Management's Responsibility for Financial Reporting

The accompanying unaudited condensed interim consolidated financial statements of **Stockport Exploration Inc.** are the responsibility of management and have been approved by the Board of Directors. The unaudited condensed interim consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards ("IFRS"). The unaudited condensed interim consolidated financial statements include certain amounts and assumptions that are based on management's best estimates and have been derived with careful judgment.

In fulfilling its responsibilities, management has developed and maintains a system of internal accounting controls. These controls are designed to provide reasonable assurance that the financial records are reliable for the preparation of the financial statements. The Audit Committee of the Board of Directors reviewed and approved the Company's unaudited condensed interim consolidated financial statements and recommended their approval by the Board of Directors.

These unaudited condensed interim consolidated financial statements have not been reviewed by the external auditors of the Company.

STOCKPORT EXPLORATION INC.
Notes to Unaudited Condensed Interim Consolidated Financial Statements
For the periods ended January 31, 2015 and 2014

(expressed in Canadian dollars unless otherwise noted)

1. Nature of operations

These unaudited condensed interim consolidated financial statements include the accounts of Stockport Exploration Inc. (the “Company”) and its wholly-owned subsidiaries, 6321593 Canada Inc., Stockport Exploration of Kenya Limited, and Minera Zapoteca, S.A. de C.V.

The Company is in the process of exploring its resource properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. To date, the Company has not earned significant revenues. The recoverability of the amounts shown for resource properties and related deferred costs is dependent upon the discovery of economically recoverable reserves, obtaining necessary financing and permitting to complete the development, and future profitable production or proceeds from the disposition thereof. The Company is incorporated and domiciled in Canada, and its head office is located at 1969 Upper Water Street, Suite 2001, Halifax, Nova Scotia, Canada.

2. Basis of Presentation and Going Concern

Going Concern

These unaudited condensed interim consolidated financial statements have been prepared using International Financial Reporting Standards applicable to a going concern, which contemplate the realization of assets and settlement of liabilities in the normal course of business as they come due.

For the three-month period ended January 31, 2015, the Company incurred a net loss of approximately \$0.1 million (year-ended October 31, 2014 - \$2.0 million) and had an accumulated deficit of approximately \$20.7 million as at January 31, 2015 (year-ended October 31, 2014 - \$20.6 million). The Company has no income or cash flow from operations and at January 31, 2015, had a negative working capital balance of approximately \$0.8 million (year-ended October 31, 2014 - negative working capital balance of \$0.7 million). In addition to its working capital requirements, the Company must secure sufficient funding to maintain legal title to its resource properties, to fund its exploration and development activities and to fund its general and administrative costs. Such material uncertainties cast significant doubt as to the ability of the Company to meet its obligations as they come due and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern.

Management is evaluating alternatives to secure additional financing so that the Company can continue to operate as a going concern. Nevertheless, there is no assurance that these initiatives will be successful or sufficient.

The Company’s ability to continue as a going concern is dependent upon its ability to fund its working capital and exploration requirements and eventually to generate positive cash flows, either from operations or the sale of properties. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

Notes to Unaudited Condensed Interim Consolidated Financial Statements

For the periods ended January 31, 2015 and 2014

Statement of Compliance

The Company prepares its unaudited condensed interim consolidated financial statements in accordance with Canadian generally accepted accounting principles as set out in the Handbook of Chartered Professional Accountants of Canada – Part 1 (“CPA Canada Handbook”), which incorporates International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* (“IAS 34”), as issued by the IASB. Accordingly, certain information normally included in annual financial statements prepared in accordance with IFRS, as issued by the IASB, have been omitted or condensed. The unaudited condensed interim consolidated financial statements should be read in conjunction with the Company’s annual audited consolidated financial statements for the year-ended October 31, 2014.

The policies applied in these unaudited condensed interim consolidated financial statements are based on the IFRS as of March 11, 2015, the date the Board of Directors approved the financial statements. Any subsequent changes to IFRS that are given effect in the Company’s annual consolidated financial statements for the year-ended October 31, 2015 could result in the restatement of these unaudited condensed interim consolidated financial statements.

