(All amounts expressed in Canadian dollars, unless otherwise stated)

---

This Management Discussion and Analysis ("MD&A") provides a detailed analysis of the business of New Wave Holdings Corp. (the "Company") and describes its financial results for the nine months ended December 31, 2022. The MD&A should be read in conjunction with the unaudited condensed interim consolidated financial statements for the nine months ended December 31, 2022, and related notes, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") Refer to Note 3 of the March 31, 2022 audited consolidated financial statements for disclosure of the Company's significant accounting policies and a discussion of future accounting policy changes. The Company's reporting currency is the Canadian dollar and all amounts in this MD&A are expressed in the Canadian dollar. This MD&A is current as of February 28, 2023.

#### **Management's Responsibility**

The Company's management is responsible for the preparation and presentation of the financial statements and the MD&A. The financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board. This MD&A has been prepared in accordance with the requirements of securities regulators, including National Instrument 51-102 of the Canadian Securities Administrators, and the Canadian Securities Exchange.

#### **COMPANY BACKGROUND**

New Wave Holdings Corp. (formerly New Wave Esports Corp.) ("the Company" or "New Wave") was incorporated under the Business Corporation Act of British Columbia on May 17, 2006. The Company's objective is to generate income and achieve long term capital appreciation through investments focused on e-sports, NFT (non-fungible token), metaverse, blockchain and Web 3 sectors. The head office, principal address and records office of the Company are located at Royal Centre, Suite 1500, 1055 W Georgia Street, Vancouver, BC V6E 4N7.

On October 24, 2019, the Company completed a "three cornered" amalgamation whereby its previous wholly owned subsidiary, 1205619 B.C. Ltd., amalgamated with the company New Wave Holdings (BC) Corp. pursuant to an amalgamation agreement dated June 7, 2019 (announced in the Company's June 18, 2019 news release) as amended effective September 26, 2019, among the Company, 1205619 B.C. Ltd., and New Wave Holdings Corp. On October 28, 2019, the Company began trading on the Canadian Securities Exchange under the stock symbol NWES which was eventually changed to SPOR.

On May 8, 2020, the Company completed a three old shares for one new share consolidation. On June 18, 2021, the Company completed another 20 old shares for one new share consolidation. All references to common shares, options, and warrants and per common share amounts have been retroactively restated to reflect this share consolidation.

#### **QUARTERLY HIGHLIGHTS AND SUBSEQUENT DEVELOPMENTS**

- On February 15, 2022, the Company entered into a letter of intent to acquire all of the issued and outstanding securities of its investment in a private British Columbia corporation ("BCCO") and indirectly acquired Convergency LLC, doing business as BlockSt, a Florida corporation. As consideration, the Company is expected to issue 23,500,000 common shares. The Company has currently decided to postpone the acquisition of BCCO.

BlockSt was created to compile both a curated marketplace, general non-fungible token marketplace, as well as a social media outlet, into one space. NFT marketplaces are platforms where NFTs can be stored,

displayed, traded and in some cases minted (created). These NFTs are minted across numerous different blockchains. The native marketplace that BlockSt has built brings all of these blockchains together. This means that a project built on the ethereum network, and a project built on another network such as Solana, can be bought and sold in the same place. This concept remains true for every single compatible blockchain. Users also have the ability to bridge these tokens between the different blockchains. To date, any relevant network where NFTs can be minted and stored are compatible with the BlockSt platform.

**OVERALL PERFORMANCE**

The Company continued operations for the nine months ended December 31, 2022 and incurred a net loss of 555,527 primarily driven by the loss on remeasurement of its investments and incurred general operating cost consistent with maintaining its operations for the quarter. The Company is currently monitoring its investments and have decided to postpone the acquisition of BlockSt. The Company expects to continue to raise additional funds through equity and debt financings and seek additional investment opportunities including diversifying its investment portfolio and other similar investments.

the terms of the note, interest at the rate of 20% shall apply to all outstanding balance (including accrued interest) until the amounts owing under this note is brought into good standing. WoW will not be required to make monthly payments and is due on demand. On December 31, 2022, the Company recorded an impairment of \$77,883 on the promissory and the accrued interest charged.

