### **1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS**

Pasinex Resources Limited (“Pasinex” or the “Company”) is a publicly listed company incorporated in British Columbia on February 21, 2006, and on August 4, 2006, it continued out of British Columbia and into the British Virgin Islands. On September 21, 2006, the Company changed its principal business activity and developed its business plan to enter the convention industry principally in Macau. On July 10, 2008, in connection with the change of control, the Company continued into British Columbia as a mineral exploration company in the exploration stage, engaged in the acquisition, exploration and development of mineral properties. The Company’s shares are listed on the Canadian Securities Exchange (“CSE”) under the symbol “PSE” and on the Frankfurt Stock Exchange (“FSE”) under the symbol “PNX”. The Company changed the fiscal year end from March 31<sup>st</sup> to December 31<sup>st</sup>, effective December 31, 2012. The head office, principal address and registered and records office of the Company are located at 1450 – 789 West Pender, Vancouver, BC, Canada, V6C 1H2.

These condensed interim consolidated financial statements for the three months ended March 31, 2015, were authorized for issue by the Audit Committee and Board of Directors on May 28, 2015.

### **2. GOING CONCERN**

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for at least the next twelve months and will be able to realize its assets and discharge its liabilities in the normal course of operations.

Several adverse conditions cast substantial doubt on the validity of this assumption. The Company is in the exploration stage and, accordingly, has not yet commenced revenue-producing operations. The Company has incurred losses since inception and the Company has an accumulated deficit as at March 31, 2015 of \$7,536,483 (December 31, 2014 - \$7,188,103). The Company had a working capital of \$247,970 (December 31, 2014 - \$435,580). The ability of the Company to continue as a going-concern depends upon its ability to develop profitable operations and to continue to raise adequate financing required to maintain its operations, and to ultimately attain future profitable operations. Management expects the Company to continue as a going concern and plans to meet any financing requirements through equity financing and seeking other business opportunities to expand the Company’s operations. The outcome of these matters cannot be predicted at this time and there are no assurances that the Company will be successful in achieving its goals. The consolidated financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

The application of the going concern concept is dependent upon the Company’s ability to satisfy its liabilities as they become due and to obtain the necessary financing to complete the exploration and development of its mineral property interests, the attainment of profitable mining operations or the receipt of proceeds from the disposition of its mineral property interests. Management is actively engaged in the review and due diligence on opportunities of merit in the mining sector and is seeking to raise the necessary capital to meet its funding requirements. There is, primarily as a result of the conditions described above, significant doubt as to the appropriateness of the use of the going concern assumption.

The Company is not expected to be profitable during the ensuing twelve months and therefore must rely on securing additional funds from either equity financing or loan from shareholders or directors for cash consideration. During the three months ended March 31, 2015, the Company received gross cash proceeds of \$100,100 (December 31, 2014 - \$1,565,282) from financing activities. Though the Company has been successful at raising funds, there is no assurance that they will continue to generate sufficient funds for future operations.

### **3. BASIS OF PRESENTATION**

#### **a) Statement of Compliance**

These condensed interim consolidated statements are prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”), applicable to the presentation of interim financial statements, including IAS 34, Interim Financial Reporting.

---

### 3. BASIS OF PRESENTATION (continued)

#### a) Statement of Compliance (continued)

The policies applied in these condensed interim consolidated financial statements are consistent with policies disclosed in Note 4 of the financial statements for the year ended December 31, 2014. These condensed interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2014.

#### b) Basis of Measurement

These consolidated financial statements have been prepared on a historical costs basis except for financial instruments classified as financial instruments at fair value through profit or loss, which are measured at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting.

#### c) Use of Estimates

The preparation of consolidated financial statements in conformity with IFRS requires management to make judgments, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses, and related disclosure. Judgement is used mainly in determining how a balance or transaction should be recognized in the consolidated financial statements. Estimates and assumptions are used mainly in determining the measurement of recognized transactions and balances. Actual results may differ from these estimates.

