**TRUECLAIM ANNOUNCES FILING OF NI 43-101 TECHNICAL REPORT
ON IRON NUGGET PROPERTY, ARIZONA AND RECEIPT OF DRILL PERMIT**

TRUECLAIM EXPLORATION INC. – (the “**Company**”) is pleased to announce it has completed its National Instrument 43 - 101 on the copper-gold anomaly at its Iron Nugget property located in south-central Gila County, Arizona. The report entitled “*Truclaim Resources (US) Inc. Technical Report Iron Nugget Property Arizona USA 2013*” is dated effective March 8, 2013 and is co-authored by Marck Croteau, P.Geo. and Nicholas Barr, B.Sc. (Geology). This is a significant step forward in the Company's exploration plan for project. The report states that copper-gold mineralization, hosted in massive magnetite as carbonate replacement near the intrusive contact, has returned assay values up to 7.45% and 0.076 opt (2.36 g/t) respectively. Please refer to the technical report for additional information regarding the property and exploration results. The Company has also received a permit from the United States Forest Service (USFS) to complete a preliminary drill program based on this report. The Company is exploring financing opportunities, including potential joint venture partners, to initiate and fund drilling as recommended by the report. The Company continues to move forward despite current market conditions. A full copy of the report is available on the Company’s website at www.trueclaimexploration.com and on the Company’s profile on SEDAR at www.sedar.com.

Technical information in this news release has been reviewed and approved by Mark Croteau, P. Geo., a consulting geologist from Sudbury, Ontario, Canada, a Qualified Person as defined in National Instrument 43-101 – *Standards of Disclosure for Mineral Projects*.
