For the nine months ended April 30, 2011

Management's Discussion and Analysis

Date of Report: June 29, 2011

Disclaimer for Forward-Looking Information

Certain statements in this report are forward-looking statements, which reflect our management's expectations regarding our future growth, results of operations, performance, business prospects and opportunities such as our intended work programs on our existing property interests, our ability to meet financial commitments and our ability to raise funds when required. Forward-looking statements consist of statements that are not purely historical, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits we will obtain from them. These forward-looking statements reflect management's current views and are based on certain assumptions and speak only as of the date of this Management's Discussion and Analysis. These assumptions, which include management's current expectations, estimates and assumptions about our current property interests, the global economic environment, the market price and demand for mineral commodities and our ability to manage our property interests and operating costs, may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions, (2) a decreased demand or price for mineral commodities, (3) delays in the start of projects with respect to our property interests, (4) inability to locate and acquire additional property interests, (5) the uncertainty of government regulation and politics in North America and Tanzania regarding mineral exploration and mining, (6) potential negative financial impact from regulatory investigations, claims, lawsuits and other legal proceedings and challenges, and (7) other factors beyond our control.

There is a significant risk that such forward-looking statements will not prove to be accurate. Investors are cautioned not to place undue reliance on these forward-looking statements. No forward-looking statement is a guarantee of future results. Except as required by law, we disclaim any intention or obligation to update or revise any forward-looking statements. Additional information about these and other assumptions, risks and uncertainties are set out in the section entitled "Risk Factors" below.

Company Overview

Our company was incorporated under the provisions of the *Business Corporations Act* (British Columbia) on March 28, 2007. Our company was a Capital Pool Company under the TSX Venture Exchange Policy 2.4. The principle business of our company as a Capital Pool Company was to identify and evaluate companies, assets or businesses with a view to completing a Qualifying Transaction, as that term is defined in Policy 2.4. Our

company's shares were listed and began trading on the TSX Venture Exchange on October 11, 2007 under the symbol "BKT.P".

On May 27, 2008, our company entered into a definitive purchase agreement with RockBridge Energy Inc. and Pure Oil & Gas Co. Ltd. in respect of a proposed Qualifying Transaction. Pursuant to the terms of the agreement, as amended on August 26, 2008, our company and RockBridge Energy agreed to each purchase a 50% interest in the petroleum and natural gas rights, tangible assets and miscellaneous interests, in connection with the Bantry and Pembina properties from Pure Oil & Gas. In consideration for such interests, our company agreed to pay a total of \$1,000,000 and issue 400,000 shares of our capital stock to Pure Oil & Gas. Additionally, our company and RockBridge Energy agreed to each pay 50% of the all expenses incurred from the date of entering into the purchase agreement to the closing of the transactions contemplated therein.

The TSX Venture Exchange granted final approval for the Qualifying Transaction on September 5, 2008 and our company's shares resumed trading on the TSX Venture Exchange under the symbol "BKT" on September 8, 2008.

Following the closing of the agreement, our company ceased to be a Capital Pool Company and became classified as a Tier 2 oil and gas issuer under the policies of the TSX Venture Exchange, engaged in the exploration and development of prospective oil and gas properties. During the year ended July 31, 2009, we acquired 50% of certain petroleum and natural gas rights in both the Pembina property located approximately 50 miles southwest of Edmonton, Alberta and the Bantry property located approximately 60 miles northwest of Medicine Hat, Alberta.

Our company entered into a joint operating agreement with Rockbridge Energy and its wholly-owned subsidiary which provided that the 2007 CAPL Operating Procedure and the 1996 PASC Accounting Procedure would govern the operations with respect to the assets related to the Pembina and Bantry properties. Rockbridge's subsidiary was appointed as operator for such assets. Under the terms of the joint operating agreement, our company and Rockbridge Energy agreed to bear all costs and expenses paid or incurred under the agreement, to own, operate and develop the lands associated with the assets and to share revenues in accordance with their respective 50% working interests.

We were required to commencing preparing and filing reports required under National Instrument 51-101 for our fiscal year ended July 31, 2009. As such we filed our Form 51-101 F1, F2 and F3 on SEDAR at www.sedar.com on November 23, 2009.

During the year ended July 31, 2010, we entered into a letter agreement with an arm's length party to sell our interest in and to certain assets in connection with the Pembina and Bantry properties, including PNG rights, tangibles and wells for cash consideration of \$575,000. This transaction received TSX Venture Exchange approval and the Pembina and Bantry properties have been sold. Therefore, we were not required to file reports under National Instrument 51-101 for our fiscal year ended July 31, 2010.

