Form 51-102F1 – Management's Discussion & Analysis
For the three months ended July 31, 2011

Date: October 24, 2011

INTRODUCTION

This management discussion and analysis ("MD&A") of the operating results and financial condition of Silver Sun Resource Corp (the "Company") for the three months ended July 31, 2011 is prepared in accordance with International Financial Reporting Standards ("IFRS") and should be read in conjunction with the condensed consolidated interim financial statements for the three months ended July 31, 2011 (the "Financial Statements") IFRS replaces current Canadian GAAP for publicly accountable enterprises, including the Company, effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. Accordingly, the accompanying unaudited condensed consolidated interim financial statements for the three months ended July 31, 2011 have been prepared in accordance with IAS 34, Interim Financial Statements, using accounting policies consistent with IFRS.

The transition to IFRS resulted in changes to the Company's significant accounting policies, however these changes in accounting policies did not have a significant effect on the Company's fiscal May 1, 2010 statement of financial position or its fiscal 2011 comparative information presented in the financial statements for the three months ended July 31, 2011. Financial information for periods prior to May 1, 2010 have not been assessed for whether there would be significant adjustments as a result of the changes in accounting policies on adoption of IFRS.

Readers of the MD&A should refer to "Changes in Accounting Policies" below, and Note 13 of the accompanying condensed interim financial statements, for a discussion of IFRS and its impact on the Company's financial statements.

Readers should use the information contained in this MD&A in conjunction with all other disclosure documents including those filed on SEDAR (www.SEDAR.com).

All dollar amounts referred to in this discussion and analysis are expressed in Canadian dollars except where indicated otherwise. The date of this MD&A is October 24, 2011.

Additional information relevant to the Company's activities can be found on SEDAR at www.sedar.com. As used in this management's discussion and analysis, the terms "we", "us", "our", the "Company" and "Silver Sun" mean Silver Sun Resource Corp. and our subsidiaries, unless otherwise indicated.

FORWARD LOOKING STATEMENTS

Certain statements contained in the following Management's Discussion and Analysis (MD&A) constitute forward-looking statements. Forward-looking statements are frequently, but not always identified by words such as "expects", "anticipates", "believes", "intends", "estimates", "potential", "possible" and similar expressions, or statements that events, conditions or results "will", "may", "could" or "should" occur or be achieved. The forward-looking statements may include statements regarding exploration results and budgets, mineral resource estimates, work programs, capital expenditures, timelines, strategic plans, market price of

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

commodities or other statements that are not statement of fact. Forward-looking statements are statements about the future and are inherently uncertain, and actual achievements of the Company may differ materially from those reflected in forward-looking statements due to a variety of risks, uncertainties and other factors. The Company's forward-looking statements are based on the beliefs, expectations and opinions of management on the date the statements are made, and the Company does not assume any obligation to update forward-looking statements if circumstances or management's beliefs, expectations or opinions should change except as required by law. For the reasons set forth above, investors should not place undue reliance on forward-looking statements. Important factors that could cause actual results to differ materially from the Company's expectations include uncertainties involved in disputes and litigation, fluctuations in commodity prices and currency exchange rates; uncertainties relating to interpretation of drill results and the geology, continuity and grade of deposits; uncertainty of estimates of capital and operating costs, recovery rates, production estimates and economic return; the need for cooperation of government agencies and native groups in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs or in construction projects and uncertainty in meeting anticipated program milestones; uncertainty as to timely availability of permits and other government approvals at Cherry Hill and Zacatecas properties, as well as other risks and uncertainties disclosed in other information released by the Company from time to time and filed with the appropriate regulatory agencies.

OVERALL PERFORMANCE

Description of Business

The Company was incorporated under the Business Corporations Act (British Columbia) on March 14, 2007, and was classified as a Capital Pool Company as defined in TSX Venture Exchange (the "Exchange") Policy 2.4. The Company's place of business is 400-409 Granville Street, Vancouver, BC, V6C 1T2. On October 1, 2007, the Company's common shares were listed and posted for trading on the Exchange under the symbol "SSU".

Overview and Results and Description of Exploration and Evaluation

Zacatecas Mineral Claims, Zacatecas, Mexico

On August 14, 2008, the Company entered into an Option Agreement with Yale Resources Ltd. ("Yale") whereby the Company obtained an option to acquire 100% of Yale's 65% vested participating interest in a Joint Venture Agreement dated August 8, 2008, between Yale and Impact Silver Corp. ("Impact"), with respect to three mining concessions in Zacatecas, Mexico. The venture consists of three separate properties: Mina San Jose, Salvador, and Zacatecas which are located approximately 15 kilometers northwest of the municipality of Zacatecas, the capital city of Zacatecas State, Mexico.

In order to exercise the option, the Company agreed to pay \$150,000 and issue 500,000 common shares to Yale and incur exploration expenditures of \$200,000 over a 13-month period. The Company also agreed to pay US\$250,000 to Yale if the property was included in a positive feasibility study or is part of a production on the property that is greater than 500 tones per day. The Company subsequently paid \$50,000 towards the \$150,000 payment obligation and issued 200,000 shares towards the 500,000 shares issuable to Yale. The

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

remaining \$100,000 payment was waived in the January 14, 2010 amendment to the option agreement and the Company issued 300,000 shares to Yale to complete its option to purchase three mining concessions in Zacatecas, Mexico. The \$50,000 in cash and \$37,500 being the value of the 500,000 shares issued to Yale have been charged to Mineral Properties.

The Mina San Jose property consists of one exploration concession of 40 hectares (ha). The Salvador-Zacatecas property consists of the Salvador exploitation concession which is 32 ha, while the adjacent Zacatecas exploration concession has 8.712 ha for a total of 40.712 ha.

Location:

The properties are located about 10-16 km north and northwest of the city of Zacatecas, the capital of Zacatecas State, Mexico. The properties are located in the Central Mesa plateau in north central Mexico, situated in the states of Zacatecas, Aguascalientes, and San Luis Potosi. The topography is flat to undulating plateaus cut by small, frequently dry streams that flow out to broad valleys, which are agriculture centers. Elevations in the immediate area of the property are 2300-2450 m above sea level. Access to the projects is from paved National and State highways extending from the city of Zacatecas to neighboring towns, including Vetagrande, Nuevo Hacienda, and Morelos. Gravel roads in good repair access the interiors of the properties.

