1. Nature and continuance of operations and going concern

Fandom Sports Media Corp. (formerly Hatch Interactive Technologies Corp. and Tosca Resources Corp), (the "Company") is a publicly listed company incorporated in Canada under the British Columbia Corporations Act on May 12, 2006. The Company was previously listed on the TSX-Venture Exchange under the trading symbol "TSQ" while engaged principally in the acquisition and exploration of resource properties.

On August 30, 2015, Tosca Resources Corp. ("Tosca") completed a Share Exchange Agreement (Note 8) with Hatchitech Technologies Corp. ("Hatchitech"), a private company incorporated on February 21, 2011 under the laws of British Columbia, Canada. On September 4, 2015, the Company ceased trading on the TSX-Venture Exchange and began trading on the Canadian Securities Exchange ("CSE") under the trading symbol "HAT" (subsequently changed to "FDM" on August 3, 2016). The transaction was accounted for as an acquisition of Tosca by Hatchitech, resulting in a reverse take-over (the "RTO"). Immediately following the RTO, Tosca changed its name to Hatch Interactive Technologies Corp. and on August 3, 2016, to Fandom Sports Media Corp. On February 10, 2016, Hatchitech changed its name to Fandom Media Group Inc. For the purposes of these consolidated financial statements, the "Company" refers to Hatchitech prior to the date of RTO and the consolidated entity thereafter.

The Company's primary business is the development and monetization of online and mobile applications.

The Company's registered and records office is located at Suite 1710, 1177 West Hastings St., Vancouver, British Columbia, Canada, V6E 2L3. The Company's head office is located at 68 Water Street, Suite 505, Vancouver, British Columbia, Canada V6B 1A4.

These financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. The Company's continuation as a going concern is dependent upon the successful results from the development and monetization of the Company's online and mobile applications and its ability to attain profitable operations and generate funds from and/or raise equity capital or borrowings sufficient to meet current and future obligations, all of which are uncertain. These material uncertainties may cast significant doubt about the ability of the Company to continue as a going concern. Management intends to finance operating costs over the next twelve months with loans from related parties, exercise of stock options and/or private placement of common shares.

2. Statement of Compliance and Basis of Presentation

Statement of compliance

These unaudited condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") using accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the IFRS Interpretations Committee.

These unaudited condensed consolidated interim financial statements do not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Company for the year ended January 31, 2016.

Basis of Presentation

Effective August 30, 2015, in connection with the RTO, the Company consolidated its common shares on a 3:2 basis (3 old shares were exchanged for 2 new shares). All disclosures regarding number of shares, stock options, share purchase warrants and loss per share in current and previous accounting periods have been adjusted retroactively to reflect this consolidation.

2. Statement of Compliance and Basis of Presentation (continued)

Basis of presentation (continued)

These consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments, which are measured at fair value. The presentation and functional currency is the Canadian dollar.

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, as follows:

	Jurisdiction of Incorporation	Percentage owned	
		July 31, 2016	July 31, 2015
Fandom Media Group (formerly Hatchitech Technologies)	Canada	100%	n/a

The consolidated financial statements include the accounts of Tosca from August 30, 2015, the date of the RTO. The financial statements prior to this date include only the accounts of Hatchitech. Inter-company transactions and balances are eliminated upon consolidation.

3. Significant Accounting Policies

Significant accounting judgments, estimates and assumptions

The preparation of the Company's consolidated interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated interim financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to:

- The determination of income tax is inherently complex and requires making certain estimates and assumptions about future events. While income tax filings are subject to audits and reassessments, the Company has adequately provided for all income tax obligations. However, changes in facts and circumstances as a result of income tax audits, reassessments, jurisprudence and any new legislation may result in an increase or decrease of the tax provision for income taxes. With respect to the recognition of deferred tax assets, the Company considers whether the realization of deferred tax assets is probable in determining whether or not to recognize these deferred tax assets.
- Stock-based compensation is subject to estimation of the value of the award at the date of grant using pricing models such as the Black-Scholes option valuation model. The option valuation model requires the input of subjective assumptions including the expected share price volatility. Because the Company's warrants have characteristics significantly different from those of traded options and because the subjective input assumptions can materially affect the calculated fair value, such value is subject to measurement uncertainty.