Pembina and Bantry Properties

We owned a 50% interest in the petroleum and natural gas rights, tangible assets and miscellaneous interests, in connection with the Bantry and Pembina properties. The Bantry property is located 60 miles northwest of Medicine Hat, Alberta and the Pembina property is located 50 miles southwest of Edmonton, Alberta. The Pembina property consists of 5 sections of 50% working interest operated land in Townships 48 and 49, Ranges 3 and 4 W5M in central Alberta. These lands directly offset the Pembina Keystone Cardium Unit No.2 and are geologically updip from the Unit. The Bantry property consists of a 50% working interest in Section 3-20-14 W4M.

In July 2009, RockBridge Energy, who was the operator at that time, commenced a rework program on one of the Pembina oil wells that previously produced to 2004. The previous operator had shut down the well after an equipment malfunction during attempts to improve production. The work, with a crew and service rig onsite, included abandoning the lower former producing zone and perforating 5 metres of the Belly River formation, followed by swab testing. In August 2009, the work program was completed and the perforation could not be completed, apparently due to the tight formation.

Security deposits were required to be paid to the Energy Resources Conservation Board by the operator in connection with the Pembina and Bantry properties, of which our share was \$288,969. We were also required to pay a Crown royalty deposit of \$1,600 in relation to our oil and gas properties.

As at July 31, 2009, the oil and gas properties had been written-down to their recoverable value of \$92,504 and an asset retirement obligation of \$518,329 was also set up for the oil and gas properties.

During the year ended July 31, 2010, we sold our interests in and to certain assets in connection with Pembina and Bantry properties, including PNG rights, tangibles and wells, in consideration for proceeds of \$575,000. Prior to the sale we recorded \$23,458 in depletion expense and \$17,278 in accretion expense related to the asset retirement obligation. Other deposits of \$1,600 were forfeited resulting in a gain on sale of \$1,039,960.

Ontario Lithium Claims and Yukon Quartz Claims

On August 20, 2009, we entered into a share exchange agreement (the “Agreement”) with 0854508 B.C. Ltd., a private British Columbia company (“BC Co”), and the four shareholders of BC Co (the “Shareholders”). BC Co is the sole legal and beneficial owner of 96 mineral claims prospective for lithium covering an area of approximately 3,800 acres, located in Northern Ontario, and 93 lead quartz mineral claims covering an area of approximately 4,836 acres, located in the Yukon Territory. Under the terms of the Agreement, we purchased all of the issued and outstanding common shares in the capital of BC Co from the Shareholders. Consideration was \$150,000 in cash and the issue of 5,000,000 (issued) common shares upon TSX Venture Exchange approval, which was received on August 28, 2009. We also issued 482,142 common shares to one finder in connection with the transaction. This transaction resulted in the acquisition of a subsidiary. During the nine months ended April 30, 2011, we acquired the assets of the subsidiary in the period and dissolved the subsidiary.

No work was conducted on the Ontario Lithium Claims to date and we were required to either spend \$38,400 in exploration costs or pay \$38,400 in annual rental income on the Ontario Lithium claims by June 26, 2011. Subsequent to April 30, 2011, we decided not to make the payment and drop this property. Accordingly, we wrote off \$387,789 in acquisition costs as of April 30, 2011.

Late in September 2009, we commenced operations on our 100% owned Yukon gold prospect. The initial phase consisted of sampling and operations.

In September 2010, we initiated operations on the Yukon gold prospect that included field work and sampling throughout the claim block. We completed a small scale soil sample and we anticipate conducting a larger sampling program in the summer of 2011.

As at April 30, 2011, we had spent a total of \$18,717 in exploration expenditures on the Yukon Quartz Claims. Subsequent to April 30, 2011, we renewed some of our Yukon quartz claims for three months and the rest of our Yukon quartz claims for one year with the Yukon Ministry of Energy, Mines & Resources.

British Columbia Cariboo Gold Prospect

We entered into a property purchase agreement dated December 31, 2010 with 0895459 B.C. Ltd., a private British Columbia company, to acquire a 100% interest in 15 mineral claims covering an area of approximately 7,290 hectares, located within the Cariboo Gold Region, British Columbia. In consideration, we were required to pay \$15,000 (paid subsequently) and issue 3,000,000 common shares, which have been issued. On January 7, 2011, we received approval from the TSX Venture Exchange. In addition, we also issued 228,260 common shares as finder's fee.

No work has been conducted on the Cariboo Gold Prospect to date, nor do we currently have sufficient funds to do so, and our focus is the Handeni Gold Prospect in Tanzania. We may look at divesting some of our properties if we are unable to obtain sufficient financing. While we have been successful in securing financings in the past, there is no assurance that we will be able to do so in the future, and/or that we will be able to raise sufficient funds to meet our work commitments for all of our properties.

