Condensed Consolidated Interim Financial Statements

For the nine months ended January 31, 2012 and 2011 (Unaudited) (Expressed in Canadian Dollars)

Notice to Readers

Under National Instrument 51-102, Part 4.3 (3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim consolidated financial statements of the Company for the period ending January 31, 2012 have been prepared in accordance with International Accounting Standard 34 for Interim Financial Reporting under International Financial Reporting Standards. These financial statements are the responsibility of the Company's management and have been approved by the Board of Directors. The Company's independent auditors have not performed an audit or review of these condensed consolidated interim financial statements.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS

Silver Sun Resource Corp. (the "Company"), is a public company incorporated under the laws of the Province of British Columbia, Canada on March 14, 2007. The Company is listed on the TSX Venture Exchange ("TSX") under the trading symbol "SSU", on the Frankfurt Stock Exchange under the trading symbol "SS6" and on the OCTBB under the symbol SSUXF. The Company is in the business of exploring mineral properties, including: the Cherry Hill Gold mining claims in Siskiyou County, northern California; and the Yoreme mineral claim located in the Municipality of Alamos, state of Sonora, Mexico.

The Company is in the exploration stage with respect to its exploration and evaluation assets. Based on the information available to date, the Company has not yet determined whether its exploration and evaluation assets contain economically recoverable reserves. The recoverability of the amounts shown for exploration and evaluation assets is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their development and upon future profitable production.

These condensed consolidated interim financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to raise adequate financing to develop its exploration and evaluation assets, and to commence profitable operations in the future. To date the Company has not generated any revenues and is considered to be in the exploration stage. These condensed consolidated interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence. Further discussion of liquidity risk has been disclosed in Note 14(b).

Management is also aware that material uncertainties exist, related to current economic conditions, which could adversely affect the Company's ability to continue to finance its activities. Management's plan includes continuing to pursue additional sources of financing through equity offerings, seeking joint venture partners to fund exploration, monitoring exploration activity and reducing overhead costs. Management expects that the Company will have sufficient capital to fund operations and keep its exploration and evaluation assets in good standing for the upcoming fiscal year.

2. BASIS OF PREPARATION

a) Statement of compliance and conversion to International Financial Reporting Standards

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS").

These are the Company's third IFRS condensed consolidated interim financial statements for the period covered by the Company's first IFRS annual consolidated financial statements for the year ending April 30, 2012. Previously, the Company prepared its consolidated annual and condensed consolidated interim financial statements in accordance with Canadian Generally Accepted Accounting Principles ("Canadian GAAP"). Canadian GAAP differs in some areas from IFRS. In preparing these financial statements, management has amended certain accounting and measurement methods previously applied in the Canadian GAAP financial statements to comply with IFRS. Note 16 contains reconciliations and a discussion of the effect of the transition from Canadian GAAP to IFRS on equity, operations and comprehensive loss along with reconciliations of the statements of financial position as at May 1, 2010, January 31, 2011 and April 30, 2011 and summary reconciliations of the statements of operations and comprehensive loss for the three and nine months ended January 31, 2011 and statements of cash flows for the nine months ended January 31, 2011.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

2. BASIS OF PREPARATION (continued)

b) Basis of presentation

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for financial instruments that have been measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

These condensed consolidated interim financial statements do not include all of the information required for full annual consolidated financial statements.

As these condensed consolidated interim financial statements are for part of the period covered by the Company's first IFRS annual financial statements, the Company's disclosure exceeds the minimum requirements under IAS 34. The Company has elected to exceed the minimum requirements in order to present the Company's accounting policies in accordance with IFRS and some additional disclosures required under IFRS, which also highlight the changes from the Company's 2011 annual financial statements prepared in accordance with Canadian GAAP. In 2012 and beyond, the Company may not provide the same amount of disclosure in the Company's condensed consolidated interim financial statements under IFRS as the reader will be able to rely on the annual financial statements, which will be prepared in accordance with IFRS.

These condensed consolidated interim financial statements, including comparatives, have been prepared using accounting policies consistent with IFRS as is expected to be effective on April 30, 2012, the Company's first IFRS annual reporting date.

The standards that will be effective for the annual financial statements for the year ending April 30, 2012 are subject to change and may be affected by additional interpretations. Accordingly, the accounting policies for the annual period that are relevant to these condensed consolidated interim financial statements will be determined only when the first IFRS financial statements are prepared for the year ending April 30, 2012.

The preparation of these condensed consolidated interim financial statements resulted in changes to the accounting policies as compared with the most recent annual financial statements prepared under Canadian GAAP. The accounting policies set out below have been applied consistently to all periods presented in these condensed consolidated interim financial statements. They also have been applied in preparing an opening IFRS statement of financial position at May 1, 2010 for the purpose of the transition to IFRS, as required by IFRS 1, *First Time Adoption of International Financial Reporting Standards* (IFRS 1). The impact of the transition from Canadian GAAP to IFRS is explained in Note 16.

c) Foreign Currencies

i) Presentation and functional currency

The presentation currency of the Company and its subsidiaries is the Canadian Dollar.

The functional currency of the Company and its Mexican subsidiary is the Canadian Dollar while the functional currency of the Company's American subsidiaries is the US Dollar.

ii) Foreign currency transactions

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on the dates of the transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

2. BASIS OF PREPARATION (continued)

c) Foreign Currencies (continued)

iii) Foreign operations

Subsidiaries that have a functional currency other than the Canadian Dollar translate their statement of operations into Canadian dollars at the average exchange rate for the period. Assets and liabilities are translated at exchange rates prevailing at the end of each reporting period. Exchange variations resulting from the retranslation at closing rate of the net investment in such subsidiaries, together with differences between their statement of operations items translated at actual and average rates, are recognized in the Cumulative Translation Reserve account.

For the purpose of foreign currency translation, the net investment in a foreign operation is determined inclusive of foreign currency intercompany balances for which settlement is neither planned nor likely to occur in the foreseeable future. The balance of the foreign currency translation reserve relating to a foreign operation that is disposed of, or partially disposed of, is recognized in the statement of operations and comprehensive loss at the time of disposal.

d) Significant accounting judgements and estimates

The preparation of the condensed consolidated interim financial statements using accounting policies consistent with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. The preparation of the condensed consolidated interim financial statements also requires management to exercise judgment in the process of applying the accounting policies.

