

EnviroGold Global Announces Webinar to be held on April 9, 2024, led by CEO David Cam and CTO Brock Hill

TORONTO, CANADA – April 2, 2024 - EnviroGold Global Limited (CSE: NVRO | OTCQB: ESGLF | FSE: YGK) (“EnviroGold” or the “Company”), a clean technology company accelerating the world’s transition to a circular-resource economy, will be hosting a live and interactive webinar on April 9, 2024 at 4:30PM EDT, led by Chief Executive Officer David Cam and Chief Technology Officer Brock Hill.

Chairman Allan Bezanson will provide opening remarks. Mr. Cam and Mr. Hill will give a presentation to outline the following details:

- Discussion around the previously announced NI 43-101 (follow link [here](#))
- The Company’s upcoming commercialization plans and deployment of a working plant
- An update on the Company’s proprietary technology

Following the presentation management will participate in an interactive Q&A session.

David Cam, Chief Executive Officer of the Company commented, “As co-founder of EnviroGold, I am very excited to be given the opportunity to take our best-in-class proprietary leaching technology through to the commercialization process and beyond. I am equally excited to engage with the Company’s investor base and plan to be very communicative and accessible to the investing community moving forward as we take our technology into commercialization later this year.”

Please register for the webinar via the link below

About EnviroGold Global

EnviroGold Global is a technology company that uses proprietary technologies to enable mining companies worldwide to recover valuable metals from mine tailings and reduce the environmental liabilities of wastes and by-products from mining while maximizing return for its shareholders. The Company is dedicated to establishing ESG and circular economy leadership by enabling mining companies to profitably reprocess and remediate mine waste (tailings) and smelter by products to recover precious, critical, and strategic metals – including gold, silver, copper, zinc, and nickel. The Company has adopted a royalty model for its technology by licensing the NVRO process to customers.