British Columbia Stewart Gold Prospect

On October 2, 2009, we entered into an option agreement with 0862799 B.C. Ltd., a private British Columbia company, to acquire a 100% interest in six contiguous claim blocks consisting of 2,706 hectares in the Stewart Mining Region of British Columbia. The property is subject to a 3% net smelter royalty, 1% of which may be purchased by us for \$1,000,000. In consideration, we were required to make cash payments totaling \$50,000 (paid), incur \$500,000 in exploration costs over two years and issue 2,400,000 common shares, which have been issued.

In early November 2010, we amended the option agreement with 0862799 B.C. Ltd. We issued 1,000,000 common shares and the vendor waived the work commitment of \$250,000 for the first year of the option agreement.

Consideration is cash payments, exploration costs and the issue of common shares as follows:

	<u>Cash</u>	<u>Exploration Costs</u>	<u>Common Shares</u>
Upon Exchange approval (paid and issued)	\$ 25,000	\$ -	1,200,000
By November 3, 2010 (paid and issued)	25,000	-	1,200,000
By February 3, 2011 (issued)	-	-	1,000,000
By November 3, 2011	-	250,000	-
	<u>\$ 50,000</u>	<u>\$ 250,000</u>	<u>3,400,000</u>

As at April 30, 2011, we had spent a total of \$13,422 in exploration expenditures on the property.

Quebec Rare Earth Claims

In June 2010, we entered into an option agreement to acquire 31 contiguous rare earth mineral claims in Quebec with 9222-2777 Quebec Inc. and Tanveer Ali (collectively the "Vendor"). We amended the agreement in May 2011, whereby the Vendor waived the work commitment of \$150,000 for the first year of the agreement and increased the work commitment from \$400,000 to \$550,000 for the fourth year of the agreement. In consideration, we are required to make cash payments, incur exploration costs, and issue common shares as follows:

	<u>Cash</u>	<u>Common Shares</u>	<u>Exploration Costs</u>
Upon Exchange approval (paid and issued)	\$ 17,500	2,000,000	\$ -
By June 17, 2012	-	-	150,000
By June 17, 2013	-	-	150,000
By June 17, 2014	-	-	550,000
	<u>\$ 17,500</u>	<u>2,000,000</u>	<u>\$ 850,000</u>

In addition, 195,000 common shares were issued as a finder's fee.

No work has been conducted on the Cariboo Gold Project to date, nor do we currently have sufficient funds to do so, and our focus is the Handeni Gold Prospect in Tanzania. We do intend to initiate exploration activities if we are able to obtain sufficient financing. While we have been successful in securing financings in the past, there is no assurance that we will be able to do so in the future, and/or that we will be able to raise sufficient funds to meet our work commitments for all of our properties.

Handeni North, Tanzania

On September 3, 2010, we entered into a letter agreement with Sundance Gold Ltd. to acquire an 80% interest in a 63.4 square kilometre gold property located in the Handeni

Region of Tanzania. Consideration is cash payments, exploration costs and the issue of common shares as follows:

	<u>Cash</u>	<u>Exploration Costs</u>	<u>Common Shares</u>
Upon execution of the letter agreement (paid)	US\$ 75,000	US\$ -	-
Upon closing date (issued)	-	-	3,000,000
Upon closing date (paid)	200,000	-	-
As finders' fee (paid)	60,304	-	-
On or before January 31, 2012	-	350,000	-
On or before Feb. 29, 2012 (shares issued)	350,000	-	3,000,000
On or before January 31, 2013	-	500,000	3,000,000
	<u>US\$ 625,000</u>	<u>US\$850,000</u>	<u>9,000,000</u>

We will be able to acquire the remaining 20% interest by further payments of US\$4,500,000 and the issuance of 3,000,000 common shares. This additional 20% interest will be subject to a 2% net smelter return and the foregoing payments for this interest may be made over a period of up to three years.

On December 14, 2010 we received final approval from the TSX Venture Exchange for the acquisition of the Handeni North Prospect. In February we paid a finder's fee to an arm's length party of \$59,325 and we will pay a finder's fee of \$71,875 in the second year following the closing date in connection with the transaction.

On January 7, 2011 we were notified by the operator that first phase of the work program on our Handeni North Prospect has now commenced. This first phase will consist of line cutting, geological mapping, and setting up of IP and mag surveying.

In April 2011, we were informed by the operator that field crews were continuing the geological mapping and grid soil sampling. The soil samples were taken at 25 m intervals along 500 m spaced east west lines starting at the south end of the property. Three crews were sampling and completing the geological mapping of the property in anticipation of commencing drilling once all data is collected and evaluated.