Critical accounting estimates

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively from the period in which the estimates are revised. The following are the key estimate and assumption uncertainties that have a significant risk of resulting in a material adjustment within the next financial year:

Impairment of assets

When there are indications that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. Recoverable amount is the greater of value in use and fair value less costs to sell. Determining the value in use requires the Company to estimate expected future cash flows associated with the assets and a suitable discount rate in order to calculate present value. No impairments of non-financial assets have been recorded for the nine months ended January 31, 2012 (January 31, 2011 – \$160,000).

Useful life of property, plant and equipment

Property, plant and equipment is depreciated over the estimated useful life of the assets. Changes in the estimated useful lives could significantly increase or decrease the amount of depreciation recorded during the year and the carrying value of equipment. Total carrying value of property, plant and equipment at January 31, 2012 was \$170,100 (April 30, 2011 - \$51,000).

Share-based compensation

Management is required to make certain estimates when determining the fair value of stock options awards, and the number of awards that are expected to vest. These estimates affect the amount recognized as share-based compensation in the Company's condensed consolidated interim statement of operations and comprehensive loss. For the nine months ended January 31, 2012 the Company recognized share-based compensation expense of \$493,262 (January 31, 2011 - \$630,228).

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars)

2. BASIS OF PREPARATION (continued)

d) Significant accounting judgements and estimates (continued)

Critical judgements used in applying accounting policies

In the preparation of these condensed consolidated interim financial statements management has made judgments, aside from those that involve estimates, in the process of applying the accounting policies. These judgments can have an effect on the amounts recognized in the condensed consolidated interim financial statements.

Exploration and evaluation assets

Management is required to apply judgment in determining whether technical feasibility and commercial viability can be demonstrated for its exploration and evaluation assets. Once technical feasibility and commercial viability of a property can be demonstrated, it is reclassified from exploration and evaluation assets and subject to different accounting treatment. As at January 31, 2012 and April 30, 2011 management had determined that no reclassification of exploration and evaluation assets was required.

Income taxes

The measurement of income taxes payable and deferred income tax assets and liabilities requires management to make judgments in the interpretation and application of the relevant tax laws. The actual amount of income taxes only becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the condensed consolidated interim financial statements.

3. SIGNIFICANT ACCOUNTING POLICIES

a) Basis of Consolidation

The condensed consolidated interim financial statements include the accounts of the Company and its Mexican and American subsidiaries.

	Ownership Interest	Jurisdiction	Nature of Operations
Minera Plata Del Sol S.A. de C.V	100%	Mexico	Exploration Company
Golden Sun, LLC.	100%	California; USA	Holding Company
Cherry Hill Holdings, LLC	100%	California; USA	Holding Company
Lucky Boy Resources, LLC	100%	California; USA	Exploration Company

Inter-company balances and transactions, including unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the condensed consolidated interim financial statements.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Financial Instruments

Financial assets and financial liabilities are recognized on the statement of financial position when the Company becomes a party to the contractual provisions of the financial instrument. The Company does not have any derivative financial instruments.

Financial assets

The Company classifies its financial assets into one of the following categories, at initial recognition, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss - This category comprises derivatives, or financial assets acquired or incurred principally for the purpose of selling or repurchasing in the near term. They are carried in the statements of financial position at fair value with changes in fair value recognized in profit or loss for the period.

Loans and receivables - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at amortized cost less any provision for impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default. Held-to-maturity investments - These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest rate method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in profit or loss for the period.

Available-for-sale - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in other comprehensive income or loss, ("OCI"). Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from OCI and recognized in profit or loss for the period.

Transaction costs associated with fair value through profit or loss financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

All financial assets, other than for those at fair value through profit or loss, are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

Financial liabilities

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss: This category comprises derivatives, or liabilities acquired or incurred principally for the purpose of selling or repurchasing in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in profit or loss for the period.

Other financial liabilities: This category includes accounts payables and accrued liabilities, which are recognized at amortized cost.

c) Cash and cash equivalents

Cash and cash equivalents in the statement of financial position is comprised of cash at banks and on hand, and short term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Exploration and evaluation assets

Acquisition costs for exploration and evaluation assets, net of recoveries, are capitalized on a property-by-property basis. Acquisition costs include cash consideration and the value of common shares, based on recent issue prices, issued for exploration and evaluation assets pursuant to the terms of the agreement. Exploration expenditures, net of recoveries, are charged to operations as incurred. After a property is determined by management to be commercially feasible, exploration and development expenditures on the property will be transferred to property, plant and equipment as mine and mill costs. Prior to transfer the assets will be tested for impairment. The costs related to a property from which there is production, will be depleted and amortized using the unit-of-production method.

An exploration and evaluation asset acquired under an option agreement where payments are made at the sole discretion of the Company, is capitalized at the time of payment. Option payments received are treated as a reduction of the carrying value of the related acquisition cost for the exploration and evaluation asset until the payments are in excess of acquisition costs, at which time they are then credited to operations. Option payments are at the discretion of the optionee and, accordingly, are accounted for when receipt is reasonably assured.

Capitalized acquisition costs are assessed for impairment if facts and circumstances suggest that the carrying amount exceeds the recoverable amount. When there is little prospect of further work on a property being carried out by the Company or its partners, when a property is abandoned, or when the capitalized costs are no longer considered recoverable, the related property costs are written down to management's estimate of their net recoverable amount.

The recoverability of the carrying amount of exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, the sale of the respective areas of interest.

e) Property, plant and equipment

Property, plant and equipment ("PPE") is carried at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of PPE consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

PPE is depreciated annually at the following rates, when the asset becomes available for use:

Mine and mill equipment - 30% straight line
Office and computer equipment - 30% straight line
Vehicles - 30% straight line

An item of PPE is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in profit or loss in the condensed consolidated interim statement of comprehensive income or loss.

