Dear Sir or Madame:

A separate consent form has not been filed for the 43-101 Report on the Golcuk Copper Project.

There has been no triggering event and it has been filed voluntarily as per section 8.3.5 of the NI 43-101 Companion Policy. The reason for this voluntary filing is that the company views this report as an important technical statement of the geology of the Golcuk property and a first milestone in the project development.

The consent to the filing can be found on page 65 of the technical report under 21.8 (Certificate of Author, Date and Signature Page).

Yours truly,

Pasinex Resources Limited

Per:

“Steve Williams”
