

FORM 51-102F3

**MATERIAL CHANGE REPORT
UNDER SECTION 7(1)(a) OF NATIONAL INSTRUMENT 51-102**

Item 1. Reporting Issuer

Big Wind Capital Inc. (the "Issuer")
700 1620 Dickson Ave.
Kelowna, BC V1Y 9Y28

Item 2. Date of Material Change

June 9, 2016.

Item 3. Press Release

Press Release dated June 9, 2016 and disseminated to the Ontario Securities Commission, British Columbia Securities Commission and Alberta Securities Commission via SEDAR filing and via Market Wired.

Place of Issuance: Kelowna, British Columbia.

Item 4. Summary of Material Change

The Issuer has entered into a claim purchase agreement to acquire a 100% interest in a large claim package prospective for gold in the La Ronge Gold Belt and the Flin Flon Greenstone Belt region of northern Saskatchewan (the "Project"). The Project is comprised of 39 mineral claims in 7 project areas with a total land package of 31,731 hectares. The Company will pay \$35,000 in cash and issue 5,000,000 common shares to Mr. Ross McElroy to acquire the Project.

Item 5. Full Description of Material Change

See attached news release.

Item 6. Reliance on Section 7(2) of National Instrument 51-102

The Issuer is not relying on Section 7(2) of National Instrument 51-102.

Item 7. Omitted Information

There is no omitted information.

Item 8. Senior Officers

Greg Downey, CFO – Tel. 778.484.8028.

Item 9. Statement of Senior Officer

The foregoing accurately discloses the material changes referred to herein.

DATED the 15th day of June, 2016.

“Greg Downey”

Greg Downey, CFO

BIG WIND CAPITAL PURCHASES GOLD PROPERTY

Big Wind Capital Corp. (the “Company”) is pleased to announce that it has entered into a claim purchase agreement to acquire a 100% interest in a large claim package prospective for gold in the La Ronge Gold Belt and the Flin Flon Greenstone Belt region of northern Saskatchewan (the “Project”). The Project is comprised of 39 mineral claims in 7 project areas with a total land package of 31,731 hectares.

The Company will pay \$35,000 in cash and issue 5,000,000 common shares to Mr. Ross McElroy to acquire the Project. Mr. McElroy will be invited to join the board of directors of the Company.

The Company intends to undertake a preliminary exploration program beginning in the summer of 2016 and anticipates a preliminary work program budget of approximately \$650,000.

Background Information

Gold deposits in Saskatchewan are found mainly in the Early Proterozoic volcanoplutonic regimes of the La Ronge and Flin Flon domains. Six of the project areas are located within the **La Ronge Gold Belt** and a 7th project is located in the **Flin Flon Greenstone Belt** located to the south-east (see Table 1 and Figure 1).

La Ronge Gold Belt Properties

The La Ronge Gold Belt hosts 13 known gold deposits including 5 former producing gold mines. Gold mineralization in the La Ronge Gold Belt is mostly structurally controlled, quartz-vein type and characteristically high-grade, often with average grades >10 g/t Au. Highlights of the 6 properties that are located within the La Ronge Gold Belt are as follows:

- The **Hilda Pond** property lies north and contiguous with claims owned by Kristo Gold (private company). The Kristo Gold claims host the past producing Anglo-Rouyn Cu-Zn-Au Mine.
- The **Kidney Lake** and **McKenzie Lake** properties are contiguous to the north and south of a large land package belonging to Golden Band Resources encompassing the past producing Komis & Star Lake deposits, and the EP, Golden Heart, Memorial, Tower East, Kaslo, Birch Crossing, Jojay, Alimak & Decade gold deposits.

- The **McLennan Lake** property lies 7km south of the past producing Star Lake Au mine. Access is excellent as the property straddles Highway 102 from La Ronge.
- The **Slaney Lake** property is contiguous on the north with a Golden Band land package that hosts the Bingo Gold Deposit (Roy Lloyd Mine).
- The **Miles Lake** property is contiguous to the west with a Golden Band land package that encompasses the past producing Contact Lake Gold mine.

