

CORAZON GOLD CORP.

Management Discussion & Analysis

December 31, 2013

The following Management Discussion and Analysis ("MD&A") of Corazon Gold Corp. (the "Company" or "Corazon") should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2013 which have been prepared in accordance with IAS 34 of International Financial Reporting Standards ("IFRS"). This MD&A includes certain statements that may be deemed "forward looking statements". All statements in this MD&A, other than statements of historical fact, that address future exploration activities and events or developments that the Company expects, are forward looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Additional information can be found on SEDAR at www.sedar.com. This MD&A is dated as of April 30, 2014.

DESCRIPTION OF THE COMPANY

The Company is a natural resource company engaged in the acquisition and exploration of resource properties. The Company is activity searching for new projects. The Company trades on the TSX Venture Exchange under the symbol 'CGW'.

COMPANY HIGHLIGHTS

- Pursuant to the special resolution passed by shareholders on September 4, 2013, the Company consolidated its share capital on a 1:15 basis.
- The Company appointed Brad Scharfe as CEO of the Company. Mr. Scharfe is currently a director of the Company and has been focused on venture capital situations throughout his career, and has successfully worked with multiple companies in the areas of capital requirements, public market concerns and personnel. Mr. Scharfe was previously a venture capital stockbroker with Canaccord Genuity Corp. for 12 years, earning "chairman's club" status during this time. Mr. Scharfe holds a bachelor of arts from the University of Toronto, with a major in commerce and economics.
- The Company appointed Fred Tejada as a director of the Company. Mr. Tejada is a geologist since November, 2005. He has been the president of Tirex Resources Ltd. since April 16, 2013, a director of Green Arrow Resources Inc. since April 24, 2012, a director of Sora Capital Corp. since Jan. 9, 2012, and a director of High 5 Ventures Inc. since Dec. 18, 2009. All of these are companies listed on the TSX Venture Exchange.
- The Company appointed Bao Huo as CFO of the Company. Mr. Huo has worked on various Canadian and U.S.
 public corporations in the areas of accounting and regulatory compliance. Mr. Huo holds a Bachelor of Science
 degree and a diploma in accounting from the University of British Columbia.

SELECTED ANNUAL FINANCIAL INFORMATION

For the years ended December 31, 2013, 2012 and 2011

		December 31, 2013		December 31, 2012		December 31, 2011	
Financial results							
Total revenue	\$	Nil	\$	Nil	\$	Nil	
Loss for the year	\$	6,867,767	\$	3,711,596	\$	9,242,773	
Basic and diluted loss per share	\$	0.93	\$	0.79	\$	2.40	
Impairment of exploration and evaluation assets	\$	5,501,911	\$	1,198,152	\$	6,133,926	
Balance sheet data							
Current assets	\$	55,160	\$	1,836,210	\$	5,989,418	
Non-current assets	\$	46,932	\$	5,007,775	\$	270,377	
Total assets	\$	102,092	\$	6,843,985	\$	6,259,795	
Current liabilities	\$	502,830	\$	501,253	\$	280,434	
Shareholders' equity	\$	(400,738)	\$	6,342,732	\$	5,979,361	

Corazon is a mineral exploration company which has elected under IFRS to capitalize exploration and evaluation expenditures. Corporate and administration expenses, as well as any exploration expenditures incurred prior to obtaining the legal right to explore, are charged to the statement of earnings when incurred. The exploration properties acquired by the Company are still in the early exploration stage. No revenues have been reported for the years ended December 31, 2013, 2012, and 2011.

