSIS

During the quarter ended December 31, 2015, a net loss of \$2,360,089 was recorded compared to a net loss of \$794,797 for the same period in 2014, the variation is mainly due to a write off of intangibles assets and the change of accounting policy regarding exploration and evaluation expenditures in order to recognize these expenditures directly to the profit or loss instead of capitalizing them as exploration and evaluation assets.

During the quarter ended September, 2015, a net loss of \$619,316 was recorded compared to a net loss of \$212,359 for the same period in 2014, the variation is mainly due to the write off of inventories and the change of accounting policy regarding exploration and evaluation expenditures in order to recognize these expenditures directly to the profit or loss instead of capitalizing them as exploration and evaluation assets. In this quarter the Corporation issued options which create a Black & Scholes expense. In 2014 a gain on sale of investment of \$103,561 was recorded in the quarter and a gain on sale of claims for \$57,500 .

During the quarter ended June 30, 2015, a net loss of \$326,252 was recorded compared to a net loss of \$283,654 for the same period in 2014, the variation is mainly due to the change of accounting policy regarding exploration and evaluation expenditures in order to recognize these expenditures directly to the profit or loss instead of capitalizing them as exploration and evaluation assets. The consulting fees and the Professional fees have increase in 2015, the Corporation hiring many consultants for his business.

During the quarter ended March 31, 2015, a net loss of \$346,170 was recorded compared to a net loss of \$419,494 for the same period in 2014, the variation is mainly due to the change of accounting policy regarding exploration and evaluation expenditures in order to recognize these expenditures directly to the profit or loss instead of capitalizing them as exploration and evaluation assets.

RELATED PARTY TRANSACTIONS

The Corporation related party transactions are disclosed to the Note 22 in the annual audited consolidated financial statements for the period ended June 30, 2016.

LIQUIDITY AND CAPITAL RESOURCES

The Corporation has a negative working capital of \$469,728 as at June 30, 2016 (\$823,009 as at December 31, 2015) considering cash of \$58,078, but has \$134,595 to spend in exploration and evaluation work in order to comply with the requirements of flow-through financing, until December 31, 2016. The company is still confident spending this money before the end of 2016.

The Corporation's principal source of financing is equity financing, the success of which depends on capital markets, the attractiveness of exploration companies to investors, and metal prices. To continue its future exploration activities and be able to support its ongoing operations, the Corporation will need to maintain and expand its relationships with the financial community in order to obtain further equity financing. A financing is mandatory to pay the working capital and to continue the exploration and evaluation of the mining properties.

As of June 30, 2016, there is significant doubt as to the Corporation's ability to meet all its liabilities and commitments, as they will fall due, to pay its administrative costs and exploration and evaluation expenses and to pursue its research for new mining properties. There are no guarantees that measures taken by management will be successful.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

Financial risks factors

The Corporation's activities expose it to a variety of financial risks: price risk, credit risk and liquidity risk. Risk management is carried out by management under policies approved by the board of directors. The board of directors provides written policies for overall risk management, as well as written policies covering specific areas, such as interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity. The company's overall risk management program seeks to minimize potential adverse effects on the company's financial performance.

a) Price risk

The Corporation is exposed to equity securities price risk because of investments held by the Corporation. When trading its shares, bad market conditions could result in the disposal of its listed shares at less than value as at June 30, 2016. A 1% variation in the closing price on the stock market would result in a non-material variation.

b) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Corporation is subject to concentrations of credit risk through cash. The Corporation reduces its credit risk by maintaining part of its cash in financial instruments and held with a Canadian chartered bank.

c) Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet the obligations associated with its financial liabilities. The Corporation has no history of earnings and does not expect to receive revenues from operations in the foreseeable future, if all. The Corporation generates cash flows primarily from its financing activities).

Management estimates that the funds as at June 30, 2016 will not be sufficient to meet the Corporation's obligations and budgeted assets through December 31, 2016. Any additional funding may be met in the future in a number of ways including but not limited to, the issuance of new equity instruments. Cash flow forecasting is performed by the Corporation which monitors rolling forecasts of the Corporation's liquidity requirements to ensure it has sufficient cash to meet operational needs at all times. Surplus cash, if any, over and above balances required for working capital management are invested in interest bearing short-term deposits with a maturity within 12 months, which are selected with appropriate maturities or sufficient liquidity to provide sufficient head-room as

determined by the above-mentioned forecasts. Accounts payable and accrued liabilities as at December 31, 2015 consist of items that should be settled within approximately 30 days (note 2 to the financial statements for information on going concern).