Basis of Presentation

The condensed interim consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments recorded at fair value. Items included in the financial statements of each of the Company’s subsidiaries are measured using the currency of the primary economic environment in which the entity operates (“functional currency”). The Company’s functional currency is the Canadian dollar. The unaudited condensed interim consolidated financial statements are presented in Canadian dollars, which is also the presentation currency of the Company.

Use of Estimates and Judgments

The preparation of financial statements under IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and revenue and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and further periods if the review affects both current and future periods.

STOCKPORT EXPLORATION INC.

Notes to Unaudited Condensed Interim Consolidated Financial Statements

For the periods ended January 31, 2015 and 2014

3. Significant Accounting Policies

These financial statements have been prepared using the same policies and methods of computation as the annual consolidated financial statements of the Company for the year-ended October 31, 2014. Refer to note 3, *Significant Accounting Policies*, of the Company's annual consolidated financial statements for the year-ended October 31, 2014 for information on the accounting policies as well as new accounting standards not yet effective.

4. Financial Instruments

The Company recognizes financial instruments based on their classification. Depending on the financial instruments' classification, changes in subsequent measurements are recognized in net income (loss) or comprehensive income (loss).

If a financial instrument is measured at fair value, changes in its fair value shall usually be recognized in net income (loss) in the period in which the change occurs, with some exceptions, such as for cash flow hedges and available-for-sale investments. For investments designated as being available-for-sale, changes in the fair value shall be recorded directly in Shareholders' Equity in a separate account called "Accumulated Other Comprehensive Income (Loss)" until the asset is disposed of or becomes impaired. At that time, the gains and losses are transferred to net income (loss).

The Company has implemented the following classifications:

- Cash and restricted cash are classified as "Loans and Receivables." After their initial fair value measurement, they are measured at amortized cost using the effective interest method.
- Marketable securities are classified as "Available-for-Sale". Financial assets classified as Available-for-Sale are recognized initially at fair values plus transaction costs and are subsequently carried at fair value, with changes in the fair value recorded in other comprehensive income.
- Accounts payable and accrued liabilities are classified as "Other Financial Liabilities." After their initial fair value measurement, they are measured at amortized cost using the effective interest method.
- Embedded derivatives are classified as "Financial Assets or Financial Liabilities at Fair Value through Profit or Loss". The convertible debentures issued on October 31, 2013 included certain embedded derivatives, which are included in convertible debentures on the statement of financial position. After initial recognition at fair value, the embedded derivatives are remeasured each period at fair value, with changes in fair value recognized in non-operating income in the consolidated statement of comprehensive loss.

a) Fair value

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

STOCKPORT EXPLORATION INC.

Notes to Unaudited Condensed Interim Consolidated Financial Statements

For the periods ended January 31, 2015 and 2014

The carrying values of cash and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

b) Foreign currency rate risk

A portion of the Company's transactions occur in United States, Mexican and Kenyan currencies; accordingly, the related financial assets are subject to fluctuations in the respective exchange rates.

For the period ended January 31, 2015, the sensitivity of the Company's net income due to changes in the exchange rate between the Canadian dollar and foreign currencies (primarily the United States dollar and the Kenyan shilling) would have impacted net income by \$4,155 for a 5% increase or decrease in the Canadian dollar.

c) Concentration of credit risk

Management does not believe it is exposed to any significant concentration of credit risk except that a significant portion of its cash is on deposit with major Canadian and Kenyan banks. All of the sales taxes recoverable are with either the government of Canada or the government of Mexico.

d) Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due (note 2).

e) Interest rate risk

The Company has cash; accordingly, the Company's interest income is susceptible to fluctuations in interest rates. The convertible debentures were issued on October 31, 2013. The payments required on the convertible debentures are subject to a number of factors, as outlined in note 11, which results in interest rate risk.

