

Maple Leaf Receives Permit and Resale Certificate for California MJ Project

(TSX-V: MGW)

May 10, 2016 – \$0.12

CALGARY, May 10, 2016 /CNW/ - Maple Leaf Green World (MGW-V) ("**Maple Leaf**" or the "**Company**") announces that the Company has received a seller's permit and resale certificate from the Board of Equalization of the State of California. As such, the Company is fully compliant with the laws of California regarding the growing and selling of marijuana for medical purposes. Furthermore, with the seller's permit in place, the Company has opened a business account with a major U.S. bank to handle all of its banking needs, including the transfer of funds to Canada, as required. The permit and resale certificate makes the Company eligible to apply for a new medical marijuana license when such licenses become available. Management considers these achievements to be significant for Maple Leaf as it gets closer to generating positive cash flow from its operations in California. The Company intends to keep current with the upcoming referendum for recreational marijuana legalization in California and the latest developments in medical marijuana licensing laws.

About Maple Leaf Green World Inc.

Maple Leaf is a Canadian company that focuses in the agricultural/environmental industry with four main areas of activity:

1. Canadian MMPR - It pursues opportunities within the medical cannabis industry. If and when a MMPR license is obtained and through an agreement to lease a greenhouse facility with Woodmere Nursery Ltd., it will become a Canadian producer. It is currently seeking Canadian MMPR licensed producer status to grow medical cannabis in Canada for domestic consumption and export to approved countries.
2. California Project – It pursues opportunities within the medical cannabis industry in various States that have legalized marijuana. It is currently in a joint venture with a California non-profit collective to set up a growing facility.
3. Eco-Agriculture - it pursues several projects around the world. In China, it is focused on growing value-added tree seedlings and nursery products that assist with anti- desertification.
4. Renewable Energy - it pursues various renewable energy projects around the world, including Yellowhorn in China which would provide valuable Yellowhorn seeds and ultimately oil from such seeds for the manufacture of bio-diesel fuel and premium healthy cooking oil.
