GOLDEN CROSS ANNOUNCES EXTENSION TO AMALGAMATION AGREEMENT WITH BLUE GOLD

April 30, 2013

CNSX: GOX

Golden Cross Resources Inc. ("Golden Cross" or the "Company") announces that it has entered into an extension agreement (the "Extension Agreement") to the amalgamation agreement previously entered into with Blue Gold Tailing Technologies Ltd. ("Blue Gold"). The parties have agreed to further extend the Outside Date, as defined in the Agreement, from April 30, 2013 to May 31, 2013. The Agreement was previously amended on January 16, 2013 to extend the Outside Date from February 28, 2013 to April 30, 2013.

About Blue Gold

Blue Gold is a water remediation company with a suite of technologies and proprietary nanobiotechnology that provides environmentally safe solutions for water purification, restoration and contamination issues. Blue Gold uses the EPA guidelines as a benchmark for what constitutes safe agricultural or drinkable water, and tailors these guidelines to those standards that are acceptable in the jurisdiction in which the technology is used. Additionally, this technology can be used to recover heavy and precious metals from mine tailings.

The first commercial plant began operating on January 14, 2012 in Mexico. It has been successfully removing leachate from water in a landfill and producing clean water certified by Conaqua, the federal water commission of Mexico.

In addition, Blue Gold has a patent pending technology that recovers precious metals contained in tailings. At the end of the process the water is remediated and can be reused. The first contract has been signed to re-treat PGM rich chrome tailings materials. The unit is expected to treat 40,000 tons of tailings per month and is expected to be installed in the second half of 2013.

Blue Gold's suite of technologies includes: (i) PUREINATOR™, (ii) SMARTSAN™, (iii) LAREMUTEC™, and (v) DESALT™ 1000/2000 & DESALT™ 5500. These technologies can be utilized as separate solutions or in combination with one another, to accommodate specific client requirements.

Blue Gold's current business model is based on entering into long term agreements (plant installation and operating agreements) with clients pursuant to which Blue Gold funds the capital costs of building and installing its treatment plants. Pursuant to a plant installation and operating agreement, the client pays Blue Gold a negotiated dollar value per cubic meter of treated water with a negotiated guaranteed minimum number of cubic meters to be treated per annum.

Blue Gold is a private Ontario corporation.

About the Company

The Company holds a 100% undivided interest in the Holy Cross Property, which consists of a single mineral exploration tenure covering 2,005 hectares within the Omineca Mining Division of north central British Columbia.