Risks and Uncertainties

An investment in the common shares of the Corporation should be considered highly speculative for a variety of reasons. The following is a general description of certain significant risk factors which should be considered:

Risks Inherent to Mining Exploration

The Corporation is engaged in the business of acquiring and exploring mineral properties in the hope of locating economic deposits of minerals. The Corporation's property interests are in the exploration and evaluation stage only and are without a known body of commercial ore. Accordingly, there is little likelihood that the Corporation will realize any profits in the short to medium term. Any profitability in the future from the Corporation's business will be dependent upon locating an economic deposit of minerals. However, there can be no assurance, even if an economic deposit of minerals is located, that it can be commercially mined.

Regulation and Environmental Requirements

The activities of the Corporation require permits from various governmental authorities and are governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, environmental protection and other matters.

Increased costs and delays may result of the need to comply with applicable laws and regulations. If the Corporation is unable to obtain or renew licenses, approvals and permits, it may be curtailed or prohibited from proceeding with exploration or development activities.

Capital Needs

The exploration and evaluation, development, mining and processing of the Corporation's properties may require substantial additional financing. The only current source of future funds available to the Corporation is the sale of additional equity capital and the borrowings of funds. There is no assurance that such funding will be available to the Corporation or that it will be obtained on terms favorable to the Corporation or will provide the Corporation with sufficient funds to meet its objectives, which may adversely affect the Corporation's business and financial position.

In addition, any future equity financings by the Corporation may result in a substantial dilution of the existing shareholders. Failure to obtain sufficient financing may result in delaying or indefinite postponement of further exploration and evaluation, development or production on any or all of the Corporation's properties or even a loss of property interest.

Commodity Prices

The market price of the Corporation's common shares, its financial results and its exploration and evaluation, development and mining activities have previously been, or may in the future be, significantly adversely affected by the volatility in the price of precious or base minerals, including lithium and phosphate

Uninsured Risks

The Corporation's business is subject to a number of risks and hazards, including environmental conditions adverse, environmental regulations, political uncertainties, industrial accidents, labour disputes, unusual or

MANAGEMENT'S DISCUSSION AND ANALYSIS

unexpected geological conditions, ground or slope failures, cave-ins, and natural phenomena such as inclement weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties or production facilities, personal injury or death, environmental damage to the Corporation's properties or the properties of others, delays in mining, monetary losses and possible legal liability.

Going Concern

The future of the Corporation depends on its ability to finance its activities and to develop its assets. Failure to obtain sufficient financing may result in the Corporation not being able to continue its operations, realize its assets and discharge its liabilities in the normal course of business in the foreseeable future.

QUALIFIED PERSON

Donald Theberge, Eng., P.Geo., is the Qualified Person under National Instrument 43-101 who has reviewed the scientific and technical information in this document.

OUTLOOK

The availability of funds is a function of the capital markets. The Corporation is confident to be in a position to finance itself and to find new mining properties.

The Corporation's ability to continue as a going concern is dependent upon raising additional funds. The outcome of these matters cannot be predicted at this time.

CERTIFICATION OF ANNUAL FILINGS

The President and Chief Executive Officer and the Chief Financial Officer have signed the Basic Certifications of Annual Filings as required by National Instrument 52-109 for venture issuer, thus confirming, the review, the absence of misrepresentations and the fair presentation of the annual filings.

- The President and Chief Executive Officer and the Chief Financial Officer confirm to have reviewed the annual financial statements and the annual MD&A (together, the "annual filings") of the Company for the period ended June 30, 2016.
- Based on their knowledge, having exercised reasonable diligence, the President and Chief Executive Officer and the Chief Financial Officer confirm that the filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, for the period covered by the I filings.
- Based on their knowledge, having exercised reasonable diligence, the President and Chief Executive Officer and the Chief Financial Officer confirm that the financial statements together with the other financial information included in the annual filings fairly present in all material respects the financial condition, financial performance and cash flows of the issuer, as of the date of and for the period presented in the I filings.