Significant areas where management's judgement has been applied include:

- Economic recoverability and probability of future economic benefits of exploration, evaluation and development costs – Management has determined that exploratory drilling, evaluation, development and related costs incurred which have been capitalized are economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefit including geologic information, scoping and feasibility studies, accessible facilities, existing permits and life of mine plans.
- Functional currency – The functional currency for the Company's subsidiary and investment in joint venture, is the currency of the primary economic environment in which the entity operates. The Company has determined the functional currency of each entity in Turkey is the New Turkish Lira (TRY). Determination of functional currency may involve certain judgments to determine the primary economic environment and the Company reconsiders the functional currency of its entities if there is a change in events and conditions which determined the primary economic environment.
- Joint Venture – Pursuant to the Joint Venture Agreement between Pasinex Arama ve Madencilik AS ("Pasinex Arama") and Akmetal Madencilik Sanayi ve Ticaret A.S. ("Akmetal") dated January 17, 2013, the Company has determined the Joint Venture is a form of joint venture and the Company is required to account for its shares in the joint venture company by using the equity method.
- Going concern – Significant judgments used in the preparation of these consolidated financial statements include, but are not limited to those relating to the assessment of the Company's ability to continue as a going concern.
- Deferred taxes - deferred tax assets are recognized for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that probable that future taxable profit will be available against which the deductible temporary differences and carry-forward of unused tax assets and unused tax losses can be utilized. In addition, the valuation of tax credits receivable requires management to make judgements on the amount and timing of recovery. As of December 31, 2014, the Company has not recognized any deferred income tax assets.

Significant areas requiring the use of management estimates and assumptions include:

- The inputs used in assessing the recoverability of deferred tax assets to the extent that the deductible temporary differences will reverse in the foreseeable future and that the Company will have future taxable income;
- Management's assumption that there are currently no decommissioning liabilities is based on the facts and circumstances that have existed during the year; and
- The inputs used in accounting for share-based payment expenses.

#### 3. BASIS OF PRESENTATION (continued)

##### d) Principles of consolidation

The consolidated financial statements include the financial statements of Pasinex and its subsidiaries listed below:

	Jurisdiction	Nature of Operations	Equity Interest	
			March 31, 2015	December 31, 2014
Pasinex Arama	Turkey	Mineral exploration	100%	100%

The financial statements of the subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Pasinex and its subsidiaries are collectively referred to as the “Company”. All intercompany transactions, balances and unrealized gains and losses from intercompany transactions have been eliminated upon consolidation.

On February 1, 2012, the Company purchased all the assets of 0886183 B.C. Ltd. (“0886183 BC”, a private company incorporated in British Columbia) which included a company in Turkey, Pasinex Arama ve Madencilik A.S. (“Pasinex Arama”). On May 31, 2013, 0886183 BC was voluntarily dissolved. As a result, the Company deconsolidated all assets and liabilities associated with 0886183 BC. The dissolution of the subsidiary has nominal impact on the consolidated financial statements.

### 5. FINANCIAL INSTRUMENTS AND CAPITAL DISCLOSURES

In accordance with IFRS, the Company shall disclose the comparison of carrying amounts and fair values of the Company's financial instruments that are carried in the consolidated financial statements. As of March 31, 2015 and December 31, 2014, the fair values of the financial assets and liabilities approximate their carrying amounts due to the short-term maturities of these instruments, except for cash and cash equivalents and marketable securities. Marketable securities are measured at fair value based on price quotations at the reporting date.

The Company classifies its financial instruments using a fair value hierarchy as a framework for disclosing fair value of financial instruments based on inputs used to value the Company's investments. The hierarchy of inputs and description of inputs is described as follows:

Level 1 – fair values are based on quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – fair values are based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); or

Level 3 – fair values are based on inputs for the asset or liability that are not based on observable market data, which are unobservable inputs.

	Assets measured at fair value as at March 31, 2015			
	Level 1	Level 2	Level 3	Total
	\$	\$	\$	\$
<b>At fair value through profit or loss</b>

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities. The Company has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments. This note presents information about the Company's exposure to each of the above risks and the Company's objectives, policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout these financial statements.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board has implemented and monitors compliance with risk management policies as set out herein. A discussion of the Company's use of financial instruments and their associated risk is provided below:

#### a) Credit Risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada and in Turkey. Management believes that the credit risk with respect to receivables is remote. The Company mitigates credit risk on these financial instruments by adhering to its investment policy that outlines credit risk parameters and concentration limits.

The maximum credit risk exposure relating to financial assets is represented by their respective carrying values as at the statement of financial position date.

