NANOSTRUCK ANNOUNCES ISSUANCE OF SHARES PURSUANT TO CONSULTING AGREEMENT

November 19, 2013 - VANCOUVER, Canada –NanoStruck Technologies Inc. (the “Company” or “NanoStruck”) (CNSX:NSK) (OTCQX: NSKTF) (Frankfurt: 8NSK) has issued shares to a consultant for amounts owed for consulting fees. The Company issued a total of 111,706 common shares of the Company at a deemed value of \$0.12 per share based on the discounted market price on the day of issuance in accordance with the CNSX policy.

About the Company

NanoStruck is a water remediation company with a suite of patented technologies and proprietary nanobiotechnology that provides environmentally safe solutions for water purification, restoration and contamination issues. The Company uses the EPA guidelines as a benchmark for what constitutes safe agricultural or drinkable water, and tailors these guidelines to those standards that are acceptable in the jurisdiction in which the technology is used. Additionally, the Company's technology can be used to recover heavy and precious metals from mine tailings.

The first water treatment facility began operating on January 14, 2012 in Mexico. It has been successfully removing leachate from water in a landfill and producing clean water certified by Conagua, the federal water commission of Mexico.

In addition, the Company has a patent pending technology that recovers precious metals contained in tailings. At the end of the process, the water is remediated and can be reused.

The Company's current business model is based on entering into long term agreements (plant installation and operating agreements) with clients pursuant to which the Company funds the capital costs of building and installing its treatment plants. Pursuant to a plant installation and operating agreement, the client pays the Company a negotiated dollar value per cubic meter of treated water with a negotiated guaranteed minimum number of cubic meters to be treated per annum.

The Company also holds a 100% undivided interest in the Holy Cross Property, which consists of a single mineral exploration tenure covering 2,005 hectares within the Omineca Mining Division of north central British Columbia.
