

Maple Leaf Green World Inc. - California Project Starts Shipping of First Crop

(TSX-V: MGW)

Sept. 28, 2016 –\$0.31

CALGARY, Sept. 28, 2016 /CNW/ - Maple Leaf Green World (MGW-V) ("**Maple Leaf**" or the "**Company**") announces that the first shipment of product from its initial harvest has commenced. Product shipments will continue for the next few weeks and Maple Leaf expects the selling price will be at the high end of the price range previously announced (see news release dated August 29, 2016).

The Company's second crop has been flowering for two weeks and the plants are now over six feet in height. It is expected that harvesting of the second crop will begin in mid-November, with product shipment taking place on or about mid-December. Once the harvesting and shipping of the first two crops has been completed, the Company will be in a better position to provide revenue projections for 2017 and beyond.

The seedlings for the Company's third marijuana crop will be cultivated in November, with harvesting expected in March 2017. From 2017 onward, Maple Leaf is targeting six harvests per year.

"This is a landmark achievement for Maple Leaf and is proof that the Company's growing methodology is successful. We are ready to expand our operations both in California and other American states. We believe we can capitalize on new opportunities available to us, pending the outcome of the upcoming referenda on the legalization of marijuana for recreational use in various jurisdictions in the United States." said Raymond Lai, President & C.E.O. of Maple Leaf.

About Maple Leaf Green World Inc.

Maple Leaf is a Canadian company that focuses in the agricultural/environmental industry with four main areas of activity:

1. Canadian MMPR - It pursues opportunities within the medical cannabis industry. If and when a MMPR license is obtained and through an agreement to lease a greenhouse facility with Woodmere Nursery Ltd., it will become a Canadian producer. It is currently seeking Canadian MMPR licensed producer status to grow medical cannabis in Canada for domestic consumption and export to approved countries.
2. California Project – It pursues opportunities within the medical cannabis industry in various States that have legalized marijuana. It is currently in a joint venture with a California non-profit collective.
3. Eco-Agriculture - it pursues several projects around the world. In China, it is focused on growing value-added tree seedlings and nursery products that assist with anti- desertification.
