The accompanying notes are an integral part of these condensed financial statements.

1. Corporate Information

Seaway Energy Services Inc. ("Seaway" or the "Company") was incorporated under the Business Corporations Act (Alberta) on September 4, 1998. The principal activities of Seaway were the provision of environmental consulting services to the petroleum and natural gas industry until March 31, 2012 when the Company ceased active operations as further discussed in Note 2. The Company's common shares trade on the TSX Venture exchange under the symbol SEW.

The head office of the Company is located at Suite 2000, 1177 West Hastings Street, Vancouver, British Columbia, V6E 2K3 and the registered office is located at Suite 1810, 1111 West Georgia Street, Vancouver, British Columbia, V6E 4M3.

2. Basis of Presentation

Statement of compliance

These condensed interim financial statements ("financial statements") have been prepared in accordance with International Accounting Standard ("IAS") 34 Interim Financial Reporting. These financial statements were authorized for issue by the Board of Directors on August 29, 2016. They do not contain all disclosures required by IFRS for annual financial statements and, accordingly, should be read in conjunction with the audited financial statements for the year ended September 30, 2015. The condensed financial statements have been prepared using the same accounting policies and methods as the financial statements for the year ended September 30, 2015.

The financial statements were approved by the Board on September 21, 2016.

Going concern assumption

These financial statements have been prepared on a going concern basis, under which the Company is assumed to be able to realize its assets and discharge its liabilities in the normal course of operations. The Company has no active ongoing operations and is prudently managing administrative costs and additional capital will be required to facilitate other business opportunities. The current market environment for idle public companies may cast significant doubt about the Company's ability to continue as going concern. The financial statements do not reflect adjustments that would be necessary if the going concern assumptions were not appropriate. If the going concern basis was not appropriate for these financial statements, then adjustments would be necessary in the carrying value of property and equipment, liabilities, the reported expenses, and the classifications used in the statement of financial position. Such adjustments could be material.

Basis of Measurement

The financial statements have been prepared on the historical cost basis, which is based on the fair value of the consideration at the time of the transaction, except for certain financial instruments which are accounted for at fair value.

Functional and Presentation Currency

The financial statements are presented in Canadian dollars, which is the functional currency of Seaway.

Use of Estimates, Judgments and Assumptions

The preparation of financial statements requires management to make estimates and use judgment regarding the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as at the date of the financial statements and the reported amounts of revenues and expenses during the period. By their nature, estimates are subject to measurement uncertainty and changes in such estimates in future periods could require a material change in the financial statements. Accordingly, actual results may differ from the estimated amounts as future confirming events occur. Significant estimates and judgments made by management in the preparation of

2. Basis of Presentation - continued

these financial statements are as follows:

Stock-based compensation – assumptions and estimates are used in determining the inputs used in the Black-Scholes option pricing model, including assumptions regarding volatility, dividend yield, risk-free interest rates, forfeiture estimates and expected option lives.

Deferred income taxes – assumptions and estimates are made regarding the amount and timing of realization and/or settlement of the temporary differences between the accounting carrying value of the Company's assets versus the tax basis of those assets, and the tax rates at which the differences will be recovered or settled in the future.

Available for sale investments – the recoverability of the Company's investment is dependent on the liquidity of the private Company shares, which is based in part on the ability to complete acquisitions. The Company will assess at each reporting period whether there is any objective evidence that a financial asset has been impaired. When the fair value of the investment cannot be derived from active markets, they are determined using recent transactions or a variety of valuation techniques that may include the use of mathematical models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of liquidity and model inputs such as volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

3. Promissory Note

On January 25, 2016, the Company closed a \$15,000 Promissory Note financing with an arm's length party. The Promissory Note bears interest at 20% per annum and is due on January 25, 2017. If the Promissory Note is paid by July 25, 2016, no interest will be payable. The note was repaid in full during the reporting quarter.

4. Share Capital

(a) Authorized

Unlimited number of preferred shares

Unlimited number of common voting shares without nominal or par value

Unlimited number of share purchase warrants

On April 11, 2016, the Company consolidated its share capital on three for one basis.

Balance, beginning	405,000	\$ 85,500	405,000	\$ 85,500
Private placement ⁽ⁱ⁾	3,805,000	-	-	-
Expired	(405,000)	-	-	-
Balance, ending	3,805,000	\$ 85,500		\$ 85,500

(i) On April 19, 2016, the Company closed a private placement for 7,610,000 Units sold at a price of \$0.05 per Unit. Each unit comprises one share and one half share purchase warrant exercisable at \$0.10 per share for a period of 24 months from the date of closing. Finder's fee of \$3,000 cash was paid. The attached warrants had a \$NIL residual value.

