BELGRAVIA CAPITAL INTERNATIONAL INC.**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

JUNE 30, 2019

(Unaudited - Expressed in CAD Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Belgravia Capital International Inc. (“Belgravia” or the “Company”) was incorporated under the Canada Business Corporations Act on November 8, 2002. The Company’s registered office is 82 Richmond Street East, Toronto, ON M5C 1P1. The Condensed Consolidated Interim Financial Statements (“Interim Financial Statements”) are comprised of the Company and its subsidiaries.

During the year ended December 31, 2017, the Company disposed of its interest in a wholly-owned subsidiary which was involved in the development of potash-related minerals. The Company is now focusing on merchant banking and providing management services in the resources, technology, and legal cannabis industries, developing healthcare products, as well as pursuing the royalty streams from its previous potash project.

The Company’s continuation as a going concern is dependent on cash flow from its investments, royalties, or operations and its ability to raise equity capital or borrowings sufficient to meet current and future obligations. While the Company currently has no source of operating revenue other than management services consulting fees, its working capital of \$8,435,635 at June 30, 2019 leads management to believe the Company has sufficient capital to fund its business activities and general working capital for at least the next 12 months. The Company’s financial success is dependent on its ability to identify, evaluate, negotiate, and exit investments in assets or businesses. These condensed consolidated interim financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future.

The Company is currently exploring alternatives to obtain financing. Such alternatives may involve debt, equity or alternative financing structures and may occur at the public company or subsidiary level.

2. SIGNIFICANT ACCOUNTING POLICIES**a) Statement of compliance:**

These Interim Financial Statements have been prepared in accordance with IAS 34 “Interim Financial Reporting” (“IAS 34”) using accounting policies consistent with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

The Interim Financial Statements were authorized by the audit committee and board of directors of the Company on August 23, 2019.

b) Basis of presentation:

The Interim Financial Statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair value. In addition, these Interim Financial Statements have been prepared using the accrual basis of accounting, except for cash flow information. The comparative figures presented in these Interim Financial Statements are in accordance with IFRS and have not been audited.

The preparation of interim financial statements in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These Interim Financial Statements do not include all of the information required for annual financial statements.

The significant accounting policies for these Interim Financial Statements are consistent with those disclosed in the audited financial statements for the year-ended December 31, 2018. These Interim Financial Statements should be read in conjunction with the Company’s audited consolidated financial statements for the year-ended December 31, 2018.

BELGRAVIA CAPITAL INTERNATIONAL INC.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

JUNE 30, 2019

(Unaudited - Expressed in CAD Dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**c) Basis of consolidation:**

The Consolidated Financial Statements of the Company include the following subsidiaries:

Name of subsidiary	Place of incorporation	Percentage ownership
Intercontinental Potash Corp.	Canada	100%
Trigon Exploration Utah Inc.	USA	100%

The Company consolidates the subsidiaries on the basis that it controls these subsidiaries when the Company possesses power over an investee, has exposure to variable returns from the investee, and has the ability to use its power over the investee to affect its returns. The Company deconsolidated the operations of PolyNatura Corp. (formerly International Potash Corp. (USA)) ("ICP(USA)") in fiscal 2017. Belgravia Dermatology Inc. was dissolved in January 2019. All intercompany transactions and balances are eliminated on consolidation.

d) Cash:

Cash is comprised of cash deposited at Canadian banks and secure, short-term, highly liquid demand deposits.

e) Investments:

All investments except investments in debt instruments are classified upon initial recognition at fair value through profit or loss ("FVTPL"), with changes in fair value reported in profit or loss. Purchases and sales of investments are recognized on the settlement date. Investments at FVPTL are initially recognized at fair value. Transaction costs are expensed as incurred in the statement of comprehensive income (loss). Investments in debt instruments are initially measured at fair value then subsequently measured at amortized cost using the effective interest rate method.

Subsequent to initial recognition, all investments are measured at fair value. Gains and losses arising from changes in the fair value of the FVTPL investments are recognized in profit or loss.

Investments in common shares of public companies are measured at fair value based on published market prices with unrealized gains and losses recognized through profit or loss. The valuation of these shares has been determined in whole by reference to the close price of the shares on the TSX, TSX Venture Exchange or Canadian Securities Exchange ("CSE") at each reporting date. Various warrants have been received as attachments to share purchase units and do not trade in an active market. At the time of purchase, the per unit cost is allocated to common shares and warrants using the residual value method. The value of the warrants is subsequently determined at the measurement date using the Black-Scholes option pricing model.

All privately held investments are initially recorded at the transaction price, being the fair value at the time of acquisition. Thereafter, at each reporting period, the fair value of an investment may, depending upon the circumstances, be adjusted with unrealized gains and losses recognized through profit or loss.

f) Significant accounting estimates and judgments:

The preparation of these Interim Financial Statements requires management to make judgments, estimates and assumptions about future events that affect the reported amounts of assets and liabilities and disclosure of contingent assets at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, events or actions, actual results may differ from these estimates.

JUNE 30, 2019

(Unaudited - Expressed in CAD Dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**g) Revenue recognition**

Management services revenue is recognized when services are rendered, and the amount can be reasonably estimated and collected. Any amount received for future services is recorded as deferred revenue and recognized as revenue when the related services are performed.

h) New standards, amendments and interpretations:*Effective January 1, 2019*

IFRS 16 – Leases. IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation, and disclosure of leases including guidance for both parties to a contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases as is required by IAS 17 and instead introduces a single lessee accounting model. The adoption of IFRS 16 did not have an impact on the Company's financial statements.