**LIQUIDITY AND CAPITAL RESOURCES**

In management's view, given the nature of the Company's operations, which comprises commercial esports/gaming activities, investing and advising esports companies in business growth, market penetration, and product expansion, the most relevant financial information relates primarily to current liquidity, solvency and planned strategic growth. The Company's ability to continue as a going concern and realize the carrying value of its assets is dependent on its continued ability to raise capital through public equity financings, and upon the generation of profits from its investments, the outcome of which cannot be predicted at this time.

At December 31, 2022, the Company had working capital of \$1,958,134, including cash and cash equivalents of \$83,328.

The Company's budget is its working capital and believes that the current capital resources is not sufficient to pay overhead expenses and make new investments for the next twelve months and continues to raise additional funding to fund its marketing and general working capital and towards potential investments, if such opportunities arise. The Company will continue to monitor the current economic and financial market conditions and evaluate their impact on the Company's liquidity and future prospects.

Since the Company may not be able to generate cash from its operations in the foreseeable future, the Company will have to rely on the issuance of shares or the exercise of options and warrants to fund ongoing operations and investments. The ability of the Company to raise capital will depend on market conditions and it may not be possible for the Company to issue shares on acceptable terms or at all.

The Company manages its capital structure in order to ensure sufficient resources are available to meet operational requirements and safeguard its ability to continue as a going concern. There are no externally imposed capital requirements on the Company. Management considers the items included in shareholders' equity (deficit) and working capital as capital. The Company manages the capital structure and makes adjustments in response to changes in economic conditions, including the risk characteristics of the underlying assets. The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund the operation of the Company. To secure additional capital necessary to pursue these plans, the Company intends to raise additional funds through equity or debt financing.

Share Capital Activities

There were no share issuances during the nine months ended December 31, 2022.

**RESULTS OF OPERATION**

During the three months ended December 31, 2022:

During the three months ended December 31, 2022, the Company recorded a net income of \$98,510 compared to the net loss of \$1,623,678 for the comparable quarter ended December 31, 2022. The Company recognized a net investment gain of \$219,803 in the current quarter as compared to the net investment loss of \$1,017,183 for the comparable quarter. The net investment gain is the result of an unrealized gain of \$1,032,337 on its investment that mainly consisted of an increase in its remeasurement of its investment in Talon of \$1,012,355 based on a recent financing completed by Talon. This increase was offset by an impairment of its note receivable of \$813,542 from Pawtocol and WoW.

The Company had total expenses of \$121,293 for the current quarter as compared to \$526,240 for the comparable quarter a decrease of approximately \$405,000. The decrease can be attributed the decrease in consulting fees due to less consultants engaged in business advisory and development services, decrease in professional fees due to less legal services provided by legal counsel and a decrease in investor relations because of the discontinuation of investor relations services provided by consultants in the comparable quarter. All other costs are consistent with the comparable quarter ended December 31, 2022.

During the nine months ended December 31, 2022:

During the nine months ended December 31, 2022, the Company incurred a net loss of \$643,256 compared to the net loss of \$1,891,428 for the comparable period ended December 31, 2021. The Company recognized a net investment loss of \$176,150 in the current period as compared to the net investment loss of \$1,183,517 for the comparable period. The net investment loss is the result of an impairment of note receivables of \$813,542 from Pawtocol and WoW. The net investment loss was offset by an increase in unrealized gain on investment of \$631,509 that mainly consisted of an increase in its remeasurement of its fair value of Talon based on a recent financing completed by Talon.