Results of Operations for the year ended December 31, 2013 compared to 2012

The net loss for the year increased by \$3,156,171 to \$6,867,767 (2012 – \$3,711,596). This increase in net loss is primarily due to the impairment of exploration and evaluation assets. Individual items contributing to the increase in net loss:

- Impairment of exploration and evaluation assets increased by \$4,303,759 to \$5,501,911 (2012 \$1,198,152) as the
 Company wrote off the Trout Creek, Hog Ranch and Estil, Kings River, Silver Cliff, and Goldfield Bonanza, La
 Ranchera, Rio Coco, and SDL properties.
- Property examination costs decreased by \$403,644 to \$111,891 (2012 \$515,535) as the Company scaled back reviewing of new properties as it conserves cash for operational needs.
- Share-based payments decreased by \$332,071 to \$20,297 (2012 \$352,368) reflecting the recognition of the option expense from stock options that were granted and vested during the period.

- Corporate development decreased by \$346,798 to \$11,654 (2012 \$358,452) as the Company reduced investor relation programs as it tries to conserve cash for operational needs.
- Professional fees decreased by \$220,855 to \$35,379 (2012 \$256,234) as a result of the decrease of overall
 activity in the Company to conserve cash for operational needs.
- Salaries and benefits decreased by \$197,034 to \$294,737 (2012 \$491,771) as the Company reduced the total number of employees to conserve cash for operational needs.

Cash flows for the year ended December 31, 2013 compared to 2012

Cash outflows from operating activities decreased by \$1,439,944 to \$779,237 (2012 – \$2,219,181) primarily as a result of the Company reducing activity as compared to prior year.

Cash outflows from investing activities decreased by \$555,453 to \$937,209 (2012 - \$1,492,662) primarily as a result of the Company reducing exploration and evaluation expenditures.

SUMMARY OF QUARTERLY RESULTS

	2013				2012			
	Q4	Q3	Q2	Q1	Q4	Q3	Q2	Q1
Net Sales	-	-	-	-	-	-	-	-
Net loss	1,343,789	495,946	4,691,586	336,446	923,887	662,271	1,102,552	1,022,886
Basic and diluted net loss per share	0.18	0.06	0.63	0.06	0.11	0.16	0.27	0.25

The large increase in net loss in Q2 and Q4, 2013, was due to the impairment of exploration and evaluation assets, including the Trout Creek, Hog Ranch and Estil, Kings River, Silver Cliff, and Goldfield Bonanza, La Ranchera, Rio Coco, and SDL properties.

Results of Operations for the three month period ended December 31, 2013 compared to 2012

The net loss for the three month period ended December 31, 2013 increased by \$419,902 to \$1,343 789 (2012 – \$923,887). This increase in net loss is primarily due to the impairment of exploration and evaluation assets. Individual items contributing to the increase in net loss:

- Impairment of exploration and evaluation assets increased by \$769,795 to \$1,099,811, (2012 \$330,016) as the Company wrote off the Trout Creek, Hog Ranch and Estil, Kings River, Silver Cliff, and Goldfield Bonanza, La Ranchera, Rio Coco, and SDL properties.
- Corporate development decreased by \$45,316 to \$Nil (2012 \$45,316) as the Company reduced investor relation programs as it tries to conserve cash for operational needs.
- Office expenses decreased by \$38,006 to \$81,883 (2012 \$119,889) due to a decrease in overall activity in the Company.
- Professional fees decreased by \$108,624 to \$970 (2012 \$109,594) due to a decrease in overall activity in the Company.
- Salaries and benefits decreased by \$96,880 to \$38,652 (2012 \$135,532) as the Company reduced the total number of employees to conserve cash for operational needs.

LIQUIDITY AND CAPITAL RESOURCES

The Company has no significant revenues and no expectation of revenues in the near term. In order to manage risk, the Company closely monitors its cash requirements and expenditures. At December 31, 2013 and December 31, 2012 the Company's working capital and deficit were as follows:

	December 31, 2013	December 31, 2012
Working capital (deficiency) Deficit	\$ (447,670) (20,303,526)	\$ 1,334,957 (13,435,759)

As at December 31, 2013, the Company has a working capital deficiency of \$447,670. Management is actively reviewing financing opportunities in order to meet working capital requirements for the next fiscal year.