List of Mineral Tenures:

Concession	Title No.	Claim Type	Area (ha)	Date registered
Mina San Jose	T-225854	Exploration	40	28 Oct. 2005
Salvador	T-181880	Exploitation	32	16 Dec. 1987
Zacatecas	T-219098	Exploration	8.712	4 Feb. 2003

In August, 2008 Silver Sun engaged Tekhne Research Inc. to prepare a technical report on the Zacatecas Joint Venture. The operating partner during the period, Impact Silver Corp., had contracted with Tekhne Research Inc. of Victoria, BC, an arms-length company, on 15 November 2006 to assist in the design and execution of the Phase 1 surface evaluation and Phase 2 diamond drilling program on the Mina San Jose and Salvador-Zacatecas Properties under the Joint Venture. Silver Sun received a technical report (the "Technical Report") dated August 21, 2008, as amended October 14, 2008, prepared by Edward M. Lyons, P. Geo of Tekhne Research Inc. entitled "Exploration Phases 1 & 2: Surface Sampling & Diamond Drilling on the Mina San Jose & Salvador-Zacatecas Properties Zacatecas, Zacatecas State, Mexico", which summarized the results of the Phase 1 and Phase 2 surface and geological sampling on the Zacatecas property.

The exploration program consisted of Phase 1 surface sampling and geological sampling. Phase 2 was the drill program based on the Phase 1 results. For Mina San Jose, Phase 1 produced 45 surface dump and rock samples and Phase 2 had four diamond drill holes totaling 501.25 m of NTW (61.2 mm diameter core) and 106 core samples. Salvador-Zacatecas Phase I work resulted in 17 dump and rock samples, while Phase 2 had 12 diamond drill holes (two were lost) totaling 1,314.5 metres of NTW coring with 193 samples. All samples were

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

sent to ALS-Chemex Labs at Guadalajara, Mexico for sample preparation and the pulps were sent for analyses to ALS-Chemex in Vancouver, BC Canada.

The Technical Report (available on www.sedar.com) prepared by the Company's Qualified Person at the time, Edward M. Lyons, P. Geo. provided the following summary of the drill hole data results on the Zacatecas property:

The results for Mina San Jose showed Ag at 122 to 525 g/T Ag as average samples and selected dump samples, specifically selected to show the best potential values, of 4,900 g/T Ag with 6% Zn and 1-2% Pb. The drill results encountered the veins as zones to 1,340 g/T Ag, 1.23 % Pb, and 1.18% Zn over 0.65 m true thickness. The drilling was reconnaissance in nature. The work suggests that the vein may be more coherent to the west and perhaps at depth. The Salvador-Zacatecas dump samples ran 100-288 g/T Ag with selected material typically 3-4 times higher. Drill intersections returned a maximum of 382 g/T Ag over 0.5 m true width on the Salvador Vein and 275 g/T Ag over 0.61 m true width with less than 1% Pb and Zn respectively.

As of January 31, 2010, the Company had fulfilled its obligation to incur exploration expenditures of \$200,000. As a result of these expenditures, the Company now has a 73% interest in the Joint Venture with Impact. The Company is currently completing the metallurgical testing on the ore and has recently received the mining and reclamation permits required from the Mexican government in order to put this property into production. However, no plans are in place to currently follow through with production as a suitable milling facility – and hence economic assessment – has not been identified.

On June 30, 2010, the Company announced the approval of mining and environmental permitting on their Zacatecas project through the Company's wholly owned Mexican subsidiary Minera Plata del Sol S.A. de C.V. Silver Sun is in discussions with IMPACT Silver Corp., owners of the remaining 27%, regarding the option to process ore at their wholly-owned mill which is 1,000 meters from the property. On August 3, 2010, the Company announced that it has contracted SGS de Mexico S.A. de C.V to carry out metallurgical test-work on the mineralized stockpiles from the Company's Zacatecas properties.

The test program consisted of a Cyanide Leach Bottle-Roll Test to generate kinetic gold/silver extraction curves and to determine Sodium Cyanide and Lime consumptions. Further, two Flotation Tests were performed on each sample to identify Primary Flotation, Scavenger Flotation and two cleaning stages. All concentrates were for Au, Ag, Pb, Zn, Cu and Fe. Results from the Metallurgical Test Program show the recovery for Ag at 47%.

The properties are presently registered in the name of Minera Aguila Plateada S.A. de C.V. which is a wholly owned subsidiary of Impact Silver Corp. We hold a 73% interest in the Concessions pursuant to the Joint Venture Agreement between Yale Resources Ltd. and Impact dated July 25, 2008. We acquired Yale's interest in the Joint Venture Agreement pursuant to an Option Agreement with Yale dated August 14, 2008 as amended on January 8, 2010.

On August 25, 2011, IMPACT Silver announced that it has agreed to sell all of its interests in Zacatecas, including their 27% ownership in the Zacatecas, San Jose, and Salvador concessions to Defiance Silver Corp.

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

Yoreme Mineral Claim, Sonora , Mexico

On December 20, 2010, the Company entered into a exploration and evaluation asset purchase agreement with Maggiore Capital Limited pursuant to which the Company has acquired one hundred percent (100%) right, title and interest in the Yoreme mineral claim (the "Property"). The Property is 400 hectares in size and is located in the Municipality of Alamos, state of Sonora, Mexico. The consideration paid for this exploration and evaluation asset is 2,500,000 common shares of the Company. The Company agreed to pay an additional 200,000 shares as a finders' fee on this purchase.

On June 10, 2011, the Company entered into an agreement with Strachen Resources Ltd ("Strachen"), for the conditional sale of the Company's Yerome Project for a total price of \$300,000, consisting of 2,500,000 common shares of Strachan and \$50,000 cash. On August 31, 2011, the Company and Strachan mutually agreed to terminate this conditional sale.

Barkerville Claims, British Columbia, Canada

On May 3, 2010, the Company acquired an option to purchase a one hundred percent (100%) interest in five contiguous mineral claims covering a combined area of approximately 2431.79 hectares located in the Cariboo mining district in British Columbia (the "Property"). The Property borders an area owned by Barkerville Gold Mines Ltd.

