1 Nature of operations and going concern

Trueclaim Exploration Inc. (the "Company") is a Canadian company which is engaged in the acquisition, exploration and development of resource properties. The Company has not yet determined whether its mining properties contain reserves that are economically recoverable. The recoverability of the amounts shown for mining properties are dependent upon the existence of economically recoverable reserves, the ability of the Company to fund costs to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposal of properties.

The consolidated financial statements of the Company have been prepared using Canadian generally accepted accounting principles applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. During the nine month period ended September 30, 2011, the Company had a net loss of $ 1,122,238 (2010: $341,691) and as at September 30, 2011, reported a deficit of $3,900,438 (2010: 1,548,364). These circumstances may lend significant doubt as to the ability of the Company to continue operations into the foreseeable future as a going concern and, accordingly, the ultimate appropriateness of the use of accounting principles applicable to a going concern. Management has obtained financing through the issuance of new equity instruments from third parties for the Company to continue its operations and, while it has been successful in raising funds in the past, there can be no assurance that the Company will be able to do so in the future should additional funding be needed. Without such additional funding being available, the Company may be unable to continue its operations, and amounts realized for assets may be less than amounts reflected in these consolidated financial statements.

Although management has taken steps to verify title to mining properties in which the Company has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and noncompliance with regulatory requirements.

The Company is a public company which is listed on the TSX Venture Exchange (the "Exchange"). The address of its registered office is One London Place, 255 Queens Avenue suite 1000, London, Ontario N6A 5R8.

The Company prepares its financial statements in accordance with Canadian generally accepted accounting principles, as set out in the Handbook of the Canadian Institute of Chartered Accountants ("CICA Handbook"). In 2010, the CICA Handbook was revised to incorporate International Financial Standards ("IFRS"), and require publicly accountable enterprises to apply such standards effective for years beginning on or after January 1, 2011. Accordingly, the Company has commenced reporting on this basis in its condensed interim consolidated financial statements. In the financial statements, the term "Canadian GAAP" refers to Canadian GAAP before the adoption of IFRS.

These consolidated interim financial statements are unaudited and have been prepared in accordance with IAS 34 '*Interim Financial reporting*', using accounting policies consistent with the IFRS applicable to interim financial statement reporting issued by the International Standards Board ("IASB"). The accounting policies followed in these interim financial statements are the same as those applied in the Company's interim financial statements for the periods ended March 31, 2011 and June 30, 2011. The Company has consistently applied the same accounting policies throughout all periods presented, as if these policies had always been in effect. Note 3 discusses the impact of the transition to IFRS on the Company's reported equity as at September 30, 2010 and comprehensive income for the three and nine months ended September 30, 2010, including the nature and effect of significant changes in accounting policies from those used in the Company's consolidated financial statements for the year ended December 31, 2010.

The policies applied in these condensed interim consolidated financial statements are based on IFRS applicable to interim financial statement reporting issued and outstanding as of November 28, 2011, the date the Board of Directors approved the financial statements. Any subsequent changes to IFRS, that are given effect in the Company's annual consolidated financial statements for the year ending December 31, 2011 could result in restatement of these interim consolidated financial statements, including the transition adjustments recognized on change-over to IFRS.

The condensed interim consolidated financial statements should be read in conjunction with the Company's Canadian GAAP annual financial statements for the year ended December 31, 2010 and the Company's interim financial statements for the quarters ended March 31, 2011 and June 30, 2011, prepared in accordance with IFRS applicable to interim financial statements.

2 Summary of significant accounting policies and estimates

The significant accounting policies used in the preparation of these consolidated interim financial statements are described below.

Basis of measurement

The consolidated interim financial statements have been prepared under the historical cost convention. The comparative figures presented in these interim consolidated financial statements are in accordance with IFRS applicable to interim financial statement reporting.