The Company had total expenses of \$467,106 for the current period as compared to \$741,202 for the comparable period a decrease of approximately \$274,000. The decrease can be attributed the decrease in consulting fees due to less consultants engaged in business advisory and development services, decrease in professional fees due to less legal services provided by legal counsel and a decrease in investor relations because of the discontinuation of investor relations services provided by consultants in the comparable period. The decreases was offset by the increase in share-based payments of \$126,000 as compared to \$14,136 for the comparable period. During the period, the Company granted 2,520,000 stock options to directors, officers and consultants of the Company. The Company fair valued these stock options using the Black-Scholes option pricing model. All other costs are consistent with the comparable period ended December 31, 2022.

Accounts payable and accrued liabilities	549,720	597,452
Loan payable	135,471	-
Convertible debentures	98,954	80,555

**Fair value measurement**

As at December 31, 2022, financial instruments that are measured at amortized cost on the condensed interim consolidated statement of financial position are represented by cash and cash equivalents, account payable and accrued liabilities, and convertible debentures. The fair values of these financial instruments approximate the carrying value due to their short-term nature.

Financial assets and liabilities that are recognized on the condensed interim consolidated statement of financial position at fair value can be classified in a hierarchy that is based on the significance of the inputs used in making the measurements.

The levels in the hierarchy are:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The Company's financial assets measured at fair values through profit or loss are as follows:

December 31, 2022	Level 1	Level 2	Level 3
	\$	\$	\$
Investments	397,440	-	2,133,557

**Management of Industry and Financial Risk**

The Company's financial instruments are exposed to certain financial risks, which include the following:

*Credit risk*

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its bank account and note receivables. All of its cash is deposited in a bank account held with a major bank in Canada. As most of the Company's cash is held by one bank there is a concentration of credit risk. This risk is managed by using a major bank that is a high credit quality financial institution as determined by rating agencies. The maximum exposure to credit risk is the carrying amount of the Company's financial instruments.

*Foreign exchange risk*

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company is not exposed to significant foreign exchange risk.

*Liquidity risk*

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time.

The Company's main source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

*Price risk*

Equity price risk is the risk of potential loss to the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. As at December 31, 2022, the Company's equity investments of \$2,530,997, are subject to fair value fluctuations. If the fair value of the Company's marketable securities had decreased/increased by 10% with all other variables held constant, loss and comprehensive loss for the period ended December 31, 2022 would have been approximately \$253,000 higher/lower.

*Capital Management*

Management's objective is to manage its capital to ensure that there are adequate capital resources to safeguard the Company's ability to continue as a going concern through the optimization of its capital structure. The capital structure consists of share capital and working capital. In order to achieve this objective, management makes adjustments to it in light of changes in economic conditions and risk characteristics of the underlying assets. To maintain or adjust capital structure, management may invest its excess cash in interest bearing accounts of Canadian chartered banks and/or raise additional funds externally as needed. The Company is not subject to externally imposed capital requirements. The Company's management of capital did not change during the period ended December 31, 2022.

***Fair Value***

The fair value of the Company's financial assets and liabilities approximate the carrying amount wither due to their short-term nature or because the interest rates applied to measure their carrying amount approximate current market rates.

**RELATED PARTY TRANSACTIONS**

Related party transactions were in the normal course of operations and measured at the exchange amount, which is the amount established and agreed to by the related parties. Key management personnel are the persons responsible for planning, directing and controlling the activities of the Company, and include both executive and non-executive directors, and entities controlled by such persons. The Company considers all directors and officers of the Company to be key management personnel.

**Transactions with key management and directors**

The Company incurred the following transactions for the period ended, with companies controlled by current and former directors and officers of the Company:

	<b>For the nine months ended</b>	
	<b>December 31,</b>	
	<b>2022</b>	<b>2021</b>
	<b>\$</b>	<b>\$</b>
Consulting fees	72,000	24,000
Share-based compensation	40,000	-
	<b>112,000</b>	<b>24,000</b>

**Related parties balance**

Included in December 31, 2022 accounts payable and accrued liabilities is \$4,200 to a company controlled by an officer of the Company (March 31, 2022 - \$12,800) for unpaid consulting fees and are unsecured, non-interest bearing and payable on demand.

