MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED MARCH 31, 2023**

INTRODUCTION

The following management discussion and analysis ("MD&A") of the results of operations and financial condition of Polaris Northstar Capital Corp. (formerly Global Care Capital Inc.) ("Polaris" or the "Company") for the three months ended March 31, 2023 and up to the date of this MD&A, has been prepared to provide material updates to the business operations, financial condition, liquidity and capital resources of the Company since its last management discussion and analysis for the year ended December 31, 2022.

This MD&A should be read in conjunction with the audited financial statements for the year ended December 31, 2022, and the unaudited financial statements for the three months ended March 31, 2023.

All financial information in this MD&A – Quarterly Highlights is derived from the Company's financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") and all dollar amounts are expressed in Canadian dollars unless otherwise indicated. This MD&A is dated August 14, 2023.

DESCRIPTION OF BUSINESS

Polaris Northstar Capital was incorporated under the laws of British Columbia on May 25, 2004. The Company's shares are listed for trading on the Canadian Securities Exchange ("CSE") under the ticker symbol "POLE", the Frankfurt Stock Exchange under the symbol L6V1.F and on the United States OTC stock market's OTC Pink, under the symbol RSCZF. The registered office of the Company is Suite 303 – 595 Howe Street, Vancouver, British Columbia, Canada, V6C 2T5.

Polaris is a global investment company which specializes in providing early-stage financing to private and public companies in the cryptocurrency, blockchain, healthcare, natural resource sectors, on early-stage investments in innovative and undervalued companies focused on responsible energy creation, infrastructure, technology, Environment, Social and Governance "ESG", carbon-neutral, air and water pollution, waste management, water usage and green-focused initiatives.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. The impact on the Company is not currently determinable but management continues to monitor the situation.

The current economic uncertainty has significantly impacted the market sector. Publicly traded entities are feeling the weight of the tightening monetary policy environment, shrinking market liquidity and slower economic growth. All forms of financing continue to be very constrained for early-stage companies and this has resulted in the quantity of financings to be severely reduced and arduous to complete successfully.

The blockchain and cryptocurrency sectors have been subject to a number of negative factors over the past 12-18 months including: a significant decline in the price of Bitcoin and other cryptocurrencies both on a current basis as well as future expectations, price declines have caused financing for cryptocurrency mining facilities to become very difficult to obtain, even more so as it relates to startups and early stage companies, financial difficulties encountered by crypto exchanges who have suspended redemptions and in some cases insolvencies, increased regulatory and geopolitical uncertainty; as well as other factors.

Effective September 14, 2022, the Company adopted an investment policy "Polaris Northstar Investment Policy" and has formed an Investment Committee with its current members being Denis Hayes, Simon Tam, and Lawrence Cofield.

Luxwing Holdings Limited – Promissory Note

On July 15, 2022, the Company has signed a promissory note agreement with Luxwing Holdings Limited ("Luxwing Holdings"), the borrower, for a principal amount of US\$20,000 to be repaid by the borrower on or before August 15, 2022. The Company will earn a minimum fee of US\$5,000. The total repayment to the Company will be equal to US\$25,000 plus interest at 2.5% per annum, calculated daily. The promissory note is secured by a debt assignment note of CAD \$250,000.

On March 2, 2023, the Company and the Luxwing Holdings Limited has signed a further extension agreement whereby the Luxwing Holdings agreed to pay additional extension fee of \$5,000 to extend the maturity of promissory note to February 29, 2024. In connection with this extension, Luxwing Holdings agreed to pay \$4,000 toward the principal loan amount. The aggregate amount of \$9,000 in fees was received by the Company on March 2, 2023.

The promissory note balance was calculated at \$28,774 as of March 31, 2023 (December 31, 2022 - \$32,774).

The remaining 1,635,450 post-consolidation shares were unable to be returned, and the Company accepted a payment of \$60,000 in lieu of the return of these shares.

TRENDS AND INVESTMENT STRATEGY

Polaris is focused on early-stage investment opportunities in private and public companies. The Company recognizes two enterprise value enhancers; (1) the transition from private to public assets, and (2) investing in assets which have been overlooked and have not realized their latent potential.

Engagement of this strategy has resulted in increases and decreases in the value of the Company's portfolio historically, however the depressed state of the junior market sector has affected all publicly traded entities over the last several years. All forms of financing continue to be very constrained for early-stage companies and this has resulted in the quantity of financings to be severely reduced and arduous to complete successfully.

Due to the depressed state on the junior markets, the Company has reviewed potential opportunities in blockchain and crypto currency sectors and will continue to do so, along with reviewing investment opportunities in the healthcare, natural resource and other potential sectors.

The Company evaluates its portfolio on a regular basis and is actively reviewing new opportunities for investment.

