1. NATURE OF OPERATIONS AND GOING CONCERN UNCERTAINTY

Weststar Resources Corp. (the "Company") is a Vancouver, British Columbia based company listed on the TSX Venture Exchange (the "Exchange"). The Company was incorporated on October 27, 2004 in the Province of British Columbia. During the year ended December 31, 2006, the Company completed its initial public offering on the Exchange, and the Company's shares were listed for trading on September 22, 2006.

The principal address of the Company is located at suite 2606 – 400 Capilano Road, Port Moody, British Columbia, Canada, V3H 0E1.

Going concern uncertainty

To date, the Company has not generated revenue from operations. As at June 30, 2012, the Company has net working capital deficiency of \$100,630 (December 31, 2011, net working capital - \$319,820) and a deficit of \$9,447,500 (December 31, 2011 - \$9,157,887). The Company incurred a comprehensive loss of \$407,912 during the six months ended June 30, 2012 (2011 - \$674,514). Until the Company attains profitability, it will be necessary to raise additional financings for general working capital and for exploration costs on its property. If the Company is unable to obtain financing in the amounts and on terms deemed acceptable, the future success of the business could be adversely affected. There is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

These financial statements have been prepared on a going-concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business. The financial statements do not include any adjustments to assets and liabilities should the Company be unable to continue as a going concern. If the going concern assumption were not appropriate for these financial statements then adjustments would be necessary to the carrying value of assets and liabilities, the reported expenses, and the statement of financial position classifications used. Such adjustments could be material.

2. BASIS OF PRESENTATION

2. BASIS OF PRESENTATION (continued)

Approval of the unaudited condensed interim financial statements

The unaudited condensed interim financial statements of the Company for the six months ended June 30, 2012, were authorized for issue on August 28, 2012 by the Board of Directors of the Company.

Basis of preparation

The condensed interim financial statements are presented in Canadian dollars, which is also the Company's functional currency. The unaudited condensed interim financial statements of the Company have been prepared on an accrual basis except for cash flow information and are based on historical costs, except for certain financial instruments, which are stated at their fair values.

Significant accounting judgements, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and revenue and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Significant estimates made in the preparation of these financial statements include the recoverability of the carrying value of exploration and evaluation assets, accrued liabilities, assumptions for the determination of fair value of share-based payments, and for the recoverability of deferred tax assets. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The condensed interim financial statements have been prepared, for all periods presented, following the same accounting policies and methods of computation as described in Note 3 to the audited Financial Statements for the year ended December 31, 2011.

Accounting standards, amendments and interpretations not yet effective

Certain pronouncements were issued by the IASB or the International Financial Reporting Interpretations Committee ("IFRIC") that are mandatory for accounting years beginning after January 1, 2012 or later years. None of these are expected to have a significant effect on the financial statements. The following standards and interpretations have been issued but are not yet effective:

IFRS 9 Financial Instruments

IFRS 9 Financial Instruments is part of the IASB's wider project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015.

WESTSTAR RESOURCES CORP.

Notes to the Condensed Interim Financial Statements

(Expressed in Canadian dollars - unaudited)

For the six month period ended June 30, 2012

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Accounting standards, amendments and interpretations not yet effective (continued)

IFRS 10 Consolidated Financial Statements

IFRS 10 builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the financial statements of the parent company. The standard provides additional guidance to assist in the determination of control where this is difficult to assess. The standard is effective for annual periods beginning on or after January 1, 2013.

IFRS 11 Joint Arrangements

IFRS 11 describes the accounting for arrangements in which there is joint control; proportionate consolidation is not permitted for joint ventures (as newly defined). IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC 13 Jointly Controlled Entities — Non-Monetary Contributions by Venturers. The standard is effective for annual periods beginning on or after January 1, 2013.

IFRS 12 Disclosures of Interests in Other Entities

IFRS 12 includes the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. The standard is effective for annual periods beginning on or after January 1, 2013.

IFRS 13 Fair Value Measurement

IFRS 13 aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRS. The standard is effective for annual periods beginning on or after January 1, 2013.

There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Company.

4. AMOUNTS RECEIVABLE

Amounts receivable at June 30, 2012 includes guaranteed investment certificates ("GICs") with interest rates at 1% (December 31, 2011 - 1%) per annum. At June 30, 2012, the fair value of the GICs was \$5,000 (December 31, 2011 - \$5,000). The GICs are held as resource reclamation deposits and are restricted for other uses. The remaining balance represents HST recoverable of \$18,764 (December 31, 2011 - \$32,562) and receivable from the disposal of office and computer equipment of \$4,112 (December 31, 2011 - \$Nil).