In consideration for the acquisition of the Option, the Company agreed to issue 2,000,000 common shares of the Company. The Company engaged a consulting geologist to conduct certain preliminary exploration activities on the property, including stream sampling and mapping.

As a result of this preliminary exploration activity by the geologist, the Company decided to terminate its option in the property and write off the \$160,000 of value that were assigned to the 2,000,000 common shares issued for the option.

Yreka Mineral Claims, California USA

On April 15, 2011, the Company announced that it has closed the Definitive Agreement for the purchase of a 51% interest in the Cherry Hill Mine mineral claims, located in Siskiyou County, northern California, whose key asset is the past producing, Cherry Hill Gold Mine. In consideration for the 51% interest in the project, the Company agreed to pay USD555,000. The Cherry Hill Mine is fully permitted and consists of a high grade underground quartz lode mine that is located on a claim block consisting of six unpatented mining claims. The Cherry Hill purchase includes one mill site claim including a 750 ton per month gravity circuit mill with all machinery and equipment. The Property is approximately 125 acres located in the Klamath National Forest in Siskiyou County, California, approximately 8 miles from Yreka. Cherry Hill has had a substantial amount of work done in the mine as it has previously been in production numerous times during the past 100 years.

On May 10, 2011, the Company announced that it has formed a wholly owned U.S. subsidiary, Golden Sun LLC, as well as Cherry Hill Holdings LLC and Luckyboy Resources LLC which will function as the Joint Venture operating companies.

The Company received approval from the United States Forest Service (USFS) to continue with the current Plan

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

of Operations, which is valid until the year 2015 using the permits and licenses that are currently in place. Once production resumes at Cherry Hill, the Company plans to apply to the USFS to broaden the Plan of Operations at Cherry Hill to include the entire property for which a full Environmental Assessment will be required.

On May 12, 2011, the Company announced that the Company has increased its interest in the Cherry Hill Mine mineral claims to a total of 68.15% by acquiring an additional 17.15% interest.

In consideration for the additional 17.15% interest, the Company has agreed to issue 500,000 shares of Common Stock of the Company subject to obtaining all applicable regulatory, corporate approvals and consents, including the consent of the TSX Venture Exchange.

On June 16, 2011, the Company announced that subject to Exchange approval, the Company has increased its interest in the Cherry Hill Mine mineral claims to a total of 100% by acquiring an additional 31.85% interest.

In consideration for the additional 31.85% interest, the Company has agreed to issue 950,000 shares of Common Stock of the Company and issue 475,000 common share purchase warrants at a price of \$0.56 for a period of twelve (12) months from the date of closing. Closing of the transaction will be subject to obtaining all applicable regulatory, corporate approvals and consents, including the consent of the TSX Venture Exchange.

On July 7, 2011, the Company announced that they have received confirmation from Mojave Desert Minerals, LLC, stationed in Oatman Arizona, that they will serve as the Company's primary Underground Mine Rescue team for the Cherry Hill Gold Mine in Yreka, California. Further, the Company is in receipt of confirmation from the Siskiyou County Sheriff's Department (Search and Rescue Team) of their assistance in the event of an emergency.

On July 20, 2011, the Company announced they have received approval from the City of Yreka, California, to operate the Company's mill within the city limits. While the Company's mill is being relocated for construction, Silver Sun has access to two additional, fully operational, contract mills to process all stockpiled ore from the Cherry Hill gold mine.

On August 24, 2011, the Company announced that development work will start with the creation of a refuge chamber as well as areas for the explosives magazine and blasting caps. This development work, as a requirement of the Mine Safety and Health Administration (MSHA), will allow the company to expand its understanding of the underground geometry of the Queen vein as approximately 105 feet of crosscuts are planned. These crosscuts outside of the vein will also provide the company with stations where underground drilling can be conducted in the future to test the downdip extensions of the vein.

In addition, development work will prepare the Queen vein for production by expanding the Q4-1 raise, which will be the main focus of the first new production from the mine. The Q4-1 raise will be extended higher into the vein and widened such that production and mucking can happen simultaneously on different headings, which is anticipated to increase production rates.

On October 21, 2011 the Company announced that it has completed a bulk sampling program at Cherry Hill. Approximately 100 tons of material was processed at the Discovery Day Mine's gravity circuit mill, which

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

produces two separate concentrates: a free-gold bearing concentrate and a sulphides concentrate that requires additional processing. The quantity and value of these concentrates has not been determined.

SELECTED ANNUAL FINANCIAL INFORMATION

The Company's audited consolidated financial statements for the year ended April 30, 2011 (the "Annual Financial Statements") have been prepared in accordance with Canadian GAAP. The Company's reporting currency is in Canadian dollars, except where stated otherwise. The following selected financial information is taken from the Annual Financial Statements and should be read in conjunction with those statements.

	For the year ended		
	April 30, 2011 (IFRS)	April 30, 2010 (Cdn GAAP)	April 30, 2009 (Cdn GAAP)
Statement of Operations and Comprehensive Loss:			
Total revenue	\$0	\$0	\$0
Operation expenses	1,445,189	289,245	302,551
Other expense (income)	(2,904)	(83)	(4,489)

For discussion of the factors affecting the Company's losses see "Selected Quarterly Financial Data" and "Results of Operations" below. For discussion of the factors affecting our statement of financial position see "Results of Operations" and "Liquidity and Capital Resources" below.

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

RESULTS OF OPERATIONS

For the three months ended July 31, 2011, the Company recorded a net loss of \$708,631 and comprehensive loss of \$705,154, compared to a net loss of \$111,840 and comprehensive loss of \$111,840 in the three months ended July 31, 2010.

