

High Grade Gold Intersections Discovered by Seahawk Ventures Inc. 2019 Diamond Drill Program

Vancouver, British Columbia--(Newsfile Corp. - February 11, 2020) - **Seahawk Ventures Inc. (CSE: SHV)** ("**Seahawk**") is pleased to report the initial assay results of the fall 2019 grass roots diamond drill program on the company's Touchdown, and Blitz properties located in the Urban-Barry Gold Camp where Osisko Mining (Windfall) and Bonterra Resources (Moroy and Barry) are evaluating their properties at the advanced exploration stage.

The results below clearly indicate there is an appreciable amount of gold in the mineralizing systems and there is a very high probability of discovering higher grade and wider zones along strike and at depth. The presence of sulphide mineralization is significant.

HIGHLIGHTS of the SEAHAWK 2019 EXPLORATION DIAMOND DRILL PROGRAM

TOUCHDOWN PROPERTY

- The diamond drilling intersected numerous Au intersections, the best being 5.2 g/t Au over 4.1 m including 7.26 g/t Au over .7 m, 4.5 g/t Au over 1.6 m and 13.78 g/t Au over 1.00 m in Hole TD-19-01.
- Another high grade intersection returned 13.32 g/t Au over 1.6m lower down the hole.
- Numerous highly anomalous (.4 g/t Au to .5 g/t Au) intersections over varying widths were returned in Holes TD-19-01, 02, 06, 07, 08 and 11.
- All the significant Au assays are observed to be associated with sulphide mineralization.

BLITZ PROPERTY

- The significant intersections were in Hole BE-19-01 which returned 1.1 g/t Au over 4.4 m including 1.53 g/t Au over 1.1 m.
- Wide highly anomalous intersections of .42 g/t Au over 14.7 m or .40 g/t Au over 16.6 m were also intersected in Hole BE-19-01.
- All the significant Au assays are observed to be associated with sulphide mineralization.

The Touchdown Property is located approximately 20 km east of Bonterra's Gladiator Property, The Blitz Property is located approximately 5 km north-west of the Grevet Mine and 30 km north-north-east of the town of Lebel sur Quevillion in the near northwestern region of Quebec.

On the Touchdown and Blitz Properties the grass roots diamond drill program was extremely successful in discovering numerous new Au zones in areas where no previous diamond drilling has ever been completed. These Au intersections range from highly anomalous to high grade and vary in width from .1 meters to 4.4 meters.

Laboratoire Expert Inc. of Rouyn-Noranda, Quebec completed all of the assaying.

Based on the very significant and encouraging results obtained in the 2019 Grass Roots Diamond Drill program, the company is preparing a multi-discipline exploration program including line cutting, magnetometer and deep penetrating Induced Polarization geophysical surveys (to locate the areas of sulphide concentrations along strike and at depth) and a minimum 5,000 meter diamond drill program to further evaluate the Touchdown and Blitz Properties.

Seahawk Ventures Inc. management is extremely pleased and encouraged by the results received to date from the 2019 Diamond Drill Program on the Touchdown and Blitz Properties. We remind shareholders and other investors that these important results are from a Grass Roots Drill Program, evaluating magnetic features on properties that were never drill evaluated in the past.

These results clearly indicate there is an appreciable amount of gold in the mineralizing systems and there is a very high probability of discovering higher grade and wider zones along strike and at depth.

The drill program was completed between October and December 2019 and included 18 diamond drill holes totaling 3,075 meters.