7. EXPLORATION AND EVALUATION ASSETS

Axe Project

Pursuant to an option agreement dated July 19, 2005, the Company acquired a 70% interest (originally 66% but amended by mutual consent) in the Axe claims comprised of 119 units situated in the Similkameen Mining District, Province of B.C. As consideration for the property, the Company paid \$5,000, issued 300,000 common shares at a fair value of \$243,500 and incurred exploration costs of \$500,000.

Pursuant to an agreement dated March 23, 2007, the Company acquired four additional claims. As consideration for the claims the Company paid \$15,000. The claims are subject to a 2% net smelter royalty and under the terms of the agreement the Company has the right to purchase the net smelter royalty in stages for up to \$3,000,000.

On March 21, 2012 the Company entered into an option agreement with Xstrata Copper Canada ("Xstrata") and Bearclaw Capital Corp. ("Bearclaw"). Under the terms of the option agreement, the Company and Bearclaw have agreed to grant Xstrata an option to earn a 51% interest where Xstrata will have the sole and exclusive right to carry out exploration activities on and evaluate the Axe Property. In order to exercise the option, during the earn-in period, Xstrata must incur \$3,000,000 of expenditures in exploration activities on the Axe Property.

During the earn-in period, Xstrata must pay to the Company and Bearclaw (collectively, in proportion to their participating interests in the Axe Property, which are 70% for the Company and 30% for Bearclaw):

- \$25,000 immediately (received);
- \$25,000 on March 31, 2013;
- \$30,000 on March 31, 2014;
- \$40,000 on March 31, 2015; and
- \$60,000 on March 31, 2016.

If Xstrata exercises the option, the Company, Bearclaw and Xstrata will enter into a formal joint venture agreement. Xstrata will be the initial operator holding a 51% participating interest and the Company and Bearclaw a 34.3% and 14.7% participating interest respectively.

Upon exercise of the option, Xstrata will have the option to acquire an additional 24% undivided interest in the Axe Property (increasing its interest to 75%, absent other adjustments) by either completing a feasibility study on the Axe Property or incurring no less than \$15,000,000 in feasibility study expenditures on the Axe Property and providing the Company and Bearclaw with evidence of such expenditures. In the event Xstrata exercises the second option and acquires an undivided 75% interest in the Axe Property, the Company and Bearclaw will have a 17.5% and 7.5% participating interest respectively.

Under the option agreement the Company and Bearclaw have also granted Xstrata a right of first refusal ("ROFR") over any direct or indirect sale or transfer by the Company and/or Bearclaw of any of their respective interest in the Axe Property. The ROFR will terminate at the end of the earn-in period if Xstrata has not exercised the option.

("Minera"). The La Paloma property concession is located in the state of Jalisco, Mexico and comprises 155 hectares of mineral rights. 9. RESERVE

The share option reserve records items recognized as share-based payment expense until such time that the share options are exercised, at which time the corresponding amount will be transferred to share capital. If the options expire or are cancelled unexercised, the related amount remains in the reserve account.

The fair value of the common shares issued in the private placement was determined to be the more easily measurable component and were valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, was allocated to the attached warrants. Any fair value attributed to the warrants is recorded in the reserve. If the warrants are exercised, the related amount is reclassified as share capital. If the warrants expire unexercised, the related amount remains in the reserve account.

	2012	2011
Volatility percentage	N/A	180%
Risk-free interest rate	N/A	1.02%
Dividend yield	N/A	-

11. FINANCIAL INSTRUMENTS (continued)

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts. The majority of cash is deposited in bank accounts held with major banks in Canada. As most of the Company's cash is held by a bank there is a concentration of credit risk. This risk is managed by using major banks that are high credit quality financial institutions as determined by rating agencies.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash and cash equivalents. Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

All of the Company's financial liabilities have contractual maturities of 30 days or due on receipt and are subject to normal trade terms.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not have any borrowings. Interest rate risk is limited to potential decreases on the interest rate offered on cash and GICs held with the bank. The Company considers this risk to be immaterial.

Fair value

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- Level 3 – Input for assets or liabilities that are not based on observable market data.

The Company's financial assets and liabilities are measured at fair value by level with the fair value hierarchy described above. Assets and liabilities are classified entirely based on the lowest level of input that is significant to the fair value measurement.

The fair values of the Company's cash, amounts receivable and accounts payable and accrued liabilities approximates the carrying amounts due to the short term nature of these instruments.

12. CAPITAL MANAGEMENT

The Company considers its capital structure to include shareholders' equity and debt. The Company's objectives when managing capital are to maintain financial flexibility in order to preserve its ability to meet financial obligations and continue as a going concern and optimize the use of its capital to provide an appropriate investment return to its shareholders commensurate with risk.

The Company's financial strategy is formulated and adapted according to market conditions in order to maintain a flexible capital structure that is consistent with its objectives and the risk characteristics of its underlying assets. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares.