**Off-Balance Sheet Transactions**

The Company has not entered into any significant off-balance sheet arrangements or commitments.

**CRITICAL ACCOUNTING ESTIMATES****Significant estimates and assumptions**

The preparation of the condensed interim consolidated financial statements in accordance with IFRS requires the Company to make estimates and assumptions concerning the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

**Significant estimates**

Estimates and assumptions where there is significant risk of material adjustments to the statement of financial position in future accounting periods include the recoverability and measurement are as follows:

Valuation of investments

Investment transactions are recorded on a trade date basis. The cost of investments represents the amount paid for each investment and is determined on an average cost basis excluding transaction costs. The Company classifies its investments as fair value through profit or loss, with unrealized gains and losses recognized in profit or loss. The fair value of the Company's investments as at the financial reporting date are determined as follows: Common shares in quoted companies – All securities listed on a recognized public stock exchange are generally valued at their last bid price. Options and warrants – The options and warrants are valued at fair value using the Black-Scholes pricing model which considers factors such as market value of the underlying security, strike price, volatility and expected life. Investments in private companies and other investments – When the fair values of financial assets and financial liabilities recorded on the condensed interim consolidated statements of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques. The inputs to these models are derived from observable market data where possible, but where observable market data is not available, judgement is required to establish fair value.

**Significant judgments**

The preparation of the condensed interim consolidated financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in applying the Company's financial statements are as follows:

Going concern

The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay its ongoing operating expenditures and meet its liabilities for the ensuing year involves significant judgment based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances.

Investment entity

Management has applied judgement in determining whether the Company meets the criteria required under IFRS 10, in order to be classified as an investment entity.

***COVID-19***

Since December 31, 2019, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in a widespread health crisis that has affected economies and financial markets around the world resulting in an economic downturn. This outbreak may also cause staff shortages, reduced customer demand, increased government regulations or interventions, all of which may negatively impact the business, financial

---

condition or results of operations of the Company. The duration and impact of the COVID-19 outbreak is unknown at this time and it is not possible to reliably estimate the length and severity of these developments.

***Conflict in Ukraine***

The Company's business financial condition and results of operations may be further negatively affected by economic and other consequences from Russia's military action against Ukraine and the sanctions imposed in response to that action in late February 2022. While the Company expects any direct impacts, of the pandemic and the conflict in the Ukraine, to the business to be limited, the indirect impacts on the economy and on different industries in general could negatively affect the business.

***Going Concern***

As at December 31, 2022 the Company has an accumulated deficit of \$31,196,934 (March 31, 2022 - \$30,553,678 deficit), no source of operating cash flow and no assurance that sufficient funding will be available. Management has the option to raise funds through a combination of equity and/or debt financing, along with a sale of investments. The success of these plans will depend upon the ability of the Company to generate cash flows from its portfolio investments. These condensed interim consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary, should the Company be unable to continue as a going concern.

***Sector Specific Investment Risks***

The Company seeks a high return on investment opportunities on its psilocybin and esports sectors ("Sectors"). Thus, the Company is exposed to investment risks relating to these Sectors which is generally more volatile than the overall market. Investing in these Sectors can be speculative in nature and the value of the Company's investments may be subject to significant fluctuations. Such businesses entail a degree of risk, regardless of the skill and experience of the corporation's management. The assets, earnings and share values of corporations involved in these sectors are subject to risks associated with the world prices of related products, economic cycles, exchange rates, taxation changes and political events. Government restrictions can also be factors.