5. Capital Management

The Company's capital structure consists of share capital, warrants and contributed surplus, which at January 31, 2015 totalled \$27.0 million (year-ended October 31, 2014 - \$27.0 million). The Company's objective when managing capital is to maintain adequate levels of funding to support the acquisition and exploration of resource properties and maintain the necessary corporate and administrative functions to facilitate these activities. This is done primarily through equity financing. Future financings are dependent on market conditions, and there can be no assurance the Company will be able to raise funds in the future.

There were no changes to the Company's approach to capital management during the period. The Company is not subject to externally imposed capital requirements.

Kenya

i) Nyanza

The Company has an agreement with East African Pure Gold Limited ("EAPG") and B&M Mining Company Limited ("B&M") to earn an interest in three mineral exploration concessions located in Kenya. Under the terms of the agreement, the Company has:

- A first option to earn a 70% interest on completing exploration expenditures of US \$600,000 and making cash payments of US \$300,000 to EAPG and B&M by August 2016. The required exploration expenditures have been incurred, and cash payments of US \$28,000 have been made to date.
- A second option to earn an 80% interest by exercising the first option and incurring cumulative exploration expenditures of US \$4.0 million.
- Within 90 days of completion of the second option, EAPG and B&M can deliver a one-time joint election to fund its 20% share of exploration costs, or EAPG and B&M can grant the Company a future option to acquire an additional 10% interest by funding additional exploration expenditures of US \$10.0 million. The Company will remain the operator on the concessions and is not obligated to incur additional exploration expenditures.
- Within 90 days of completion of a positive feasibility study and receipt of a production notice from the Company for each project, EAPG and B&M can deliver a one-time joint election to fund its 10% or 20% share of the construction costs, or EAPG and B&M can grant the Company a further option to acquire an additional 5% interest by funding additional costs of US \$10.0 million. The Company is not obligated to advance a project, covered by a feasibility study, to production.
- The Company maintains a 100% right to any surface mineralization to a depth of one metre below saprolite.

SPL 214, which is part of the Nyanza property, is subject to a 2% net smelter royalty. 1% of the net smelter royalty is payable to African Queen Mines Limited (“AQ”), and 1% is payable to AQ’s partner, Abba Mining Company Limited.

Canada

i) KM61

The Company holds a 100% interest in the KM61 property, which is a molybdenum-copper-silver prospect, located in northwestern Ontario, contiguous with the Seymour Lake project. The majority of the KM61 property, including the mineralized zone, is subject to a 0.5% net smelter royalty. Of the remaining claims on the KM61 property, certain portions are subject to a 3% net smelter royalty and the balance are not subject to any royalties. The Company can repurchase 50% of the 0.5% net smelter royalty for \$250,000 and/or 50% of the 3% net smelter royalty for \$1.0 million.

During the year-ended October 31, 2012, the Company identified various indicators of impairment of the property, including declines in the prices of molybdenum, copper and silver, a lack of recent exploration work with no significant exploration work planned in the foreseeable future, as well as a strategic shift in the Company’s exploration focus towards its Kenyan operations. Given the stage of exploration of the property, the estimated fair value of \$4.0 million was determined based on a review of comparable sale transactions of resource properties. The resulting impairment charge of \$4.4 million was charged to expenses. This write-down was approximately 50% of the carrying value prior to the recorded impairment.

As at January 31, 2015 and at October 31, 2014, the Company determined that there were no indicators of additional impairment or impairment reversals. Management is currently assessing options to fund additional exploration of KM61.

As at January 31, 2015 or October 31, 2014, if it were determined that the estimated fair value of the property should have been 10% higher or lower, this would result in an increase or decrease of the impairment charge by approximately \$400,000. The manner and amount of the ultimate realization of the KM61 property remains subject to significant uncertainty.

ii) Seymour Lake

The Company holds a 100% interest in the Seymour Lake property, which is a tantalum-lithium-beryllium prospect located in northwestern Ontario, in the Crescent Lake area of the Thunder Bay Mining District. Certain portions of the Seymour Lake property are subject to a 3% net smelter return royalty, of which 1.5% can be purchased by the Company for \$1.0 million.

As at January 31, 2015, 2,965,938 options were available for granting under the Plan (October 31, 2014 – 2,930,022).