### **5. FINANCIAL INSTRUMENTS AND CAPITAL DISCLOSURES (continued)**

#### b) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient capital to meet liabilities when due after taking into account the Company's holdings of cash that might be raised from equity financings. As at March 31, 2015, the Company had a cash balance of \$26,886 (December 31, 2014- \$151,045) and current liabilities of \$258,604 (December 31, 2014 - \$184,582). All of the Company's accounts payable and accrued liabilities have contractual maturities of less than 60 days and are subject to normal trade terms. The Company may manage its short term liquidity shortfall by obtaining additional loans from directors or by equity financing.

#### c) Market Risk

Market risk consists of currency risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

i) Currency Risk - Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although the Company is considered to be in the exploration stage and has not yet developed commercial mineral interests, the underlying commodity price for minerals is impacted by changes in the exchange rate between the Canadian and United States dollar. Foreign currency risk also arises from the fluctuation in currency exchange between the Canadian dollar and TRY. The Company is exposed to currency risk with regards to its TRY denominated financial assets and financial liabilities. The Company has not entered into financial instruments to hedge against this risk. A 1% strengthening in Canadian dollar against TRY would have a before-tax effect of \$900 increase in accumulated other comprehensive income, based on amounts held at March 31, 2015 (December 31, 2014 - \$2,200).

ii) Interest Rate Risk - Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is currently not exposed to interest rate risk.

The Company manages its common shares, stock options and warrants as capital. As the Company is in the exploration stage, its principal source of funds is from the issuance of common shares. It is the Company's objective to safeguard its ability to continue as a going concern, so that it can continue to explore and develop its project for the benefit of its stakeholders. The Company is not subject to any externally imposed capital requirement.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the exploration and development of its mineral properties. The Board of Directors has not established quantitative capital structure criteria for management, but will review on a regular basis the capital structure of the Company to ensure its appropriateness to the stage of development of the business. The properties in which the Company currently has interest are in the exploration stage and the Company is dependent on external financing to fund its activities. In order to carry out planned exploration and development and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. In order to facilitate the management of capital and maintenance and development of future mining sites, the Company may issue new equity, incur additional debt, option its properties for cash and/or expenditure commitments from optionees, enter into joint venture arrangements, or dispose of certain assets. The Company's investment policy is to hold cash in interest bearing accounts at high credit quality financial institutions to maximize liquidity. In order to maximize ongoing development efforts, the Company does not pay dividends. The Company expects to continue to raise funds, from time to time, to continue meeting its capital management objectives.

### **6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES**

Accounts payable and accrued liabilities of the Company are due to service providers, mainly including regulatory fees, professional fees, consulting fees, and general office costs. All accounts payable and accrued liabilities for the Company fall due within the next 12 months.

### 8. JOINT VENTURE WITH AKMETAL

On June 28, 2012, the Company, through its wholly-owned Turkish subsidiary, Pasinex Arama, signed a non-binding Letter of Intent ("LOI") with an arm's length Turkey based miner, Akmetal Madencilik Sanayi ve Ticaret A.S. ("Akmetal"), to form a 50 / 50 joint venture to explore for zinc and other associated commodities in the region between and around Horzum and Tufanbeyli, Adana Province, Turkey. Under the terms of the LOI it is proposed that a joint venture company will be formed and held 50 / 50 by the two parties and will be controlled by a board consisting of equal representatives of both Pasinex and Akmetal. Both partners will equally fund exploration and other general costs associated to the joint venture's course of business.

On October 29, 2012, the new joint venture company, Horzum Arama ve Isletme AS ("Joint Venture"), was formed while the Joint Venture Agreement had not been substantiated. On January 17, 2013, Pasinex Arama and Akmetal signed the Joint Venture Agreement effective the same day.

During the year ended December 31, 2013, the Joint Venture acquired, through staking, one property in Turkey: Pinargozu. The property is located within the Turkish Provinces of Adana, and was acquired for the potential to host base and precious metals.