Compared to the three months ended July 31, 2010, the Company's comprehensive net loss for the three months ended July 31, 2011 was impacted significantly by the following factors:

- Management and consulting fees increased by \$72,307 in Q1/2012 compared to Q1/2011 due to additional work performed by consultants in respect of proposed asset acquisitions.
- Exploration and evaluation asset exploration costs of \$338,979 were incurred in Q1/2012 related to the Cherry Hill Property in California and the Yoreme Property in Mexico.
- Share based compensation was \$110,315 greater in Q1/2012 as a result of 600,000 options granted including 350,000 to Launch IR an investor relations firm.
- Professional fees increased by \$18,983, primarily as a result of increased legal fees incurred in relation to the Cherry Hill Property and asset acquisitions.
- Investor Relations increased by \$10,000 as Launch IR Inc. was retained for investor relations services.
- Office, administration and travel increased by \$3,432 due to increased activity relative to asset acquisitions.

As of the date of this MD&A, the Company has insufficient working capital at this time to meet its ongoing financial obligations for the coming year (see Subsequent Events).

SUMMARY OF QUARTERLY RESULTS

The following table provides summary financial data for our last eight quarters (in thousands):

Quarter ended:	Accounting Standard	Revenue	Loss before other income and expense	Net loss and comprehensive loss	Basic diluted loss per common share	Weighted average number of shares
Q1/12	July 31, 2011 IFRS	\$ -	(692,653)	(705,154)	-0.02	44,238,533
Q4/11	April 30, 2011 IFRS	-	(320,366)	(318,696)	-0.01	43,112,651
Q3/11	January 31, 2011 IFRS	-	(759,487)	(758,914)	-0.02	34,666,835
Q2/11	October 31, 2010 IFRS	-	(253,363)	(252,835)	-0.01	25,500,000
Q1/11	July 31, 2010 IFRS	-	(111,973)	(111,840)	0.00	25,456,522
Q4/10	April 30, 2010 Canadian GAAP *	-	(187,834)	(187,779)	-0.01	22,241,573
Q3/10	January 31, 2010 Canadian GAAP *	-	(77,031)	(77,026)	-0.01	9,258,696
Q2/10	October 30, 2009 Canadian GAAP *	-	(7,835)	(7,825)	0.00	9,200,000

* Financial information for the periods prior to May 1, 2010 have not been assessed for whether there would be significant adjustments as a result of the changes in accounting policy on adoption of IFRS.

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

The primary factors affecting the magnitude and variations of the Company's losses are summarized as follows:

- Q1/12 had higher management, consulting, and professional fees related to property acquisition activity, which was offset by lower share based compensation.
- In Q1/12 there was a significantly higher net loss due to the increase in exploration and evaluation asset exploration costs.
- In Q4/11 loss before other income and expenses was impacted by higher consulting and management fees, which were offset by reduced share based compensation and reduced professional fee costs.
- In Q3/11 the Company granted 3,000,000 options and recognized share-based compensation of \$630,228.
- In Q2/11 the Company recognized a write-off of \$160,000 in respect of its exploration and evaluation asset option located in the Cariboo mining district in British Columbia.
- In Q1/11 the Company's office, administration and travel along with exploration and evaluation asset exploration costs increased but was offset by decreased professional fees and management and consulting fees.
- In Q4/10 management and consulting fees increased by \$116,250 over Q3/11. Professional fees were higher due to a financing during the year.
- Q3/10 share based compensation was \$43,821 due the issue of 575,000 stock options.

LIQUIDITY AND CAPITAL RESOURCES

As at July 31, 2011, the Company had a cash balance of \$203,552 and a short term investment \$800,000, compared to a cash balance of \$559,389 at July 31, 2010. The Company continues to utilize its cash resources to fund its administrative requirements, investigate asset acquisitions and maintain and develop its exploration and evaluation assets. As the Company has no significant revenue, cash balances will continue to decline as the Company utilizes these funds to conduct its operations unless replenished by capital fundraising.

The Company's operations to date have been financed by the issuance of its common shares. The Company continues to seek capital through various means including the issuance of equity and/or debt. While the Company has been successful in raising funds in the past, there is no assurance that it will continue to do so in the future.

The financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. The Company has incurred losses from inception including a loss of \$705,154 for the three months ended July 31, 2011. At the date of this MD&A the Company has sufficient working capital to meet its ongoing financial obligations for the coming year. July 31, 2011 the Company working capital of \$1,035,949 compared to working capital of \$686,240 as at July 31, 2010, an increase of \$349,709.

In addition to the commitments disclosed elsewhere in the MD&A, the Company had the following obligations:

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

- The Company has a rental and administrative services agreement with a company that shares similar directors and officers and requires the payment of \$800 per month plus taxes. The agreement is in effect on a month to month basis and may be terminated with thirty days written notice in accordance with the provisions of the agreement.
- On December 22, 2010, the Company entered in a 12 month consulting agreement with an unrelated third party which required a payment of \$15,000 per month plus 750,000 stock options. The agreement may be terminated with thirty days written notice in accordance with the provisions of the agreement.
- On May 1, 2011 the Company entered into an indefinite term contract with McLeary Capital Management, Inc. (the "consultant"), a private company controlled by the President and CEO of the Company, for the consultant to continue to act as President and Chief Executive Officer and Director of the Company. A monthly consulting fee of \$10,000 is payable to the consultant. The contract may be cancelled by either party on 30 days written notice and, if cancelled by the Company, by payment of an amount equivalent to two years annual salary. On termination of the contract the consultant will be immediately retained by the Company as a non-paid advisor/consultant to the Company until May 1, 2016 or for such time as the consultant still holds unexercised stock options in the Company. On exercise of the consultant's options, the relationship between the consultant and the Company will cease.
- Effective June 9, 2011, the Company entered into a fifteen month investor relations agreement with Launch IR Inc. An agreement was concluded with the investor relations consultant for a term of 15 months commencing June 15, 2011. The Consultant will be paid a total of \$20,000 plus HST over the term of four months, payable in instalments of \$5,000 monthly, commencing June 15, 2011 and \$500 per month for a period of eleven months commencing October 15, 2011. The consultant was also the granted options to purchase 350,000 common shares of the Company at an exercise price of \$0.45 for a term of fifteen months.
- On June 10, 2011, the Company entered into an agreement with Strachen Resources Ltd ("Strachen"), for the conditional sale of the Company's Yerome Project for a total price of \$300,000, consisting of 2,500,000 common shares of Strachen and \$50,000 cash. On August 31, 2011, the Company and Strachen mutually agreed to terminate this conditional sale.
- Effective July 5, 2011, the Company entered into a 12 month license and service agreement for the consideration of \$10,000 per month. The agreement terms require the licensor to provide mining and permit development services to the Company, and provides the Company the rights to use certain licenses and permits registered in the name of the licensor relating to the Company's Cherry Hill claims located in Siskiyou County, California.