Later in April 2011, we were informed by the operator that pits were dug and that detailed sampling was continuing. This data will enable the operator to determine the highest priority drill targets.

The Handeni Gold Prospect is our company's main focus and we intend to raise funds in order to continue with a work program and to meet our exploration commitments. While we have been successful in securing financings in the past, there is no assurance that we will be able to do so in the future. If we are able to secure additional financing the operator intends to conduct 2,000 meters of drilling, complete the IP survey work and perform the Airborne Mag survey.

Overall Performance

Oil and gas revenue for the three and nine months ended April 30, 2011 were \$Nil and \$Nil compared to \$Nil and \$68,022 for the three and nine months ended April 30, 2010. Oil and gas operating costs were \$Nil and \$Nil for the three and nine months ended April 30, 2011 compared to \$Nil and \$81,585 for the three and nine months ended April 30, 2010. Accretion of asset retirement obligation were \$Nil and \$Nil for the three and nine months ended April 30, 2011, compared to \$Nil and \$17,278 for the three and nine months ended April 30, 2010. Depletion and the write-down of oil and gas properties were \$Nil and \$Nil for the three and nine months ended April 30, 2011 compared to \$Nil and \$23,458 for the three and nine months ended April 30, 2010.

Until September 8, 2008, we carried on business as a Capital Pool Company which consisted of the identification and evaluation of companies, assets or businesses with a view to completing a Qualifying Transaction. From September 8, 2008 until December 2009, we carried on business as an oil and gas company. In December 2009, we sold the Pembina and Bantry oil and gas properties and turned our focus to our mineral properties. We were incorporated on March 28, 2007 and incurred expenses of \$344,338 and \$894,188 for the three and nine months ended April 30, 2011 compared to \$131,458 and \$643,586 for three and nine months ended April 30, 2010.

Summary of Quarterly Results

The following table sets out selected quarterly financial data for the eight most recently completed interim quarters:

Brookemont Capital Inc.
for the nine months ended April 30, 2011 – Page 8

	2011 Third	2011 Second	2011 First	2010 Fourth	2010 Third	2010 Second	2010 First	2009 Fourth
Revenues	\$Nil	\$Nil	\$Nil	\$Nil	\$Nil	\$ 5,504	\$ 62,518	\$ 43,914
General and administrative expenses	\$ (344,338)	\$ (381,470)	\$ (168,380)	\$ (170,197)	\$ (131,458)	\$ (160,130)	\$ (351,998)	\$ (273,165)
Loss before other items	\$ (344,338)	\$ (381,470)	\$ (168,380)	\$ (170,197)	\$ (131,458)	\$ (154,626)	\$ (289,480)	\$ (229,251)
Loss per share (Basic and Diluted)	\$ (0.009)	\$ (0.011)	\$ (0.006)	\$ (0.007)	\$ (0.005)	\$ (0.007)	\$ (0.017)	\$ (0.020)
Other items:								
Interest Income	\$ 9	\$ 891	\$ 465	\$ 255	\$ 324	\$ 33	\$ 177	\$ 729
Interest expense	(2,683)	(2,230)	\$Nil	\$Nil	\$Nil	\$Nil	\$Nil	\$Nil

Net (loss)/gain and comprehensive (loss)/gain	\$ (734,801)	\$ (382,809)	\$ (167,915)	\$ (169,942)	\$ (131,134)	\$ 885,367	\$ (289,303)	\$ (982,527)
Basic and diluted (loss)/gain per share	\$ (0.020)	\$ (0.011)	\$ (0.006)	\$ (0.007)	\$ (0.005)	\$ 0.037	\$ (0.017)	\$ (0.088)

Summary of Results from Incorporation

Net loss decreased by \$693,224 from the fourth quarter of 2009 to the first quarter of 2010 main due to a comparative decrease in the write-down of the oil and gas properties. We had net earnings the second quarter of 2010 due to selling the Pembina and Bantry properties. Net loss during the third quarter of 2010 was mainly due to management and directors' fee as well as to professional fees. Net loss increased from the third to fourth quarter of 2010 mainly due to an increase in stock based compensation and professional fees. Net loss was relatively stable from the fourth quarter of 2010 to the first quarter of 2011, as it only decreased by \$2,027. Net loss increased by \$214,894 from the first to second quarter of 2011 mainly due to an increase in finance fees of \$149,423, consulting fees of \$30,590 and stock-based compensation of \$31,788. Net loss increased from the second to third quarter of 2011 due to a write down of mineral properties of \$387,789 in the third quarter and an increase in stock-based compensation from \$65,895 in the second quarter to \$160,095 in the third quarter. These were mitigated by a drop in finance fees of \$149,423 to \$Nil from the second to third quarter.

