Supplemental cash flow information (Note 24)

1. NATURE OF OPERATIONS AND GOING CONCERN

Agra Ventures Ltd. (formerly AgraFlora Organics International Inc.) (the "Company" or "Agra Ventures") was incorporated on June 24, 2004 pursuant to the Business Corporations Act (British Columbia). The diversified Company is focused exclusively on the cannabis industry. On July 26, 2021, the Company changed its name to Agra Ventures Ltd. from AgraFlora Organics International Inc. The Company's flagship assets include its 70% equity interest in Propagation Services Canada, a 2,200,000 sq. ft. greenhouse complex in Delta, B.C. In addition, Agra Ventures' wholly owned subsidiary AgraFlora Europe GmbH is a distributor of medical cannabis in Europe. The Company's corporate office is located at Suite 810, 789 West Pender Street, Vancouver, British Columbia V6C 1H2. The Company trades on the Canadian Stock Exchange (the "CSE") under the symbol "AGRA". The Company also trades on the OTC Pink Sheets ("OTCPK") under the symbol "AGFAF" and the Frankfurt Stock Exchange under the symbol "PU3".

These consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. Further discussion of liquidity risk has been disclosed in Note 25. At March 31, 2022, the Company has working capital deficit of $19,530,006 (December 31, 2021 – $20,194,836), and an accumulated deficit of $204,354,663 (December 31, 2021 - $206,243,336).

The Company generates minimal cash flow from operations and therefore relies upon the issuance of securities for financing. The Company intends to continue relying upon the issuance of securities to finance its operations to the extent such instruments are issuable under terms acceptable to the Company. While the Company has been successful in raising funds in the past, it is uncertain whether it will be able to raise sufficient funds in the future. In addition, the Company faces uncertainty with respect to potential future business impacts resulting from the continuing COVID-19 global pandemic, further described in Note 2. These events and conditions create a material uncertainty, which may cast significant doubt upon the Company's ability to continue as a going concern. If the Company is unable to secure additional financing, repay liabilities as they come due, negotiate suitable joint venture agreements, and/or continue as a going concern, then material adjustments would be required to the carrying value of assets and liabilities and the statement of financial position classifications used. These consolidated financial statements have been prepared on a going concern basis, and do not include any adjustments relating to the recovery of assets and classification of assets and liabilities that may arise should the Company be unable to continue as a going concern.

2. BASIS OF PREPARATION

Basis of preparation

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS34") using accounting policies consistent with International Financial Reporting Standards ("IFRS").

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") on a historical cost basis except for financial instruments that have been measured at fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

2. BASIS OF PREPARATION (continued)

Basis of preparation (continued)

The condensed consolidated interim financial statements are presented in Canadian dollars and are prepared in accordance with the same accounting policies, critical estimates and methods described in the Company's annual consolidated financial statements, except for the adoption of new accounting standards and/or estimates identified in Note 3. Given that certain information and disclosures, which are included in the annual audited consolidated financial statements, have been condensed or excluded in accordance with IAS 34, these financial statements should be read in conjunction with our annual audited consolidated financial statements as at and for the year ended December 31, 2021, including the accompanying notes thereto.

These condensed interim consolidated financial statements were approved by the Board of Directors and authorized for issue on May 30, 2022.

Basis of Consolidation

A subsidiary is an entity the Company controls when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. These condensed interim consolidated financial statements include the accounts of the Company and its subsidiaries:

AgraFlora Holdings Corp. (Note 12)	100%	100%	Canada

Intercompany balances and transactions, including unrealized income and expenses arising from intercompany transactions, have been eliminated in preparing the condensed interim consolidated financial statements.

Presentation and functional currency

The functional currency of the parent company, is the Canadian dollar, which is also the presentation currency of the consolidated financial statements. The functional currency is the Canadian dollar for the Company's Canadian subsidiaries, and the Euro is the functional currency for AgraFlora Europe GmbH.