Where an item of PPE comprises major components with different useful lives, the components are accounted for as separate items of PPE. Expenditures incurred to replace a component of an item of PPE that is accounted for separately, including major inspection and overhaul expenditures, are capitalized.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

f) Impairment

At each financial position reporting date, the carrying amounts of the Company's assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

An asset's recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset or cash generating unit is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

g) Share capital

Common shares

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

Equity Units

Proceeds received on the issuance of units, comprised of common shares and warrants, are allocated on the residual value method; proceeds are allocated to the common shares up to their fair value, as determined by the current quoted trading price on the announcement date, and the balance, if any, to the reserve for warrants.

Non-monetary consideration

Where share capital is issued, or received, as non-monetary consideration and the fair value of the asset received, or given up is not readily determinable, the fair market value of the shares is used to record the transaction. The fair market value of the shares is based on the trading price of those shares on the appropriate stock exchange on the date of the agreement to issue or receive shares as determined by the board of directors.

h) Share-based payment transactions

The share option plan allows Company employees and consultants to acquire shares of the Company. The fair value of options granted is recognized as an employee or consultant expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee.

The fair value of employee options is measured at grant date, and the fair value of non-employee options is at the date or over the period such services are received. Each tranche of employee and non-employee options granted is recognized using the graded vesting method over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest.

Share-based payments granted to non-employees that are related to the issuance of shares are recorded as a reduction of share capital. All other share-based payments are reflected in equity reserves, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in the equity reserve is credited to share capital, adjusted for any consideration paid.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

i) Equity reserves

Where share options or warrants expire or are cancelled, the fair value previously recognized is transferred from the appropriate equity reserve to accumulated deficit.

j) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share is determined by adjusting the loss attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive potential common shares.

k) Provisions

Provisions are recognized where a legal or constructive obligation has been incurred as a result of past events; it is probable that an outflow of resources embodying economic benefit will be required to settle the obligation; and a reliable estimate of the amount of the obligation can be made. If material, provisions are measured at the present value of the expenditures expected to be required to settle the obligation.

Decommissioning liability

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration, development or ongoing production of an exploration and evaluation asset interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, as soon as the obligation to incur such costs arises. Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. Subsequent to initial measurement, the obligation is adjusted at the end of each reporting period to reflect the passage of time and changes in the estimated future cash flows underlying the obligation. The increase in the provision due to the passage of time is recognized as a finance cost and increases/ decreases due to changes in the estimated future cash flows to decommission the asset are capitalized. Actual costs incurred upon settlement of the site restoration obligations are charged against the provision to the extent the provision was established.

I) Income taxes

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized as equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the statement of financial position liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes; the initial recognition of assets or liabilities in a transaction that is not a business combination and that affect neither accounting or taxable profit; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the statement of financial position date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a future tax asset will be recovered, it provides a valuation allowance against that excess.

Additional income taxes that arise from the distribution of dividends are recognized at the same time as the liability to pay the related dividend.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

m) New accounting standards and interpretations not yet adopted

The following accounting pronouncements have been released but have not yet been adopted by the Company.

IFRS 9 Financial Instruments

In November 2009, the IASB issued, and subsequently revised in October 2010, IFRS 9 Financial Instruments (IFRS 9) as a first phase in its ongoing project to replace IAS 39. IFRS 9, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. The standard also adds guidance on the classification and measurement of financial liabilities. Management has not yet determined the potential impact the adoption of IFRS 9 will have on the Company's financial statements

IFRS 10 Consolidated Financial Statements

In May 2011, the IASB issued IFRS 10 Consolidated Financial Statements (IFRS 10). IFRS 10, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 10 replaces Standing Interpretations Committee 12 Consolidation – Special Purpose Entities (SIC 12) and IAS 27 Consolidated and Separate Financial Statements (IAS 27). IFRS 10 eliminates the current risk and rewards approach and establishes control as the single basis for determining the consolidation of an entity. The standard provides guidance on how to apply the control principles in a number of situations, including agency relationships and holding potential voting rights. Management has not yet determined the potential impact that the adoption of IFRS 13 will have on the Company's financial statements.

IFRS 12 Disclosure of Interests in Other Entities

In May 2011, the IASB issued IFRS 12 Disclosure of Interests in Other Entities (IFRS 12). IFRS 12, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 12 outlines the required disclosures for interests in subsidiaries and joint arrangements. The new disclosures require information that will assist financial statement users to evaluate the nature, risks and financial effects associated with an entity's interests in subsidiaries and joint arrangements. Management has not yet determined the potential impact that the adoption of IFRS 13 will have on the Company's financial statements.

IFRS 13 Fair Value Measurement

In May 2011, the IASB issued IFRS 13 Fair Value Measurement (IFRS 13). IFRS 13, which is to be applied prospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 13 defines fair value, provides a framework for measuring fair value and includes disclosure requirements for fair value measurements. IFRS 13 will be applied in most cases when another IFRS requires (or permits) fair value measurement. Management has not yet determined the potential impact that the adoption of IFRS 13 will have on the Company's financial statements.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

m) New accounting standards and interpretations not yet adopted (continued)

Other

In June 2011, the IASB issued amendments to IAS 1 Presentation of Financial Statements to revise the way in which other comprehensive income is presented. The Company does not believe the changes resulting from the amended standard will have an impact on its financial statements. The amended standard is effective for annual periods beginning on or after July 1, 2012.

In June 2011, the IASB issued amendments to IAS 19 Employee Benefits with revised requirements for pensions and other postretirement benefits, termination benefits and other changes. The Company does not believe the changes resulting from these amendments are relevant to its financial statements. The amended standard is effective for annual periods beginning on or after January 1, 2013.

In June 2011, the IASB issued amendments to IFRS 7 Financial Instruments: Disclosures. The Company does not believe the changes resulting from these amendments are relevant to its financial statements. The amended standard is effective for annual periods beginning on or after July 1, 2011.

In May 2011, the IASB issued IFRS 11 Joint Arrangements, in addition to IFRS 10 and IFRS 12 as discussed above. The Company does not believe the changes resulting from this new standard are relevant to its financial statements. IFRS 11 is effective for annual periods beginning on or after January 1, 2013.

