

# Update to Shareholders Regarding the Seahawk Ventures Inc. 2019 Exploration Program

Vancouver, British Columbia--(Newsfile Corp. - March 5, 2019) - Seahawk Ventures Inc. (CSE: SHV) ("**Seahawk**") is pleased to update the shareholders on the company's current and planned exploration activities in the Urban-Barry Gold Camp where Osisko Mining is evaluating the Windfall Lake Zones and Bonterra Resources is evaluating the Gladiator Zone at the advanced exploration stage.

As outlined in our Jan 3<sup>rd</sup>, 2019, press release, Seahawk raised \$912,240.00 to further explore our five strategically located properties in the Urban-Barry Gold Camp.

To date we have completed a detailed Airborne Total Field Magnetometer Survey over the Blitz Property and we expect the report in the next few weeks.

A detailed Airborne Electromagnetic and Total Field Magnetometer Survey will be completed in the next two weeks over the Skyfall Property. The southern part of the Skyfall Property has never been flown with modern day geophysical surveys and we expect numerous new diamond drill targets to be identified.

When the results are received from these airborne surveys we will complete a review and planning program integrating the new information into a comprehensive geological/geophysical/historical work compilation of all our properties to finalize the 2019 work programs.

At this time it is planned to complete prospecting, geological surveys, ground geophysical surveys and diamond drill evaluation of priority targets on all five properties starting as soon as the access conditions allow.

With the newly acquired technical information we look forward to the discovery and evaluation of numerous new mineralized gold zones on our properties.
