PAMPA METALS CORPORATION

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Unaudited - Expressed in Canadian Dollars)
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2024 AND 2023

1. NATURE OF OPERATIONS AND GOING CONCERN

Pampa Metals Corporation (the "Company" or "Pampa") is a mining exploration company focused on exploration of base metals and precious metals projects in the Americas, with a primary focus on the Piuquenes Copper-Gold Porphyry Project in San Juan, Argentina. The Company was incorporated under the British Columbia Business Corporations Act in 1999. The Company's head office and records office is 501 - 543 Granville Street, Vancouver, British Columbia. The Company's registered office is 1200 - 750 West Pender Street, Vancouver, British Columbia. The Company trades on the Canadian Securities Exchange (the "CSE"; CSE: PM); the Frankfurt Stock Exchange (FSE: FIR); and on the OTCQB (OTCQB: PMMCF).

Going concern

The Company's financial statements have been prepared on a going concern basis, which presumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future.

The Company is in the process of exploring its mineral property interests and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of mineral property interests is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of its mineral properties and upon future profitable production.

Several conditions cast doubt on the validity of the going concern assumption. The Company has incurred losses since inception and an accumulated deficit of \$18,702,757 as at the reporting date. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

The ability of the Company to continue as a going concern and meet its commitments as they become due, including the acquisition and exploration of mineral property interests, is dependent on the Company's ability to obtain necessary financing. Management is planning to raise additional capital to finance operations and exploration activities. The ability of the Company to continue as a going concern depends upon its ability to develop profitable operations and to continue to raise adequate financing. These circumstances indicate that material uncertainties exist that may cast significant doubt about the Company's ability to continue as a going concern and, accordingly, the ultimate use of accounting principles applicable to a going concern.

2. SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

Basis of preparation and measurement

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS"), applicable to preparation of interim financial statements including International Accounting Standard 34 Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed interim consolidated financial statements have been prepared on a historical cost basis, except for financial instruments, which have been measured at fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information. These condensed interim financial statements follow the same accounting policies and methods of application as the Company's most recent annual consolidated financial statements and should be read in conjunction with the annual audited consolidated financial statements of the Company for the year ended December 31, 2023.

Certain new accounting standards have been amended effective January 1, 2024. The Company has evaluated these standards and determined that they are not expected to have a significant effect on its financial statements.

8. FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT (cont'd...)

Capital management

The Company defines its capital as shareholders' equity. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration and development of mineral property interests. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The mineral property interests in which the Company currently has an interest in are at the exploration stage. As such, the Company has historically relied on the equity markets to fund its activities. In addition, the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will need to raise additional funds. The Company will continue to assess new properties and seek to acquire an interest in additional mineral properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company's capital management objectives, policies and processes have remained unchanged during the nine months ended September 30, 2024. The Company is not subject to any capital requirements imposed by a lending institution or regulatory body.

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate risk, foreign currency risk and commodity price risk). Risk management is carried out by the Company's management team, with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance on overall risk management.

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfil its payment obligations. The Company's cash is largely held with Canadian financial institutions. The Company does not have any asset-backed commercial paper. The Company maintains cash deposits with a Schedule A financial institution, which from time to time may exceed federally insured limits. The Company has not experienced any significant credit losses and believes it is not exposed to any significant credit risk.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities that require the use of cash. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. As at the reporting date, the Company had working capital of \$2,687,778 (December 31, 2023 - working capital of \$1,724,563).

Foreign exchange risk

The Company's functional and reporting currency is the Canadian dollar and substantially all expenditures of the parent company are denominated in Canadian dollars and substantially all expenditures in Argentina are denominated in the Argentine Peso. A 10% appreciation (depreciation) of these currencies against the Canadian dollar, with all other variables held constant, would not result in any significant changes to the Company's loss and comprehensive loss for the year.
