

Infinity Stone Enters into Option Agreement to Acquire Galaxy Pegmatite Project, Quebec

Vancouver, BC, July 6, 2022 – Infinity Stone Ventures Corp. ([CSE:GEMS](#)) ([OTC:TLOOF](#)) ([FSE:B2I0](#)) (the “**Company**” or “**Infinity Stone**”) is pleased to announce, further to its news release dated June 24, 2022, that it has entered into a property option agreement (the “**Option Agreement**”) with Quartier Minerals Inc. (“**Quartier**”) to acquire up to a 100% interest in and to the Galaxy Pegmatite Project located near Mont-Laurier, Quebec (the “**Project**”).

Pursuant to the Option Agreement, the Company will acquire a 100% interest in and to the Project upon:

- i) paying \$50,000 to Quartier (completed);
- ii) issuing 500,000 Class A Subordinate Voting Shares of the Company (“**Shares**”) to Quartier within thirty (30) days of the execution date (the “**Execution Date**”) of the Option Agreement;
- iii) paying \$100,000 to Quartier on or before the first anniversary of the Execution Date;
- iv) issuing 500,000 Shares to Quartier on or before the first anniversary of the Execution Date;
- v) incurring \$100,000 in exploration expenditures on the Project on or before the first anniversary of the Execution Date; and
- vi) incurring an additional \$200,000 in exploration expenditures on the Project on or before the second anniversary of the Execution Date.

Upon the Company acquiring the Project, Quartier will retain a 2.5% net smelter returns royalty (the “**NSR**”) over production from the Project, subject to the Company’s right to repurchase 1% of the NSR for \$1,500,000.

A recent field survey of the Project site recovered a sample of lithium bearing Spodumene. The Company intends to conduct further exploration of the Project in the coming weeks.

About the Galaxy Pegmatite Project

The Galaxy Pegmatite Project covers 22 mineral claims and 2 pending claim applications covering 1,411 hectares in southern Quebec, approximately 45 kilometres northwest of Mont-Laurier, Quebec and 140 kilometres north of the city of Gatineau, Quebec. There is excellent access to all

parts of the Property from road La Vérendrye 13, via the Trans-Canada Highway (Hwy QC-117), which traverses roughly through the middle of the Property.

The Property is underlain by at least 30 pegmatite exposures representing 30 pegmatite dikes of Laurentian or more recent rocks of the Precambrian Grenvillian Series. The general strike of the formation is in a northwesterly direction with a near vertical dip. The five minerals associated with the pegmatites are lepidolite, columbite, samarskite, euxenite, and thorianite. The property is largely covered by quaternary till. ⁽¹⁾

For further description of the Project, please see the Company's news release dated June 24, 2022.