As of the date of this MD&A, the Company has insufficient working capital at this time to meet its ongoing financial obligations for the coming year (see Subsequent Events) and fund its planned work on its Mexico and California projects. Additional financing will be required in the event that the Company commences full scale mine development work or obtains any definitive feasibility studies in connection with its exploration mineral projects. There is no assurance that the Company will be successful in raising additional capital if and when required.

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

Cash Flows

In the first quarter ended July 31, 2011, cash used for operating activities amounted to \$600,937 (First quarter ended June 30, 2010: \$68,464). The increase in cash outflows used for operating activities for Q1/12 compared to Q1/11 is principally due to higher costs related to asset acquisition, exploration expenditures and share-based compensation as described in "Results of Operations", which was offset by a reduction in cash used for accounts payable and accrued liabilities.

During the three months ended July 31, 2011 cash provided by financing activities amounted to \$322,750 from stock option and warrant exercises compared to \$nil in the same period last year. In Q1/12 1,300,000 options were exercised for \$311,500 and 75,000 warrants for \$11,250, where there was no completed financing, options exercise or warrants exercise during Q1/11.

In the first quarter of 2012, cash used for investing activities amounted to \$49,254, which was used for the purchase of equipment.

SUBSEQUENT EVENTS

The following events occurred subsequent to July 31, 2011:

- 200,000 shares were issued on the exercise of 100,000 options at \$0.245 and 100,000 at \$0.325.
- On August 31, 2011 the Company and Strachen Resources Ltd. mutually agreed to terminate the conditional sales of the Company's Yoreme project.

RELATED PARTY TRANSACTIONS

a) Management transactions

The Company has identified its directors and certain senior officers as its key management personnel. The compensation costs for key management personnel for the three months ended July 31, 2011 and 2010 are as follows:

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

For the three months ended July 31, 2011

	Short-term employee benefits \$	Other benefits \$	Total \$
McLeary Capital Management, Inc. (i)	30,000	-	30,000

For the three months ended July 31, 2010

	Short-term employee benefits \$	Other benefits \$	Total \$
Mark McLeary; President and CFO	16,675	-	16,675

(i) A private company controlled by the President and CEO, Mark McLeary.

Total expenses of \$6,257 were reimbursed to the Company's CFO and director during the three months ended July 31, 2011 (July 30, 2010 - \$462).

b) Director transactions

During the three months ended July 31, 2011 the Company paid the following businesses associated with a director of the Company, Ian Foreman:

- \$15,014 for geological consulting services (July 31, 2010 - \$nil), and \$1,791 (July 31, 2010 - \$1,646) for office rent and administrative costs to Yale Resources Ltd.
- \$1,800 to Foremost Geological Consulting for consulting services (July 31, 2010 - \$nil).
- \$769 to Foremost Management Services for employee health benefits (July 31, 2010 - \$nil).
At July 31, 2011, this expense has not yet been paid, and is included in accounts payable and accrued liabilities.

FOURTH QUARTER

During the quarter ended April 30, 2011, the Company incurred a net loss of \$318,696 compared to a net loss of \$187,779 for the quarter ended April 30, 2010. During the quarter ended April 30, 2011, the major expenses were \$61,150 in management and consulting fees, \$5,049 in professional fees, \$213,664 in stock based compensation, \$21,162 in administrative and travel costs and \$8,975 in transfer agent, filing and listing fees.

CONTINGENT LIABILITIES

The Company has no contingent liabilities that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company.

CONFLICTS OF INTEREST

The Company's directors and officers may serve as directors or officers, or may be associated with, other reporting companies, or have significant shareholdings in other public companies. To the extent that such other companies may participate in business or asset acquisitions, dispositions, or ventures in which Silver Sun may participate, the directors and officers of Silver Sun may have a conflict of interest in negotiating and concluding on terms with respect to the transaction. If a conflict of interest arises, Silver Sun will follow the provisions of the BCBCA dealing with conflict of interest. These provisions state that where a director has such a conflict, that director must, at a meeting of Silver Sun's directors, disclose his or her interest and refrain from voting on the matter unless otherwise permitted by the Corporations Act. In accordance with the laws of the Province of British Columbia, the directors and officers of Silver Sun are required to act honestly, in good faith, and in the best interest of Silver Sun.

OFF-STATEMENT OF FINANCIAL POSITION ARRANGEMENTS

The Company did not enter into any off-statement of financial position arrangements during the three months ended July 31, 2011.

PROPOSED TRANSACTIONS

The Company does not currently have any proposed-transactions approved by the Board of Directors. All current transactions are fully disclosed in the condensed consolidated interim financial statements for the three months ended July 31, 2011.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The information provided in this report, including the condensed consolidated interim financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future value for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the condensed consolidated interim financial statements.

SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the condensed consolidated interim financial statements using accounting policies consistent with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. The preparation of the condensed consolidated interim financial statements also requires management to exercise judgment in the process of applying the accounting policies.

Critical Accounting Estimates

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively from the period in which the estimates are revised. The following are the key estimate and assumption uncertainties that have a significant risk of resulting in a material adjustment within the next financial year:

Impairment of assets

When there are indications that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. Recoverable amount is the greater of value in use and fair value less costs to sell. Determining the value in use requires the Company to estimate expected future cash flows associated with the assets and a suitable discount rate in order to calculate present value. No impairments of non-financial assets have been recorded for the three months ended July 31, 2011 (June 30, 2010 – Nil).

Useful life of property, plant and equipment

Equipment is depreciated over the estimated useful life of the assets. Changes in the estimated useful lives could significantly increase or decrease the amount of depreciation recorded during the year and the carrying value of equipment. Total carrying value of property, plant and equipment at July 31, 2011 was \$161,096 (April 30, 2011 - \$51,000).

