1. NATURE OF OPERATIONS AND GOING CONCERN

Montana Gold Mining Company Inc. ("the Company" or "Montana") was incorporated under the Ontario Business Corporations Act on December 21, 2000. The Company has three wholly-owned subsidiary corporations, Montana Gold Subsidiary Corporation, a United States corporation, Celerity Mineral Corporation, a Canadian corporation and Celerity Subsidiary Corporation, a United States corporation.

The Company is engaged in the business of locating and exploring mineral properties. Substantially all of the efforts of the Company are devoted to these business activities. To date, the Company has not earned significant revenues and is considered to be in the exploration stage. The head office and principal address of the Company is 380 Wellington Street, 6th Floor, London City Centre, Tower B, London, Ontario, N6A 5B5.

While these unaudited condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis that presumes the realization of assets and discharge of liabilities in the normal course of business, there are material uncertainties related to adverse conditions and events that cast significant doubt on the Company's ability to continue as a going concern.

During the period ended March 31, 2014, the Company incurred a net loss of \$228,188 (December 31, 2013 - \$100,446) and, as of that date, the Company had accumulated a deficit of \$9,751,912 (December 31, 2013 - \$9,523,724), a working capital deficiency of \$525,270 (December 31, 2013 - \$514,247) and negative cash flows from operations of \$99,200 (December 31, 2013 - \$283,570). These factors create material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern.

As is common with exploration companies, the Company is dependent upon obtaining necessary equity financing from time to time to finance its on-going and planned exploration activities and to cover administrative costs.

Recovery of the carrying value of the mining claims and the related deferred exploration expenditures are dependent upon the discovery of economically recoverable resources, the ability of the Company to obtain necessary financing to continue exploration and development, the ability of the Company to secure and maintain title and beneficial interest in the properties, entering agreements with others to explore and develop the properties and upon future profitable production or proceeds from disposition of such properties.

These unaudited condensed interim consolidated financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue operations. Such adjustments would be material.

7. STOCK OPTIONS AND WARRANTS

(a) Stock Options

The Company has a Stock Option Plan (the "Plan") to provide options for the benefit of employees, directors and third parties. The maximum number of shares allocated to and made available to be issued under the Plan shall not exceed 10% of the common shares issued and outstanding (on a non-diluted basis) at any time. The exercise price of options granted under the Stock Option Plan will be determined by the directors, but will be at least equal to the closing trading price for the common shares for the last trading day prior to the grant and otherwise the fair market price as determined by the Board of Directors. The term of any option granted shall not exceed five years. Except as otherwise provided elsewhere in the Stock Option Plan, the options shall be cumulatively exercisable in installments over the option period at a rate to be fixed by the Board of Directors. The Company will not provide financial assistance to any optionee in connection with the exercise of options.

The Company issued stock options to acquire common shares as follows:

	March 31, 2014		December 31, 2013	
	Number of Options	Weighted Average Exercise Price (CDN)	Number of Options	Weighted Average Exercise Price (CDN)

7. STOCK OPTIONS AND WARRANTS (Cont'd)

(a) Stock Options (Cont'd)

The above options were not included in the computation of diluted net loss per share as they are anti dilutive.

- (i) On March 25, 2014, the Company granted 150,000 stock options to a consultant. Each option entitles the holder to purchase one common share at \$0.05 CDN per share at any time on or before December 24, 2015. 30,000 options vest upon grant, 30,000 options vest June 25, 2014, 30,000 options vest September 25, 2014, 30,000 options vest December 25, 2014 and 30,000 options vest March 25, 2015.

In the absence of a reliable measurement of the services received, the transaction has been measured at the fair value of the stock options issued. The fair value of these stock options of \$4,356 was estimated at the grant date based on the Black-Scholes pricing model, using the following weighted average assumptions:

Stock price	\$0.05 CDN
Expected dividend yield	Nil
Exercise price	\$0.05 CDN
Risk-free interest rate	1.07%
Expected life	1.75 years
Expected volatility (based on historical prices)	140%

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable measure of the fair value of the Company's stock options.

(a) Market Risk

(i) Currency risk

The Company operates internationally and is exposed to foreign exchange risk from the Canadian Dollar. Foreign exchange risk arises from purchase transactions as well as recognized financial assets and liabilities denominated in foreign currencies.

As at March 31, 2014 the Company is exposed to currency risk through the following financial assets and liabilities denoted in Canadian dollars:

	March 31, 2014	December 31, 2013
Cash	\$ 4,094	\$ 4,355
Accounts payable and accrued liabilities	\$ 565,807	\$ 549,556

The above balances were translated into US dollars at the period-end rate of \$0.9047 (December 31, 2013 - \$0.9402) Canadian dollars to every US dollar.

Based on the above net exposures as at March 31, 2014, assuming that all other variables remain constant, a +/- 5% change in the Canadian dollar against the United States dollar would result in an increase/decrease in net loss of approximately \$26,000.