In October 2011, the IASB issued IFRIC 20 Stripping costs in the production phase of a surface mine. The Company does not believe the changes resulting from this new standard are relevant to its financial statements. IFRIC 20 is effective for annual periods beginning on or after January 1, 2013.

4. CASH AND CASH EQUIVALENTS

At January 31, 2012 the Company's cash and cash equivalents was comprised entirely of cash at financial institutions and on hand of \$50,327 (April 30, 2011 - \$507,807).

5. SHORT TERM INVESTMENT

During the year ended April 30, 2011 the Company purchased a guaranteed investment certificate which bears interest at 1.85% and which matures on February 1, 2012. Accrued interest income of \$3,700 is included in amounts receivable at January 31, 2012.

Balance at April 30, 2011	\$ 800,000
Redeemed during the period	(600,000)
Balance at January 31, 2012	\$ 200,000

a) Yreka, California

On April 14, 2011, the Company closed the Definitive Agreement for the purchase of a 51% interest in the Cherry Hill Mining claims, located in Siskiyou County, northern California, whose key asset is the past producing Cherry Hill Gold Mine. In consideration for the 51% interest in the project, the Company agreed to pay US\$555,000 (paid). The Cherry Hill purchase includes one mill site claim including a 750 ton-per-month gravity circuit mill with all machinery and equipment (note 7). The Property is approximately 125 acres located in the Klamath National Forest in Siskiyou County, California, approximately 8 miles from Yreka. Cherry Hill has completed a substantial amount of exploration work in the mine.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

8. EXPLORATION AND EVALUATION ASSETS (continued)

a) Yreka, California (continued)

On May 20, 2011 the Company concluded the purchase agreement to acquire a further 17.15% interest in the Cherry Hill Mining claims. In consideration the Company agreed to issue 500,000 common shares (note 10(b)), at a fair value of \$230,000. \$209,420 has been recognized as exploration and evaluation asset acquisition costs and the remaining \$20,570 as equipment (note 7).

On July 29, 2011 the Company concluded the purchase agreement to acquire the remaining 31.85%% interest in the Cherry Hill Mining claims, to acquire a 100% interest therein. In consideration the Company agreed to issue 950,000 common shares (note 10(b)), at a fair value of \$446,500 and 475,000 share purchase warrants, at a fair value of \$121,993 (note 10(c)). A total of \$517,627 has been recognized as exploration and evaluation asset acquisition costs and the remaining \$50,866 as equipment (note 7).

To date, the Company has incurred mineral property exploration and evaluation costs of \$802,144.

b) Mexico

(i) Zacatecas

On August 14, 2008, the Company entered into an Option Agreement with Yale Resources Ltd.("Yale") whereby the Company entered into an option agreement to acquire 100% of Yale's 65% vested participating interest in a Joint Venture Agreement dated August 8, 2008, between Yale and IMPACT Silver Corp., with respect to certain mining concessions located in Zacatecas, Mexico.

In order to exercise the option, the following consideration is required by the Company:

- Pay a \$25,000 (paid) non-refundable deposit upon execution of the Option Agreement;
- Pay \$25,000 (paid), issue 200,000 common shares of the Company (issued at a fair value of \$10,500) and incur \$100,000 (incurred) on exploration expenditures by December 24, 2008;
- Pay \$100,000 (waived), issue an additional 300,000 common shares of the Company (issued at a fair value of \$27,000) and incur an additional \$100,000 (incurred) in mineral property exploration and evaluation costs by January 24, 2010.

To date, the Company has incurred mineral property exploration and evaluation costs of \$249,026 (April 30, 2011 - \$238,241).

On January 14, 2010, Yale waived the payment of the final \$100,000 due under the agreement. The Company exercised its option to acquire 100% of Yale's 65% vested participating interest in the Joint Venture Agreement by issuing the final 300,000 shares due under the agreement.

The Company also agreed to pay US\$250,000 to Yale if the property is included in a positive feasibility study or is part of a production on the property greater than 500 tonnes per day.

(ii) Yoreme

On December 20, 2010, the Company entered into an exploration and evaluation purchase agreement with Maggiore Capital Limited, pursuant to which the Company has acquired one hundred percent (100%) right, title and interest in the Yoreme mineral claim (the "Property"). The Property is 400 hectares in size and is located in the Municipality of Alamos, state of Sonora, Mexico. The consideration paid for this exploration and evaluation is 2,500,000 common shares of the Company, at a fair value of \$0.32 per share. The Company agreed to pay an additional 200,000 shares as a finders' fee on this purchase (note 10(b)).

To date, the Company has incurred mineral property exploration and evaluation costs of \$95,300 (April 30, 2011 - \$16,700).

c) British Columbia

On May 3, 2010, the Company acquired an option to purchase a one hundred percent (100%) interest in five contiguous mineral claims covering a combined area of approximately 2,431.79 hectares located in the Cariboo mining district in British Columbia. In consideration for this option, the Company issued 2,000,000 common shares valued at \$160,000. On November 25, 2010 the Company announced that it has terminated the option to purchase these claims, and wrote off the cost of this option.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars)

9. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Accounts payable and accrued liabilities are comprised of the following:

	January 31, 2012	April 30, 2011
Trade payables	\$ 21,996	\$ 32,945
Accrued Liabilities	39,501	-
Due to related parties	 412	
	\$ 61,909	\$ 32,945

10. SHARE CAPITAL

a) Authorized

Unlimited common shares without par value

b) Issued

On May 20, 2011 the Company issued 500,000 common shares at a price of \$0.46 per share (total value of \$230,000) as consideration for the acquisition of a 17.15% interest in the Cherry Hill Mining claims (note (8(a)).

On July 29, 2011 the Company issued 950,000 common shares at a price of \$0.47 per share (total value of \$446,500) as consideration for the acquisition of the remaining 31.85% interest in the Cherry Hill Mining claims (note 8(a)).

