HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

1. NATURE OF OPERATIONS

- (a) Homeland Uranium Inc. (the "company") is a development company engaged in the business of acquisition and exploration of uranium resource properties, currently in Niger, West Africa and formerly in Colorado and Utah, USA (*see note 6(b)*). The company, incorporated in December, 2006 under the Ontario Business Corporations Act, is a reporting issuer subject to the rules and regulations of the Ontario Securities Commission. As a reporting issuer only, its shares do not trade on any stock exchange.
- (b) As the company is a development stage enterprise, it has not yet determined whether its properties contain reserves that are economically recoverable and the ability to recover amounts from these properties is dependent upon a number of factors including environmental risks, legal and political risks, the discovery of economically recoverable reserves, confirmation of the company's interest in the underlying properties, the ability of the company to obtain necessary financing to complete the development and future profitable production or proceeds from the disposition of the properties. The company is considered to be a development stage enterprise as it has yet to generate significant revenue from operations.

Although the company has taken steps to verify title to the mineral properties on which it is conducting exploration and in which it has an interest, these procedures do not guarantee the company's title. Although management is not aware of any such agreements, transfers or defects, property title may be subject to unregistered prior agreements, claims or transfers and title may be affected by undetected defects. Assets located outside of North America are subject to the risk of foreign investment, including currency exchange fluctuations and restrictions and local political instability and uncertainty.

The company faces risks and uncertainties including: (i) the inability to obtain the financing necessary to complete the development of its properties, (ii) realization of proceeds from the sale of its properties, or (iii) the company's licenses, permits or concessions being revoked as a result of title disputes, a failure to comply with agreements or security issues preventing the safe exploration and development of any properties under license. Specifically, the company has encountered many delays during the execution of its Niger project due to events and circumstances beyond its control. The government of Niger has acknowledged these delays as "force majeure" and has granted the company an extension to its current concessions until August 31, 2012 to compensate for the lost time, essentially giving it a further two years to comply with its original spending requirements. Such risks and uncertainties discussed above could result in a material write down of the mineral properties

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES

The unaudited interim consolidated financial statements of the company comply with International Financial Reporting Standards ("IFRS") applicable to interim financial statements, including IAS 34 and IFRS 1. The significant policies are detailed as follows:

(a) Statement of compliance

The policies applied in these interim consolidated financial statements are based on IFRS issued and outstanding as of June 28, 2011, the date the Board of Directors approved the interim consolidated financial statements. Any subsequent changes to IFRS that are given in the annual consolidated financial statements for the year ending December 31, 2011 could result in restatement of these interim consolidated financial statements, including the transition adjustments recognized on change-over to IFRS.

These are the company's first interim consolidated financial statements prepared in accordance with IFRS. The 2010 consolidated financial statements include an opening balance sheet as at January 1, 2010, the date at which the impact of IFRS transition was recorded against equity, in accordance with the provisions of IFRS 1 "First Time Adoption of International Financial Reporting Standards" and the 2010 comparative statements were prepared using the same basis of accounting. A detailed reconciliation of the consolidated financial statements prepared under Canadian generally accepted accounting principles ("Canadian GAAP") and the comparative 2010 IFRS financial information is presented in Schedules 1 to 7 (following note 16).

The company will ultimately prepare its opening consolidated balance sheet as of January 1, 2010 and consolidated financial statements for the years ended December 31, 2011 and 2010 by applying IFRS that are in effect as at December 31, 2011. Accordingly, the opening consolidated balance sheet as of January 1, 2010 and consolidated financial statements for the years ended December 31, 2011 and 2010 may differ from these interim consolidated financial statements if new IFRS are subsequently enacted.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

(b) Basis of presentation

These interim consolidated financial statements are prepared on the historical cost basis except for certain assets and financial instruments which are measured at their fair value, as explained in the accounting policies set out in this note. Non-current assets are stated at the lower of carrying amount and fair value less costs to sell. The accounting policies set out below have been applied consistently to all periods, both current and comparative, presented in the interim consolidated financial statements and in preparing an opening IFRS balance sheet at January 1, 2010 for the purpose of transition to IFRS.

These interim consolidated financial statements should be read in conjunction with the company's audited financial statements for the year ended December 31, 2010. Accounting measurements at interim dates inherently involve greater reliance on estimates than at year end and results of operations for interim periods are not necessarily indicative of results expected for the fiscal year.