***Regulatory Risks***

The Company's investment in the psilocybin sector operate in a new industry which is highly regulated, highly competitive and evolving rapidly. As such, new risks may emerge, and management may not be able to predict all such risks or be able to predict how such risks may result in actual results differing from the results contained in any forward-looking statements. The Company's investments incur ongoing costs and obligations related to regulatory compliance. Failure to comply with regulations may result in additional costs for corrective measures, penalties or in restrictions of operations. In addition, changes in regulations, more vigorous enforcement thereof or other unanticipated events could require extensive changes to operations, increased compliance costs or give rise to material liabilities, which could have a material adverse effect on the business, results of operations and financial condition of the Company's investment and, therefore, on the Company's prospective returns.

The industry is subject to extensive controls and regulations, which may significantly affect the financial condition of market participants. The marketability of any product may be affected by numerous factors that are beyond the control of the Company which cannot be predicted, such as changes to government regulations, including those relating to taxes and other government levies which may be imposed. Changes in government levies, including taxes, could reduce the Company's earnings and could make future capital investments or the Company's operations uneconomic. The industry is also subject to numerous legal challenges, which may significantly affect the financial condition of market participants and which cannot be reliably predicted.

***Limited Operating History***

The Company has limited operating history as an investment company and has had limited success in its investment sectors. The Company and its business prospects must be viewed against the background of the risks, expenses and problems frequently encountered by companies in the early stages of their development, particularly companies in new and rapidly evolving markets such as the psilocybin sector. There is no certainty that the Company will be able to operate profitably.

***Key Personnel***

The Company is dependent upon the continued availability and commitment of its management, whose contributions to immediate and future operations are of significant importance. The loss of any such management could negatively affect the Company's business operations. From time to time, the Company will also need to identify and retain additional skilled management to efficiently operate its business. Recruiting and retaining qualified personnel is critical to the Company's success and there can be no assurance of its ability to attract and retain such personnel. If it is not successful in attracting and training qualified personnel, the Company's ability to execute its business model and growth strategy could be affected, which could have a material and adverse impact on its profitability, results of operations and financial condition.

***Lack of Control or significant influence over Companies in which the Company Invests***

In certain cases, the Company invests or may invest in securities of companies that the Company does not control or influence. These investments will be subject to the risk that the company in which the investment is made may make business, financial or management decisions with which the Company does not agree or that the majority stakeholders or management of the company may take risks or otherwise act in a manner that does not serve the Company's interests. If any of the foregoing were to occur, the values of investments by the Company could decrease and the Company's financial condition and cash flow could suffer as a result.

***Due Diligence***

The due diligence process undertaken by the Company in connection with investments that it makes or wishes to make may not reveal all relevant facts in connection with an investment. Before making investments, the Company will conduct due diligence investigations that it deems reasonable and appropriate based on the facts and circumstances applicable to each investment. When conducting due diligence investigations, the Company may be required to evaluate important and complex business, financial, tax, accounting, environmental and legal issues. Outside consultants, legal advisors, accountants and investment banks may be involved in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence investigations and making an assessment regarding an investment, the Company will rely on resources available, including information provided by the target of the investment and, in some circumstances, third party investigations. The due diligence investigations that are carried out with respect to any investment opportunity may not reveal or highlight all relevant facts that may be necessary or helpful in evaluating such investment opportunity. Moreover, such investigation will not necessarily result in the investment being successful.

***Fluctuations in the Value of the Company and the Common Shares***

The net asset value of the Company and market value of its common shares will fluctuate with changes in the market value of the Company's investments. Such changes in value may occur as the result of various factors, including general economic and market conditions, the performance of corporations whose securities are part of the Company's investment portfolio and changes in interest rates which may affect the value of interest-bearing securities owned by the Company. There can be no assurance that shareholders will realize any gains from their investment in the Company and may lose their entire investment.

***Need to Manage Growth***

The Company could experience rapid growth in revenues, personnel, complexity of administration and in other areas. There can be no assurance that the Company will be able to manage the impact that growth could place on the Company's administrative infrastructure, systems and controls. If the Company is unable to manage future growth effectively, the Company's business, operations and operating results and financial condition may be materially adversely affected.

**MANAGEMENT'S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS**

The information provided in this report is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying financial statements.
