SECOVA APPOINTS BRAD KITCHEN CHAIRMAN AND CHIEF EXECUTIVE OFFICER

VANCOUVER, BRITISH COLUMBIA – April 22, 2015 (TSX.V: SEK) Secova Metals Corp. ("Secova" or the "Company") is pleased to announce the appointment of P. Bradley Kitchen as Chief Executive Officer. Mr. Kitchen will also be joining the board of directors and take on the role of Chairman.

Mr. Kitchen has 25 years of experience in investment banking and heading up corporations. In this time Mr. Kitchen has been responsible for all operations and closing structured financings for primarily resource based small, medium and large private and public companies. Most recently he served as the Chief Executive Officer and President of Eagle Hill Exploration Corporation until it was taken over in August 2013. He also served as a Vice President of CIBC World Markets (formerly CIBC Wood Gundy Securities Inc.) and TD Securities Inc., for over 11 years. For the past 17 years, Mr. Kitchen, through his company PBK Capital Corp., has worked with junior resource companies focusing on the mineral exploration and oil and gas industries. Mr. Kitchen holds an MBA from McGill University in Montreal, Quebec in 1987 and a B.Ap.Sc. in Civil Engineering from the University of British Columbia in 1985. Mr. Kitchen will bring his leadership, corporate governance and team building expertise to Secova to generate synergies, create corporate successes and achieve set targets and goals for the Company's shareholders. The appointment of Mr. Kitchen is subject to all necessary regulatory approvals.

About Secova Metals Corp.

Secova is a Canadian gold exploration company based in Vancouver, BC focused building a strong asset base through exploration of undervalued Canadian gold projects. The Company recently acquired the Jessie Lake gold project which is an early stage exploration project. Secova has also entered into an agreement to acquire up to 90% of the Duvay advanced gold project in Amos, Quebec. The Duvay Gold Project is comprised of 105 claims covering over 4,500 hectares and is located in a favourable geological setting with potential for hosting either a near surface bulk tonnage gold deposit or an Archean shearhosted gold deposit. Visible gold was discovered at Duvay in the late 1930s. Visible gold showings and historic drill samples of up to 402 g/t gold occur on the property. Gold mineralization at Duvay is associated with a northwest trending shear zone and intersecting northeast faults. The property encompasses kilometric zones of intense carbonate alteration (ankerite) with quartz stockworks. Native gold occurs on the property as well as disseminated pyrite, chalcopyrite, sphalerite and minor galena. There has been a significant amount of exploration done on the Duvay Property by both Tres-Or and more recently, Aurizon Mines Ltd. who had optioned the property prior to their acquisition by Hecla Mining. It is the Company's intention to compile this and other historic data, develop a comprehensive model and formulate an advanced stage exploration program to enhance the value of this significant asset for our shareholders.