Results of Operations

Three Months Ended April 30, 2011 Compared to Three Months Ended April 30, 2010

Administrative expenses were \$344,338 for the three months ended April 30, 2011 compared to \$131,458 for the three months ended April 30, 2010. The significant

increase of \$212,880 was due partly to an increase of \$92,960 in finance fees and an increase of \$160,095 in stock-based compensation.

Total assets increased significantly from \$2,014,513 at July 31, 2010 to \$4,805,317 at April 30, 2011, mainly due to an increase in mineral properties.

Nine months ended April 30, 2011 Compared to Nine months ended April 30, 2010

Administrative expenses were \$894,188 for the nine months ended April 30, 2011 compared to \$643,586 for the nine months ended April 30, 2010. The increase of \$250,602 was mainly due to increases in finance fees of \$149,423, in consulting fees of \$236,326 and stock-based compensation of \$260,097.

Liquidity and Capital Resources

At July 31, 2010, we had \$274,976 in cash and cash equivalents and working capital of \$223,836 as compared to cash and cash equivalents of \$138,036 and a working capital deficiency of \$57,648 at April 30, 2011.

Current assets decreased by \$105,070 from July 31, 2010 to April 30, 2011, due to a decrease in cash and cash equivalents. Current liabilities increased by \$176,414 from July 31, 2010 to April 30, 2011, due to an increase in accounts payable and accrued liabilities and loans payable.

There is substantial doubt about our ability to continue as a going concern as the continuation of our business is dependent upon obtaining further long-term financing, successful exploration of our property interests, the identification of reserves sufficient enough to warrant development, successful development of our property interests and, finally, achieving a profitable level of operations. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments. During the nine months ended April 30, 2011, three arm's length lenders made unsecured loans to the Company of \$525,000 bearing 5% interest per annum. As consideration, the Company issued 807,692 common shares valued at \$149,423 as finance fees. As at April 30, 2011, \$212,500 had not been repaid.

Due to the uncertainty of our ability to meet our current operating and capital expenses, in the notes to our audited financial statements for the period ended July 31, 2010, our independent auditors included an explanatory paragraph regarding substantial doubt about our ability to continue as a going concern.

Our company had no long-term debt as of April 30, 2011 and July 31, 2010. However we did have future income tax liability of \$313,300 at April 30, 2011 and July 31, 2010.

Capital Resources

As of the date of this Report our company has commitments for capital expenditures until July 31, 2011 to pay \$1,143 in office rent.

Operating Activities

During the three and nine months ended April 30, 2011 operating activities used cash of \$561,965 and \$555,461. The use of cash for the three months ended April 30, 2011 was mainly attributable to our net loss for the period of \$734,801 and accounts payable and accrued liabilities of \$371,3710, offset mainly by the write down of mineral properties of \$387,789 and stock-based compensation of \$160,095. The use of cash for the nine months ended April 30, 2011 was mainly attributable to our net loss for the period of \$1,285,525 and other items, offset mainly by the write down of mineral properties of \$387,789, finance fees of \$149,423, and stock-based compensation of \$260,097.

During the three and nine months ended April 30, 2010 operating activities used cash of \$172,828 and \$518,258. The use of cash for the three months ended April 30, 2010, was mainly attributable to our net loss for the period of \$131,134 and accounts payable and accrued liabilities of \$50,113. The use of cash for the nine months ended April 30, 2010, was mainly attributable to our gain on sale of oil and gas properties of \$1,039,960 and accounts payable and accrued liabilities of \$117,992, offset by our net earnings of \$464,930 and other items.

Investing Activities

During the three and nine months ended April 30, 2011, we used \$113,851 and \$583,342 in investing activities, mainly due to acquisition and development of mineral properties. During the three months ended April 30, 2010, investing activities used cash of \$25,325 due to acquisition and development of mineral properties. During the nine months ended April 30, 2010, investing activities provided cash of \$360,985, which was attributable to the proceeds on sale of oil and gas properties of \$575,000 offset mainly by acquisition and development of mineral properties of \$212,702.

Financing Activities

During the three ended April 30, 2011, \$221,280 was provided to us by financing activities due to proceeds from the issuance of share capital of \$243,780, offset by our \$22,500 repayment of loans payable. During the nine months ended April 30, 2011, \$1,001,863 was provided to us by financing activities due to proceeds from issuance of share capital of \$789,363 and loans payable of \$212,500. During the three and nine months ended April 30, 2010, \$Nil and \$509,073 were provided by financing activities. The provision of cash of \$509,073 was due to \$519,823 in proceeds from the issuance of share capital offset by \$10,750 in share issuance costs.