3. RECEIVABLES

Receivables are comprised of:

	June 30, 2019	December 31, 2018
GST receivable ^(a)	\$ 29,540	\$ 22,833
Management services fees receivable ^(b)	\$ 96,992	\$ 63,000
Total	\$ 126,532	\$ 85,833

- a. The Company had GST receivable of \$29,540 at June 30, 2019.
- b. The Company provides management services to several companies in which the Company has invested. Pursuant to management services agreements, the Company was owed \$96,992 at June 30, 2019.

4. INVESTMENTS

The Company's investments include common shares and warrants of Canadian companies that are listed on various Canadian stock exchanges and investments in private Canadian and U.S. companies as well as certain investment funds, such as money market funds and bond funds, held through Canadian investment dealers and debt instruments. The fair values of the common shares of the publicly-traded companies have been directly referenced to published price quotations in an active market. The fair value of investments in private companies is referenced to the most recent equity financing completed by each private company. The investments in unlisted warrants of companies that are publicly-traded are valued using the Black-Scholes option pricing model, with the following weighted average assumptions:

	Period ended June 30, 2019	Year ended December 31, 2018
Risk-free interest rate	1.52%	1.85%
Expected life of warrants	1.32 years	1.41 years
Annualized volatility	145.81%	170.11%
Dividend rate	0.00%	0.00%

12. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to invest to earn a risk-appropriate return for shareholders. The Company does not have any externally imposed capital requirements to which it is subject. The capital of the Company consists of items in shareholders' equity. The Company had no bank indebtedness at June 30, 2019. The Board of Directors do not establish quantitative return on capital criteria for management, but rather rely on the expertise of the Company's management to sustain future development of the business.

The Company manages the capital structure and makes adjustments to it in light of changes in available funds, economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue new shares, borrow money, or dispose of assets to adjust the amount of cash.

The Company's investment policy is to invest its cash necessary to fund operations for the next 12 months in demand investment instruments in high credit quality financial institutions to provide liquidity over the expected time of expenditures from continuing operations. The Company also invests some of its excess cash in common shares and other securities of private and public companies.

There were no significant changes in the Company's approach to capital management during the quarter ended June 30, 2019.

13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

IFRS 7, Financial Instruments: Disclosures, establishes a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's financial instruments include cash, investments, receivables, accounts payable and accrued liabilities and employment liability.

The carrying values of receivables, accounts payable and accrued liabilities and employment liability approximate fair value because of the short-term nature of these instruments.

As at June 30, 2019, the Company's classification of financial instruments measured at fair value within the fair value hierarchy are summarized below:

	Level 1	Level 2	Level 3	Total
Cash	\$ 2,302,932	\$ -	\$ -	\$ 2,302,932
Equity investments	4,341,410	-	2,030,357	6,371,767
	\$ 6,644,342	\$ -	\$ 2,030,357	\$ 8,674,699

13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial instruments (cont'd...)

As at December 31, 2018, the Company's classification of financial instruments within the fair value hierarchy are summarized below:

	Level 1	Level 2	Level 3	Total
Cash	\$ 3,420,159	\$ -	\$ -	\$ 3,420,159
Investments	2,680,439	-	2,077,176	4,757,615
	\$ 6,100,598	\$ -	\$ 2,077,176	\$ 8,177,774

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's credit risk is primarily attributable to cash and receivables. The Company has no significant concentration of credit risk arising from operations. Cash is held at reputable financial institutions, from which management believes the risk of loss to be remote. Receivables consist primarily of amounts due from government agencies, and from management services customers, which the Company believes will be fully collected.

Liquidity risk

As at June 30, 2019, the Company had a cash balance of \$2,302,932 to settle current liabilities of \$315,063. The Company is not subject to significant liquidity risk.

Interest rate risk

The Company has cash balances subject to fluctuations in the prime rate. The Company's current policy is to invest some of excess cash in investment-grade highly liquid demand deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. Management believes that interest rate risk is remote as cash deposits are payable on demand and the Company currently does not carry interest bearing debt at floating rates. Fluctuations in interest rates may impact the value of the Company's investments in publicly traded common shares.

Foreign currency risk

The Company's functional currency is the Canadian dollar; however, there are transactions and investments in U.S. dollars and the Company keeps some of its cash in U.S. currency. The Company is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility in these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk. A 10% change in the foreign exchange rate would have had an approximate \$150,000 impact on foreign exchange gain or loss.

13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial instruments (cont'd...)

Market risk

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate due to changes in market prices. The value of financial instruments can be affected by changes in interest rates, foreign exchange rates, and equity and commodity prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favourable prices. The Company's investments are primarily concentrated in the junior healthcare, natural resource, and technology industries, which results in exposure to higher volatility than broader market investments and indexes. The Company's investments are accounted for at fair value and are sensitive to changes in market bid prices, such that changes in market prices result in a proportionate change in the carrying value of the Company's investments. The Company holds investments in private and public traded equity securities. Market prices for equity securities are subject to fluctuation and consequently the amount realized in the subsequent sale of an investment may significantly differ from the reported market value. Some investments may not be very liquid and dispositions may take time or may be sold at less than market prices. A 10% change in the fair values of the Company's investments at June 30, 2019 would have an \$670,000 impact on results from operations.

14. CONTINGENCY

During 2018, the Company launched a legal claim against certain parties relating to an investment and management services agreement. The parties have filed a statement of defence and counterclaim. The outcome of these actions is not determinable at this time.

15. SUBSEQUENT EVENT

On July 11, 2019, the Company announce a non-binding letter-of-intent ("LOI") with Cali Care Group Ltd. ("Cali Care"), a leading cannabis home delivery service in the Inland Empire of California. Under the LOI, Belgravia would issue \$2,500,000 CAD in securities in exchange for 62.5% of Cali Care, and commit to financing the capital needs for Cali Care to help scale growth. The Company has 60 days of due diligence to execute the definitive agreement.
