NEWS RELEASE

NANOSTRUCK ANNOUNCES STOCK OPTION GRANTS

November 4, 2013 - VANCOUVER, Canada –NanoStruck Technologies Inc. (the “Company”) (CNSX:NSK) (OTCQX: NSKTF) (Frankfurt: 8NSK) announces that the Company has granted stock options to purchase a total of 6,620,000 common shares at an exercise price of \$0.15 per share for a period of three years, in accordance with the provisions of the Company’s stock option plan. The option exercise price was set pursuant to CNSX policies, whereby the exercise price must not be lower than the greater of the closing market prices on (a) the trading day prior to the option grant date, and (b) the date of the option grant. The options are allocated as to (i) 4,600,000 options to the Company’s directors and officers, (ii) 1,420,000 options to the Company’s consultants, and (iii) 600,000 options to the Company’s advisory board.

About the Company

NanoStruck Technologies Inc. is a water remediation company with a suite of patented technologies and proprietary nano-biotechnology that provides environmentally safe solutions for water purification, restoration and contamination issues. The Company uses the EPA guidelines as a benchmark for what constitutes safe agricultural or drinkable water, and tailors these guidelines to those standards that are acceptable in the jurisdiction in which the technology is used. Additionally, the Company’s technology can be used to recover heavy and precious metals from mine tailings.

The first water treatment facility began operating on January 14, 2012 in Mexico. It has been successfully removing leachate from water in a landfill and producing clean water certified by Conagua, the federal water commission of Mexico.

In addition, the Company has a patent pending technology that recovers precious metals contained in tailings. At the end of the process, the water is remediated and can be reused.

The Company’s current business model is based on entering into long term agreements (plant installation and operating agreements) with clients pursuant to which the Company funds the capital costs of building and installing its treatment plants. Pursuant to a plant installation and operating agreement, the client pays the Company a negotiated dollar value per cubic meter of treated water with a negotiated guaranteed minimum number of cubic meters to be treated per annum.

The Company also holds a 100% undivided interest in the Holy Cross Property, which consists of a single mineral exploration tenure covering 2,005 hectares within the Omineca Mining Division of north central British Columbia.