BASIS OF PRESENTATION - INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS)

The annual consolidated financial statements of the Company comply with IFRS as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

The consolidated financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable. The consolidated financial statements are presented in Canadian dollars unless otherwise noted.

RELATED PARTY TRANSACTIONS

Key management personnel comprise of the Chief Executive Officer, Chief Financial Officer, and Directors of the Company. The remuneration of the key management personnel is as follows:

- •Paid or accrued salaries, wages, and consulting of \$328,401 (2012 \$268,313).
- •Stock options issued or vested with a fair value of \$13,976 (2012 \$323,329).
- •Paid or accrued Director fees of \$Nil (2012 \$44,000)

As at December 31, 2013, the amount of \$98,179 (2012 - \$17,890) is due to related parties. All balances are unsecured, non-interest bearing, have no fixed repayment terms, and are due on demand.

CRITICAL ACCOUNTING ESTIMATES

Share-based payments are subject to estimation of the value of the award at the date of grant using pricing models such as the Black-Scholes option valuation model. The option valuation model requires the input of highly subjective assumptions including the expected share price volatility. Because the Company's warrants have characteristics significantly different from those of traded options and because the subjective input assumptions can materially affect the calculated fair value, such value is subject to measurement uncertainty.

The valuation of shares issued in non-cash transactions are generally based on the value of goods or services received. When this cannot be determined, it is based on the fair value of the non-cash consideration. When non-cash transactions

Corazon Gold Corp. Form 51-102F1

Management Discussion and Analysis For the Period Ended December 31, 2013

Dated as at April 30, 2014

are entered into with employees and those providing similar services, the non-cash transactions are measured at the fair

value of the consideration given up using market prices.

The carrying value and recoverability of exploration and evaluation assets requires management to make certain estimates,

judgments and assumptions about each project. Management considers the economics of the project, including the latest

resources prices and the long-term forecasts, and the overall economic viability of the project.

The determination of income tax is inherently complex and requires making certain estimates and assumptions about future

events. While income tax filings are subject to audits and reassessments, the Company has adequately provided for all

income tax obligations. However, changes in facts and circumstances as a result of income tax audits, reassessments,

jurisprudence and any new legislation may result in an increase or decrease in our provision for income taxes.

CHANGES IN ACCOUNTING STANDARDS NOT YET ADOPTED

The following new standards, amendments to standards and interpretations have been issued but are not effective during

the year ended December 31, 2013:

• IFRS 9

New financial instruments standard that replaces IAS 39 for classification and

measurement of financial assets.(i

IAS 32 (Amendment)

New standard that clarifies requirements for offsetting financial assets and financial

liabilities. (ii)

(i) Effective date is unknown due to postponement

(ii) Effective for annual periods beginning on or after January 1, 2015

The Company anticipates that the application of these standards, amendments and interpretations will not have a material

impact on the results and financial position of the Company.

RISKS AND UNCERTAINTIES

Resource exploration is a speculative business and involves a high degree of risk. There is a probability that the

expenditures made by the Company in exploring its properties will not result in discoveries of commercial quantities of

minerals. A high level of ongoing expenditures is required to locate and estimate ore reserves, which are the basis to further

the development of a property. Capital expenditures to support the commercial production stage are also very substantial.

The following sets out the principal risks (non-inclusive) faced by the Company.

Exploration risk. There can be no assurance that economic concentrations of minerals will be determined to exist on the Company's property holdings within existing investors' investment horizons or at all. The failure to establish such economic concentrations could have a material adverse outcome on the Company and its securities. The Company's planned programs and budgets for exploration work are subject to revision at any time to take into account results to date. The revision, reduction or curtailment of exploration programs and budgets could have a material adverse outcome on the Company and its securities.