COVID-19 rapid testing kits which it branded and resold to its customers globally. As the company was unable to provide the necessary working capital, actual revenue generated by ViralClear fell short of original projections. On July 21, 2022, Virax Biolabs Group Limited ("Virax"), an innovative biotechnology company focuses on the prevention, detection, and diagnosis of viral diseases, announced it has completed its initial public offering (IPO), and Virax's shares began trading on the Nasdaq Capital Market under the ticker symbol "VRAX".

During the current period, the Company exchanged all of these shares to reduce the Mirabel convertible debenture.

Valuation of Assets

Public Companies

The fair value of any security which is listed or traded upon a stock exchange is estimated by taking the latest bid price. The quoted bid price value of securities that are subject to a hold period will be valued with an appropriate discount. The market values can be impacted by trading volumes, restrictions and market price fluctuations, and the quoted market price may not be indicative of what the Corporation could realize on the immediate sale as it may take an extended period to liquidate positions with causing a significant negative impact on the market price.

Private Companies

The fair value of any shares which are not listed or traded upon a stock exchange are originally recorded at cost, unless the shares are flow-through shares, in which case they are originally recorded either on an assessment of the most recent price at which the investee corporation issued common equity without flow-through characteristics or at managements estimated fair value. After the initial transaction, adjustments are made to reflect any changes in value as a result of evidence of a decline in value, as indicated by an assessment of the financial condition of the investment based on operational results, forecasts, discounted cash flow models and other developments.

Options and Warrants

Options and warrants which are not traded on a recognized securities exchange, have no market value readily available. When there are sufficient and reliable observable market inputs, the warrants are valued using the Black-Scholes option pricing model. If no such market inputs are available or reliable, the warrants are valued at intrinsic value.

RESULTS FROM OPERATIONS

Year ended December 31, 2022 ("2022") compared to year ended December 31, 2021 ("2021")

The Company's net change in fair value adjustment on investments for 2022 was an unrealized loss of \$3,318,001 compared to \$26,517,217 for 2021.

The Company's net loss and comprehensive loss for 2022 was \$5,335,038 compared to \$28,110,178 for 2021. The decrease in net loss and comprehensive loss is primarily due to a lower unrealized fair value adjustment on its investments for 2022.

The notable variances in addition to unrealized fair value adjustment on investments between 2022 and 2021 are as follows:

- Consulting fees were \$645,289 (2021 - \$299,510). The increase is attributable to the expanded scope of activities during the year ended December 31, 2022 that required more consultations with external parties.
- Corporate development expense was \$41,008 in 2022 (2021 - \$290,167). The Company dedicated less funds to corporate development activities during the year ended December 31, 2022 in comparison to the comparative period.
- Professional fees increased to \$349,611 from \$264,793. This expense is comprised of various legal fees, audit fees, and corporate fees associated with due diligence and other work done in connection with the various acquisitions, and other professional fees. It is directly correlated with scope of activities that the management undertakes in the year; more professional services were rendered in 2022.
- Share based compensation of \$nil (2021 - \$478,480) was recognized as no equity instruments were issued and vested during the year ended December 31, 2022.
- Other expenses increased by \$1,348,431 from \$nil in 2021 due to non-recurring or extraordinary transactions that took place in 2022, including but not limited to settlement of debt via issuance of common shares, revaluation of convertible debenture, shares issued at inception of convertible debenture financing.

Three months ended March 31, 2023

The Company's net loss and comprehensive loss for 2023 was \$321,437 compared to \$959,156 in 2022. The decrease in net loss

POLARIS NORTHSTAR CAPITAL CORP. (FORMERLY GLOBAL CARE CAPITAL INC.)**MANAGEMENT'S DISCUSSION AND ANALYSIS****FOR THE THREE MONTHS ENDED MARCH 31, 2023**

is primarily due to lower consulting expense and share-based compensation, offset somewhat by higher professional fees.

The notable variances between 2023 and 2022 are as follows:

- Consulting fees were \$147,760 (2022 - \$731,731). The decrease is attributable to the expanded scope of activities during 2022 that required more consultations with external parties.
- Professional fees increased to \$84,159 from \$52,869. This expense is comprised of various legal fees, audit fees, and corporate fees associated with due diligence and other work done in connection with the various acquisitions, and other professional fees. It is directly correlated with scope of activities that the management undertakes in the period.
- Share based compensation of \$nil (2022 - \$316,994) was recognized as no equity instruments were issued and vested during the period ended March 31, 2023.
- In 2022 there had been a gain on debt settlements of \$186,245 whereas there was no similar occurrence in the current period.

The Company's financial instruments consist of cash and cash equivalents, investments, promissory note receivable, accounts payable and accrued liabilities, contingent consideration liability, and convertible debentures. The carrying value of accounts payable and accrued liabilities approximates their fair value due to the short-term nature.

