

The following discussion and analysis of the operations, results and financial position of Deer Horn Metals Inc. (formerly Golden Odyssey Mining Inc.) (the "Company") for the three months ended October 31, 2012 should be read in conjunction with the unaudited financial statements for the three months ended October 31, 2012 and the audited financial statements ended July 31, 2012.

This Management Discussion and Analysis ("MD&A") is dated December 18, 2012 and discloses specified information up to that date. The Company is classified as a "venture issuer" for the purposes of National Instrument 51-102. The Company's financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") in Canada. Unless otherwise cited, references to dollar amounts are in Canadian dollars.

We recommend that readers consult the "Cautionary Statement" on the last page of this report.

Description of Business

The Company was incorporated under the Canada Business Corporations Act on April 16, 2004 under the name "Golden Odyssey Mining Inc." On January 20, 2011, shareholders of the Company approved a name change and it commenced trading as Deer Horn Metals Inc. on January 27, 2011. The Company's strategy is to identify, acquire, explore and develop precious and base metal deposits amenable to low production costs and high operating margins, focusing on properties with low initial entry costs.

Overall Performance and Outlook

Since the year ended July 31, 2008, the Company underwent a significant change in management and direction. The Company no longer focuses on gold properties in the state of Nevada and, effective July 31, 2008, relinquished all property interests in the state of Nevada and closed its Reno, Nevada-based office. During the fiscal year ended July 31, 2012, the Company dissolved its wholly-owned subsidiary, Golden Odyssey Exploration Inc., a company incorporated in the State of Nevada, United States of America. The Company relocated its head-office to Delta, British Columbia, Canada and focused on opportunities in Canada to acquire interests in precious and base metal properties. The Company entered into an option agreement to acquire an interest in the Deer Horn property, located in British Columbia, Canada, in August 2009. The company continues to seek and evaluate opportunities to participate in similar projects.

Company Activity

During the three months ended October 31, 2012, the Company completed a non-brokered private placement of 5,700,000 units for aggregate proceeds of \$285,000. The Company also incurred \$197,852 in exploration expenditures on its Deerhorn property during the three months ended October 31, 2012.

Deer Horn

In August 2009, the Company entered into an option agreement with a company related by virtue of common directors, to acquire an initial 50% interest in the Deer Horn property, located in north western British Columbia.

To acquire its interest, the Company is required to incur \$5,000,000 in exploration expenditures as follows:

- 1) Incur \$400,000 by August 12, 2010 (incurred)
- 2) Incur an additional \$1,100,000 by August 12, 2011 (incurred)

- 3) Incur an additional \$1,500,000 by August 12, 2012 (incurred)
- 4) Incur an additional \$2,000,000 by August 12, 2013 (partially incurred)

As at the date of this MD&A, the Company has incurred \$4,651,319 of the \$5,000,000 in exploration expenditures required to earn an initial 50% interest in the property.

After the Company has acquired the initial 50% interest, it may acquire an additional 25% interest by incurring all costs required to bring the property to commercial production.

The Company's 2011 work program included 60 holes totalling 2,500 meters of drilling and 1,000 meters of trenching, including 6 holes totalling 650 meters of drilling and 1,000 meters of trenching focusing on the historical tungsten showing.

The Company encountered mineralization in all 49 holes drilled in the 2011 exploration program and near-surface mineralization was extended to a distance of at least 875 meters and is open in three directions. The Company intends to infill drill as part of its next phase of work on the property in order to potentially add further resources to the existing estimates.

In April 2012, the Company announced that a mineral resource update, prepared in compliance with NI 43-101, showed increased tonnage and significantly higher resources of gold and silver, and an initial resource for tellurium. The estimate, authored by R.A. Lane, P.Geo. and G.H. Giroux, P.Eng., both independent consultants and Qualified Persons as defined by NI 43-101, showed the deposit containing 68,000 ounces of gold, 2.1 million ounces of silver and 66,000 kg of tellurium in the indicated category and 32,000 ounces of gold, 930,000 ounces of silver and 27,000 kg of tellurium in the inferred category. The updated mineral resource estimate is based on historical diamond drill holes completed from 1944 to 1990, 35 drill holes completed by the Company in 2009 and a further 29 drill holes completed in 2011.