During the nine months ended January 31, 2012, 2,190,000 common shares were issued on the exercise of 2,000,000 options and 190,000 warrants, for total proceeds of \$508,500 and \$28,500 respectively.

On May 3, 2010 the Company issued 2,000,000 common shares at a price of \$0.08 per share (total value of \$160,000) as consideration for the acquisition of mineral claims in the Cariboo mining district of British Columbia (note 8(c)).

On December 20, 2010 the Company issued 2,700,000 common shares at a price of \$0.32 per share (total value of \$864,000) for consideration for the Yoreme mineral claim (note 8(b)(ii)).

During the year ended April 30, 2011, 15,035,000 common shares were issued on the exercise of 14,085,000 warrants and 950,000 options, for total proceeds of \$1,413,500 and \$104,000 respectively.

At April 30, 2010, 789,600 of the Company's issued and outstanding common shares were held in escrow and deposited with a trustee under an escrow agreement. Under the escrow agreement these common shares were released from escrow during the nine months ended January 31, 2011.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

c) Warrants

A continuity schedule of the Company's outstanding share purchase warrants for the nine months ended January 31, 2012 and the year ended April 30, 2011 is as follows:

	January 31, 2012			April 30	1	
		Weigh	ted			Weighted
	Number	Average Exer	cise	Number	Ave	rage Exercise
_	Outstanding	Pi	rice	Outstanding		Price
Outstanding, beginning of the year	583,000	\$ 0.	15	14,668,000	\$	0.10
Issued	475,000	\$ 0.	56	-	\$	-
Exercised	(190,000)	\$ 0.	15	(14,085,000)	\$	0.10
Outstanding, end of the period/year	868,000	\$ 0.	37	583,000	\$	0.15

As at January 31, 2012, the Company had warrants outstanding to acquire common shares of the Company as follows:

	Warrants		Weighted average remaining
Expiry date	Outstanding	Exercise price	contractual life (in years)
February 8, 2015 *	393,000	0.15	3.02
July 29, 2012	475,000	0.56	0.49
	868,000		1.64

As at April 30, 2011, the Company had warrants outstanding to acquire common shares of the Company as follows:

	Warrants		Weighted average remaining
Expiry date	Outstanding	Exercise price	contractual life (in years)
February 8, 2015 *	583,000	0.15	3.78

^{*}On February 8, 2010, the Company issued 14,668,000 warrants in connection with a non-brokered financing. The warrants have a five year term and are exercisable at \$0.10 in year one, \$0.15 in year two, \$0.25 in year three, \$0.50 in year four, and \$1.00 in year five.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

d) Share Purchase Options

On April 27, 2007, the Company adopted an incentive stock option plan, which provides that the board of directors of the Company may from time to time, on its discretion and in accordance with the Exchange requirements, grant to directors, officers, employees and technical consultants to the Company, non-transferable options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed 10% of the common shares outstanding at Closing. Such options will be exercisable for a period of up to 5 years from the date of grant. In connection with the foregoing, the number of common shares reserved for issuance to any individual director or officer will not exceed five percent (5%) of the issued and outstanding common shares and the number of common shares reserved for issuance to all technical consultants will not exceed 2% of the issued and outstanding common shares. Options may be exercised no later than 90 days following cessation of the optionee's position with the Company, provided that if the cessation of office, directorship, or technical consulting arrangement was by reason of death, the options may be exercised within a maximum period of one year after such death, subject to the expiry date of such options.

A continuity schedule of the Company's outstanding options for the nine months ended January 31, 2012 and the year ended April 30, 2011 is as follows:

_	January 31	, 2012	April 30, 2011			
	Number W	eighted Average	Number	Weighted Average		
_	Outstanding	Exercise Price	Outstanding	Exercise Price		
Outstanding, beginning of the year	3,900,000 \$	0.27	900,000	\$ 0.11		
Granted	1,900,000 \$	0.37	4,100,000	\$ 0.28		
Exercised	(2,000,000) \$	0.25	(950,000)	\$ 0.11		
Cancelled	(100,000) \$	0.36	(150,000)	\$ 0.10		
Outstanding, end of the period/year	3,700,000 \$	0.33	3,900,000	\$ 0.27		

As at January 31, 2012, the Company had options outstanding and exercisable to acquire common shares of the Company as follows:

	Number of	Number of		Weighted average
	Options	Options		remaining contractual
Expiry date	Outstanding	Exercisable	Exercise price	life (in years)
March 1, 2012	400,000	400,000	\$ 0.245	0.08
March 16, 2012	400,000	400,000	\$ 0.325	0.12
July 19, 2012	250,000	250,000	\$ 0.55	0.47
September 15, 2012	350,000	175,000	\$ 0.45	0.62
December 21, 2015	1,000,000	1,000,000	\$ 0.28	3.89
December 12, 2016	1,300,000	1,300,000	\$ 0.32	4.87
	3,700,000	3,525,000	\$ 0.33	2.87

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

d) Share Purchase Options (continued)

As at April 30, 2011, the Company had stock options outstanding and exercisable to acquire common shares of the Company as follows:

	Number of	Number of		Weighted average
	Options	Options		remaining contractual
Expiry date	Outstanding	Exercisable	Exercise price	life (in years)
December 21, 2011	750,000	750,000	\$ 0.21	0.64
March 1, 2012	500,000	500,000	\$ 0.245	0.84
March 14, 2012	100,000	100,000	\$ 0.36	0.87
March 16, 2012	500,000	500,000	\$ 0.325	0.88
December 21, 2015	2,050,000	2,050,000	\$ 0.28	4.65
	3,900,000	3,900,000	\$ 0.27	0.37

e) Share-based compensation

The fair value of share based compensation is measured at the date of grant and recognized over the vesting period. The fair value of stock options granted to directors, employees, and consultants and vested during the nine months ended January 31, 2012 was \$493,262 (January 31, 2011 – \$630,228) which has been expensed as share-based compensation in the Company's condensed consolidated interim statement of operations and comprehensive loss.

