Silver Sun Enters into a Mutual Release and Termination of Consulting Agreements

Vancouver, British Columbia (November 25th, 2010) – Silver Sun Resource Corp. (“Silver Sun” or “the Company”) announces that it has mutually agreed to terminate the consulting agreements entered into on January 26th, 2010 with Asia Asset Management, Inc. (Munir Ali), MGK Consulting Inc. (Jason Gigliotti) and Veneto Holding Ltd. (formerly Skyridge Consulting Inc. – Graeme Sewell).

In consideration of the mutual release and termination, Asia Asset Management, Inc. provided Silver Sun with a repayment of \$30,450 and both MGK Consulting Inc. and Skyridge Consulting Inc. provided Silver Sun with \$33,075 re-payments respectively in consulting fees paid by the Company.

The Company also wishes to announce that they have terminated the option to purchase the Barkerville, British Columbia project from 0875262 BC Ltd.

The Company’s management team continues to focus on the economic value of production with its Zacatecas, Mexico property.

About Silver Sun Resource Corp.

Silver Sun is a Canadian-based resource company focused on the acquisition and exploration of precious metal deposits in Mexico. The Company is engaged in an on-going work program on the Zacatecas, Salvador and Mina San Jose properties, located within the prolific Zacatecas Silver District in Mexico. The Company has an experienced management team with a growth strategy to develop a diversified portfolio of mining projects.

ON BEHALF OF THE BOARD OF DIRECTORS

“Mark A. McLeary”
President

Forward Looking Statements

The reader is cautioned that the potential quantity and grade of the regional exploration target is conceptual in nature; it is uncertain if further exploration will result in the exploration target being delineated as a mineral resource and there is no guarantee that these resources, if delineated, will be economic or sufficient to support a commercial mining operation. The Company's production objectives are intended to provide an indication of management's current expectations and are still conceptual in nature. It is uncertain that it will be established that these resources will be converted into economically viable mining reserves. Until a feasibility study has been completed, there is no certainty that these objectives will be met.

This release may contain forward-looking statements including management's assessments of future plans and operations, and expectations of future production. These statements are based on current expectations that involve a number of risks and uncertainties, which could cause actual results to differ materially from those anticipated. These risks include, but are not limited to, the risks associated with the mining and exploration industry (e.g. operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve estimates; the uncertainty of estimates and projections relating to production and the uncertainty of the availability of capital). The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
