

## **ROSITA MINING ANNOUNCES \$850,000 PRIVATE PLACEMENT**

### **Financing to Advance Santa Rita Stockpiles Project in Nicaragua**

**Toronto, Ontario – July 7, 2016: Rosita Mining Corporation (RST: TSX-V) (“Rosita” or the “Company”)** is pleased to announce a non-brokered private placement (the “Private Placement”) of up to 17,000,000 units (“Unit”) at a price of \$0.05 per Unit for gross proceeds of \$850,000.

Each Unit is comprised of one common share and one common share purchase warrant, with each warrant (“Warrant”) entitling the holder to acquire a further common share of the Company at a price of \$0.055 for a period of two years following the date of issuance.

The Company anticipates closing on or around July 15. A Finder’s fee will be paid on the Private Placement. The Private Placement is also subject to the approval of the TSX Venture Exchange.

#### **Use of Proceeds**

Rosita plans to use the proceeds from the Private Placement to advance the Santa Rita stockpile project, located near Rosita, Nicaragua. Work planned will include:

- Metallurgical optimization test work leading towards a production decision by the first quarter of next year
- Additional gold leach test work and SART studies for the recovery of copper.
- Capital and operating cost estimation work
- Completion of a Preliminary Economic Assessment

#### **Santa Rita Project**

The stockpiles at the project were generated over a 17-year operating life from 1959 to 1975 at the Santa Rita open pit mine. A total of 5.4 million tonnes averaging 2.06% copper, 0.93 grams gold and 15.08 grams silver per tonne were mined. Mill recoveries reportedly varied from 60% to 80%, depending on the type of material processed.

In addition to the stockpile resources, the concessions also include 13 exploration targets for gold-copper skarn and porphyry mineralization.

Rosita recently completed an updated National Instrument 43-101 (“NI 43-101”) resource estimate for the surface stockpiles. These total 70.9 million lbs. of copper, 96,660 oz. of gold and 1,520,500 oz. of

silver and 46.2 million lbs. of copper, 50,330 oz. of gold and 957,500 oz. of silver in the Indicated and Inferred categories respectively.

Indicated resources total 6.46 million tonnes grading 0.47 grams gold per tonne, 0.5% copper per tonne and 7.32 grams silver per tonne whilst Inferred resources total 3.44 million tonnes grading 0.46 grams gold per tonne, 0.61% copper per tonne and 8.66 grams silver per tonne in a series of stockpiles located near the former producing Santa Rita gold-copper open pit mine. These estimates have been based on a US\$10 net smelter return (“NSR”) cut off.

In addition, the Company is also reporting maiden Inferred resources of 1.96 million tonnes grading 0.56 grams gold per tonne, 0.21% copper per tonne and 9.56 grams silver per tonne at cut-off of 0.3 g/t gold in tailings located proximal to the Santa Rita stockpiles.

For complete details about the NI 43-101 resource estimate, please see our press release dated February 8, 2016 and the NI 43-101 report, both which are available at [www.SEDAR.com](http://www.SEDAR.com)

### **About Rosita Mining Corporation**

Rosita is a junior mining and exploration resource company focused on growing shareholder value through the development of near-term mining projects and advancing accretive exploration opportunities.

Rosita and Calibre Mining Corp. hold a 65% and 35% interest respectively in the Rosita copper-gold-silver supergene/skarn/porphyry project in Nicaragua located 275 kilometres northeast of Managua.

The technical information included in this press release has been reviewed and approved by John Cook, MIMMM, President and CEO of Rosita Mining Corporation and a “Qualified Person”, under National Instrument 43-101 Standards of Disclosure for Mineral Projects.