These unaudited interim consolidated financial statements, prepared by management, have not been reviewed by the company's external auditors.

(c) Consolidation

These interim consolidated financial statements include the accounts of the company and its wholly-owned subsidiaries, Homeland Uranium, Inc. ("US sub"), a Utah company, Pan African Uranium Corp. ("Ontario sub"), an Ontario company, and Uranium International Limited Niger ("Niger sub"), a branch of the Ontario sub. Control is achieved when the company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. All significant intercompany transactions and balances have been eliminated on consolidation.

(d) Mineral properties

All acquisition and exploration costs, net of incidental revenues, are charged to operations in the period incurred (*see also notes 16(I)(d) and 16(II)(a) re transitional IFRS provision*) until such time as it has been determined that a property has economically recoverable reserves, in which case subsequent exploration costs and the costs incurred to develop a property are capitalized into property, plant and equipment ("PPE"). On the commencement of commercial production, depletion of each mining property will be provided on a unit-of-production basis using estimated resources as the depletion base.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

(e) Property and equipment

Property and equipment ("PPE") are carried at historical cost less any accumulated depreciation and impairment losses. Historical cost includes the acquisition cost or production cost as well as the costs directly attributable to bringing the asset to the location and condition necessary for its use in operations. When property and equipment include significant components with different useful lives, they are recorded and amortized separately. Amortization is computed using the straight-line and declining balance methods based on the estimated useful life of the assets.

Subsequent to initial recognition, the cost model is applied to property and equipment. The company has elected not to apply the option provided by IFRS 1 regarding the re-measurement, as at January 1, 2010, of its property and equipment at their fair value at that date.

The company recognizes in the carrying amount of an item of property and equipment the cost of replacing part of such an item when that cost is incurred if it is probable that the future economic benefits embodied with the item will flow to the company and the cost of the item can be measured reliably. All other costs are recognized in the income statement as an expense as incurred.

Depreciation is provided at rates calculated to write off the cost of property and equipment less their estimated residual value on a straight-line and declining balance methods, over the estimated useful lives of each part of an item of property and equipment, as follows.

An item of PPE is derecognized upon disposal, when held for sale or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in the consolidated statement of comprehensive income.

The company conducts an annual assessment of the residual balances, useful lives and depreciation methods being used for PPE and any changes arising from the assessment are applied by the company prospectively.

(f) Financial instruments

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

(f) Financial instruments, continued

Financial assets

Financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held-to-maturity, available-for-sale, loans-and-receivables or at fair value through profit or loss (“FVTPL”).

Financial assets classified as FVTPL are measured at fair value, with any resultant gain or loss recognized in the statement of operations. Financial instruments classified as being available-for-sale are measured at fair value, with any resultant gain or loss being recognized directly under other comprehensive income, except for impairment losses and, in the case of monetary items such as securities denominated in foreign currency, which are recorded in foreign exchange gains and losses. When these investments are derecognized, the cumulative gain or loss previously recognized directly in equity is recognized in profit or loss. Financial assets classified as loans and receivables are measured at amortized cost using the effective interest method.

Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

Financial liabilities

Financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other-financial-liabilities. Financial liabilities classified as other-financial-liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other-financial-liabilities are subsequently measured at amortized cost using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Fair value changes on financial liabilities classified as FVTPL are recognized through the statement of comprehensive income.

Impairment losses

Impairment losses for the different financial assets and liabilities are recognized as follows:

FVTPL financial assets: An impairment loss on a financial asset or financial liability classified as FVTPL is recognized in net income in the period in which it arises.

Available-for-sale financial assets: When a decline in the fair value of an available-for-sale financial asset has been recognized directly in equity and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized directly in equity is transferred

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

(f) Financial instruments, continued

to profit or loss even though the financial asset has not been derecognized. The amount of the cumulative loss that is recognized in profit or loss is the difference between the acquisition cost and current fair value, less any impairment loss on that financial asset previously recognized in profit or loss.

(g) Impairments

When events or changes in the economic environment indicate a risk of impairment of property and equipment and mineral properties, an impairment test is performed to determine whether the carrying amount of the asset or group of assets under consideration exceeds its or their recoverable amount. Recoverable amount is defined as the higher of an asset's fair value (less costs to sell) and its value in use. Value in use is equal to the present value of future cash flows expected to be derived from the use and sale of the asset.