As at March 31, 2023, cash and cash equivalents and investments in public companies are measured at fair value using Level 1 of the fair value hierarchy; investments in private companies are measured at fair value using level 2 and 3 of the fair value hierarchy; convertible debentures are measured at fair value using level 2 of the fair value hierarchy.

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The following table presents the Company's financial instruments, measured at fair value on a recurring basis on the statements of financial position and categorized into levels of the fair value hierarchy:

	Level 1	Level 2	Level 3	Total
March 31, 2023	\$	\$	\$	\$

Risk management

The Company is or may be subject to certain risks including interest rate risk, currency risk, credit risk and market risk. Risk management strategies may expose the Company to further gains or losses, but serve to stabilize future cash flows, reduce the volatility of operating results, and increase overall financial strength.

Currency risk

The Company has a promissory note receivable and convertible debenture denominated in US dollar and is therefore subject to currency risk. The Company does not currently use any derivative instruments to reduce its exposure to fluctuations in foreign currency exchange rates.

As at March 31, 2023, with other variables unchanged, a 10% strengthening (weakening) of the US dollar against the Canadian dollar would have increased (decreased) net loss by approximately \$24,300.

Credit risk

Credit risk is the risk associated with the inability of a third party to fulfil its payment obligations. The Company is exposed to the risk that third parties that owe money or securities in connection with services provided, or for other purposes, will default on their underlying obligations.

Prior to accepting any service engagement or providing any loan, the Company assesses future recoverability by examining the entities' financial conditions, properties and assets, business development activities and management. The Company manages its exposure to credit risk by reviewing the outstanding balances on an ongoing basis, monitoring the amount attributable to each counterparty and the length of time taken for amounts to be settled. Where necessary, management takes appropriate action to follow up on those balances considered overdue.

Liquidity risk

Liquidity risk is the risk that the Company will have insufficient cash resources to meet its financial obligations as they become due. The Company's liquidity and operating results may be adversely affected if the Company does not have access to the capital markets, whether as a result of a downturn in general market conditions or related to matters specific to the Company, or if the value of the Company's investments decline, resulting in lower proceeds and/or losses on disposition. The Company generates cash flows primarily from the disposition of its investments and from its financing activities.

The Company's investments focus on early-stage companies which can at times be relatively illiquid and if the Company decides to dispose of certain securities, it may not be able to do so at favorable prices at that time, or at all. However, the Company has marketable securities which are freely tradable and relatively liquid and might be able to fund its obligations as they become due under normal operating conditions such that, in the absence of overall market disruptions or exceptional circumstances, liquidity risk might be minimized.

The Company expects accounts payable and accrued liabilities to be settled within 12 months of March 31, 2023.

MANAGEMENT'S DISCUSSION AND ANALYSIS

FOR THE THREE MONTHS ENDED MARCH 31, 2023

Market risk

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will significantly fluctuate due to changes in market prices. The value of the financial instruments can be affected by changes in interest rates, foreign exchange rates and equity and commodity prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favourable prices.

A 10% change in the fair values of the Company's investments at March 31, 2023, would have a \$3,200,000 (December 31, 2022 - \$32,090) impact on operations.

Concentration risk

The Company is subject to concentration risk due to the nature of the Company's operations as an investment company and the number of investments held in the portfolio which consists primarily of early-stage companies and their related technologies. As a result, the investment portfolio is directly exposed to the risks associated with companies operating in these industry sectors.

As at March 31, 2023, approximately 99.7% (December 31, 2022 – 99.9%, three companies) of the fair value of the Company's investment portfolio consisted of investments in one company.

RISK FACTORS

This section discusses factors relating to the business of Company that should be considered by both existing and potential investors. The information in this section is intended to serve as an overview and should not be considered comprehensive and the Company may face risks and uncertainties not discussed in this section, or not currently known to us, or that we deem to be immaterial. All risks to the Company's business have the potential to influence its operations in a materially adverse manner.

Sector Specific Investment Risks

The Company seeks a high return on investment opportunities on its mining and natural resource and block chain technology sectors ("Sectors"). Thus, the Company is exposed to investment risks relating to these Sectors which is generally more volatile than the overall market. Investing in these Sectors can be speculative in nature and the value of the Company's investments may be subject to significant fluctuations. Such businesses entail a degree of risk, regardless of the skill and experience of the corporation's management. The assets, earnings and share values of corporations involved in the natural resource and block chain development are subject to risks associated with the world prices of various cannabis related products, natural resource and cryptocurrencies, forces of nature, economic cycles, commodity prices, exchange rates, royalty and taxation changes and political events. Government restrictions, such as price regulations, production quotas, royalties, and environmental protection, can also be factors.

