Chlormet to purchase I-502 property in Washington State

Vancouver, British Columbia (November 4, 2014) – Chlormet Technologies Inc. (CSE: PUF) (“Chlormet” or “the Company”) is pleased to announce that it has entered into escrow for the purchase of an I-502 compliant 9.7 acre parcel of land in Whatcom County, Washington State.

The property fulfills all of the Company’s criteria for its planned expansion into Washington State. It is permitted for light industrial use, is I-502 compliant, currently contains a 13,000 square foot building and has sufficient room for expansion. The existing building is insulated, was built in 2008 and is ready to be built-out to accommodate a marijuana grow licence.

Chlormet intends to become involved in the legal marijuana industry in Washington State by providing buildings, equipment and non-grow related services to licensed producers and processors via long term leases and property management contracts.

The purchase price for the property is \$1,200,000 US and the Company has made a refundable payment into escrow upon acceptance of its offer. The Company now has up to 60 days to complete its due diligence. Subject to closing, the Company has secured third party mortgage financing for the purchase price with a US lender.

At 9.7 acres, the site is large enough for expansion via construction of additional buildings. During the due diligence period the Company will be working together with its architect to develop its future plans for the property such that it will facilitate multiple licenced grow and processing licensees.

About Chlormet Technologies

Chlormet Technologies Inc. is moving into the Medical Marijuana sector by purchasing a 100% interest in AAA Heidelberg, a private Ontario company that is in the process of applying for a MMPR license. Although the Company cannot guarantee nor estimate the timing for the issuance of a license to AAA Heidelberg, it is Chlormet’s goal to become the next publicly traded Canadian company to be granted a new medical marijuana production license.

With the signing of an LOI with Babcock Bench Farms (see news release dated June 19, 2014) Chlormet intends to become involved in the legal marijuana industry in Washington State by providing building, equipment and non-grow related services to licensed growers.

ON BEHALF OF THE BOARD OF DIRECTORS

"Yari Nieken"

Interim President and CEO
