## News Release

### **NASS VALLEY ANNOUNCES SUCCESSFUL TEST RUNS OF ITS FIRST STATE OF THE ART M-WAVE SYSTEM UNIT IN BC, CANADA**

March 5<sup>th</sup>, 2013, Vancouver, British Columbia – M-Wave EnviroTech Inc. (“MWE”), a subsidiary of Nass Valley Gateway Ltd. (“Nass Valley”) announces that following its announcement of October 30, 2012, its subsidiary M-Wave EnviroTech Inc. (“MWE”) has successfully qualified installation and operation of its first M-Wave Unit within the premises of its joint venture partner Imperial Cedar Products Ltd (“ICP”). Initial tests and pilot runs during February were successful in proving the MWE’s claim that the M-Wave System is a superior, environmentally-friendly, drying technology for wood products compared to the traditional Kiln drying systems presently used within the industry. This first M-Wave unit will initially be used by M-Wave System BC01 Inc (“MWE-BC01”) for smaller production runs of cedar shingles and also as the Company’s demonstration unit to prove the efficiency of the M-Wave System for custom drying of all soft and hard wood products used in the housing construction industry.

M-Wave EnviroTech has initiated the design of a larger scale M-Wave unit for its subsidiary MWE-BC01 Inc to accommodate an already identified additional demand for M-Wave dried products. This demand was identified after the analysis of test runs of cedar feed-stock of different quality and moisture content. The increased demand is for the production of dry, quality re-edged and re-buttet, grooved, sanded shingles, as well as specialty cut and then primed and pre-stained shingles and shakes for the local and export markets. This second M -Wave unit is anticipated to be delivered and in production during the summer of 2013.

To facilitate the day to day co-operational efficiency of MWE’s management with its partner, Vixon Technology Ltd (“Vixon”), the Company has moved its operational offices and MWE’s office into the facilities of Vixon, located at 8877 Odlin Crescent, Unit 120, Richmond, BC, V6X 3Z7.

#### **ABOUT NASS VALLEY GATEWAY LTD.**

*Since 2011, Nass Valley is focused on developing, marketing and establishing environmentally responsible Energy Converting and Waste Disposal Technology, through its subsidiary, Global Environomic Systems Corp. (“GSC”). Nass Valley progressed in 2012 on specific multiwave technology applications through its wholly owned subsidiary, M-Wave EnviroTech Inc. which has installed North America’s first demonstration and production unit in British Columbia, Canada. Nass Valley views both of its environmentally responsible technologies as State Of The Art technologies and very complementary to each other.*

*Nass Valley Gateway and its subsidiaries are devoted to building value for their shareholders and employees, contributing to the improvement of the communities in which they operate through employment creation, and implementing sustainable practices designed to preserve and enhance our environment.*