Market risks. The Company's securities trade on public markets and the trading value thereof is determined by the evaluations, perceptions and sentiments of both individual investors and the investment community taken as a whole. Such evaluations, perceptions and sentiments are subject to change, both in short term time horizons and longer term time horizons. An adverse change in investor evaluations, perceptions and sentiments could have a material adverse outcome on the Company and its securities.

Commodity price risks. The Company's exploration projects seek gold and precious metals. While gold has recently been the subject of significant price increases from levels prevalent earlier in the decade, there can be no assurance that such price levels will continue, or that investors' evaluations, perceptions, beliefs and sentiments will continue to favour these target commodities. An adverse change in these commodities' prices, or in investors' beliefs about trends in those prices, could have a material adverse outcome on the Company and its securities.

Financing risks. Exploration and development of mineral deposits is an expensive process, and frequently the greater the level of interim stage success the more expensive it can become. The Company has no producing properties and generates no operating revenues; therefore, for the foreseeable future, it will be dependent upon selling equity in the capital markets to provide financing for its continuing substantial exploration budgets. While the Company has been successful in obtaining financing from the capital markets for its projects in recent years, there can be no assurance that the capital markets will remain favourable in the future, and/or that the Company will be able to raise the financing needed to continue its exploration programs on favourable terms, or at all. Restrictions on the Company's ability to finance could have a material adverse outcome on the Company and its securities.

Share Price Volatility and Price Fluctuations. In recent years, the securities markets in Canada have experienced a high level of price and volume volatility, and the market prices of securities of many companies, particularly junior mineral exploration companies like the Company, have experienced wide fluctuations which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that these

price fluctuations and volatility will not continue to occur.

Key personnel risks. The Company's exploration efforts are dependent to a large degree on the skills and experience of certain of its key personnel. The Company does not maintain "key man" insurance policies on these individuals. Should the availability of these persons' skills and experience be in any way reduced or curtailed, this could have a material adverse outcome on the Company and its securities.

Competition. Significant and increasing competition exists for the limited number of mineral property acquisition opportunities available. As a result of this competition, some of which is with large established mining companies with substantial capabilities and greater financial and technical resources than the Company, the Company may be unable to acquire additional attractive mineral properties on terms it considers acceptable.

Foreign Countries and Regulatory Requirements. Currently, the Company's properties are located in Nicaragua and the United States of America. Consequently, the Company is subject to certain risks associated with foreign ownership, including currency fluctuations, inflation, and political risk. Both mineral exploration and mining activities and production activities in foreign countries may be affected in varying degrees by political stability and government regulations relating to the mining industry. Any changes in regulations or shifts in political conditions are beyond the control of the Company and may adversely affect its business. Operations may be affected in varying degrees by government regulations with respect to community rights, restrictions on production, price controls, export controls, restriction of earnings, taxation laws, expropriation of property, environmental legislation, water use, labour standards and workplace safety. The Company maintains the majority of its funds in Canada and only forwards sufficient funds to meet current obligations.

Environmental and Other Regulatory Requirements. The current or future operations of the Company, including development activities and the commencement of production on its properties, require permits from various governmental authorities and such operations are and will be subject to laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, safety and other matters. Companies engaged in the development and operation of mines and related facilities generally experience increased costs, and delays in production and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that approvals and permits required to commence production on its properties will be obtained on a timely basis, or at all. Additional permits and studies, which may include environmental impact studies conducted before permits can be obtained, may be necessary prior to operation of the properties in which the Company has interests and there can be no assurance that the Company will be able to obtain or maintain all necessary permits that may be required to commence construction, development or operation of mining facilities at these properties on terms which enable operations to be conducted at economically justifiable costs.

Form 51-102F1

Management Discussion and Analysis

For the Period Ended December 31, 2013

Dated as at April 30, 2014

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions there

under, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may

include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties

engaged in mining operations or extraction operations may be required to compensate those suffering loss or damage by

reason of such activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or

regulations.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more

stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital

expenditures or production costs or reduction in levels of production at producing properties or abandonment or delays in

development of new mineral exploration properties.

