

NEWS RELEASE

MEADOW BAY GOLD REPORTS DRILL RESULTS

Vancouver, BC – November 19, 2015 Meadow Bay Gold Corporation (“Meadow Bay Gold” or the “Company”) (TSX:MAY) (OTCQB:MAYGF) (Frankfurt: 20M, WKN A1C3DN) is pleased to report it has received additional assay results from drilling its Atlanta Gold Mine Project, Lincoln County, Nevada.

The current drill program has achieved the objective to in-fill ‘donut holes’ in the existing resource. The hole penetrated a sequence of post-mineral volcanoclastic sediments before intersecting the Atlanta porphyry which overlies the Atlanta Shear Zone.

Table showing new significant intercepts from holes 2 to 4 of the 2015 Atlanta drill program:

Drill Hole	Target	Total Depth (m)	From (m)	To (m)	Length (m)	Au g/t	Ag g/t
DHRI-15-LRC02	Atlanta Shear Zone / Porphyry	1300				NSV	NSV
DHRI-15-LRC03	Atlanta Shear Zone	1110	950	1090	140	1.46	6.5
DHRI-15-LRC04	Atlanta Porphyry	1165	875	1055	80	1.11	NSV

Abbreviations: Au = gold; Ag = silver; g/t = grams per tonne, m = metre

“We are encouraged by the results and we expect to increase not only the size of the resource but also the confidence level,” stated Meadow Bay CEO Christopher Crupi.

Layne Christensen Company of Chandler, Arizona, completed the holes using an Ingersoll Rand TH-75 drill. Assays were performed by ALS Minerals of Vancouver BC, with sample preparation at its Elko, Nevada, facility. The insertion of standards, blanks and duplicates as well as logging was conducted by Meadow Bay personnel at the Atlanta mine site.

The current drill program has completed drilling in the pit area and the remaining samples have been shipped to ALS Minerals for analyses. Results will be released as they are received. The drill and has been moved to the Western Knolls target area located 5km to the west where discovery drilling is underway.

Forward-looking information

This release contains “forward-looking information” within the meaning of applicable Canadian securities legislation, including predictions, projections and forecasts. Forward-looking information includes, but are not limited to, statements that address activities, events or developments that the Company expects or anticipates will or may occur in the future, including such things as the calculation of a new mineral resource estimate.

Often, but not always, forward-looking information can be identified by the use of words such as “plans”, “planning”, “planned”, “expects” or “looking forward”, “does not expect”, “continues”, “scheduled”, “estimates”, “forecasts”, “intends”, “potential”, “anticipates”, “does not anticipate” or “belief” or describes a “goal” or variation of such words and phrases or state that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved.

Forward-looking information is based on a number of material factors and assumptions, including, the result of drilling and exploration activities, that contracted parties provide goods and/or services on the agreed timeframes, that equipment necessary for exploration is available as scheduled and does not incur unforeseen breakdowns, that no labour shortages or delays are incurred, that plant and equipment function as specified, that no unusual geological or technical problems occur, and that laboratory and other related services are available and perform as contracted. Forward-looking information involves known and unknown risks, future events, conditions, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, prediction, projection, forecast, performance or achievements expressed or implied by the forward-looking information. Such factors include, among others, the interpretation and actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of gold and silver; possible variations in grade or recovery rates; failure of equipment or processes to operate

as anticipated; the failure of contracted parties to perform; labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of exploration, as well as those factors disclosed in the company's publicly filed documents. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. Except as required under applicable securities legislation, the Company undertakes no obligation to publicly update or revise forward-looking information.