Changes in Accounting Policies

International Financial Reporting Standards (“IFRS”)

In February 2008 the Canadian Accounting Standards Board (“AcSB”) confirmed the date for publicly-listed companies to use IFRS replacing Canadian GAAP for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. Therefore, our company will be required to adopt IFRS for its fiscal year commencing August 1, 2011, and the transition plan will require in 2011 the restatement for comparative purposes onto the IFRS basis of amounts and disclosures reported by our

company for its prior fiscal year, ended July 31, 2011. Our company has commenced the development of an IFRS implementation plan to prepare for this transition, and is currently in the process of analyzing the key areas where changes to current accounting policies may be required. The Chief Financial Officer will manage the conversion and report regularly to the Audit Committee.

While an analysis will be required for all current accounting policies, the initial key areas of assessment will include:

- Exploration and development expenditures;
- Provisions, including asset retirement obligations;
- Stock-based compensation;
- Accounting for income taxes; and
- First-time adoption of International Financial Reporting Standards (IFRS 1).

As the analysis of each of the key areas progresses, other elements of our company's IFRS implementation plan will also be addressed, including the implication of changes to accounting policies and processes; financial statement note disclosures; information technology; internal controls; contractual arrangements; and employee training.

The following table summarizes the expected timing of activities related to our transition to IFRS.

Initial analysis of key areas for which changes to accounting policies may be required.	In progress now
Detailed analysis of all relevant IFRS requirements and identification of areas requiring accounting policy changes or those with accounting policy alternatives.	By August 31, 2011
Assessment of first-time adoption (IFRS 1) requirements and alternatives.	By August 31, 2011
Final determination of changes to accounting policies and choices to be made with respect to first-time adoption alternatives.	By August 31, 2011
Resolution of the accounting policy change implications on information technology, internal controls and contractual agreements.	By August 31, 2011
Management and employee education and training.	Throughout the Transition process
Quantification of the Financial Statements impact of changes in accounting policies.	By August 31, 2011

Off-Balance Sheet Arrangements

Our company does not utilize off-balance sheet arrangements.

Related Parties Transactions

Directors and a former officer received \$121,618 in management directly or through companies wholly-owned by them during the nine months ended April 30, 2011 (2010 – \$141,425). All Seasons Consulting Inc. (Negar Adam) (ceased to be an officer during the first quarter), Conrad Clemis, Daniel Terrett and BLB Consulting Inc. (James Nelson) were paid management fees. There are no management agreements in place and our company has no contractual requirement to continue paying management fees. The

directors were actively seeking new projects for our company and working on our company's existing property.

These transactions are in the normal course of operations and were measured at the exchange amount, a reasonable amount agreed upon by the related parties.

As at April 30, 2011, accounts payable and accrued liabilities included \$3,494 (July 31, 2010 - \$249) payable to Canasia Industries Corporation for reimbursement of expenses. Canasia Industries is a related party in that Conrad Clemis is a director of both companies.

Financial and Other Instruments

Our company's financial instruments consist of cash and cash equivalents, prepaid expenses and GST/HST recoverable. Unless otherwise noted, it is management's opinion that our company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying value, unless otherwise noted.

Proposed Transactions

Our company does not have any proposed transactions as of the date of this report.

Additional Disclosure for Venture Issuers without Significant Revenue

During the nine months ended April 30, 2011 and 2010, our company incurred expenses including the following:

	2011	2010
Write down and depletion	\$387,789	\$23,458
Acquisition costs	\$3,070,448	\$801,454
General & administrative costs	\$894,188	\$643,586
Capitalized exploration costs	\$213,494	\$10,998

See April 30, 2011 and 2010 interim consolidated financial statements for details of expenditures.

Additional Disclosure of Outstanding Share Data

Common Shares

Our company has authorized an unlimited number of common shares without par value.

As of April 30, 2011 and June 29, 2011, we had 43,096,168 common shares issued and outstanding.

As at April 30, 2011 and June 29, 2011, we had 300,000 common shares subject to an escrow agreement.

Stock options

At April 30, 2011 and June 29, 2011, we had 2,799,166 share purchase options were outstanding and exercisable entitling the holders thereof the right to purchase one common share for each option held as follows:

<u>Number</u>	<u>Exercise Price</u>	<u>Expiry Date</u>
215,000	\$0.22	July 4, 2011
1,636,000	\$0.22	March 31, 2012
133,333	\$0.22	October 11, 2012
143,333	\$0.10	April 1, 2014
187,500	\$0.11	September 8, 2014
306,000	\$0.10	October 9, 2014
120,000	\$0.13	August 31, 2015
58,000	\$0.10	October 11, 2017
<hr/>		
<u>2,799,166</u>		

Warrants

At April 30, 2011 and June 29, 2011, we had 2,050,000 share purchase warrants outstanding. Each warrant entitles the holder the right to purchase one common share as follows:

<u>Number</u>	<u>Exercise Price</u>	<u>Expiry Date</u>
<u>2,050,000</u>	\$0.15	September 25, 2011

Risks and Uncertainties

Because of the unique difficulties and uncertainties inherent in mineral exploration ventures, we face a high risk of business failure.