The estimated value of options earned during the three-month period ended January 31, 2015 was \$22,244 (year ended October 31, 2014 - \$79,981). The Company capitalized \$85 (October 31, 2014 - \$1,001) in non-cash share-based compensation expense to resource properties, with the balance of \$22,159 (October 31, 2014 - \$78,980) charged to operations.

11. Convertible Debentures

On October 31, 2013, the Company completed a private placement of 1,196 units at a price of \$1,001 per unit, for aggregate gross proceeds of \$1,197,196. The proceeds of the financing are being used to fund expenditures, including a two-phased exploration and potential surface gold recovery program at the Company's Nyanza Project:

- Phase I - sampling, metallurgy, permitting and plant equipment procurement; and
- Phase II – capital investment and plant operation for the surface gold recovery program. Until the Company advanced to Phase II, 75% of the gross proceeds, being \$897,897, were held in trust with a Kenyan law firm. At the Company's discretion, it was entitled to advance to Phase II with the completion of a successful Phase I.

STOCKPORT EXPLORATION INC.
Notes to Unaudited Condensed Interim Consolidated Financial Statements
For the periods ended January 31, 2015 and 2014

During the year ended October 31, 2014, the Company elected to proceed with Phase II. As a result, the convertible debenture holders are now entitled to receive:

- a repayment of the convertible debenture in the amount of 100% of the investment (\$1,000 per unit) based on 75% of free cash flow generated from the surface gold recovery project;
- a right to purchase a preferred share in Stockport Mining Kenya (“SMK”), a subsidiary of the Company to be incorporated. \$1 per unit will be allocated to the cost of the preferred share. The preferred share will pay a premium entitlement of 110% of the original investment (\$1,100 per unit) from 75% of free cash flow generated from the gold recovery project and is then redeemed by SMK; and
- if the amount of the debenture plus the 110% premium entitlement is not paid within the five year maturity date of October 31, 2018, then the amount of debt and premium entitlement, less any repayments to that date, will be converted into common shares of the Company at a conversion price of \$0.50 per share.

Under the terms of this financing, the Company also issued 1,000 warrants with each unit. The 1,196,000 warrants are exercisable at the commencement of Phase II at a price of \$0.10 per share and expire on October 31, 2018. An initial value of \$30,000 was assigned as the fair value of the warrants.

Details of the amounts repayable related to the convertible debenture are as follows:

	January 31, 2015
	\$
Phase I	299,299
Phase II	<u>897,897</u>
Total financing proceeds after Phase I and Phase II	1,197,196
Premium entitlement (110%)	<u>1,316,916</u>
Total amount to be repaid by October 31, 2018	<u>2,514,112</u>
Estimated fair value of amount to be repaid	1,831,306
Less: current portion of convertible debentures	<u>(425,000)</u>
Long-term portion of convertible debentures	<u>1,406,306</u>

The Company has estimated the fair value of this liability based on the net present value of 75% of projected future cash flows from operating the surface gold recovery program until October 31, 2018, using a discount rate of 20%, resulting in a fair value of \$1,831,306 (October 31, 2014 - \$1,831,306). The current portion of the fair value of this liability is estimated to be \$425,000 (October 31, 2014 - \$275,000).

17. Subsequent Event

Subsequent to the three-month period ended January 31, 2015, the Company completed a \$295,000 bridge loan financing from various directors and other private investors of the Company by the issuance of 12% unsecured convertible promissory notes (the “Notes”). The principal amount of the Notes will bear interest at 12% per annum, payable quarterly commencing August 25, 2015, and will be repayable by the Company on or before the maturity date of February 25, 2018.

The principal amount of the Notes is convertible into common shares of the Company at the election of the holder at the rate of \$0.05 of principal converted per share (the “Conversion Price”). If the Notes are not repaid within three days of the maturity date of February 25, 2018, the Notes will be automatically converted into common shares of the Company. In this event, the principal amount of the Notes will be converted into shares at the Conversion Price. If interest is not paid each quarter, any accrued interest can be converted, at the option of the holder, into shares at the five-day Volume Weighted-Average Price (“VWAP”) preceding the date of conversion.
