Notes to the Condensed Interim Consolidated Financial Statements (*unaudited*)

1. Nature of Operations

Radio Fuels Energy Corp (formerly Mainstream Minerals Corporation) (the "Company") was incorporated in Canada pursuant to *The Canada Business Corporations Act* on July 19, 2006. On November 24, 2021, the Company filed Certificate of Amendment to change its name. The mailing and office address of its executive office is: 401 – 217 Queen Street West, Toronto, ON M5V 0R2.

The Company is a mineral resource company in the development stage that is engaged in the acquisition of interests in, and in the exploration of, mineral resource properties.

As at February 28, 2023, the Company had a working capital of \$19,626,645 (November 30, 2022 – \$20,436,63), had not yet achieved profitable operations, has accumulated losses of \$17,163,580 (November 30, 2022 - \$16,631,804) and expects to incur future losses in the development of its business.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of interest in mineral properties and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs to the carrying values.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, aboriginal claims, unregistered claims, and non-compliance with regulatory and environmental requirements.

When stock market conditions become favourable for mineral exploration companies to raise capital, management plans to secure the necessary financing through a combination of issuance of new equity or debt instruments entering into joint venture arrangements. Nevertheless, there is no assurance that these initiatives will be successful.

The Company will require substantial additional funds to further explore and, if warranted, develop its exploration properties. The Company has limited financial resources and no current source of recurring revenue, and there is no assurance that additional funding will be available to the Company to carry out the completion of its planned exploration activities. There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in the delay or indefinite postponement of further exploration and property development. The terms of any additional financing obtained by the Company could result in substantial dilution to the shareholders of the Company.

The COVID-19 pandemic has not resulted in any material impact on operations and the Company currently does not expect it will impact its 2023 operations. Preventative measures are in place to ensure the well-being of employees and contractors and no risks were noted at the end of the year. Management continues to monitor the situation at the site and corporate office to identify any issues that may affect operational or financial reporting activities.

12. Financial instruments

Fair value

As at February 28, 2023, the carrying and fair value amounts of the Company's financial assets at amortized cost and financial liabilities at amortized cost are approximately equivalent due to the relatively short periods to maturity of these instruments

Fair value estimates are made at a specific point in time, based on relevant market information and information about financial instruments. These estimates are subject to and involve uncertainties and matters of significant judgment, therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value hierarchy

A fair value hierarchy establishes three levels to classify valuation techniques used to measure fair value.

Level 1 items are quoted prices in active markets for identical assets or liabilities.

Level 2 items are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets or quoted prices that are derived principally from or corroborated by observable market.

Level 3 inputs are unobservable and supported by little or no market activity.

The fair value hierarchy gives the highest priority to Level 1 items and the lowest priority to Level 3 items. Marketable securities are in Level 1 of fair value hierarchy with a fair value of \$15,984,408 and a cost of \$20,160,113 (November 30, 2022 - fair value of \$16,509,918 and a cost of \$19,894,109).