3. Significant Accounting Policies (continued)

Foreign exchange

The functional currency of the Company and its subsidiary is the currency of the primary economic environment in which the Company operates. The consolidated financial statements are presented in Canadian dollars, which is the Company and its subsidiary's functional currency. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, The Effects of Changes in Foreign Exchange Rates.

At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the period end exchange rate, while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in the statement of loss and comprehensive loss.

Intangible assets

Intangible assets consist of website and platform developed in-house or acquired externally, on which advertisements are placed. The amount initially recognized for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meet the following recognition criteria: i) the technical feasibility of the completing the intangible assets so that it will be available-for-use or sale; ii) its intention to complete the intangible asset and use or sell it; iii) its ability to use or sell the intangible asset; iv) how the intangible asset will generate probably future economic benefits; v) the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and vi) its ability to measure reliably the expenditure attributable to the intangible asset during its development; otherwise they are expensed as incurred. Subsequent to initial recognition, the Company reports internally-generated intangible assets at cost less accumulated amortization and accumulated impairment losses. Intangible assets are measured at cost less accumulated amortization and accumulated impairment losses, if any. Intangible assets acquired through asset acquisition or business combinations are initially recognized at fair value based on an allocation of the purchase price.

Intangible assets in use are amortized on a straight-line basis over their estimated useful life of 5 years. The amortization method, estimated useful life and residual values are reviewed each financial year end or more frequently if required, and are adjusted as appropriate. Intangible assets under development and not ready for use are not amortized.

Share-based compensation

Stock-based compensation to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Stock-based compensation to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The corresponding amount is recorded to the option reserve. The fair value of options is determined using a Black-Scholes Pricing Model which incorporates all market vesting conditions. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting periods such that the amount recognized for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest.

3. Significant Accounting Policies (continued)

Financial instruments

Financial assets

The Company classifies its financial assets into one of the following categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss - This category comprises derivatives, or assets acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statement of loss and comprehensive loss.

Loans and receivables - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at cost less any provision for impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default.

Held-to-maturity investments - These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at a amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in the statement of loss and comprehensive loss.

Available-for-sale - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in equity. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognized in the statement of loss and comprehensive loss.

All financial assets except for those at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

Financial liabilities

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the liability was incurred. The Company's accounting policy for each category is as follows:

Fair value through profit or loss - This category comprises derivatives, or liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statement of statement of loss and comprehensive loss.

Other financial liabilities: This category consists of non-derivative financial liabilities which are measured at a amortized cost.

3. Significant Accounting Policies (continued)

The Company has implemented the following classifications for its financial instruments:

- a) Cash has been classified as fair value through profit or loss.
- b) Receivables have been classified as loans and receivables and measured at a mortized cost.
- c) Accounts payable have been classified as other financial liabilities and are measured at a mortized cost.

Disclosures are required about the inputs used in making fair value measurements, including their classification within a hierarchy that prioritizes their significance. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly;

Level 3 – Inputs that are not based on observable market data.

See Note 13 for relevant disclosures.

Impairment of assets

The carrying amount of the Company's long-lived assets (which include equipment and intangible assets) is reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. An impairment loss is recognized whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are included in the determination of net loss.

The recoverable amount of assets is the greater of an asset's fair value less cost to sell and value in use. In assessing value in use, the estimated future cashflows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is only reversed if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount; however, not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognized in previous years.

Assets that have an indefinite useful life are not subject to a mortization and are tested annually for impairment.

Income taxes

Current income tax:

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the Canadian taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity and not in profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3. Significant Accounting Policies (continued)

Deferred tax:

Deferred tax is provided using the statement of financial position method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and recognized only to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Equipment

Equipment is stated at historical cost less accumulated amortization and accumulated impairment losses.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the statement of loss and comprehensive loss during the financial period in which they are incurred.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized in profit or loss.

