8. CAPITAL DISCLOSURES

The Company was formed for the purpose of acquiring exploration and development stage natural resource properties. The determination of the Company's capital structure is subject to the Board of Directors, who make adjustments based on funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Directors have not established quantitative return on capital criteria for capital management.

Currently the Company controls two contiguous Mineral Titles Online ("MTO") claims covering approximately 915 hectares (2,261 acres) located 125km south of Vanderhoof, British Columbia on the Nechako Plateau. The Company does not generate any revenue, and accordingly will be dependent in the future upon external financing to fund future exploration programs and its administrative costs. The Company will raise additional amounts as needed.

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. The Company will continue to assess new properties and to seek to acquire an interest in additional properties if management determines there is sufficient geologic or economic potential, provided it has adequate financial resources to do so. The Directors review the capital management approach on an ongoing basis and believe, given the relative size of the Company, that this approach is reasonable.

The Company considers the items included in the statements of changes in equity as capital. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements, sell assets to reduce debt or return capital to shareholders. The Company is not subject to externally imposed capital requirements.

9. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

IFRS-7 *Financial Instruments: Disclosures* establishes a fair value hierarchy that reflects the significance of the inputs used in making measurements. The fair value hierarchy levels are:

Level 1: quoted (unadjusted) prices in active markets for identical assets and liabilities

Level 2: inputs other than quoted direct prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs)

The Company's financial instruments consist of cash and cash equivalents, short-term investments, amounts receivable, accounts payable and accrued liabilities. For cash and cash equivalents, amounts receivable and payable and accrued liabilities, carrying value is considered to be a reasonable approximation of fair value due to the short-term nature of these instruments.

Cash and cash equivalents and short-term investments are designated as held for trading and therefore carried at fair value, with the unrealized gain or loss recorded on the statement of comprehensive loss. The Company's financial instruments are exposed to a number of financial and market risks, including credit, liquidity and foreign exchange risks. The Company does not currently have in place any active hedging or derivative trading policies to manage these risks since the Company's management does not believe that the current size, scale and pattern of its operations would warrant such activities.

Notes to the Condensed Interim Consolidated Financial Statements

CSE: **BWC**

a) Credit Risk

The Company's credit risk is primarily attributable to cash, short-term investments and amounts receivable. Cash and short-term investments are held with reputable financial institutions. Financial instruments included in amounts receivable consist primarily of GST recoverable from the Canada Revenue Agency. Management believes that the credit risk concentration with respect to financial instruments included in cash, short-term investments and amounts receivable is minimal.

Class Level	September 30, 2015	September 30, 2014
1	\$ 13,155	\$ 16,051
3	10,087	10,432
	\$ 23,242	\$ 26,483

b) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2015, the Company held cash of \$13,155 (September 30, 2014 - \$23,150) GST receivable of \$10,027 (September 30, 2014 - \$8,092) and had current liabilities of \$NIL (September 30, 2014 - \$718). The Company's liabilities have contractual maturities of less than 30 days and are subject to normal trade terms with the exception of amounts owed to related parties which have no fixed terms and are non-interest bearing.

c) Foreign Currency Risk

The Company's functional and reporting currency is the Canadian dollar ("CAD").

The Company holds a 100% interest in its subsidiary TRI, which operates in the USA and records transactions in US dollars ("USD"). As a result, the Company is subject to foreign currency and exchange risk on the translation of these transactions and year end balances to the reporting currency. Any gains or losses arising on such transactions in the period are recorded in operations for the year. Changes in the value of USD against the CAD affect the costs of operations and resultant capital expenditures. The Company primarily maintains its cash balances in CAD and exchanges currency on an as needed basis thereby reducing the exchange risk on cash balances. For the period ended September 30, 2015, the Company has no cash balance in USD. The Company does not participate in any hedging activities to mitigate any gains or losses which may arise as a result of exchange rate changes.

10. NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

The IASB issued a number of new and revised International Accounting Standards, IFRS amendments and related interpretations which are effective for the Company's financial year beginning on or after July 1, 2015. These new or revised standards and amendments are not expected to have any significant impact to the Company's financial statements.
