WESTSTAR RESOURCES RE-NEGOTIATES TERMS ON THE EAST MILLER CLAIMS, ADJACENT TO CANADA CARBON'S MILLER GRAPHITE MINE, QUEBEC

Vancouver, BC – December 17, 2013: Weststar Resources Corp. (TSX-V: WER) (the “**Company**” or “**Weststar**”) announced today that, further to its news release dated September 25, 2013, it has re-negotiated the terms on the 100% acquired interest in 9 mineral claims, covering approximately 540 hectares located in Quebec, Canada (the “East Miller Property” or the “Property”), adjacent to the east of Canada Carbon Inc. (TSX-V: CCB) (“CCB”) historic Miller Graphite Mine, which is a hydrothermal vein type graphite occurrence.

In consideration for the Property, the Company shall now only issue 2,500,000 common shares in the capital of the Company to arms-length vendors. This Agreement is subject to approval of the TSX Venture Exchange (the “Exchange”). Finder’s fees may be payable subject to Exchange guidelines.

CCB is exploring its historic Miller Graphite Mine and recently announced on November 25, 2013 that it had “intersects of 32.45% Cg over two metres in drilling and 28.2% Cg over 1.3 metres in channel samples at Miller Project” and on December 12, 2013, it achieved “99.9978% purity by rapid thermal upgrading of Miller vein graphite.”

CCB also disclosed on September 12, 2013 that its VTEM geophysical anomaly “...is elongated toward the east and also correlates with a magnetic gradient.”

Will Rascan, President/CEO of Weststar, remarked: “Weststar is the only Company to have land contiguous to the east off CCB. We believe this area offers significant exploration potential.”