(c) Stock options

The Company has a stock option plan that provides for the issuance to its directors, officers, employees and consultants options to purchase from treasury a number of common shares not exceeding 10% of the common shares that are outstanding from time to time which is the number of shares reserved for issuance under the plan. Options granted under the plan have varying vesting periods as determined by the Board at the grant date. Options can be exercisable for a maximum of five years from the effective date. The options are non-transferable if not exercised. Pursuant to the Stock Option Plan, the exercise price of options will be set by the Board at the time options are granted and cannot be less than the discounted market price, except as permitted by the Exchange. A summary of the status of the Company's stock option plan as at June 30, 2016 and September 30, 2015 and changes during the respective periods ended on those dates is presented below.

Stock Options	June 30, 2016		September 30, 2015	
	Number of options	Weighted average exercise price	Number of Options	Weighted average exercise price
Beginning of period	93,333	\$0.405	93,333	\$0.405
Granted	-	-	-	-

End of period	93,333	\$0.405	93,333	\$0.405
Exercisable, end of period	93,333	\$0.405	93,333	\$0.405

Date of Grant	Number Outstanding	Exercise Price	Weighted Average Remaining Contractual Life	Date of Expiry	Number Exercisable June 30, 2016
March 21, 2014	280,000	\$0.405	2.72 years	March 21, 2019	280,000

5. Financial Instruments

The Company holds various forms of financial instruments. The nature of these instruments and the Company's operations expose the Company to interest rate and foreign currency, liquidity, and fair value risks. The Company manages its exposure to these risks by operating in a manner that minimizes its exposure to the extent practical. These risks are outlined more fully below.

Financial instrument:	Category:
Cash and cash equivalents	Held for trading
Accounts receivable	Loans receivable
Accounts payable and accrued liabilities	Other financial liabilities

(a) Fair value of financial instruments

The Company has determined that the fair values of the financial instruments consisting of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities and convertible debentures are not materially different from the carrying values of such instruments reported on the statement of financial position due to their short-term nature.

The Company classifies the fair value of these financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instrument.

- Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 – Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.
- Level 3 – Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

All financial assets (except for cash and cash equivalents which are classified as held for trading and the investment in Sierra classified as available for sale), are classified as either loans or receivables and are accounted for on an amortized cost basis. All financial liabilities are classified as other liabilities. There have been no changes to the aforementioned classifications during the year ended September 30, 2015 and nine month period ended June 30, 2016.

(b) Liquidity risk

Liquidity risk includes the risk that, as a result of operational liquidity requirements:

- The Company will not have sufficient funds to settle a transaction on the due date;
- The Company will be forced to sell financial assets at a value which is less than what they are worth; or
- The Company may be unable to settle or recover a financial asset at all.

5. Financial Instruments - continued

Trade and other payables

	June 30, 2016	September 30, 2015
Trade	\$ 63,853	\$ 147,586
Accrued	-	6,500
Total accounts payable	\$ 63,853	\$ 154,086

Seaway will be required to raise funds in order to fund its current working capital deficit in order to meet its current obligations while it endeavors to facilitate other business opportunities. As these variables change, liquidity risks may necessitate the need for the Company to conduct further equity issues.

6. Capital Risk Management

The Company's objectives when managing capital is to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. Managed capital consists of the Company's current working capital (current assets less current liabilities). The Company sets the amount of capital in proportion to risk. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. The Company's objective is met by retaining adequate equity to provide for the possibility that cash flows from assets will not be sufficient to meet future cash flow requirements. The Board of Directors does not establish quantitative return on capital criteria for management; but rather promotes year over year sustainable profitable growth. The Company is not subject to any externally imposed capital requirements. There have been no changes to the Company's capital risk management approach during the periods ended June 30, 2016 or September 30, 2015.

7. Commitments and Contingencies

From time to time, the Company may be involved in litigation or has claims sought against it in the normal course of business operations. Management of the Company is not currently aware of any claims or actions that would materially affect the Company's reported financial position or results from operations.

Under the terms of certain agreements and the Company's by-laws the Company indemnifies individuals who have acted at the Company's request to be a director and/or officer of the Company, to the extent permitted by law, against any and all damages, liabilities, costs, charges or expenses suffered by or incurred by the individuals as a result of their service. The Company has no outstanding claims having a potentially material adverse effect on the Company as a whole.