For the nine months ended January 31, 2012 and 2011, share based compensation expense consisted of the following:

	January 31, 2012	January 31, 2011
Expense category:		_
Management and consulting fees	\$ 401,916	\$ 630,228
Investor relations	91,346	-
	\$ 493,262	\$ 630,228

The Company estimated the fair value of stock options granted using the Black-Scholes option pricing model with the following weighted average assumptions:

	January 31, 2012	January 31, 2011
Risk-free interest rate	1.43%	2.45%
Expected annual volatility	125.61%	137.85%
Expected life	3.78	3.93
Expected dividend yield	0%	0%
Exercise price	\$ 0.37	\$ 0.26
Share price	\$ 0.37	\$ 0.28

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 $\,$

(Expressed in Canadian Dollars)

10. SHARE CAPITAL (continued)

e) Share-based compensation (continued)

The expected volatility is based on daily share price history, to the option's grant date, for a period consistent with the assumed option life. The risk free interest rate is the yield on a zero-coupon Canadian Treasury Bill of a term consistent with the assumed option life. The expected life is the average expected period to exercise, based on the historical activity patterns for each individually vesting tranche.

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable single measure of the fair value of the Company's share options.

11. LOSS PER SHARE

Basic and diluted loss per share

The calculation of basic and diluted loss per share for the nine months ended January 31, 2012 was based on the loss attributable to common shareholders of \$1,968,093 (January 31, 2011 – \$1,123,590) and a weighted average number of common shares outstanding of 45,658,207 (January 31, 2011 – 28,541,119).

The calculation of basic and diluted loss per share for the three months ended January 31, 2012 was based on the loss attributable to common shareholders of \$852,688 (January 31, 2011 – \$758,914) and a weighted average number of common shares outstanding of 46,541,304 (January 31, 2011 – 34,666,835).

12. RELATED PARTY TRANSACTIONS AND BALANCES

a) Management transactions

The Company has identified certain senior officers as its key management personnel. The compensation costs for key management personnel for the nine months ended January 31, 2012 and 2011 are as follows:

For the nine months ended January 31, 2012:

	Short-term employee benefits	Share-based payments	Total
	\$	\$	\$
McLeary Capital Management, Inc. (i)	90,000	245,481	335,481

For the nine months ended January 31, 2011:

	Short-term employee benefits \$	Other benefits	Total \$
McLeary Capital Management, Inc. (i)	5,000	٠ -	5,000
Mark McLeary; President and CEO	41,675	123,772	165,447

⁽i) A private company controlled by the President and CEO, Mark McLeary. Total expenses of \$9,300 were reimbursed to Mack McLeary during the nine months ended January 31, 2012 (January 31, 2012 - \$252) and \$412 due to him was included in accounts payable and accrued liabilities at January 31, 2012 (January 31, 2012 - \$nil).

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

12. RELATED PARTY TRANSACTIONS AND BALANCES (continued)

b) Director transactions

During the nine months ended January 31, 2012 the Company paid or accrued the following to private companies associated with a director of the Company, Ian Foreman:

- \$35,536 to Yale Resources Ltd. for geological consulting services (January 31, 2011 \$1,950), and \$6,912 (January 31, 2011 \$4,956) for office rent and administrative costs.
- 11,200 to Foremost Geological Consulting Ltd for consulting services (January 31, 2011 \$nil).
- \$3,134 to Foremost Management Services Ltd for employee health benefits (January 31, 2011 \$nil).

Total expenses of \$1,485 were reimbursed to Ian Foreman during the nine months ended January 31, 2012 (January 31, 2011 - \$210).

Consulting fees of \$5,400 and reimbursed expenses of \$2,651 were paid to the Company's CFO and director, Thomas Kordyback.

13. SEGMENTED INFORMATION

The Company operates in one reportable operating segment, being the exploration of mineral properties.

The Company's non-current assets are located in its geographic segments of Canada, Mexico and the United States as follows:

	As at January 31, 2012	As at April 30, 2011
Canada	\$ 27,907	\$ -
Mexico	951,500	951,500
United States	1,409,710	569,979
	\$ 2,389,117	\$ 1,521,479

No revenues from external customers were earned during the nine months ended January 31, 2012 or 2011 in any of the geographic locations.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 $\,$

(Expressed in Canadian Dollars)

14. FINANCIAL INSTRUMENTS

The Company's financial assets and liabilities were categorized as follows:

	 January 31, 2012	April 30, 2011
Financial Assets		
Fair value through profit and loss		
Cash and cash equivalents	\$ 50,327	\$ 507,807
Short-term investment	200,000	800,000
Loans and receivables		
Amounts receivable (1)	3,770	-
Total financial assets	\$ 254,097	\$ 1,307,807
Financial Liabilities		
Other financial liabilities		
Accounts payable and accrued liabilities	\$ 61,909	\$ 32,945
Total financial liabilities	\$ 61,909	\$ 32,945

⁽¹⁾ excludes sales tax receivable

The fair values of the Company's amounts receivable, short-term investment and accounts payables and accrued liabilities approximate their carrying values because of the short-term nature of these instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk and market risk.

a) Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents, short-term investments and amounts receivable.

The Company deposits the majority of its cash and cash equivalents and short-term investment with high credit quality financial institutions in Canada, the United States and Mexico. The Company's amounts receivable consist primarily of Harmonized Sales Tax receivable from the Canadian government. Management considers the risk of non-performance related to cash, short-term investment and amounts receivable to be minimal.

Concentration of credit risk exists with respect to the Company's cash and short-term investment as the majority of the amounts are held each in a single Canadian, United States and Mexican financial institution.

The Company's concentration of credit risk, and maximum exposure thereto, is as follows:

	Janu	April 30, 2011			
Cash held at major financial institutions:					
Canada	\$	39,804	\$	500,054	
Mexico		781		7,753	
United States		9,742		-	
		50,327		507,807	
Short-term investments:					
Canada		200,000		800,000	
	\$	250,327	\$	1,307,807	

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 $\,$

(Expressed in Canadian Dollars)

14. FINANCIAL INSTRUMENTS (continued)

b) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments and with property exploration and development. The Company manages liquidity risk by maintaining adequate cash and short-term investment balances.