(h) Provisions

Provisions are recognized when the company has a present obligation (legal or constructive) that has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

(i) Deferred taxes

Pursuant to the liability method, deferred taxes are recorded for temporary differences existing at closing date between the tax base value of assets and liabilities and their carrying amount in the consolidated balance sheet.

Deferred tax assets and liabilities are measured at the expected tax rates for the year during which the asset will be realized or the liability settled, based on tax rates (and tax regulations) enacted or substantially enacted by the closing date. They are reviewed at the end of each year, in line with any changes in applicable tax rates.

Deferred tax assets are recognized for all deductible temporary differences, carry-forward of tax losses and unused tax credits, insofar as it is probable that a taxable profit will be available, or when a current tax liability exists, to make use of those deductible temporary differences, tax loss carry-forwards and unused tax credits, except where the deferred tax asset associated with the deductible temporary difference is generated by initial recognition of an asset or liability in a transaction which is not a business combination, and which, at the transaction date, does not impact neither earnings, nor tax income or loss.

Current tax and deferred tax shall be charged or credited directly to equity if the tax relates to items that are credited or charged directly to equity.

(j) Share based payments

The company offers a share option plan for its officers, directors and employees. The costs of equity-settled transactions with employees are measured by reference to the fair value at the date on which they are granted, measured using the Black-Scholes option pricing model. The costs of equity-settled transactions are recognized, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award (“the vesting date”). The cumulative expense is recognized for equity-settled transactions at each reporting date until the vesting date reflects the company’s best estimate of the number of equity instruments that will ultimately vest. The profit or loss charge or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and the corresponding amount is represented in share option reserve.

No expense is recognized for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition, which are treated as vesting irrespective of whether or not the market condition is satisfied provided that all other performance and/or service conditions are satisfied.

Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

(k) Functional currency and foreign currency translation

Functional and presentation currency

The financial statements are presented in Canadian dollars, which is also the functional currency of the corporate offices located in Canada. The functional currency of the Niger and USA subsidiaries are the West African CFA and US dollar respectively.

Foreign currency translation

Foreign currency transactions are initially recorded into the functional currency at the transaction date exchange rate. At closing date, monetary assets and liabilities denominated in a foreign currency are translated into the functional currency at the closing date exchange rate with all foreign currency adjustments being expensed.

Financial statements of the subsidiaries, for which the functional currency is not the Canadian dollar, are translated into Canadian dollars, the functional currency of the parent, as follows: all asset and liability accounts (including non-monetary and capital items) are translated at the period-end exchange rate and all earnings and expense accounts and cash flow statement items are translated at average exchange rates for the period. The resulting translation gains and losses are recorded as foreign currency translation adjustments in other comprehensive income.

(l) Loss per share

The basic loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding during the period. The diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding stock options and share purchase warrants, in the weighted average number of common shares outstanding during the year, if dilutive. The “treasury stock method” is used for the assumed proceeds upon the exercise of the options and warrants that are used to purchase common shares at the average market price during the year.

(m) Measurement uncertainty

The preparation of consolidated financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions and use judgement that affected the reported amounts of assets, liabilities, revenues and expenses and disclosures. The significant areas requiring management estimates are carrying values of property and equipment and the valuation of equity instruments, such as stock options and warrants. By their nature, these estimates and assumptions are subject to measurement uncertainty and the effect on the consolidated financial statements in future periods could be significant.

(Unaudited)

2. SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

(n) Related parties

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence, related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties. Related party transactions that are in the normal course of business and have commercial substance are measured at the exchange amount.

(o) Segment reporting

The geographical segment is a distinguishable component of the company based on a particular economic environment, which is subject to risks and rewards that are different from those of other segments.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

3. ADOPTION OF NEW AND REVISED IFRS STANDARDS AND INTERPRETATIONS

The IASB issued a number of new and revised International Accounting Standards, International Financial Reporting Standards, amendments and related interpretations which are effective for the company's financial year beginning on or after January 1, 2011. For the purpose of preparing and presenting the financial information for the relevant periods, the company has consistently adopted all these new standards for the relevant reporting periods. At the date of authorization of these interim consolidated financial statements, the IASB and IFRIC has issued the following new and revised standards and interpretations which are not yet effective for the relevant reporting periods:

- IFRS 8 'Operating Segments' - disclosure on information about segment assets
- IFRS 9 'Financial Instruments: Classification and Measurement' – effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, introduces new requirements for the classification and measurement of financial instruments
- IFRS 10 'Consolidated Financial Statements' – effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities
- IFRS 11 'Joint Arrangements' - effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, provides for a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form
- IFRS 12 'Disclosure of Interests in Other Entities' - effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, requires the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with, its interests in other entities and the effects of those interests on its financial position, financial performance and cash flows
- IFRS 13 'Fair Value Measurement' - effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, provides the guidance on the measurement of fair value and related disclosures through a fair value hierarchy

The company has not early adopted these standards, amendments and interpretations. However, management is currently assessing the impact of their application in the financial statements of the company.

