

## **MAPLE LEAF MOVES FORWARD ON ITS CALIFORNIA PROJECT**

### **MAPLE LEAF GREEN WORLD INC.**

**(TSX-V: MGW)**

---

**For Immediate Release**

**April 22, 2015 - \$0.05**

**CALGARY, ALBERTA** - Maple Leaf Green World (MGW-V) ("**Maple Leaf**" or the "**Company**") announces it has paid the initial deposit for the acquisition of 20 acres of land required for its California medical marijuana project (see news release dated March 10, 2015) and it has been advised that title to the property is being transferred to its wholly-owned subsidiary, Golden State Green World LLC. In addition, the Company has engaged a local contractor to commence drilling a water well on the property and to begin preparing the site for construction during the first week of May.

"We are thrilled that we have finally acquired this piece of land with such favorable terms and we are ready to move forward with our California project. One of the favorable features of this land is the surrounding neighborhood has found water in their wells even though California is under such severe drought conditions." said President and C.E.O. of Maple Leaf, Raymond Lai.

#### **About Maple Leaf Green World Inc.**

Maple Leaf is a Canadian company that focuses in the agricultural/environmental industry with four main areas of activity:

1. Canadian MMPR - It pursues opportunities within the medical cannabis industry. If and when a MMPR license is obtained and through an agreement to lease a greenhouse facility with Woodmere Nursery Ltd., it will become a Canadian producer. It is currently seeking a Canadian MMPR licensed producer status to grow medical cannabis in Canada for domestic consumption and export to approved countries.
2. California Project – It pursues opportunities within the medical cannabis industry in various States that have legalized marijuana. It is currently joint ventured with a California non-profit collective to set up a growing facility.
3. Eco-Agriculture - it pursues several projects around the world. In China, it is focused on growing value-added tree seedlings and nursery products that assist with anti-desertification.

4. Renewable Energy - it pursues various renewable energy projects around the world, including Yellowhorn in China which would provide valuable Yellowhorn seeds and ultimately oil from such seeds for the manufacture of bio-diesel fuel and premium healthy cooking oil.