In May 2012, the Company announced that it had received initial documents relating to an airborne survey carried out to test the remaining unexplored areas of the property. R.A. Lane, P.Geo, the Company's Qualified Person as defined by NI 49-101, has identified a number of targets that merit advanced interpretation, notably the gold-silver tellurium zone as well as the tungsten zone. The survey has been forwarded to an independent expert for interpretation.

In October 2012, the Company completed a 10-day prospecting program to evaluate several anomalies identified during an assessment of 2011 airborne magnetic and radiometric survey data. The work program resulted in several new discoveries, including a previously-unknown copper zone and an extension of the known near surface high grade Au/Ag/Te vein system.

Future plans include a combination of infill drilling and extending the deposit westward beyond the limits of the 2011 exploration program and to further investigate a number of precious, strategic and base-metal veins discovered throughout the same work program. Other metal occurrences on the Deerhorn property include tungsten, molybdenum, copper, lead, zinc and bismuth. The objective of the infill drilling and extension of the deposit is to acquire sufficient data to enable the company to prepare a preliminary economic assessment of the Au/Ag/Te system of the Deerhorn Property.

Summary

The Company's main focus is to exercise its option to earn an initial 50% interest on the Deerhorn property by incurring the remaining \$350,000 of the required \$5,000,000 in exploration expenditures required under the terms of the option agreement.

Results of Operations

Three months ended October 31, 2012 compared with the three months ended October 31, 2011.

General and administrative expenses totalled \$376,917 for the three months ended October 31, 2012 compared with \$1,829,197 in 2011. The decrease of \$1,452,280 is the result of decreases in amounts recorded for exploration expenses of \$1,364,432, investor relations and shareholder information of \$40,631, professional fees of \$31,991, rent of \$30, salaries and management fees of \$7,500, share-based payments of \$12,512 and travel of \$799, however; the decreases were offset slightly by increases in amounts recorded for office expenses \$1,045 and regulatory and filing fees of \$4,570.

The decrease in general and administrative expenses is due mainly to increased exploration expenditures having been incurred in the three months ended October 31, 2011 with minimal costs incurred in the same quarter of 2012. Decreases in other categories are due to reduced levels of marketing activity as well as decreased professional fees attributed to expenses incurred for non-audit accounting services in the prior year due to IFRS transitioning.

Exploration Expenses

The Company incurred \$197,852 in exploration expenses during the three months' ended October 31, 2012 compared with \$1,562,284 in 2011.

The Company completed a significant exploration a program during the three months' ended October 31, 2011 whereas the Company did not undertake significant exploration activity during the same quarter in 2012.

Income for the Period

Income for the three months' ended October 31, 2012 was \$Nil compared with income of \$11,188 in 2011, a decrease of \$11,188. The decrease in income is attributable to the Company having recorded interest income in the three months' ended October 31, 2011 and none recorded in the same quarter 2012.

Liquidity

At October 31, 2012 the Company had current assets of \$397,895, of which \$344,436 was comprised of cash. Current liabilities totalled \$56,589 and consisted of trade payables.

Total working capital as at October 31, 2012 was \$341,306. The Company continues to assess funding opportunities to address its ongoing financial obligations and for exploration programs on its property.

Capital Resources

The Company plans to continue its participation in the Deer Horn project discussed above. The Company expects to finance expenditures on these projects through the sale of common shares by way of equity financings, and through the exercise of warrants and stock options.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Related Party Transactions

Amounts owing to related parties consists of \$Nil (2011 - \$61,562).

Exploration expenses of \$180,653 (2011 - \$1,562,284) were paid or accrued to a company related by virtue of a former (common) director, Scott Gifford.

