RE: SEDAR Project No. 0316573
Interim Management Discussion and Analysis ("MD&A")
– November 30, 2020 Amendment

Please note the following amendment to the interim MD&A as referenced above.

The paragraph set out below, was deleted from page 3.

"Contakt LLC's platform will be leveraged to further expand Tracker's existing suite of blockchain-enabled technologies in the financial and logistics industries. Tracker's blockchain and risk management platform has been implemented in financial institutions globally. Contakt LLC's platform will be integrated to leverage the existing Tracker technology stack, enabling both companies to offer an enterprise-grade, fully secure public health solution. Tracker's blockchain platform enables secure storage and permission based access of data, and was originally designed for use in the company's financial risk management solution, as well as its digital asset exchange platform. Under the proposed acquisition, Contakt LLC will leverage Tracker's blockchain platform in the deployment of its end-to-end contact tracing solution, retaining privacy and data security for all stakeholders. The proposed acquisition will also enable Tracker to expand its customer base and further monetize its proprietary blockchain platform."

Yours truly,

Tracker Ventures Corp.