To the best of the Company's knowledge, it is currently operating in compliance with all applicable environmental

regulations.

History of Net Losses; Accumulated Deficit; Lack of Revenue from Operations. The Company has incurred net losses

to date. Its deficit as of December 31, 2013 was \$20,303,526. The Company is an exploration company. The Company

has not yet determined that economic resources exist and/or that commercial development is feasible and/or warranted on

any of its properties. Even if the Company commences development of certain of its properties, the Company may continue

to incur losses. There is no certainty that the Company will produce revenue, operate profitably or provide a return on

investment in the future.

Uninsurable risks. The Company and its subsidiaries may become subject to liability for pollution, fire, explosion, against

which it cannot insure or against which it may elect not to insure. Such events could result in substantial damage to property

and personal injury. The payment of any such liabilities may have a material, adverse effect on the Company's financial

position.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the

relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities;

Form 51-102F1

Management Discussion and Analysis

For the Period Ended December 31, 2013

Dated as at April 30, 2014

Level 2: Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3: Inputs that are not based on observable market data.

The fair value of the Company's receivables, accounts payable and accrued liabilities, approximate carrying value, which is

the amount recorded on the consolidated statement of financial position. Cash and cash equivalents, receivables and

restricted cash, under the fair value hierarchy are based on level one quoted prices in active markets for identical assets or

liabilities.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors

approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits,

and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is

provided as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to

incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts. The majority of

cash is deposited in bank accounts held with major banks in Canada. This risk is managed by using major banks that are

high credit quality financial institutions as determined by rating agencies. The Company's secondary exposure to risk is on

its other receivables. This includes \$27,500 receivable from a third party buyer for the sale of property and equipment during

the year. Management believes that the credit risk concentration with respect to receivables is minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has

a planning and budgeting process in place to help determine the funds required to support the Company's normal operating

requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business

requirements, taking into account its anticipated cash flows from operations and its holdings of cash and cash equivalents.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through

private placements. The Company's access to financing is always uncertain. There can be no assurance of continued

access to significant equity funding.

Form 51-102F1

Management Discussion and Analysis

For the Period Ended December 31, 2013

Dated as at April 30, 2014

All of the contractual maturities of the Company's non-derivative financial liabilities are within one year of the financial

statement end date.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates,

and commodity and equity prices.

a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of

changes in market interest rates.

The risk that the Company will realize a loss as a result of a decline in the fair value of the short-term investments

included in cash and cash equivalents is minimal.

b) Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to cash, accounts receivable and accounts

payable and accrued liabilities that are denominated in US Dollars (USD).

c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the

potential adverse impact on the Company's earnings due to movements in individual equity prices or general

movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on

earnings and economic value due to commodity price movements and volatilities. The Company closely monitors

commodity prices of gold, individual equity movements, and the stock market to determine the appropriate course of

action to be taken by the Company.

Form 51-102F1

Management Discussion and Analysis

For the Period Ended December 31, 2013

Dated as at April 30, 2014

Sensitivity Analysis

The carrying amount of cash and cash equivalents, restricted cash, receivables, and accounts payable and accrued

liabilities, interest payable approximates their fair value due to their short-term nature. The Company does not have

significant exposure to changing interest rates.

Based on management's knowledge and experience of the financial markets, the Company believes the following movement

is "reasonably possible".

The Company has cash, receivable and accounts payable denominated in USD and are exposed to risk from changes in the

USD. A 10% fluctuation in the USD against the Canadian dollar would affect net loss for the period by approximately

\$20,000.

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in

order to pursue the exploration and development of its mineral exploration concessions, acquire additional mineral property

interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the

management of capital, the Company includes its cash and cash equivalent balances and components of shareholders'

equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the

risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue

new shares, issue debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents and investments.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are

updated as necessary depending on various factors, including successful capital deployment and general industry

conditions.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's

approach to capital management during the year.