2. BASIS OF PREPARATION (CONTINUED)

Presentation and functional currency (continued)

Transactions in foreign currencies are initially recorded in the functional currency by applying exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are re-translated to the functional currency at the closing rate (the exchange rate at the reporting date). Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rate at the date of the original transaction. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are re-translated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on re-translation are recognized in the profit or loss.

The financial results and financial position of foreign operations whose functional currency is different from the Company's presentation currency are translated as follows:

- assets and liabilities are translated at period-end exchange rates prevailing at that reporting date; and
- income and expenses are translated at average exchange rates for the period.

Exchange differences arising on translation of foreign operations are recognized in accumulated other comprehensive income as foreign exchange gain on translating foreign operations. These differences are recognized in the profit or loss in the period in which the foreign operation is disposed

Significant accounting judgments and estimates

The preparation of these condensed interim consolidated financial statements using accounting policies consistent with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities, and the reported amounts of revenues and expenses. The preparation of these condensed interim consolidated financial statements also requires management to exercise judgment in the process of applying the accounting policies. The key sources of estimation uncertainty were the same as those that applied to the Company's audited consolidated financial statements for the year ended December 31, 2021.

COVID-19 Estimation Uncertainty

In March 2020, the World Health Organization declared the outbreak of COVID-19 a global pandemic. Government measures to limit the spread of COVID-19, including the closure of non-essential businesses, did not materially disrupt the Company's operations during the period ended March 31, 2022. The production and sale of cannabis have been recognized as essential services across Canada and Europe. As at March 31, 2022, we have not observed any material impairments of our assets or a significant change in the fair value of assets due to the COVID-19 pandemic.

Due to the rapid developments and uncertainty surrounding COVID-19, it is not possible to predict the impact that COVID-19 will have on our business, financial position and operating results in the future. In addition, it is possible that estimates in the Company's financial statements will change in the near term as a result of COVID-19 and the effect of any such changes could be material, which could result in, among other things, impairment of long-lived assets including intangibles. The Company is closely monitoring the impact of the pandemic on all aspects of its business.

(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES

In preparing these condensed interim consolidated financial statements, the significant accounting policies and the significant judgments made by management in applying the Company's significant accounting policies and key sources of estimation uncertainty were the same as those that applied to the Company's audited consolidated financial statements for the year ended December 31, 2021.

Cash and cash equivalents
Cash and cash equivalents in the consolidated statement of financial position is comprised of cash at banks and on hand, amounts held in trust with the Company's lawyers and short-term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash. The Company did not hold any cash equivalents as at March 31, 2022 or December 31, 2021.

Equity accounted investments
Equity accounted investments are those entities in which the Company has significant influence, but does not have control over the financial and operating policies of the investees. Significant influence is presumed to exist when the Company holds between 20 percent and 50 percent of the voting power of another entity. Joint arrangement entities are those over which the Company has joint control, established by contractual agreement and requiring unanimous consent for strategic, financial and operating decisions. Joint ventures are joint arrangements whereby the parties have joint control of the arrangement and have rights to the net assets of the arrangement.

Investments in associates and joint ventures are accounted for by the equity method, whereby the original cost of the investment is adjusted for the Company's share of earnings or losses less dividends since significant influence was acquired. When net accumulated losses from an equity accounted investment exceed its carrying amount, the investment balance is reduced to $nil and additional losses are not provided for unless the Company is committed to provide other financial support to the investee. The Company resumes accounting for its portion of income (loss) of the investment when the entity subsequently reports net income and the Company's share of that net income exceeds the share of net losses not recognized during the period the equity method was suspended.

Profits or losses resulting from transactions between the Company and its associates are eliminated to the extent of the interest in the associate. The Company determines at each reporting date whether there is objective evidence that the investments in associates are impaired. The financial statements of associates are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring the accounting policies of associates in line with those of the Company.