Flin Flon Greenstone Belt Property

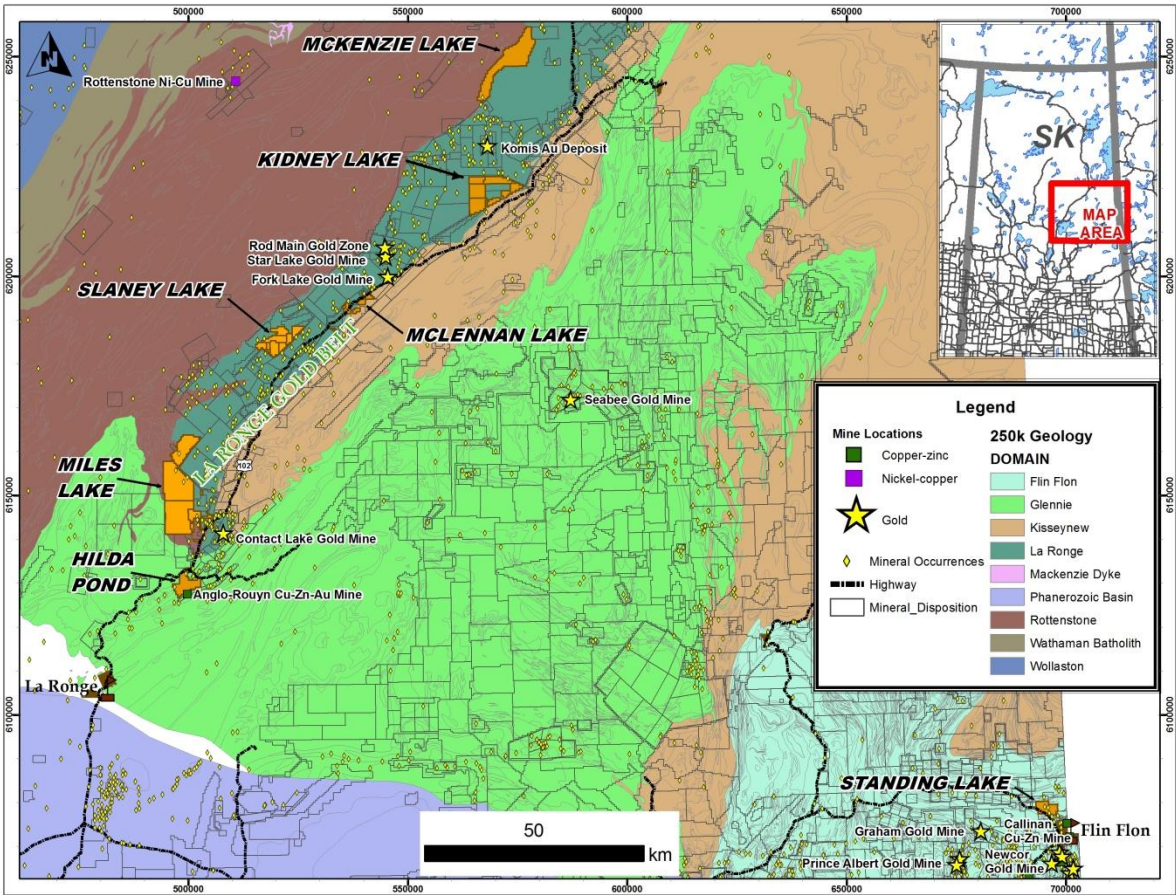

The Flin Flon Greenstone Belt is located approximately 120km to the south-east of the La Ronge Gold Belt. This mining district has been host to 25 operating mines since 1916. Most of the mines are copper-zinc, although at least 3 mines produced principally gold and silver.

- The **Standing Lake** property has several historic copper showings, the most significant being 1.25% Cu over 0.3m from drill core. A belt of Cu-Zn-Au-Ag showings trend north-west from the town of Flin Flon through the property. Access is excellent via provincial highway 106 that cuts the south edge of the claim.

Table 1: Saskatchewan Gold Properties

Geological Area	Property	Number of Claims	Project Size (Ha)
La Ronge Gold Belt	Hilda Pond	1	1,992.75
	Kidney Lake	7	4,945.38
	McKenzie Lake	1	5,955.22
	McLennan Lake	6	976.28
	Miles Lake	13	13,055.12
	Slaney Lake	10	3,533.56
Flin Flon Greenstone Belt	Standing Lake	1	1,272.97
Total		39	31,731.27