Consolidation

The financial statements of the Company consolidate the accounts of Trueclaim Exploration Inc. and its subsidiary, Trueclaim Resources Inc. All intercompany transactions, balances and unrealized gains and losses from intercompany transactions are eliminated on consolidation.

Subsidiaries are those entities which the Company controls by having the power to govern the financial and operating policies.

Cash and cash equivalents

Cash and cash equivalents include cash on hand and deposits held with banks.

Fixed assets

Fixed assets are stated at cost less accumulated amortization. Cost includes expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the company and the cost can be measured reliably.

The major categories of fixed assets are amortized on a declining balance as follows:

Computer Equipment	30%

Intangible Assets

The Company records its interests in mining properties and areas of geological interest at cost as intangible assets in the consolidated interim statement of financial position. Exploration and development costs relating to these interests and projects are capitalized until the properties to which they relate are placed into production, sold or allowed to lapse. During the nine month period ended September 30, 2011, $1,171,499 (2010 – $1,322,197) of costs were incurred for exploration, development and acquisitions of mining properties. Management reviews the carrying values of mining properties on a regular basis to determine whether any write downs are necessary. These costs will be amortized over the estimated useful life of the mining properties following commencement of production, or written off if the mining properties or projects are sold or allowed to lapse. General exploration expenditures not related to specific mining properties are expensed as incurred.

Flow-through shares

The Company will, from time to time, issue flow-through shares to finance a portion of its exploration programs. Pursuant to the terms of the flow-through share agreements, the Company agrees to incur qualifying expenditures and renounce the tax deductions associated with these qualifying expenditures to the subscribers at an agreed upon date.

The excess of cash consideration received over the market price of the Company's shares at the date of the announcement of the flow-through share financing is recorded as a liability which is extinguished when the tax effect of the temporary differences, resulting from the renunciation, is recorded. The difference between the liability and the value of the tax assets renounced is recorded as a deferred tax expense.

A deferred tax liability is recognized for the taxable temporary difference that arises from the difference between the carrying amount of eligible expenditures that are capitalized to exploration and evaluation assets and their tax basis. If the Company has sufficient tax assets to offset the deferred tax liability, the liability will be offset by the recognition of a corresponding deferred tax asset.

Income Tax

Current income taxes

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the Consolidated Interim Statement of Income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred income taxes

Deferred tax assets and liabilities represent income taxes expected to be payable or recoverable on differences between the carrying amount of assets and liabilities in the Company's financial statements and the corresponding tax basis used in the computation of taxable profit. Deferred tax assets also represent income taxes expected to be recoverable on unclaimed losses carried forward.

Deferred taxes are calculated using the liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences, with some exceptions described below. Deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be used. Neither deferred tax liabilities, nor deferred tax assets, are recognized as a result of temporary differences that arise from the initial recognition of goodwill or a transaction, other than a business combination, that affects neither accounting profit nor taxable profit. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset the current tax assets against the current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Deferred tax asset and liabilities are measured using the enacted or substantively enacted tax rates as of the balance sheet date that are expected to be in effect when the differences reverse or when unclaimed losses are utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of all or part of the asset to be utilized. To the extent that an asset not previously recognized fulfills the criteria for asset recognition, a deferred tax asset is recognized.

Deferred tax is recognized in the Consolidated Interim Statement of Income, unless it relates to items recognized directly in equity, in which case the deferred tax related to those items is also recognized directly in equity.

Loss per share

The basic loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding during the period. The diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding stock options and share purchase warrants, in the weighted average number of common shares outstanding during the period, if dilutive. During the nine month period ended September 30, 2011 and 2010, all of the outstanding stock options and warrants were antidilutive.

Share capital

Non-monetary consideration
Shares issued as purchase consideration in non-monetary transactions are recorded at the fair value of the consideration received by the Company.

Shares issued to non-employees are recorded at the fair value of the goods and services received by the company.

Stock-based compensation

Employees (including directors and senior executives) of the Company receive a portion of their remuneration in the form of stock-based payment transactions, whereby they render services as consideration for equity instruments.