At March 31, 2022 and December 31, 2021, the Company accounts for the following entities using the equity method as the Company does not have control over these entities:

	Ownership Interest 2022	Ownership Interest 2021	Jurisdiction
Propagation Services Canada Inc. (Note 11)	70%	70%	Canada
Eurasia Infused Cosmetics Inc.	50%	50%	Canada
JJ Wolf Investment Ltd.	0%	0%	Canada

(Expressed in Canadian Dollars)

5. LOANS RECEIVABLE (CONTINUED)

As a result of executing the definitive loan agreement, the previous advances were considered extinguished and replaced with the new loan, which has been advanced to Propagation Services Canada at a below-market interest rate. The fair value of the loan on initial recognition of $12,708,263 has been determined by discounting the estimated cash flows at a rate of 15%. The interest rate of 15% is determined based on market rates of interest for similar loan instruments. The difference between the original advances and the fair value of the new loan is $25,896,081 which is included in the investment account and is considered a contribution to Propagation Services Canada (Note 11). The loan receivable is considered a performing loan, with no external credit rating. Management does not expect any credit losses to occur within the next 12-month period due to the fact that the loan is not expected to be repaid within the next 12-month period and Propagation Services Canada has begun growing biological assets under its Health Canada License, bringing that entity closer to production.

25. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

a) Classification of financial instruments

IFRS 13, *Fair Value Measurement,* establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:
Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's cash is measured using level 1 inputs and marketable securities are measured using level 2 inputs.

For the Company's derivative liabilities at level 3, the fair value was determined on a binomial lattice methodology considering both expected values with and without the conversion features of the derivative liabilities. The inputs used were the stock price on the valuation date, the risk-free rate, and a risk-adjusted discount rate, dividend yield, stock volatility and trading restrictions.

(Expressed in Canadian Dollars)

25. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

a) Classification of financial instruments (Continued)

For the Company's convertible loan receivable at level 3, the fair value of the debt component of the convertible loan receivable was calculated using the present-value of future cash flows, using the coupon interest of 10% per annum and a discount rate of 12.42%. The convertibility feature was valued using a Binomial Tree model, using the stock price of the issuer of $1.00 AUD, stock volatility of 60.8%, a risk-free-rate of 0.09%, remaining life estimated between 0.667 and 1.0 years of the convertible loan receivable, a strike price between $0.75 and $1.00, and the number of options for the convertible loan receivable of 814,500.

The Company's loans receivable and mortgages payable have carrying values that approximate their fair values due to the market rates of interest attached to those financial instruments, with the exception of the Company's loan receivable from PSC (notes 5 and 11). The loan receivable from PSC approximates its fair value, as the interest free loan has been discounted at a market rate of interest for a similar loan of 15%, and is being accreted over the term using the effective interest rate method.

The following is an analysis of the Company's financial assets and liabilities measured at fair value as at March 31, 2022 and December 31, 2021:

	As at March 31, 2022		
	Level 1	**Level 2**	**Level 3**
Cash	$ 1,089,357	-	-
Marketable securities	$ 592,879	$ 500,000	-
Convertible loan receivable (Note 15)	-	-	$ 742,194
Derivative asset (Note 15)	-	-	$ 203,157
Derivative liabilities (Note 18)	-	-	$ 28

	As at December 31, 2021		
	Level 1	**Level 2**	**Level 3**
Cash	$ 3,093,357	-	-
Marketable securities	-	$ 1,250,000	-
Convertible loan receivable (Note 15)	-	-	$ 742,194
Derivative asset (Note 15)	-	-	$ 203,157
Derivative liabilities (Note 18)	-	-	$ 28

b) Financial risk management

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk
Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist primarily of cash, convertible loan receivable and loans receivable. The Company's maximum exposure to credit risk associated with those financial instruments is $17,453,945, being the face value of those instruments at March 31, 2022 ($18,997,274 as at December 31, 2021). The Company limits its exposure to credit risk by placing its cash with a high credit quality financial institution in Canada.

25. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

b) Financial risk management (Continued)

Credit risk (Continued)
The Company actively manages its exposure to credit risk, reducing the amount and duration of credit exposures, through close monitoring of relevant accounts.