Potential investors should be aware of the difficulties normally encountered by mineral exploration companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration program that we intend to undertake on our properties and any additional properties that we may acquire. These potential problems include unanticipated problems relating to exploration, and additional costs and expenses that may exceed current estimates. The expenditures to be made by us in the exploration of our properties may not result in the discovery of any mineral deposits. Any expenditure that we may make in the exploration of any other mineral property that we may acquire may not result in the discovery of any commercially exploitable mineral deposits. Problems such as unusual or unexpected geological formations and other conditions are involved in all mineral exploration and often result in unsuccessful and/or expensive exploration efforts. If the results of our exploration do not reveal viable commercial mineralization, we may decide to abandon or sell some or all of our property interests.

Because of the speculative nature of the exploration of mineral properties, there is no assurance that our exploration activities will result in the discovery of any quantities of mineral deposits on our current properties or any other additional properties we may acquire.

We intend to continue exploration on our current properties and we may or may not acquire additional interests in other mineral properties. The search for mineral deposits as a business is extremely risky. We can provide investors with no assurance that exploration on our current properties, or any other property that we may acquire, will establish that any commercially exploitable quantities of mineral deposits exist. Additional potential problems may prevent us from discovering any mineral deposits. These potential problems include unanticipated problems relating to exploration and additional costs and expenses that may exceed current estimates. If we are unable to establish the presence of mineral deposits on our properties, our ability to fund future exploration activities will be impeded, we will not be able to operate profitably and investors may lose all of their investment in our company.

Because of the inherent dangers involved in mineral exploration and exploitation, there is a risk that we may incur liability or damages as we conduct our business.

The search for mineral deposits involves numerous hazards. As a result, we may become subject to liability for such hazards, including pollution, cave-ins and other hazards against which we cannot insure or against which we may elect not to insure. At the present time we have no coverage to insure against these hazards. The payment of such liabilities may have a material adverse effect on our financial position.

The potential profitability of mineral ventures depends in part upon factors beyond the control of our company and even if we discover and exploit mineral deposits, we may never become commercially viable and we may be forced to cease operations.

The commercial feasibility of an exploration program on a mineral property is dependent upon many factors beyond our control, including the existence and size of mineral deposits in the properties we explore, the proximity and capacity of processing equipment, market fluctuations of prices, taxes, royalties, land tenure, allowable production and environmental regulation. These factors cannot be accurately predicted and any one or a combination of these factors may result in our company not receiving any return on invested capital. These factors may have material and negative effects on our financial performance and our ability to continue operations.

Exploration and exploitation activities are subject to comprehensive regulation which may cause substantial delays or require capital outlays in excess of those anticipated causing an adverse effect on our company.

Exploration and exploitation activities are subject to foreign, federal, provincial, and local laws, regulations and policies, including laws regulating the removal of natural resources from the ground and the discharge of materials into the environment. Exploration and exploitation activities are also subject to foreign, federal, provincial, and local laws and regulations which seek to maintain health and safety standards by regulating the design

and use of drilling methods and equipment. Properties may also be subject to complex Aboriginal claims.

Environmental and other legal standards imposed by foreign, federal, provincial, or local authorities may be changed and any such changes may prevent us from conducting planned activities or may increase our costs of doing so, which would have material adverse effects on our business. Moreover, compliance with such laws may cause substantial delays or require capital outlays in excess of those anticipated, thus causing an adverse effect on us, especially, foreign laws and regulations. Additionally, we may be subject to liability for pollution or other environmental damages that we may not be able to or elect not to insure against due to prohibitive premium costs and other reasons. Any laws, regulations or policies of any government body or regulatory agency may be changed, applied or interpreted in a manner which will alter and negatively affect our ability to carry on our business.

Recent political attest in the African region may significantly impact our exploration in Tanzania.

Because our property interests may not contain any mineral deposits and because we have never made a profit from our operations, our securities are highly speculative and investors may lose all of their investment in our company.

