2011 Drilling Update At Deer Horn

Delta, British Columbia October 14 2011 – Deer Horn Metals Inc. (“Deer Horn Metals”) (TSX.V - DHM) (GODYF Pink Sheets) In 2011 Deer Horn Metals completed 55 holes of drilling totalling 3772.5 meters. 49 holes were targeted at the near surface gold/silver/tellurium zone and six holes were drilled on the historical tungsten showing. At present we have received only 3 of the 49 holes that were drilled on the gold/silver/tellurium zone. The company focused its drilling near surface with the goal of increasing the gold/silver/resource from its 2009 drilling campaign and to create an initial resource for the tellurium. The average depth of the holes that were drilled in the main zone were approximately 70 meters from surface. As was indicated in a September 9 2011 news release we extended the previously identified system by at least 250 meters to the west.

The company also drilled 6 holes into the historical tungsten showing that was the basis of a 1959 Government of Canada geological memoir. The tungsten showing was the last to be drilled, therefore the assay results will most likely be the last to be received from the lab. The expectations of our geological team were surpassed by the tungsten showing. The team implemented powerful ultra violet lighting to be able to visually follow its fluorescent signature at night as well as visual confirmation of the drill cores.

In conclusion the Deer Horn property represents a couple of exciting exploration targets. First we have a near surface resource of gold/silver and tellurium that is being expanded. Tellurium is one of the rarest metals in the world and our grades are comparable to some of the best results worldwide. In addition we have a separate tungsten showing approximately 500 meters from the main gold/silver tellurium area that also demonstrates a significant exploration potential.

We will update our shareholders on our two lesser known minerals tellurium and tungsten as information becomes available.

On behalf of the board of directors of
Deer Horn Metals Inc.
(signed) “Tyrone Docherty”
President and CEO