Share issuance costs
Costs directly identifiable with the raising of share capital financing are charged against share capital.

Significant accounting judgments and estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts of assets and liabilities reported in the consolidated financial statements. Those estimates and assumptions also affect the disclosure of contingencies at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates. The most significant estimates relate to determining the fair value of share based payments to non-employees and impairment testing of the Company's intangible assets.

Financial instruments

All financial assets are initially classified into one of four categories: fair value through profit and loss (FVTPL), available for sale, loans and receivables and amortized cost.

Financial assets classified as FVTPL are measured at fair value with gains and losses recognized through earnings. The Company's cash and cash equivalents are classified as FVTPL.

Financial assets classified as loans-and-receivables are initially recognized at the amount expected to be received, less, when material, a discount to reduce the loans and receivables to fair value. The Company`s receivables are classified as financial assets.

Financial liabilities at amortized cost consist of trade payables and accrued liabilities. Trade payables and accrued liabilities are initially recognized at the amount required to be paid, less, when material, a discount to reduce the payables to fair value.

3 Transition to IFRS

The effect of the Company's transition to IFRS, as described in note 1, is summarized as follows:

(i) Transition elections
(ii) Reconciliation of equity and comprehensive income as previously reported under Canadian GAAP to IFRS

(i) Transition elections

The Company has applied the following transition exemptions to full retrospective application of IFRS:

- To apply the requirements of IFRS 3, *'Business Combinations'*, prospectively from January 1, 2010
- To apply the requirements of IFRS 2, *'Share based payments',* only to equity instruments granted after November 7, 2002 which had not vested as of January 1, 2010.

9 Related party transactions

During the nine month period ended September 30, 2011, the Company incurred key management compensation expenses in the amount of $387,925 (2010-$288,000). Of this amount, $36,000 (2010 -$36,000) represents costs incurred for mining exploration expenditures which were capitalized as mining properties during the period. The Company paid fees of $8,270 (2010 - $49,247) to an organization owned by a director of the Company for services received.

10 Commitments

Issuance of flow-through shares

The Company is partially financed through the issuance of flow-through shares, requiring that the Company spend the proceeds for qualified mining exploration expenses. Moreover, tax rules regarding flow-through investments set deadlines for carrying out the exploration work, subject to penalties if the conditions are not respected. Although the Company is committed to taking all the necessary measures, refusal of certain expenses by the tax authorities would have a negative tax impact for investors.

In 2010, the Company received $1,249,990 following an issuance of flow-through units. During the nine month period ended September 30, 2011, the Company renounced $1,245,192 of its tax deductions relating to flow-through expenditures. The Company has until December 31, 2011 to make qualified mining exploration expenses totaling $1,245,192. As at September 30, the Company had incurred $1,157,783 of qualifying expenditure.

Investor relations

The Company has entered into contracts with investor relation companies that require the Company to make monthly payments for services received. These commitments require the Company to pay the investor relation firms $11,000 per month until October 2011 after which the payments reduce to $6,000 per month until June 2012.

11 Financial risk factors

Fair value

The carrying value of cash and cash equivalents, receivables, prepaid expenses, trade accounts payable and accrued liabilities and other liabilities approximate fair value, due to their short-term nature.

Foreign exchange risk

The Company had no revenue, operating expenses, monetary assets or liabilities that were denominated in a foreign currency. Certain expenditures in respect of the Black Diamond mining property are incurred in US dollars.

Credit risk

The Company did not have any commercial customers during the periods presented and is exposed to minimal credit risk through its bank.

Interest rate risk

The Company is exposed to minimal market interest rate fluctuations with respect to its cash and cash equivalents on hand.

Liquidity risk
The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2011, the Company had current assets of $210,914 (December 31, 2010 - $1,154,945) and current liabilities of $647,783 (December 31, 2010 - $711,941).