The Company's expected source of cash flow in the upcoming year will be through equity financing. Cash on hand at January 31, 2012 and expected cash flows for the next 12 months are not sufficient to fund the Company's ongoing operational needs. Therefore, the Company will need funding through equity or debt financing, entering into joint venture agreements, or a combination thereof.

Accounts payable and accrued liabilities are due within twelve months of the statement of financial position date.

c) Market Risk

Market risk consists of interest rate risk, foreign currency risk and other price risk. These are discussed further below.

Interest Rate Risk

Interest rate risk consists of two components:

- (i) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- (ii) To the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

Current financial assets and financial liabilities are generally not exposed to interest rate risk because of their short-term nature and maturity.

The Company is exposed to interest rate price risk with respect to the short-term investment as it bears interest at a fixed annual rate. However, as the investment's maturity is less than one year, the Company is not exposed to significant interest rate price risk as at January 31, 2012 and April 30, 2011.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities are denominated in a foreign currency.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars)

14. FINANCIAL INSTRUMENTS (continued)

c) Market Risk (continued)

The Company is exposed to foreign currency risk with respect to cash, amounts receivable, accounts payable and accrued liabilities and amounts due to related parties, as a portion of these amounts are denominated in Mexican Pesos and US dollars as follows:

	January :	31, 20	012	Ap	oril 30, 2011
	MXN		USD		MXN
Cash	\$ 10,086	\$	9,701	\$	94,256
Accounts payable and accrued liabilities	-		(23,097)		_
	\$ 10,086	\$	(13,396)	\$	94,256
Rate to convert to \$1.00 CDN	\$ 0.0774	\$	1.0041	\$	0.0839

Based on the net Canadian Dollar denominated asset and liability exposures as at January 31, 2012, an average exchange rate fluctuation over the period, of 7%, (April 30, 2011 – 2%) in the Canadian/MXN and CAD/US Dollar exchange rates will impact the Company's earnings by approximately \$847 (April 30, 2011 -\$191). As this sensitivity analysis does not take into account any variables other than foreign currency rate fluctuations, the above information may not fully reflect the fair value of the assets and liabilities involved.

The Company manages foreign currency risk by minimizing the value of financial instruments denominated in foreign currency. The Company has not entered into any foreign currency contracts to mitigate this risk.

Other Price Risk

The Company's ability to raise capital to fund mineral resource exploration is subject to risks associated with fluctuations in mineral resource prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

d) Classification of Financial instruments

IFRS 7 'Financial Instruments: Disclosures' establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

- Level 1 quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's cash and short-term investment are both classified at level one of the fair value hierarchy. As the carrying values of the Company's remaining financial instruments approximate their fair values, disclosure is not made of their level in the fair value hierarchy.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

15. CAPITAL MANAGEMENT

The Company considers its capital structure to be share capital, cash and short term investments. The Company manages its capital structure based on the funds available to the Company, in order to support acquisition, maintenance, exploration, and development of mineral properties.

The Board of Directors has not established any quantitative return on capital criteria for management, instead relying on the expertise of the Company's management to sustain future development of the business.

The properties in which the Company currently has an interest in are in the exploration stage so the Company is dependent on external financing to fund its activities. In order to carry out activities and administration, the Company will spend its existing working capital and raise additional amounts as needed.

The Company is not subject to externally imposed capital restrictions.

There have been no changes to the Company's approach to capital management during the nine months ended January 31, 2012.

16. TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS

As disclosed in Note 2, these are the Company's third condensed consolidated interim financial statements for the period covered by the first annual financial statements prepared in accordance with IFRS.

The accounting policies in Note 3 have been applied in preparing the condensed consolidated interim financial statements for the nine months ended January 31, 2012, the comparative information for the nine months ended January 31, 2011, the statement of financial position as at January 31, 2011 and April 30, 2011, and the preparation of an opening IFRS statement of financial position on the transition date, May 1, 2010.

a) First time adoption

The guidance for the first time adoption of IFRS is set out in IFRS 1 *First-time Adoption of International Financial Reporting Standards'*. Under IFRS 1 changes in accounting policies resulting from the adoption of IFRS are applied retrospectively at the transition date with all adjustments taken to retained earnings unless certain optional exemptions are applied. The Company has applied the following optional exemptions to its opening statement of financial position dated May 1, 2010:

Business Combinations

IFRS1 indicates that a first-time adopter may elect not to apply IFRS 3 'Business Combinations' retrospectively to business combinations that occurred before the date of transition to IFRS. The Company has taken advantage of this election and will apply IFRS 3 to business combinations that occur on or after May 1, 2010.

Share-based payments

IFRS 1 does not require first-time adopters to apply IFRS 2 *Share-based Payment* to equity instruments that were granted on or before November 7, 2002, or equity instruments that were granted subsequent to November 7, 2002 and vested before the date of transition to IFRS. The Company has elected not to apply IFRS 2 to awards that vested prior to May 1, 2010.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 $\,$

(Expressed in Canadian Dollars)

16. TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (continued)

a) First time adoption (continued)

Borrowing Costs

IFRS 1 allows first-time adopters to apply IAS 23 *Borrowing Costs* prospectively from the date of transition to IFRS. The Company has elected to apply IAS 23 prospectively from May 1, 2010. IAS 23 requires the capitalization of borrowing costs directly attributable to the acquisition, production or construction of certain assets.

IFRS 1 also outlines specific guidelines that a first-time adopter must adhere to under certain circumstances. The Company has applied the following guideline to its opening statement of financial position dated May 1, 2010:

Estimates

In accordance with IFRS 1, an entity's estimates under IFRS for the comparative periods must be consistent with estimates made for the same date under previous Canadian GAAP, unless there is objective evidence that those estimates were in error. The Company's IFRS estimates for the comparative periods are consistent with its Canadian GAAP estimates for the same date.

b) Changes in accounting policies

The Company has changed certain accounting policies to be consistent with IFRS as is expected to be effective April 30, 2012, the Company's first annual IFRS reporting date. However, these changes to its accounting policies have not resulted in any significant change to the recognition and measurement of assets, liabilities, equity, revenue and expenses within its financial statements.