The loans receivable and convertible loan receivable expose the Company to credit risk and the Company has limited this exposure by securing the PSC loan with collateral; the other loan is unsecured. The PSC loan, up to $50,000,000, is secured by a General Security Agreement which PSC grants to the Company a security interest in, and assigns, mortgages, pledges and charges to and in favor of the Company, all its present and after-acquired personal property, and all proceeds thereof and therefrom, including all right, title and interest of the Company, whether now held or hereafter acquired. The convertible loan receivable is convertible into shares of the entity that issued it.

Liquidity risk
Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company must raise funds to meet commitments associated with financial instruments and with the construction of its cannabis facilities in Ontario and British Columbia. The Company manages liquidity risk by maintaining adequate cash balances.

The Company's expected source of cash flow in the upcoming year will be through equity financing. Cash on hand at March 31, 2022 and expected cash flows for the next 12 months are sufficient to fund the Company's ongoing operational needs for the coming year. The Company will need additional funding through equity or debt financing, or a combination thereof, to complete its facilities.

Market risk
Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices such as interest rates, foreign exchange rates, and commodity and equity prices.

(a) Interest rate risk
Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. For the Company, interest rate risk consists of two components: to the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates the Company is exposed to interest rate cash flow risk; and to the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities the Company is exposed to a change in fair value of the financial instruments. Assuming all other variables remain constant, a 1% (December 31, 2021 – 1%) change in the interest rate would result in approximately increase of $29,244 (December 31, 2021 –$50,855) in interest expense in the consolidated statement of comprehensive loss.

(b) Foreign currency risk
Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities are denominated in foreign currencies. One of the Company's subsidiary's business is primarily conducted in Euros. As such, the Company is exposed to foreign currency risk in fluctuations among the Canadian dollar and the Euro. Assuming all other variables remain constant, a 15% (December 31, 2021 – 15%) weakening or strengthening of the Euro against the Canadian dollar would result in approximately $7,790 (December 31, 2021 - $15,350) foreign exchange loss or gain in the consolidated statement of comprehensive loss. The Company has not hedged its exposure to currency fluctuations.

The Company has not entered into any foreign currency hedging contracts to mitigate foreign currency risk.

25. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

b) Financial risk management (Continued)

Market risk (Continued)

(c) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of change in market prices (other than those arising from interest rate or foreign currency risk). The Company's investments in marketable securities were with entities that did not have their shares listed on a stock exchange at December 31, 2021. As at March 31, 2022, a portion of the Company's investments in marketable securities were listed on a stock exchange, thus those securities will fluctuate in value as a result of fluctuations in their estimated fair values. The Company is exposed to risk of loss of those investments in the amount recorded on the consolidated statement of financial position, should those investments become listed on a stock exchange and suffer a decline in fair value, and or fail to have a market develop where those investments can be sold. Based on the Company's investment portfolio at March 31, 2022, a 79% (December 31, 2021 – 0%) increase or decrease in the fair value of the securities held would result in an increase/decrease to profit or loss of approximately $100,000 (December 31, 2021 - $Nil).

(d) Capital risk management

The Company manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to stakeholders through a suitable debt and equity balance appropriate for an entity of the Company's size and status. The Company's overall strategy remains unchanged from last year.

The capital structure of the Company consists of shareholders' equity, which totaled $20,764,245 at March 31, 2022 (December 31, 2021 - $19,048,620). The availability of new capital will depend on many factors including positive stock market conditions, and the experience of management. The Company is not subject to any external covenants on its capital.

26. COMMITMENTS AND CONTINGENCIES

During the year ended December 31, 2019, the Company's subsidiary entered into a lease agreement for a leased facility in Manitoba. On April 6, 2021, the Company sold its subsidiary and no longer has commitments for lease amounts subsequent to the sale (Note 28).

The Company believed these claims were without merit and intended to vigorously defend itself. During the period ended March 31, 2022, the Company settled outstanding legal claims totalling $450,000 with the former President and CEO through the issuance of common shares and payment of cash (Notes 16 and 20).