Amortization is calculated on a declining balance method to write off the cost of the assets to their residual values over their estimated useful lives. The amortization rates applicable to each category of equipment are as follows:

Class of equipment	Amortization rate
Computer equipment	30% declining balance

Loss per share

Basic loss per share is calculated by dividing the loss available to common shareholders by the weighted average number of common shares outstanding during the period. Dilutive earnings per share reflect the potential dilution of securities that could share in the earnings of an entity. In periods where a net loss is incurred, potentially dilutive common shares are excluded from the loss per share calculation as the effect would be anti-dilutive and basic and diluted loss per common share is the same. In a profit year, under the treasury stock method, the weighted average number of common shares outstanding used for the calculation of diluted earnings per share assumes that the proceeds to be received on the exercise of dilutive stock options and warrants are used to repurchase common shares at the average price during the year.

4. New Standard, Interpretations and Amendments Not Yet Effective

A number of new standards, amendments to standards and interpretations are not yet effective as of July 31, 2016 and have not been applied in preparing these financial statements.

New standard IFRS 9 “Financial Instruments”

This new standard is a partial replacement of IAS 39 “Financial Instruments: Recognition and Measurement”. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets.

The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. The Company will adopt this standard effective February 1, 2018.

Other new accounting standards and amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company’s financial statements.

At July 31, 2016	\$ -	\$ 746,754	\$ 746,754

8. Share Exchange Agreement

On August 30, 2015, in accordance with the Share Exchange Agreement (Note 1), Tosca issued 32,124,732 common shares for all of the issued and outstanding 32,124,732 shares of Hatchitech.

The transaction resulted in the shareholders of Hatchitech acquiring control of the Company. Therefore, the transaction has been accounted for as an acquisition of Tosca by Hatchitech. As Tosca does not meet the definition of a business as defined in IFRS 3, it has been accounted for as a share-based payment transaction in accordance with IFRS 2. The excess of the consideration over the net assets acquired was expensed as the cost of obtaining a public listing.

The following table provides details of the fair value of the consideration given and the fair value of the assets and liabilities acquired:

Consideration	Number	Amount
Outstanding common shares of Tosca	13,496,425	\$1,349,643
Outstanding stock options of Tosca	755,500	32,000
Outstanding warrants of Tosca	8,261,063	129,000
Net assets acquired		(345,500)
Listing fee		\$1,165,143

As Hatchitech is deemed to be the accounting acquirer for accounting purposes, its assets, liabilities and operations are included in the financial statements at their historical carrying values. The consolidated financial statements are a continuation of Hatchitech. Tosca's financial performance and cash flows are included from August 31, 2015.

9. Accounts payable and accrued liabilities

	July 31, 2016	January 31, 2016
Accounts payable (Note 12)	\$ 288,191	\$ 274,911
Accrued liabilities	22,789	40,809
	\$ 310,980	\$ 315,720

10. Share capital**Authorized share capital**

Unlimited number of common shares without par value.

Issued share capital

Issued and outstanding on July 31, 2016: 59,216,157 (July 31, 2015: 30,124,733)

Changes in Share Capital

On May 26, 2016, the Company issued 8,735,000 common shares at \$0.05 per share for total gross proceeds of \$436,750.

On February 26, 2016, the Company issued 3,270,000 common shares at \$0.05 per share for total gross proceeds of \$163,000. The Company issued 100,000 common share with a fair value of \$5,000 to finders in relation to this share issuance.

On February 26, 2016, the Company issued 100,000 common shares with a fair value of \$15,000 in connection with the completion of work related to a statement of work contract for a contractor.

On November 9, 2015, the Company issued 1,340,000 common shares at \$0.10 per share for total gross proceeds of \$134,000. The Company issued 50,000 common share with a fair value of \$5,000 to finders in relation to this share issuance.

On February 24, 2015, the Company issued 2,000,000 common shares with a fair value of \$180,000 for marketing services for a twelve month period. At January 31, 2016, \$105,000 of the \$180,000 was recorded in prepaid expenses.

During the year ended January 31, 2015, the Company issued 24,794,732 common shares with a fair value of \$717,592 to settle outstanding payables.