Related Party Transactions - Key Management Compensation

During the period, \$52,500 (2011 - \$85,000) was paid or accrued to a company controlled by the President, Tyrone Docherty, for services as director and officer of the Company, \$15,000 (2011 - \$15,000) was paid or accrued to a company controlled by a Director, Tony Fogarassy, for consulting services and \$7,500 (2011 - \$7,500) was paid or accrued to the CFO, Pamela Saulnier, for services as an officer of the Company.

New standards, amendments and interpretations not yet effective:

A number of new standards, amendments to standards and interpretations are not yet effective as of November 1, 2012 and have not been applied in preparing these condensed consolidated interim financial statements. None of these are expected to have a material effect on the financial statements of the Company.

Consolidation

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12 "Consolidation—Special Purpose Entities" and parts of IAS 27 "Consolidated and Separate Financial Statements".

Joint Arrangements

IFRS 11 "Joint Arrangements", requires a venturer to classify its interest in a joint arrangement as a joint venture or a joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation, the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11 supersedes IAS 31, "Interests in Joint Ventures", and SIC-13, "Jointly Controlled Entities – Non-monetary Contributions by Venturers". The standard is effective for annual periods beginning on or after January 1, 2013. Entities early adopting this standard must also adopt the other standards included in the 'suite of five' standards on consolidation, joint arrangements and disclosures: IFRS 10, "Consolidated Financial Statements", IFRS 12, "Disclosure of Interests in Other Entities", IAS 27 (2011), "Separate Financial Statements" and IAS 28 (2011), "Investments in Associates and Joint Ventures".

Disclosure of Interests in Other Entities

IFRS 12, "Disclosure of Interests in Other Entities", establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other

entities. The standard is effective for annual periods beginning on or after January 1, 2013. Entities early adopting this standard must also adopt the other standards included in the 'suite of five' standards on consolidation, joint arrangements and disclosures: IFRS 10, "Consolidated Financial Statements", IFRS 11, "Joint Arrangements", IAS 27 (2011), "Separate Financial Statements" and IAS 28 (2011), "Investments in Associates and Joint Ventures".

Joint Ventures

The IASB issued Exposure Draft 9 – Joint Arrangements ("ED-9") in September 2007. ED-9 proposed to eliminate the Company's choice to proportionately consolidate jointly controlled entities and required such entities to be accounted for using the equity method. During the second quarter of 2009, the IASB commenced re-deliberations of ED-9 and now proposes to establish a principles-based approach to the accounting for joint arrangements which focuses on the nature, extent and financial effects of the activities that an entity carries out through joint arrangements and its contractual rights and obligations to assets and liabilities, respectively, of the joint arrangements. The IASB plans on publishing the final standard during the first half of 2011, with an anticipated effective date of January 1, 2013. The Company is currently evaluating the impact that ED-9 and the final standard are expected to have on its consolidated financial statements.

Fair Value Measurement

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures.

Financial instruments

The IASB intends to replace IAS 39 – Financial Instruments: Recognition and Measurement ("IAS 39") in its entirety with IFRS 9 – Financial Instruments ("IFRS 9") in three main phases. IFRS 9 will be the new standard for the financial reporting of financial instruments that is principles-based and less complex than IAS 39, and is effective for annual periods beginning on or after January 1, 2013, with earlier adoption permitted. In November 2009 and October 2010, phase 1 of IFRS 9 was issued and amended, respectively, which addressed the classification and measurement of financial assets and financial liabilities. IFRS 9 requires that all financial assets be classified as subsequently measured at amortized cost or at fair value based on the Company's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. Financial liabilities are classified as subsequently measured at amortized cost except for financial liabilities classified as at FVTPL, financial guarantees and certain other exceptions. The IASB has issued exposure drafts addressing impairment of financial instruments, hedge accounting and the offsetting of financial assets and liabilities, with comments due in 2011. The complete IFRS 9 is anticipated to be issued during 2011. The Company is currently evaluating the impact the final standard is expected to have on its consolidated financial statements.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Classification of financial instruments

Financial instruments measured at fair value are classified into one of three levels using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value ("FV") hierarchy has the following levels:

Level 1- quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2- inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (ie. as prices) or indirectly (ie. derived from prices); and

Level 3- inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's financial instruments consist of cash, receivable, accounts payable and accrued liabilities.

