

Seahawk Ventures Inc. 2019 Exploration Drilling Program Commenced

Vancouver, British Columbia--(Newsfile Corp. - October 24, 2019) - Seahawk Ventures Inc. (CSE: SHV) ("**Seahawk**") is pleased to inform shareholders on the company's exploration activities in the Urban-Barry Gold Camp where Osisko Mining and Bonterra Resources continue to report impressive high grade gold intersections from their ongoing diamond drill programs

The 2019 Seahawk Exploration Drilling Program has commenced to evaluate our Urban-Barry properties. This drill evaluation will be a phase 1 program to follow up on priority geophysical and geological targets that have been previously identified during prospecting programs and geophysical surveys.

It is planned that the drill program will concentrate on the Touchdown and Blitz properties where the Road showing (Touchdown) and the Bella showing (Blitz) returned economic Au grades in grab samples. The Mystery and Xtra Point properties will also be drill evaluated.

It is anticipated the diamond drill program will involve 2,300 meters of NQ sized drill core across all the properties.

To date, the 2019 Seahawk Ventures Inc. exploration program has discovered a new showing on the Blitz Property, extended the Road showing on the Touchdown Property and revealed the initial geology/geophysical/mineralization environments on the Skyfall Property.

We are encouraged with the encouraging results to date of the continuing 2019 exploration program and look forward to positive results from this Phase 1 Drill Evaluation Program.