On November 3, 2014, the Company completed a share split on a 39,000:1 basis. Concurrent with the RTO, the Company completed a share consolidation of its common shares on a 3:2 (3 old for 2 new) basis. All references to the issuance, granting, exercising of common stock, stock options and warrants and loss per share amounts in the financial statements have been adjusted to reflect the retroactive effect of the stock split and the share consolidation.

Stock options

The Company has adopted an incentive stock option plan, which enables the Board of Directors of the Company from time to time, in its discretion, and in accordance with the CSE requirements, grant to directors, officers, employees and technical consultants to the Company, non-transferable stock options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed 10% of the Company's issued and outstanding common shares. Such options will be exercisable for a period of up to 5 years from the date of grant. In connection with the foregoing, the number of common shares reserved for issuance to any one optionee will not exceed five percent (5%) of the issued and outstanding common shares and the number of common shares reserved for issuance to all investor relations and technical consultants will not exceed two percent (2%) of the issued and outstanding common shares. Options may be exercised no later than 90 days

10. Share capital (continued)

following cessation of the optionee's position with the Company or 30 days following cessation of an optionee conducting investor relations activities' position.

On July 6, 2016, the Company granted 1,650,000 stock options to directors, employees and consultants, which vested immediately and are exercisable at \$0.10 per share for a period of five years. The fair value of this grant was determined by the Black-Scholes Option Pricing Model using the following assumptions: expected life – 5 years, average risk-free interest rate 0.54%, expected dividend yield – 0%, and average expected stock price volatility – 100%. During the period ended July 31, 2016, \$122,100 (2015 - \$nil) was recognized in share-based payment and recorded in share-based payment reserve for vested options.

On November 1, 2015, the Company granted 3,800,000 stock options to directors, employees and consultants, which vested immediately and are exercisable at \$0.10 per share for a period of five years. The fair value of this grant was determined by the Black-Scholes Option Pricing Model using the following assumptions: expected life – 5 years, average risk-free interest rate 0.90%, expected dividend yield – 0%, and average expected stock price volatility – 100%. During the year ended January 31, 2016, \$282,100 (2015 - \$nil) was recognized in share-based payment and recorded in share-based payment reserve for vested options.

The continuity schedule of stock options is as follows:

	Number of stock options
Balance, January 31, 2015	-
Assumed in RTO	755,500
Cancelled	(243,000)
Granted	3,800,000
Balance, January 31, 2016	4,312,500
Cancelled	1,150,000
Granted	1,650,000
Balance, July 31, 2016	4,812,500

A summary of the Company's outstanding and exercisable stock options as at July 31, 2016 is as follows:

Weighted average exercise price	Remaining contractual life	Number of options outstanding	Expiry Dates
\$0.115	0.56 years	450,000	February 20, 2017
\$0.32	2.43 years	62,500	January 2, 2019
\$0.10	4.26 years	2,650,000	November 1, 2020
\$0.10	4.93 years	1,650,000	July 6, 2021
\$0.10	4.12 years	4,812,500	

Share purchase warrants

The continuity schedule of share purchase warrants is as follows:

	Number of share purchase warrants
Balance, January 31, 2015	-
Assumed in RTO	8,261,063
Expired	(3,191,250)
Balance, January 31, 2016	5,069,813
Granted	6,002,500
Expired	(702,313)
Balance, July 31, 2016	10,370,000

As of July 31, 2016 the continuity schedule of warrants is as follows

Weighted average exercise price	Remaining contractual life	Number of warrants outstanding	Expiry Dates
\$0.35	0.75 years	4,367,500	May 1, 2017
\$0.10	1.57 years	1,635,000	Feb 25, 2018
\$0.10	1.82 years	4,367,500 *	May 25, 2018
\$0.21	1.33 years	6,704,813	

* This is not a duplicate entry

11. Share-based payment reserve

The share-based payment reserve records items recognized as share-based compensation expense and the fair value initially recorded for warrants issued until such time that the stock options or warrants are exercised, at which time the corresponding amount will be transferred to share capital.