Share-based compensation

Management is required to make certain estimates when determining the fair value of stock options awards, and the number of awards that are expected to vest. These estimates affect the amount recognized as share-based compensation in the Company's condensed consolidated interim statement of comprehensive loss. For the three months ended July 31, 2011 the Company recognized share-based compensation expense \$110,315 (July 31, 2011 - \$nil).

Critical Judgements Used In Applying Accounting Policies

In the preparation of the condensed consolidated interim financial statements management has made judgments, aside from those that involve estimates, in the process of applying the accounting policies. These judgments can have an effect on the amounts recognized in the condensed consolidated interim financial statements.

Mineral properties under exploration

Management is required to apply judgment in determining whether technical feasibility and commercial viability can be demonstrated for its mineral properties. Once technical feasibility and commercial viability of a property can be demonstrated, it is reclassified from mineral properties under exploration and subject to

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

different accounting treatment. As at July 31, 2011 and April 30, 2011 management had determined that no reclassification of mineral properties was required.

Income taxes

The measurement of income taxes payable and deferred income tax assets and liabilities requires management to make judgments in the interpretation and application of the relevant tax laws. The actual amount of income taxes only becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the condensed consolidated interim financial statements.

NEW ACCOUNTING STANDARDS AND INTERPRETATIONS

The following accounting pronouncements have been released but have not yet been adopted by the Company.

IFRS 9 Financial Instruments

In November 2009, the IASB issued, and subsequently revised in October 2010, IFRS 9 Financial Instruments (IFRS 9) as a first phase in its ongoing project to replace IAS 39. IFRS 9, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. The standard also adds guidance on the classification and measurement of financial liabilities. Management has not yet determined the potential impact the adoption of IFRS 9 will have on the Company's financial statements

IFRS 13 Fair Value Measurement

In May 2011, the IASB issued IFRS 13 Fair Value Measurement (IFRS 13). IFRS 13, which is to be applied prospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 13 defines fair value, provides a framework for measuring fair value and includes disclosure requirements for fair value measurements. IFRS 13 will be applied in most cases when another IFRS requires (or permits) fair value measurement. Management has not yet determined the potential impact that the adoption of IFRS 13 will have on the Company's financial statements.

Other

In June 2011, the IASB issued amendments to IFRS 7 *Financial Instruments: Disclosures*. The Company does not believe the changes resulting from these amendments are relevant to its financial statements.

In May 2011, the IASB issued IFRS 10 *Consolidated Financial Statements*, IFRS 11 *Joint Arrangements* and IFRS 12 *Disclosure of Interests in Other Entities*. The Company does not believe the changes resulting from these new standards are relevant to its financial statements.

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

In June 2011, the IASB issued amendments to IAS 1 *Presentation of Financial Statements* and IAS 19 *Employee Benefits*. The Company does not believe the changes resulting from these amendments are relevant to its financial statements.

POLICIES AND TRANSITION TO IFRS

International Financial Reporting Standards (IFRS) replaced the previous Canadian GAAP (CGAAP) for the Company, effective for its 2012 interim and annual consolidated financial statements. Accordingly, the Company is applying accounting policies consistent with IFRS beginning with its interim financial statements for this quarter ended July 31, 2011.

The adoption of IFRS resulted in changes to the Company's accounting policies. The accounting policies disclosed in note 3 to the accompanying condensed consolidated interim financial statements have been applied consistently to all periods presented. They also have been applied in the preparation of an opening IFRS statement of financial position as at May 1, 2010.

The impact of the transition from CGAAP to IFRS is explained in detail in note 13 to the accompanying condensed consolidated interim financial statements. The changes in accounting policies have not been applied to any information for periods prior to May 1, 2010.

First-time adoption of IFRS – Impact on May 1, 2010

The first-time adoption of IFRS generally requires retrospective application of the resulting changes in accounting policies. Subject to certain optional exemptions and mandatory exceptions, the Company has applied the changes in accounting policies resulting from the adoption of IFRS retrospectively in the preparation of its opening IFRS statement of financial position as at May 1, 2010, the Company's "Transition Date".

The impact of first-time adoption of IFRS on the Company's opening IFRS statement of financial position is described in detail in note 13 to the accompanying condensed consolidated interim financial statements.

The expected impact of changes in accounting policies, as was known at the time, was also disclosed in the Company's Management Discussion and Analysis for the year ended April 30, 2011.

Impact of Changes in Accounting Policies on the Company's Financial Statements

The adoption of IFRS resulted in changes to the Company's accounting policies. However, these changes have not resulted in any significant change to the recognition and measurement of assets, liabilities, equity, revenue and expenses within its financial statements.

The following summarizes the significant changes to the Company's accounting policies on adoption of IFRS.

Impairment Of (Non-financial) Assets

IFRS requires a write down of assets if the higher of the fair market value and the value in use of a group of assets is less than its carrying value. Value in use is determined using discounted estimated future cash flows.

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

CGAAP required a write down to estimated fair value only if the undiscounted estimated future cash flows of a group of assets are less than its carrying value.

IFRS also requires the reversal of any previous impairment losses, with the exception of goodwill, where circumstances have changed such that the level of impairment in the value of the assets has been reduced. CGAAP prohibits the reversal of impairment losses.

The Company has changed its accounting policies related to impairment of assets to be consistent with the requirements under IFRS. The changes in accounting policies related to impairment did not have a significant impact on the Company's financial statements.

Decommissioning Liability (Asset Retirement Obligations)

IFRS requires the recognition of a decommissioning liability for legal or constructive obligations, while current CGAAP only requires the recognition of such liabilities for legal obligations. A constructive obligation exists when an entity has created reasonable expectations that it will take certain actions.

The Company's accounting policies related to decommissioning liabilities have been changed to reflect these differences. There is no impact on the financial statements.

Share-based Payments

In certain circumstances, IFRS requires a different measurement of share-based compensation than Canadian GAAP. In particular, IFRS requires that each tranche (that vests separately) must be treated as a separate grant and that an estimate of forfeitures be included in the determination of the expense associated with stock option grants.

Due to the nature of the Company's stock options, these changes in accounting policies did not have a significant impact on the Company's financial statements.

Functional currency

IFRS requires that the functional currency of each company within the consolidated group be assessed individually, while under Canadian GAAP the functional currency of an integrated operation was the same as the reporting company. Under IFRS, where a company's functional currency differs from the presentation currency of the consolidated financial statements, all foreign exchange gains and losses arising on translation to the presentation currency are recognised in the statement of operations and comprehensive income as other comprehensive income.