Fair values

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of receivables, accounts payable and accrued liabilities approximate their fair value because of the short term nature of these instruments.

Financial instrument risk exposure and risk management

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company considers the fluctuations of financial markets and seeks to minimize potential adverse effects on financial performance. The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process.

Credit risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's receivables consist primarily of tax receivables due from federal government agencies. The maximum exposure to credit risk is equal to the fair value or carrying value of the financial assets.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.

Interest rate risk

The Company has cash balances. The Company's current policy is to invest excess cash in investment grade short-term demand deposit certificates issued by its banking institutions. The company periodically monitors the investments it makes and is satisfied with the credit rating of its banks. The Company is exposed to interest rate risk. The Company's bank account earns interest income at variable rates. The

fair value of its portfolio is relatively unaffected by changes in short-term interest rates. The Company's future interest income is exposed to short-term rates.

Commodity price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold and other precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

OTHER MD&A REQUIREMENTS

Additional Disclosure for Venture Issuers without Significant Revenue:

As the Company has not had revenue from operations in either of its last two financial years, the following is a breakdown of the material costs incurred:

	Three months ended Oct. 31, 2012	Three months ended Oct. 31, 2011
General and Administration Expenses	<u>\$376,917</u>	<u>\$1,829,197</u>

Disclosure of Outstanding Share Data

The Company's authorized share capital consists of unlimited common shares without par value.

As at July 31, 2012, the Company had 98,653,166 issued and outstanding common shares and as at December 18, 2012 the Company had 104,353,166 issued and outstanding common shares.

The following is a summary of stock options outstanding as at July 31, 2012 and December 18, 2012:

Expiry Date	Exercise Price Per Share	Number of Shares Remaining Subject to Options (July 31, 2012)	Number of Shares Remaining Subject to Options (December 18, 2012)

Internal Controls over Financial Reporting

The Chief Executive Officer and the Chief Financial Officer of the Company are responsible for designing internal controls over financial reporting, or causing them to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The Company assessed the design of the internal controls over financial reporting as at October 31, 2012 and concluded that there are material weaknesses in internal controls over financial reporting, which are as follows:

- a) Due to the limited number of staff resources, the Company believes there are instances where a lack of segregation of duties exist to provide effective controls; and
- b) Due to the limited number of staff resources, the Company may not have the necessary in-house knowledge to address complex accounting and tax issues that may arise.

The weaknesses and their related risks are not uncommon in a company the size of the Company because of limitations in size and number of staff. The Company believes it has taken steps to mitigate these risks by hiring additional personnel, consulting outside advisors and involving the Audit Committee and Board of Directors in reviews and consultations where necessary. However, these weaknesses in internal controls over financial reporting could result in a more than remote likelihood that a material misstatement would not be prevented or detected. The Company believes that it must take additional steps to further mitigate these risks by consulting outside advisors on a more regular and timely basis.

There have been no changes in the Company's internal controls over financial reporting that occurred during the three months ended October 31, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Cautionary Statement

This MD&A is based on a review of the Company's operations, financial position and plans for the future based on facts and circumstances as of December 18, 2012. Except for historical information or statements of fact relating to the Company, this document contains "forward-looking statements" within the meaning of applicable Canadian securities regulations. There can be no assurance that such statements will prove to be accurate, and future events and actual results could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from our expectations are disclosed in the Company's documents filed from time to time via SEDAR with the Canadian regulatory agencies to whose policies we are bound. Forward-looking statements are based on the estimates and opinions of management on the date the statements are made, and we do not undertake any obligation to update forward-looking statements should conditions or our estimates or opinions change. These statements involve known and unknown risks, uncertainties, and other factor that may cause the Company's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievement expressed or implied by these forward-looking statements.
