Silver Sun Begins Milling Material from Cherry Hill

Vancouver, British Columbia (January 19th, 2012) – Silver Sun Resource Corp. (“Silver Sun” or “the Company”) is pleased to announce that milling of the stockpiled material from the Cherry Hill gold mine will begin tomorrow at the gravity and floatation circuit mill in Grants Pass, Oregon.

Approximately 200 tons of the initial 2,000 tons of material will be processed over a two day period in order to determine the best methods for optimal recovery of gold and silver. In addition processing of this initial batch of throughput will quantify the amounts, if any, of deleterious elements present in the tailings.

Concentrates from the mill will be shipped to a refinery in Sparks, Nevada, where both the Company and the refiner will have fire assays completed to establish the grade of the concentrate for final pricing. Prices for all metals purchased by the refiner will be set based on the final bid price from the London Bullion Market. Final pricing will be settled as of the next business day upon the Company’s signed Settlement Summary. Final valuation of the concentrates will be determined primarily by the assayed grade of the Au concentrate and any elevated levels of certain elements that require additional scrubbing and/or disposal.

Anticipated free gold recovered will be melted into 10 oz. “dore” bars, which will then be analyzed by a recognized laboratory that will provide a certificated of grade; then sold to a purchasing agency provided through the International Precious Metals Institute (IPMI).

The Company will announce the results of the milling and assays as they become available.

About Silver Sun Resource Corp.

Silver Sun Resource Corp. is a Canadian-based resource company focused on the acquisition, exploration and development of precious metal deposits in North America. The Company is in the production stage with its gold project in Yreka, California and engaged in an on-going work program on the Zacatecas, Salvador, and Mina San Jose properties located within the prolific Zacatecas Silver District in Mexico, as well as its Yoreme Silver Project in the mining district of Alamos, Sonora State, Mexico. The Company has an experienced management team with a growth strategy to develop a diversified portfolio of mining projects that can be taken to production in the near-term. The company's design is to add shareholder value through efficient exploration, strategic acquisitions and effective marketing while maintaining a low risk profile through project diversification and sound financial management.

ON BEHALF OF THE BOARD OF DIRECTORS

“Mark A. McLeary”

President

Forward Looking Statements

This news release contains statements that constitute "forward looking information" within the meaning of applicable Canadian provincial securities legislation ("forward-looking statements"). Forward-looking statements often, but not always, are identified by the use of words such as "seek", "anticipate", "believe", "plan", "estimate", "expect", "targeting" and "intend" and statements that an event or result "may", "will", "would", "should", "could", or "might" occur or be achieved and other similar expressions. The description of the extent of mineralized zones is not intended to imply that any economically mineable estimate of reserves or resources exists on any of Silver Sun's projects.

The forward-looking statements that are contained in this news release are based on various assumptions and estimates by Silver Sun and involve a number of risks and uncertainties. As a consequence, actual results might differ materially from results forecast or suggested in these forward-looking statements. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, performance or achievements of Silver Sun to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Factors that could cause the actual results to differ include; risks relating to fluctuations in the price of gold; the inherently hazardous nature of mining-related activities; uncertainties concerning resource estimates; results of exploration, availability of capital and financing on acceptable terms, inability to obtain required regulatory approvals, unanticipated difficulties or costs in any rehabilitation which may be necessary, market conditions and general business, economic, competitive, political and social conditions. These statements are based on a number of assumptions, including assumptions regarding general market conditions, timing and receipt of regulatory approvals, the ability of Silver Sun and other relevant parties to satisfy regulatory requirements, the availability of financing for proposed transactions and programs on reasonable terms and the ability of third-party service providers to deliver services in a timely manner. Although Silver Sun has attempted to identify important factors that could cause actual results to differ materially from those expressed or implied in forward-looking statements, there may be other factors which cause actual results to differ. Forward-looking statements contained herein are made as of the date of this news release and Silver Sun disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except as required by applicable securities laws. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
