DIRECTOR CHANGES

Maple Leaf Reforestation Inc. ("Maple Leaf" or the "Corporation") would like to announce that effective March 1, 2011, Mr. Bill McKnight has resigned from its board of directors for personal reasons. Mr. Perry Lee, Maple Leaf's Vice-President Bio-fuel and Waste Oil Project Development, has been appointed to Maple Leaf's board of directors in place of Mr. McKnight. Mr. Joe Wong, a director of Maple Leaf since July 2010, has been appointed to Maple Leaf's Audit Committee in place of Mr. McKnight. Maple Leaf graciously thanks Mr. McKnight for his lengthy commitment to Maple Leaf. Maple Leaf also welcomes the expanded involvement of Mr. Lee in Maple Leaf's operations and appreciates Mr. Wong's willingness to sit as an Audit Committee member.

Mr. Lee was the Plant Manager at a Canadian bio-fuel facility from January 2008 to October 2009, and has since fulfilled the role of Vice-President of Production at this facility. In his new role as V.P., Mr. Lee has successfully built a 5 million liter per year biodiesel production facility and is responsible for overseeing the growth of the facility's production to a desired 25 million liters of biodiesel per year.

In Mr. Lee's previous role as Plant Manager, he supported the process engineering development of the production facility, he was responsible for managing and overseeing activities such as operations, maintenance, laboratory feedstock and biodiesel logistics, he oversaw quality control processes and procedures to ensure that the biodiesel produced met regulatory specification requirements and he implemented waste management and chemical spill related programs at the facility.

Mr. Lee's experience in the biodiesel industry extends beyond his roles at the facility. Mr. Lee is also the Program Leader of the Biodiesel initiative at the Advanced Chemical Technology Centre. In this role Mr. Lee has initiated biodiesel modeling projects to investigate the most cost effective ways to produce biodiesel and to optimize the bioreactor performance for producing biodiesel. Mr. Lee is presently a Ph.D. Candidate in the Chemical and Biological Engineering department at the University of British Columbia, which he anticipates completing this calendar year.

About Maple Leaf Reforestation Inc.

Maple Leaf is a Canadian company operating various projects in China. Maple Leaf is a wholly-owned foreign enterprise which allows the Company to control 100% of the direction and operations of the company in China while permitting the cash generated from operations in China to flow back to Canada.
