NEWS RELEASE

NANOSTRUCK ANNOUNCES DELIVERY OF NANOCLEAR FIELD TEST TRIAL UNITS

November 7, 2013 - VANCOUVER, Canada – NanoStruck Technologies Inc. (the “Company” or “NanoStruck”) (CNSX: NSK) (OTCQX: NSKTF) (Frankfurt: 8NSK) is pleased to report the shipment of the field test units of NanoClear cartridges for Nanosan. As announced by the Company in June 2013, NanoStruck received a purchase order of 23,000 units from New World Sanitations CC of South Africa.

Nanosan is a sewage digester unit developed by New World Sanitations that is designed to reduce water usage for a family of five to between 300 liters and up to 1,200 liters per year. That compares with an average family that uses between 32,000 and up to 80,000 liters of water per year to flush their toilet. The NanoClear cartridge uses the company proprietary nano powder, which removes ammonia, nitrites, nitrates, phosphates, odors and improves water quality.

Nanosan is an environmentally conscious system, which uses virtually no outside sources of water or power. It is suitable for areas where there is no sewage system in place.

NanoStruck will be providing the NanoClear filter cartridges that are utilized within the Nanosan system. While the initial target market for Nanosan has been informal settlements in the economically developing world, NanoStruck along with New World Sanitations, are looking to expand to areas in the developed world where there is little or no access to sewage systems. The Company is now shipping the first order of NanoClear cartridges for the Nanosan unit.

Jürgen Graupe, CEO of New World Sanitations CC, said “NanoStruck, through ingenious innovation, has created the ultimate solution to perfect the innovative New World Sanitations Nanosan recycle sanitation system, to provide dignified sanitation to humankind and our environment, especially preserving our most important resource, water.”

Bundeep Singh Rangar, CEO and Chairman of the Board said: “The test units have been shipped within the anticipated time frame and provides New World Sanitation with a competitive edge in the market.”

About the Company

NanoStruck is a water remediation company with a suite of patented technologies and proprietary nanobiotechnology that provides environmentally safe solutions for water purification, restoration and contamination issues. The Company uses the EPA guidelines as a benchmark for what constitutes safe agricultural or drinkable water, and tailors these guidelines to those standards that are acceptable in the jurisdiction in which the technology is used. Additionally, the Company’s technology can be used to recover heavy and precious metals from mine tailings.

The first water treatment facility began operating on January 14, 2012 in Mexico. It has been successfully removing leachate from water in a landfill and producing clean water certified by Conagua, the federal water commission of Mexico.

In addition, the Company has a patent pending technology that recovers precious metals contained in tailings. At the end of the process, the water is remediated and can be reused.

The Company’s current business model is based on entering into long term agreements (plant installation and operating agreements) with clients pursuant to which the Company funds the capital costs of building and installing its treatment plants. Pursuant to a plant installation and operating agreement, the client pays the Company a negotiated dollar value per cubic meter of treated water with a negotiated guaranteed minimum number of cubic meters to be treated per annum.

The Company also holds a 100% undivided interest in the Holy Cross Property, which consists of a single mineral exploration tenure covering 2,005 hectares within the Omineca Mining Division of north central British Columbia.

FORWARD LOOKING INFORMATION

This press release contains forward-looking statements. The use of any of the words "anticipate", "continue", "estimate", "expect", "may", "will", "project", "should", "believe" and similar expressions are intended to identify forward-looking statements. Statements relating to "reserves" or "resources" are deemed to be forward-looking statements because they involve the implied assessment, based on certain estimates and assumptions that the resources and reserves described can be profitably produced in the future.

Although the Company believes that the expectations and assumptions on which the forward-looking statements are based are reasonable, undue reliance should not be placed on the forward-looking statements because the Company can give no assurance that they will prove to be correct. Forward-looking statements in this press release include that NanoStruck will be providing the NanoClear filter cartridges that are utilized within the Nanosan system. Since forward-looking statements address future events and conditions, by their very nature they involve inherent risks and uncertainties. These statements speak only as of the date of this press release. Actual results could differ materially from those currently anticipated due to a number of factors and risks including various risk factors discussed in the Company's Management's Discussion and Analysis for the nine months ended June 30, 2013 and filed on August 29, 2013 and for the year ended September 30, 2012 and filed on January 23, 2013 under the Company's profile on www.sedar.com.

THE FORWARD-LOOKING INFORMATION CONTAINED IN THIS NEWS RELEASE REPRESENTS THE EXPECTATIONS OF THE COMPANY AS OF THE DATE OF THIS NEWS RELEASE AND, ACCORDINGLY, IS SUBJECT TO CHANGE AFTER SUCH DATE. READERS SHOULD NOT PLACE UNDUE IMPORTANCE ON FORWARD-LOOKING INFORMATION AND SHOULD NOT RELY UPON THIS INFORMATION AS OF ANY OTHER DATE. WHILE THE COMPANY MAY ELECT TO, IT DOES NOT UNDERTAKE TO UPDATE THIS INFORMATION AT ANY PARTICULAR TIME.