12. Related party balances and transactions

Key management compensation

During the six-month period ended July 31, 2016, the Company has incurred charges from directors and senior management, or companies controlled by them, for management fees and consulting fees in the amount of \$76,200 (2015 - \$Nil).

As at July 31, 2016, \$42,905.74 (2015, \$Nil) due to directors or companies controlled by directors was included in accounts payable (Note 9).

As at July 31, 2016, \$Nil (2015 \$30,869) was due to a company controlled by a director. This amount is unsecured, non-interest bearing and without fixed terms of repayment.

13. Financial risk management and capital management

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Cash is carried at fair value using a Level 1 fair value measurement. The carrying value of receivables and accounts payable approximate their fair value because of the short-term nature of these instruments.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its bank accounts. This risk is managed by using major banks that have a high credit quality financial institution as determined by rating agencies. Credit risk is assessed as low.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when they come due. As at July 31, 2016, the Company had current liabilities of \$310,980, \$34,052 of cash and minimal assets readily convertible to cash. To improve liquidity, the Company is continually investigating financing opportunities.

13. Financial risk management (continued)

As disclosed in Note 1, there can be no assurance these efforts will be successful in the future. All of the Company's financial liabilities are subject to normal trade terms. Liquidity risk is assessed high.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, commodity prices, and interest rates will affect the Company's net earnings or the value of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. As at July 31, 2016 and January 31, 2016, the Company did not have any significant interest rate risk.

Foreign exchange risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The foreign currency risk for the Company is low.

Commodity price risk

The Company is not exposed to commodity price risk.

Capital Management

The Company identifies capital as cash and items included in shareholders' equity. The Company raises capital through private and public share offerings and related party loans and advances. Capital is managed in a manner consistent with the risk criteria and policies provided by the board of directors and followed by management. All sources of financing and major expenditures are analyzed by management and approved by the board of directors.

The Company's primary objectives when managing capital is to safeguard and maintain the Company's financial resources for continued operations and to fund expenditure programs to further advance its assets.

The Company is meeting its objective of managing capital through detailed review and due diligence on all potential acquisitions, preparing short-term and long-term cash flow analysis to maintain sufficient resources.

The Company is able to scale its expenditure programs and the use of capital to address market conditions by reducing expenditure and the scope of operations during periods of commodity pricing decline and economic downturn.

There were no changes in the Company's approach to capital management during the period ended July 31, 2016 and the Company is not subject to any externally imposed capital requirements.

14. Segmented information

Operating segments

The Company operates in one reportable operating segment, which is in Canada. All assets are located in Canada.

15. Income Taxes

The provision for income taxes recorded in the financial statements differs from the amount which would be obtained by applying the combined federal and provincial statutory income tax rates of 26% (2015- 26%) to net loss as follows:

	Years ended January 31,	
	2016	2015
Loss for the year	\$ (1,946,702)	\$ (199,634)
Expected income tax recovery	(506,142)	(51,905)
Non-deductible items and others	144,362	5,066
Temporary income tax differences not recognized	361,780	46,839
Total tax recovery	\$ -	\$ -

The significant components of the Company's unrecorded deferred tax assets and liabilities are as follows:

	January 31, 2016	January 31 2015
Non-capital losses	\$ 1,345,242	\$ 119,791
Allowable capital losses	1,029,030	-
Equipment	257	(5,628)
Exploration and evaluation assets	826,000	-
Finance costs	9,894	-
Valuation allowance	(1,837,824)	(114,163)
	\$ -	\$ -

The significant components of the Company's temporary differences and unused tax losses are as follows:

	Amount	Expiry
Non-capital losses	\$ 5,174,000	2026-2036
Allowable capital losses	267,652	No expiry
Equipment	1,968	No expiry
Exploration and evaluation assets	826,072	No expiry
Finance costs	38,054	No expiry
	\$ -	

16. Events After The Reporting Period

- a) **On September 19, 2016**, The Company completed a private placement of 2,516,213 units at \$0.08 per unit for total proceeds of \$201,297. Each unit consists of one common share and one warrant exercisable at \$0.10 per share for 2 years from closing. The Company paid no finder's fees.