### 9. EXPLORATION AND EVALUATION ASSETS (continued)

#### Properties Held in Turkey

##### Horzum JV Properties

During the year ended December 31, 2013, the Company, through Pasinex Arama, acquired 6 properties in the vicinity of Horzum, Adana province, Turkey as part of the “Horzum generative” zinc exploration program, in addition to the 8 properties acquired during the nine months ended December 31, 2012. These properties were acquired to be included in the 50 / 50 joint venture with Akmetal and cover approximately 8,650 hectares within the Horzum area of Adana Province. During the year ended December 31, 2013, the Company has determined that they will not be incurring future exploration costs on some of the properties and have returned the licenses on these properties to the Government. During the three months ended March 31, 2015, \$9,522 (December 31, 2014 – \$62,444) in exploration costs and \$19,143 (December 31, 2014 - \$45,385) in license costs have been spent on the Horzum JV. As at March 31, 2015, the Company has only the Akkaya Property with its exploration license in good standing. The process to transfer of the license of the Akkaya Property to the Joint Venture is still ongoing, therefore the Company is capitalizing all costs spent on the property until the transfer takes place. See also Note 8.

##### Golcuk Property

On July 19, 2012, the Company signed an option agreement (the “Agreement”) with Eurasian Minerals Inc. (“Eurasian”) and its wholly owned Turkish subsidiary, Eurasia Madencilik Ltd. STI, whereby Pasinex, through its wholly owned Turkish subsidiary, Pasinex Arama, can acquire a 100%-interest in the Golcuk Property (“Golcuk”) located in northeast Turkey. Under the Agreement, Golcuk will be forthwith transferred to Pasinex Turkey.

As consideration, upon granting of the mining obligation extension, Pasinex will issue to Eurasian Pasinex common shares as follows:

- (i) 500,000 shares within five (5) days after the granting of the extension (issued);
- (ii) 500,000 common shares on the one year anniversary of the Initial Issuance Date (issued);
- (iii) 1,000,000 common shares on the two year anniversary of the Initial Issuance Date (issued); and
- (iv) 1,000,000 common shares on the three year anniversary of the Initial Issuance Date.

Eurasian will retain a 2.9% Net Smelter Royalty on Golcuk which Pasinex has the option of buying down to 2% within six years of the Agreement date for consideration of \$1,000,000.

Additionally, Pasinex will be required to complete minimum annual work commitments on the project as follows:

- (i) \$200,000 before the one year anniversary of the date of the transfer of Golcuk to Pasinex Turkey (the “Completion Date”);
- (ii) \$250,000 before the two year anniversary of the Completion Date; and
- (iii) \$250,000 before the end of the four year anniversary of the Completion Date.

Golcuk is classified as an operational license under the Turkish government mining regulations. As such, the property requires, at a minimum, a small-scale mining operation to be carried out each year in order to satisfy its operational license, and each year, the project must process approximately 900 tonnes of ore. On the completion and acceptance of the Agreement, Pasinex was to file a request for a one-year extension in regard to the Company’s small-scale mining obligation to the Turkish government. However, Pasinex applied for and obtained an Open Pit Application and management has determined that the granting of the Open Pit Application would replace the one-year extension requirement of the original option Agreement. The Company entered into an Amending Agreement with Eurasian to waive certain government requirement and the right to terminate the agreement. The Golcuk property was transferred to Pasinex Arama in September 2012.

During the three months ended March 31, 2015, \$6,275 (December 31, 2014 – \$293,408) in exploration costs and \$149,989 (December 31, 2014 - \$64,520) in acquisition costs have been spent on the Golcuk Property.

## **9. EXPLORATION AND EVALUATION ASSETS (continued)**

### **Properties Held in Turkey (continued)**

#### Dadak Property

On May 14, 2012, the Company acquired, through staking, the Dadak Property in the province of Afyon in Turkey. During the three months ended March 31, 2015, \$429 (December 31, 2014 – \$318) in exploration costs have been incurred and impaired, as the Company relinquished the property back to the government.

### **Properties Held in Canada**

#### Murray Property

The Company acquired a 100% interest in one mineral claim northeast of Yellowknife, Northwest Territories, known as the Murray Property pursuant to a Mineral Property Acquisition Agreement dated April 17, 2008, between the Company and Zimtu Capital Corp. (“Zimtu”). The Company acquired the Property for \$15,509 cash. There was a 1% net smelter return royalty and a 1% gross overriding royalty on the Property, in favour of the original vendor of the property, which was relinquished on May 7, 2009. Zimtu is an arm’s length party to the Company. During the year ended December 31, 2014, the Company impaired the property.
