

## Maple Leaf Green World Inc. - Second Crop Started at California MJ Project

(TSX-V: MGW)

July 27, 2016 – \$0.12

CALGARY, July 27, 2016 /CNW/ - Maple Leaf Green World (MGW-V) ("**Maple Leaf**" or the "**Company**") announces that a second marijuana crop has been started in the Company's alternate greenhouse and these plants are already approaching 2 feet in height. Photos have posted to the Company's website. Maple Leaf's ability to grow two crops at the same time will ensure a more consistent revenue stream. It is anticipated that, during the last 5 months of 2016, the Company will be generating revenue every month.

The plants from the first crop are now 10 feet high and 5 feet wide, reaching above the curtains and arch supports in the Company's flowering greenhouse. Photos of the first crop are also posted to the Company's website. As the best quality of marijuana is produced from the buds at the top of the plant, management has decided to allow the plants to finish the flowering process naturally, rather than cut them down in order to close the curtain to accelerate the flowering process for harvesting. Accordingly, harvesting of the first crop has been rescheduled to take place in August.

Continued progress has been made in the effort to legalize marijuana for recreational use in California. The Adult Use of Marijuana Act has received more than double the required number of signatures for the petition to place the initiative on the ballot in the upcoming November elections.

### About Maple Leaf Green World Inc.

Maple Leaf is a Canadian company that focuses in the agricultural/environmental industry with four main areas of activity:

1. Canadian MMPR - It pursues opportunities within the medical cannabis industry. If and when a MMPR license is obtained and through an agreement to lease a greenhouse facility with Woodmere Nursery Ltd., it will become a Canadian producer. It is currently seeking Canadian MMPR licensed producer status to grow medical cannabis in Canada for domestic consumption and export to approved countries.
2. California Project – It pursues opportunities within the medical cannabis industry in various States that have legalized marijuana. It is currently in a joint venture with a California non-profit collective to set up a growing facility.
3. Eco-Agriculture - it pursues several projects around the world. In China, it is focused on growing value-added tree seedlings and nursery products that assist with anti-desertification.