Reconciliation of Canadian GAAP to IFRS

The following provides reconciliations of the statements financial position, and summary reconciliations of the statements of comprehensive income, and statements of cash flows for the three months ended July 31, 2010 and the years ended April 30, 2011. The changes in accounting policies resulting from the Company's adoption of IFRS had no significant impact on financial statements for these comparative periods, other than a transfer within equity in respect of the fair value of options and warrants no longer outstanding (refer to note (i) below).

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

All financial instruments, including derivatives, are included on the balance sheet of the Company's audited consolidated financial statements and are measured at fair market value upon inception with the exception of certain related party transactions. Subsequent measurement and recognition of change in the fair value of financial instruments depends on their initial classification. Held-for-trading financial investments are measured at fair value and all gains and losses are included in operations in the period in which they arise. Available-for-sale financial assets are measured at fair value with revaluation gains and losses included in other comprehensive income until the asset is removed from the balance sheet. Loans and receivables, held to maturity investments and other financial liabilities are measured at amortized cost using the effective interest method. Gains and losses on inception, de-recognition, impairment write-downs and foreign exchange translation adjustments are recognized immediately. Transaction costs related to financial instruments will be expensed in the period incurred. The Company has designated its cash and short term investments as held-for-trading, which is measured at fair value. Accounts receivables are classified as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost. See note 3 to the Company's condensed consolidated interim financial statements for the three months ended July 31, 2011, filed on SEDAR.

OUTSTANDING SHARE CAPITAL DATA

During the quarter ending July 31, 2011 the Company issued 1,450,000 shares and 475,000 warrants at a purchase price of \$0.56 and a 12 month term related to the Cherry Hill acquisition.

In addition during the quarter, 350,000 options were granted with an exercise price of \$0.45, and 250,000 granted with an exercise price of \$0.55.

As of July 31, 2011, the Company had 46,060,000 common shares issued and outstanding (July 31, 2010 - 25,500,000), warrants of 983,000 (July 31, 2010 - 14,668,000), and stock options of 3,100,000 (July 31, 2010 - 900,000). Subsequent to July 31, 2011, 200,000 shares were issued on the exercise of 100,000 options at \$0.245 and 100,000 at \$0.325.

As at July 31, 2011 there were 394,800 shares in escrow.

As of October 24, 2011 there were 46,260,000 common shares outstanding.

INVESTOR RELATIONS

The company entered into a 15 month agreement with Launch IR Inc. for investor relation services. (see "Liquidity and Capital Resources")

DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS AND PROCEDURES

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 *Certification of Disclosure in Issuer's Annual and Interim Filings* ("NI 52-109"), the Company utilizes the Venture Issuer Basic Certificate which does not include any representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

in National Instrument NI 52-109. In particular, the certifying officers filing the Certificate are not making any representations relating to the establishment and maintenance of:

(a) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and

(b) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

The Company's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

RISKS AND UNCERTAINTIES

In conducting its business the Company, like all development-stage mineral exploration companies, is subject to a number of other risks and uncertainties, including those discussed below, that could have a material adverse effect the Company's business prospects or financial condition and could result in a delay or indefinite postponement in the development of the Company's properties and projects. See also "Forward-Looking Statements" above.

Risks Associated with Exploration Stage Companies. The Company's business of exploring for mineral resources involves a variety of operational, financial and regulatory risks that are typical in the natural resource industry. The Company has not commenced commercial operations and has no proven history of performance, earnings or success. There is no guarantee that the Company will ever be able to achieve profitable results or successfully execute its business plan, and the Company's Common Shares must be considered speculative, primarily due to the nature of the Company's business and early stage of development. The Company has no revenue or income from operations. The Company has limited capital resources and has to rely upon the sale of equity and/or debt securities for cash required for exploration and development purposes, for acquisitions and to fund the administration of the Company. Since the Company does not expect to generate any revenues from operations in the near future, it must continue to rely upon the sales of its equity or debt securities or joint venture agreements to raise capital. It follows that there can be no assurance that financing, whether debt or equity, will be available to the Company in the amount required by the Company at any particular time or for any period and that such financing can be obtained on terms satisfactory to the Company.

Exploration and Development. Resource exploration and development is a highly speculative business, characterized by a number of significant risks including, but not limited to, unprofitable efforts resulting not only from the failure to discover mineral deposits but also from finding mineral deposits that, though present, are insufficient in quantity and quality to return a profit from production. Few exploration projects successfully achieve development due to factors that cannot be predicted or anticipated, and even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor

Silver Sun Resource Corp.
Management Discussion and Analysis
For the three months ended July 31, 2011
(Expressed in Canadian Dollars)

practical to proceed. The Company closely monitors its activities and those factors that could impact them, and employs experienced consulting to assist in its risk management and to make timely adequate decisions

Geographic Risk. The Company's property interests are located in Mexico and California. Operating in a foreign country has legal, political and currency risk that must be carefully considered to ensure their level is commensurate to the Company's assessment of the project. Any changes in governmental laws, regulations, economic conditions or shifts in political attitudes or stability are beyond the control of the Company and may adversely affect its business. In addition, shortages of skilled labor and deficiencies in infrastructure may negatively influence costs of exploration and development.

Property Title Risk. Although the Company believes it has exercised commercially reasonable due diligence with respect to determining title to properties it owns, control or has the right to acquire by option, there is no guarantee that title to such properties will not be challenged or impugned. The Company's exploration and evaluation asset interests may be subject to prior unrecorded agreements or transfers or native land claims and title may be affected by undetected defects. There may be valid challenges to the title of the Companies properties, which, if successful, could impair development and/or operations. This may be exacerbated due to the large number of title transfers historically involved with some of the properties.

Operational Risks Associated with Our Mining Properties. The operations of the Company will require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects. Failure to obtain and maintain such licenses and permits may adversely affect the Company's business as the Company would be unable to legally conduct its intended exploration and development work, which may result in it losing its interest in the subject property.

