

Certificate of Qualified Person

HARRISON COOKENBOO, Ph.D, P.Geo, P.Geol

Effective date: 1st day of July 2017:

As author of this report titled “**TECHNICAL REPORT ON THE DUVAY-CHENIER GOLD PROPERTY FOR SECOVA METALS CORP**” prepared for and on behalf of Secova Metals Corp, I do hereby certify that:

I am a consulting geologist providing my services through:

B.C. 664163 Ltd.

278 West 5th Street

North Vancouver, B.C. Canada V7M 1K

TEL: 1-604-762-5587 Email: hcookenboo@shaw.ca

I graduated with a Bachelor of Science Degree (cum laude) in geology from Duke University (Durham, North Carolina) in 1981, a Master's of Science in geology from the University of British Columbia in 1989, and a Ph.D. in geology from the University of British Columbia in 1994.

I am a member of the British Columbia Association of Professional Engineers and Geologists (APEGBC P.Geo #23483), a member of the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS P.Geo. # 27847), a Licensee of the Northwest Territories and Nunavut Association of Professional Engineers and Geoscientists (NAPEG #L1028), and a Licensee of the Ordre de Geologues de Québec (OGQ Spec Auth. #373) as well as a Fellow of the Geological Association of Canada.

I have worked as a geologist for more than 30 years since graduation from Duke University in 1981. From 1981 to 1986, I worked for Cities Service Oil and Gas Corporation (later Occidental Petroleum) as an exploration geologist generating and evaluating hydrocarbon prospects in the Gulf of Mexico. Between 1987 and 1993, I completed my M.Sc. and Ph.D. degrees and worked as a research and teaching assistant at the University of British Columbia. From 1993 to the present, I have worked in mineral exploration, including diamonds, gold, silver, nickel, copper, lithium, potash, graphite, tungsten and the platinum group metals, first for Canamera Geological (later Meridian Geoscience), and since 2002 as an independent consulting geologist. I was appointed a Senior Associate Geologist by Watts, Griffis and McQuat Consulting Geologists and Engineers, Toronto Canada in 2004.

I have read the Canadian National Instrument 43-101 (“NI 43-101”) and the technical report and declare to the best of my knowledge, information and belief that as of the effective date, the technical report contains all scientific and technical information that is required to make the report not misleading.

I certify that by reason of my education, affiliation with appropriate professional associations (as defined in NI 43-101) and past relevant work experience, I fulfill the requirements to be a “Qualified Person” for the evaluation of early stage exploration properties for the purposes of NI 43-101 and this report. I have examined, evaluated and reported on diamond, gold, PGE, silver, potash, uranium and many more commodities in many parts of the world including the Northwest Territories, Saskatchewan, Ontario, Quebec, Guyana, Costa Rica, Russia, Argentina and Brazil.

I prepared and am responsible all items of this report entitled “TECHNICAL REPORT ON THE DUVAY-CHENIER GOLD PROPERTY FOR SECOVA METALS CORP” which was written for Secova Metals Corp.

I made a site visit to the property on May 10 to 12, 2017, personally inspecting the Duvay Zone Principal, Duvay Zone de la Fosse and Grenadier showings, as described in the text.

I provided consulting services to underlying property owners Tres-Or resources Ltd. regarding the Duvay gold project (Duvay Zone Principal) between 2010 and 2013, serving as the geologist responsible for their 2010 bulk sample program and 2011 drill program.. The relevant aspects of this work are described in the Exploration section of the report. I have no prior relation to Secova Metals Corp nor any of its principals or related parties.

I am not aware of any material fact or material change with respect to the subject matter of the Technical Report as of the effective date of the report that is not reflected in the Technical Report, the omission to disclose which makes the Technical Report misleading.

I hold no stock in Secova Metals Corp, nor Tres-Or Resources Ltd, nor any related party, nor any property within 2 kms of the property that is the subject of this report. I am independent of the issuer.

I have read National Instrument 43-101 and Form 43-101F, and the Technical Report, and the Technical Report has been prepared to the standards of that instrument and form.

“Harrison Cookenboo”

July 1, 2017

Harrison O. Cookenboo Ph.D., P.Geo.