Regulatory Risks

The Company's Investment Partners in the cannabis pharmaceutical sector operate in a new industry which is highly regulated, highly competitive and evolving rapidly. As such, new risks may emerge, and management may not be able to predict all such risks or be able to predict how such risks may result in actual results differing from the results contained in any forward-looking statements. The Company's Investment Partners incur ongoing costs and obligations related to regulatory compliance. Failure to comply with regulations may result in additional costs for corrective measures, penalties or in restrictions of operations. In addition, changes in regulations, more vigorous enforcement thereof or other unanticipated events could require extensive changes to operations, increased compliance costs or give rise to material liabilities, which could have a material adverse effect on the business, results of operations and financial condition of the Company's Investment Partners and, therefore, on the Company's prospective returns.

The industry is subject to extensive controls and regulations, which may significantly affect the financial condition of market participants. The marketability of any product may be affected by numerous factors that are beyond the control of the Company and its Investment Partners and which cannot be predicted, such as changes to government regulations, including those relating to taxes and other government levies which may be imposed. Changes in government levies, including taxes, could reduce the Company's and its Streaming Partners' earnings and could make future capital investments or the Company's and its Streaming Partners' operations uneconomic. The industry is also subject to numerous legal challenges, which may significantly affect the financial condition of market participants, and which cannot be reliably predicted.

MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED MARCH 31, 2023

Political and Economic Instability

The Company may be affected by possible political or economic instability. The risks include, but are not limited to, terrorism, military repression, extreme fluctuations in currency exchange rates and high rates of inflation. Changes in medicine and agriculture development or investment policies or shifts in political attitude in certain countries may adversely affect the Company's business. Operations may be affected in varying degrees by government regulations with respect to restrictions on production, distribution, price controls, export controls, income taxes, expropriation of property, maintenance of assets, environmental legislation, land use, land claims of local people and water use. The effect of these factors cannot be accurately predicted.

Limited Operating History

The Company has limited operating history as an investment company, and has had limited success investing in mining, block chain technology and cannabis pharmaceutical sectors. The Company and its business prospects must be viewed against the background of the risks, expenses and problems frequently encountered by companies in the early stages of their development, particularly companies in new and rapidly evolving markets such as the cannabis pharmaceuticals and blockchain market. There is no certainty that the Company will be able to operate profitably.

Additional Requirements for Capital

Substantial additional financing may be required if the Company is to be successful in developing a diversified and material portfolio of investments. No assurances can be given that the Company will be able to raise the additional capital that it may require for its anticipated future development. Any additional equity financing may be dilutive to investors and debt financing, if available, may involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company, if at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated investments.

Key Personnel

The Company is dependent upon the continued availability and commitment of its management and newly formed investment committee, whose contributions to immediate and future operations are of significant importance. The loss of any such management could negatively affect the Company's business operations. From time to time, the Company will also need to identify and retain additional skilled management to efficiently operate its business. Recruiting and retaining qualified personnel is critical to the Company's success and there can be no assurance of its ability to attract and retain such personnel. If it is not successful in attracting and training qualified personnel, the Company's ability to execute its business model and growth strategy could be affected, which could have a material and adverse impact on its profitability, results of operations and financial condition.

Lack of Control or significant influence over Companies in which the Company Invests

In certain cases, the Company invests or may invest in securities of companies that the Company does not control or influence. These investments will be subject to the risk that the company in which the investment is made may make business, financial or management decisions with which the Company does not agree or that the majority stakeholders or management of the company may take risks or otherwise act in a manner that does not serve the Company's interests. If any of the foregoing were to occur, the values of investments by the Company could decrease and the Company's financial condition and cash flow could suffer.

Due Diligence

The due diligence process undertaken by the Company in connection with investments that it makes or wishes to make may not reveal all relevant facts in connection with an investment. Before making investments, the Company will conduct due diligence investigations that it deems reasonable and appropriate based on the facts and circumstances applicable to each investment. When conducting due diligence investigations, the Company may be required to evaluate important and complex business, financial, tax, accounting, environmental and legal issues. Outside consultants, legal advisors, accountants, and investment banks may be involved in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence investigations and making an assessment regarding an investment, the Company will rely on resources available, including information provided by the target of the investment and, in some circumstances, third party investigations. The due diligence investigations that are carried out with respect to any investment opportunity may not reveal or highlight all relevant facts that may be necessary or helpful in evaluating such investment opportunity. Moreover, such investigation will not necessarily result in the investment being successful.

FOR THE THREE MONTHS ENDED MARCH 31, 2023

Fluctuations in the Value of the Company and the Common Shares

The net asset value of the Company and market value of its common shares will fluctuate with changes in the market value of the Company's investments. Such changes in value may occur as the result of various factors, including general economic and market conditions, the performance of corporations whose securities are part of the Company's investment portfolio and changes in interest rates which may affect the value of interest-bearing securities owned by the Company. There can be no assurance that shareholders will realize any gains from their investment in the Company and may lose their entire investment.