The following summarizes the significant changes to the Company's accounting policies on adoption of IFRS:

Impairment of (Non-financial) Assets

IFRS requires a write down of assets if the higher of the fair market value and the value in use of a group of assets is less than its carrying value. Value in use is determined using discounted estimated future cash flows. Canadian GAAP required a write down to estimated fair value only if the undiscounted estimated future cash flows of a group of assets are less than its carrying value.

IFRS also requires the reversal of any previous impairment losses, with the exception of goodwill, where circumstances have changed such that the level of impairment in the value of the assets has been reduced. Canadian GAAP prohibits the reversal of impairment losses.

The Company has changed its accounting policies related to impairment of assets to be consistent with the requirements under IFRS. The changes in accounting policies related to impairment did not have an impact on the Company's condensed consolidated interim financial statements.

Decommissioning Liability (Asset Retirement Obligations)

IFRS requires the recognition of a decommissioning liability for legal or constructive obligations, while Canadian GAAP only required the recognition of such liabilities for legal obligations. A constructive obligation exists when an entity has created reasonable expectations that it will take certain actions.

The Company's accounting policies related to decommissioning liabilities have been changed to reflect these differences. There is no impact on the condensed consolidated interim financial statements.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

16. TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (continued)

b) Changes in accounting policies (continued)

Share-based Payments

In certain circumstances, IFRS requires a different measurement of share-based compensation than Canadian GAAP. In particular, IFRS requires that each tranche, that vests separately, must be treated as a separate grant and that an estimate of forfeitures be included in the determination of the expense associated with stock option grants.

Due to the nature of the Company's stock options, these changes in accounting policy did not have a significant impact on the Company's condensed consolidated interim financial statements.

Functional currency

IFRS requires that the functional currency of each company within the consolidated group be assessed individually, while under Canadian GAAP the functional currency of an integrated operation was the same as the reporting company. Under IFRS, where a company's functional currency differs from the presentation currency of the consolidated financial statements, all assets and liabilities are translated into the presentation currency at the rate of exchange at the period end, and foreign exchange gains and losses arising on translation are recognised in the statement of operations and comprehensive income as other comprehensive income.

c) Reconciliation of Canadian GAAP to IFRS

The following provides reconciliations and discussions of the statement financial position at the transition date of May 1, 2010 and at January 31, 2011 and April 30, 2011, and summary reconciliations of the statements of comprehensive income for the three and nine months ended January 31, 2011, and statement of cash flows for the nine months ended January 31, 2011. The changes in accounting policies resulting from the Company's adoption of IFRS had no significant impact on financial statements for these comparative periods, other than a transfer within equity in respect of the fair value of options and warrants no longer outstanding (refer to note (d(i)) below).

d) Notes on Canadian GAAP - IFRS Reconciliations

(i) IFRS permits a transfer of reserves arising from share-based transactions, within equity. Therefore, at May 1, 2010 the fair value attributable to options and warrants outstanding at that date was transferred from contributed surplus to an "Equity settled share-based payment reserve" and the fair value attributable to outstanding warrants was transferred to a "Reserve for warrants and compensation options". The remaining balance of contributed surplus, which reflected the fair value of options and warrants no longer outstanding, was transferred to Accumulated Deficit.

During the year ended April 30, 2011, some options expired and therefore a further transfer, of the fair value attributable to these option, was made from the Equity settled share-based payment reserve to Accumulated Deficit.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the nine months ended January 31, 2012 and 2011 (Expressed in Canadian Dollars)

17. COMMITMENTS

As at January 31, 2012 the Company had the following obligations:

- The Company has a rental and administrative services agreement with a company that shares directors and officers, and requires the payment of \$800 per month plus taxes. The agreement is in effect on a month to month basis and may be terminated with thirty days written notice in accordance with the provisions of the agreement.
- On December 22, 2010, the Company entered in a 12 month consulting agreement with an unrelated third party which required a payment of \$15,000 per month plus 750,000 stock options. The agreement may be terminated with thirty days written notice in accordance with the provisions of the agreement.
- On May 1, 2011 the Company entered into an indefinite term contract with McLeary Capital Management, Inc. (the "consultant"), a private company controlled by the President and CEO of the Company, for the consultant to continue to act as President and Chief Executive Officer and Director of the Company. A monthly consulting fee of \$10,000 is payable to the consultant. The contract may be cancelled by either party on 30 days written notice and, if cancelled by the Company, by payment of an amount equivalent to two years annual salary. On termination of the contract the consultant will be immediately retained by the Company as a non-paid advisor/consultant to the Company until May 1, 2016 or for such time as the consultant still holds unexercised stock options in the Company. On exercise of the consultant's options, the relationship between the consultant and the Company will cease.
- Effective June 9, 2011, the Company entered into a fifteen month investor relations agreement with Launch IR Inc. An agreement was concluded with the investor relations consultant for a term of 15 months commencing June 15, 2011. The Consultant will be paid a total of \$20,000 plus HST over the term of four months, payable in installments of \$5,000 monthly, commencing June 15, 2011 and the sum of \$5,500 plus HST over the term of eleven months, payable in installments of \$500 per month for a period of eleven months commencing October 15, 2011. The consultant was also the granted options to purchase 350,000 common shares of the Company at an exercise price of \$0.45 for a term of fifteen months.
- Effective July 5, 2011, the Company entered into a 12 month license and service agreement for the consideration of \$10,000 per month. The terms of the agreement requires the licensor to provide mining and permit development services to the Company, and provides the Company the rights to use certain licenses and permits registered in the name of the licensor relating to the Company's Cherry Hill claims located in Siskiyou County, California.
- Effective September 1, 2011, the Company entered into a 3 year storage rental agreement for an annual fee of \$8,400, payable at the start of each year. At the end of the initial rental period, the agreement shall renew annually and continue on a year-to-year basis, subject to termination of sixty days written notice by either party.

18. SUBSEQUENT EVENTS

The following events occurred subsequent to January 31, 2012:

• 308,000 shares were issued on the exercise of warrants at \$0.15 each, for gross proceeds of \$46,200.