Our securities must be considered highly speculative, generally because of the nature of our business and our stage of explorations. We currently have exploration stage property interests which may not contain mineral deposits. We may or may not acquire additional interests in other mineral properties but we do not have plans to acquire rights in any specific mineral properties as of the date of this Management's Discussion and Analysis. Accordingly, we have not generated any revenues nor have we realized a profit from our operations to date and there is little likelihood that we will generate any revenues or realize any profits in the short term. Any profitability in the future from our business will be dependent upon locating and exploiting mineral deposits on our current properties or mineral deposits on any additional properties that we may acquire and subsequent development. The likelihood that any mineral properties that we may acquire or have an interest in will contain commercially exploitable mineral deposits is extremely remote. We may never discover mineral deposits in respect to our current properties or any other area, or we may do so and still not be commercially successful if we are unable to exploit those mineral deposits profitably. We may not be able to operate profitably and may have to cease operations, the price of our securities may decline and investors may lose all of their investment in our company.

As we face intense competition in the mineral exploration and exploitation industry, we will have to compete with our competitors for financing and for qualified managerial and technical employees.

Our competition includes large established mining companies with substantial capabilities and with greater financial and technical resources than we have. As a result of this competition, we may have to compete for financing and be unable to conduct any financing on terms we consider acceptable. We may also have to compete with the other mining companies for the recruitment and retention of qualified managerial and technical employees. If we are unable to successfully compete for financing or for qualified

employees, our exploration programs may be slowed down or suspended, which may cause us to cease operations as a company.

We have a history of losses and have a deficit, which raises substantial doubt about our ability to continue as a going concern.

We have not generated any revenues since our date of inception and we will continue to incur operating expenses without revenues if and until we engage in commercial operations. Our accumulated loss as of April 30, 2011 was \$3,001,753 since inception. We had cash and cash equivalents in the amount of \$138,036 as at April 30, 2011. We estimate our average monthly operating expenses to be approximately \$40,000 each month. We cannot provide assurances that we will be able to successfully explore and develop our property interests. These circumstances raise substantial doubt about our ability to continue as a going concern as described in the notes to our audited financial statements for the period ended July 31, 2010, our independent auditors included an explanatory paragraph regarding substantial doubt about our ability to continue as a going concern. If we are unable to continue as a going concern, investors will likely lose all of their investments in our company.

Our future is dependent upon our ability to obtain financing and if we do not obtain such financing, we may have to cease our exploration activities and investors could lose their entire investment.

There is no assurance that we will operate profitably or will generate any positive cash flow in the future. We will require additional financing in order to proceed with the exploration and, if warranted, development of our properties. We will also require additional financing for the fees we must pay to maintain our status in relation to the rights to our properties and to pay the fees and expenses necessary to operate as a public company. We will also need more funds if the costs of the exploration of our mineral claims are greater than we have anticipated. We will require additional financing to sustain our business operations if we are not successful in earning revenues. We will also need further financing if we decide to obtain additional mineral properties. We currently do not have any arrangements for further financing and we may not be able to obtain financing when required. Our future is dependent upon our ability to obtain financing. If we do not obtain such financing, our business could fail and investors could lose their entire investment.

Our directors and officers are engaged in other business activities and accordingly may not devote sufficient time to our business affairs, which may affect our ability to conduct operations and generate revenues.

Our directors and officers are involved in other business activities. As a result of their other business endeavours, our directors and officers will exercise their fiduciary duties and duty of care but nonetheless may not be able to devote sufficient time to our business affairs, which may negatively affect our ability to conduct our ongoing operations and our ability to generate revenues. In addition, the management of our company may be periodically interrupted or delayed as a result of our officers' other business interests.

RISKS RELATING TO OUR COMMON STOCK

A decline in the price of our common stock could affect our ability to raise further working capital and adversely impact our ability to continue operations.

A prolonged decline in the price of our common stock could result in a reduction in the liquidity of our common stock and a reduction in our ability to raise capital. Because a significant portion of our operations have been and will be financed through the continued sale of equity securities, a decline in the price of our common stock could be especially detrimental to our liquidity and our operations. Such reductions may force us to reallocate funds from other planned uses and may have a significant negative effect on our business plan and operations, including our ability to continue our current operations. If our stock price declines, we can offer no assurance that we will be able to raise additional capital or generate funds from operations sufficient to meet our obligations. If we are unable to raise sufficient capital in the future, we may not be able to have the resources to continue our normal operations or become insolvent.

The market price for our common stock may also be affected by our ability to meet or exceed expectations of analysts or investors. Any failure to meet these expectations, even if minor, may have a material adverse effect on the market price of our common stock and our operations as a result.

Additional Information

We file annual and interim reports, information circulars and other information with certain Canadian securities regulatory authorities. The documents filed with the Canadian securities regulatory authorities are available at <http://www.sedar.com>.