Government regulation may adversely affect the Companies business and planned operations. The Company believes its exploration projects comply with existing environmental and mining laws and regulations affecting its operations. The Company's mining, processing, development and mineral exploration activities are subject to various laws governing prospecting, mining, development, production, taxes, labor standards and occupational health, mine safety, toxic substances, land use, water use, land claims of local people and other matters. The Company cannot guarantee that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. All of the foregoing could adversely affect the economic and financial viability of mining operations. Amendments to current laws, regulations and permits governing operations and activities of mining and exploration companies, or more stringent implementation thereof, could have a material adverse impact on the Company's business and cause increases in exploration expenses, capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

Operating Hazards and Risks. The exploration, development and production of mineral properties involve risks, and in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fires, flooding and earthquakes may occur. A combination of experience, knowledge and careful evaluation may not be able to overcome these risks. Operations in which the Company has a direct or indirect interest will be subject to hazards and risks normally incidental to exploration, development and production of minerals, any of which could result in work stoppages, damage to or destruction of property, loss of life and environmental damage. The nature of these risks is such that liabilities might exceed any insurance policy limits, the liabilities and hazards might not be insurable or the Company might not elect to insure itself against such liabilities due to high premium costs or other factors. Such liabilities may have a materially adverse effect

(Expressed in Canadian Dollars)

upon the Company's financial condition and operations and could reduce or eliminate any future profitability and result in increasing costs and a decline in the value of the securities of the Company.

Environmental Risks Associated with our Operations. The Company's operations are subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation provides for restrictions and prohibitions of spills, release or emission of various substances produced in association with certain mining industry operations, such as seepage from tailing disposal areas, which could result in environmental pollution. Failure to comply with such legislation may result in imposition of fines and penalties. In addition, certain types of operations require submissions to and approval of environmental impact assessments. Environmental legislation is evolving in a manner which means stricter standards and enforcement, fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. The Company intends to fully comply with all environmental regulations.

Competition Risks. The mining industry is intensely competitive and the Company must compete in all aspects of its operations with a substantial number of other corporations which have greater technical or financial resources. The Company may be unable to acquire additional attractive mining properties on terms it considers to be acceptable.

Risks Associated with Conflicts of Interest. Certain directors and officers of the Company are also directors, officers and shareholders of other natural resource or public companies, as a result of which they may find themselves in a position where their duty to another company conflicts with their duty to the Company. There is no assurance that any such conflicts will be resolved in favor of the Company. If any of such conflicts are not resolved in favor of the Company, the Company may be adversely affected. In addition, the Company's President and CEO is currently a party to an investigation by the BC Securities Commission in respect of an unrelated company for, among other things, market manipulation. Any adverse consequences from the investigation itself, or its outcome, could substantially harm the Company's reputation or ability to raise financing or enter into other joint venture or similar types of arrangements. The Company's Board of Directors has established an independent committee to determine the appropriate course of action in such circumstances and expects to conclude the process by middle of October 2011.

Market Risks. Even if the Company's exploration programs are successful, factors beyond the control of the Company may affect the marketability of any mineral products discovered. Mineral prices, particularly gold and silver prices, have fluctuated widely in recent years. The marketability and price of silver and gold which may be produced or acquired by the Company will be affected by numerous factors beyond the control of the Company. These other factors include delivery uncertainties related to the proximity of its reserves to processing facilities and extensive government regulation relating to price, taxes, royalties, allowable production land tenure, the import and export of minerals and many other aspects of the mining business. Declines in mineral prices may have a negative effect on the Company.

Fluctuating Metal Prices. Factors beyond the control of the Company have a direct effect on global metal prices, which have fluctuated widely, particularly in recent years. Consequently, the economic viability of any of the Company's exploration projects and the Company's ability to finance the development of its projects cannot be accurately predicted and may be adversely affected by fluctuations in metal prices.

Risks Associated with the Need for Additional Financing. The success of the Company is dependent, among other things, on obtaining sufficient funding to enable the Company to explore and develop its property interests or to fulfill its obligations under applicable agreements. There can be no assurance that the Company

(Expressed in Canadian Dollars)

will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of new projects with the possible loss of such properties. The Company will require new capital to continue to operate its business and to continue with exploration on its properties, and there is no assurance that capital will be available when needed, if at all. It is likely such additional capital will be raised through the issuance of additional equity which will result in dilution to the Company's shareholders. The Company may encounter difficulty sourcing future financing in light of the recent economic downturn. The current financial equity market conditions and the inhospitable funding environment make it difficult to raise capital through the private placements of shares. The junior resource industry has been severely affected by the world economic situation as it is considered speculative and high-risk in nature, making it even more difficult to fund. While the Company is using its best efforts to achieve its business plans by examining various financing alternatives, there is no assurance that the Company will be successful with any financing ventures.

Going Concern Risk. The Company's financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to obtain the necessary financing to meet its ongoing commitments and further its mineral exploration programs.

Price Volatility of Publicly Traded Securities. During the past year, global securities markets have experienced a high level of price and volume volatility, and the market prices of securities of many companies have experienced wide fluctuations in price that have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur.

Global Financial Conditions. Global financial conditions have been subject to increased volatility and numerous financial institutions have either gone into bankruptcy or have received capital bail-outs or other relief from governmental authorities. As a result of these global conditions, the Company is subject to increased counterparty risk and liquidity risk. The Company is exposed to various counterparty risks including, but not limited to: (i) financial institutions that hold the cash of the Company; and (ii) the insurance providers of the Company. As a result, the cash of the Company may become exposed to credit related losses in the event of non-performance by counterparties to these financial instruments. In the event that a counterparty fails to complete its obligations, the Company would bear the risk of loss of the amount expected to be received under these financial instruments in the event of the default or bankruptcy of a counterparty. The Company is also exposed to liquidity risk in the event its cash positions decline or become inaccessible for any reason, or additional financing is required to advance its projects or growth strategy and appropriate financing is unavailable, or demand for oil and gas falls. Any of these factors may impact the ability of the Company to obtain further equity based funding, loans and other credit facilities in the future and, if obtained, on terms favorable to the Company. If these increased levels of volatility and market turmoil were to continue, the Company's results of operations and planned growth could be adversely impacted.

ADDITIONAL INFORMATION