4. RESTRICTED CASH

Certain cash balances are restricted as they relate to deposits with state regulatory authorities in the United States to secure various reclamation guarantees with respect to mineral properties in Utah and Colorado. As these licenses were not renewed by December 31, 2010, the company is in the process of obtaining final release of these funds. As these funds are not available for general corporate purposes, they have been separately disclosed.

During the first quarter of 2011, over \$61,000 of these deposit were returned to the company after successful completion of the company's regulatory requirements. A further \$38,000 was returned after the end of the quarter.

Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

5. INVESTMENTS

The company's investments, all considered FVTPL, are carried at market value and comprised of the following:

	<u>March 31</u>	<u>Shares</u>	<u>December 31</u>	<u>Shares</u>
	<u>2011</u>		<u>2010</u>	
Southern Andes Energy Inc.	\$ 920,671	2,422,819	\$ 1,161,486	2,497,819
Homeland Energy Group Ltd.	-	-	17,500	250,000
	<u>\$ 920,671</u>		<u>\$ 1,178,986</u>	

6. MINERAL PROPERTIES

(a) **Niger concessions:**

- (i) The company was granted three year uranium exploration concessions in January 2007 and approved by a governmental order on May 31, 2007. The concessions are located in the Agadez-Arlit district of northern Niger and are held in the name of Uranium International Limited Niger, a branch of the company's Ontario subsidiary.

On June 7, 2010, the government of Niger agreed to extend this agreement a further 27 months to August 31, 2012 under the same terms and conditions.

(ii) The key terms of the agreement include:

- (a) 50% of the concessions must be relinquished on or before November 30, 2012.;
- (b) a minimum expenditure of US\$2,125,000 per concession during the grant period (see note 14)
- (c) a 10% free carried interest for the state in the mining phase with an option to acquire an additional 30% at market value;
- (d) exemptions during the exploration period include:
 - value added tax
 - corporate income tax
 - income tax for expatriate employees
 - land tax
 - licence contribution
 - mining flat tax and other registration fees
 - import duties on certain equipment and spare parts
- (e) a sliding scale mining royalty between 5.5% to 12% of the market value of production on FOB terms
- (f) exemptions during the mining phase include:
 - value added tax until the date of production
 - taxes on industrial/business profits for three years from production
 - land and mining flat taxes indefinitely
 - import duties on certain equipment and spare parts.

Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

6. MINERAL PROPERTIES, CONTINUED

(iii) During 2010, the company expended a total of \$455,450 (2009 - \$1,874,846) on the acquisition, exploration and development of mineral properties in Niger. As at December 31, 2010, the cumulative net expenditures on these properties were \$11,614,986 (2009 - \$11,159,536). In the first quarter of 2011, the company expended a further \$36,634.

(b) US properties:

(i) During the year ended December 31, 2009, the company did not renew the mining leases of four properties and were ultimately dropped. These properties consisted of CNX, Norma Jean, and Tex in the state of Colorado and the Deremo West property in Utah. The company wrote down a total of \$1,335,907 against these properties. Subsequently, the company wrote down the sum of \$1,974,207 against the properties of Atkinson Mesa, Dry Creek and Slickrock in Utah comprising most of the capitalized expenditures on these properties. During 2010, the company did not renew the mining leases of Atkinson Mesa, Dry Creek, Slickrock and Vex and ultimately wrote off the remainder of the capitalized expenditures of the properties due to a lack of commercial viability.

(ii) During 2010, the company expended a total of \$360,024 (2009 - \$869,346) on the acquisition, exploration and development of mineral properties in the US. As at December 31, 2010, the cumulative net expenditures on these properties of \$8,406,860 have all been written off.

7. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	March 31 2011	December 31 2010
Balances made up of:		
Trade accounts payable	\$ 49,672	\$ 60,519
Accrued liabilities and provisions	146,330	146,685
Payroll related	52,467	56,821
	248,469	264,025
Aging:		
Current	10,693	17,769
30-60	52,675	67,630
61+	185,101	178,626
	\$ 248,469	\$ 264,025

8. STOCK OPTIONS

The company has adopted a stock option plan under which options to purchase shares of the company may be granted to directors, officers, employees and consultants of the company. The following summary sets out the activity in outstanding stock options:

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

	March 2011	December 31 2010
Outstanding, beginning of period	3,940,000	4,090,000
Cancelled	-	(150,000)
Outstanding, ending of period	3,940,000	3,940,000

Number of stock options	Remaining contractual life	Exercise price per share	Expiry date	Exercisable stock options
2,005,000	1.3	0.25	May 7, 2012	2,005,000
1,835,000	2.1	0.25	March 6, 2013	1,835,000
<u>100,000</u>	2.9	0.25	November 21, 2013	<u>100,000</u>
<u><u>3,940,000</u></u>				<u><u>3,940,000</u></u>

During the period, the company recognized nother \$4,095 of share based payments.

9. LOSS PER SHARE

The weighted average number of shares outstanding for the three month period ended March 31, 2011 is 62,472,448 (December 31, 2010 - 44,175,733). Diluted loss per share is the same as basic loss per share as all options and warrants are anti-dilutive.

10. FINANCIAL INSTRUMENTS

The company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, currency and fair value). Risk management is carried out by the company's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

10. FINANCIAL INSTRUMENTS, CONTINUED

(a) Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The company's credit risk is primarily attributable to accounts receivable and cash. Financial instruments included in accounts receivable consist of miscellaneous accounts receivable and accrued interest and deposits held with consultants and other service providers. Cash of \$78,468 (December 31, 2010 - \$24,413) are held with reputable financial institutions from which management believes the risk of loss to be minimal. All accounts receivable and deposits held with consultants and other service providers are in good standing. As of March 31, 2011, a total of \$3,007 (December 31, 2010 - \$55,947) represented the maximum credit exposure on accounts receivable. All the 2010 accounts receivable were collected after year-end, and the current balance consists mostly of HST receivable. Accordingly, management believes that the credit risk concentration with respect to accounts receivable is negligible.

(b) Liquidity risk

Liquidity risk refers to the risk that the company will not be able to meet its financial obligations when they become due, or can only do so at excessive cost. The company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due, and as such, the company has classified its investments as current. As at March 31, 2011, the company has working capital of \$824,492 (December 31, 2010 - \$1,129,466). All of the company's financial liabilities have contractual maturities of less than 90 days and are subject to normal trade terms.

(c) Market risk

The company is exposed to certain market risks including changes in pricing and limited access to foreign markets. Specifically, the carrying value of its investments, all of which are classified as FVTPL ("fair value through profit or loss"), are adjusted every period for any changes in their quoted trading prices.

(d) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. As the company has minimal or no cash balances that earn interest and no interest-bearing debt, its interest rate risk is considered nominal.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

10. FINANCIAL INSTRUMENTS, CONTINUED

(e) Currency risk

Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities denominated in a currency that is not the entity's functional currency. The company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The company funds certain operations, exploration and administrative expenses in Niger and the United States on a cash call basis using US dollar currency converted from its Canadian dollar bank accounts held in Canada. The company maintains US dollar bank accounts in Canada and the United States. The company is subject to gains and losses due to fluctuations in US dollar and Niger currency against the Canadian dollar.

A 10% increase or decrease in the respective foreign exchange rates that the company is subject to, based on the company's foreign denominated financial instruments as at period-end, could result in an estimated foreign exchange gain or loss of approximately \$12,000.

(f) Fair value

The company has, for accounting purposes, designated its cash, restricted cash and investments as held-for-trading, each of which are measured at fair value. Accounts receivable are classified for accounting purposes as loans and receivables, which are measured at amortized cost which approximates fair market value due to its short-term nature. Accounts payable and accrued liabilities are classified for accounting purposes as other financial liabilities, which are measured at amortized cost which also approximates fair market value due to its short-term nature. Fair market value represents the amount that would be exchanged in an arm's length transaction between willing parties and is best evidenced by a quoted market price, if one exists.

The fair value of the company's financial instruments where financial measurement is required, based on the criteria in note 2(f), are as follows:

	March 31	December 31
	2011	2010
Level 1		
Cash	\$ 78,468	\$ 24,413
Restricted cash	66,056	127,340
Investments	\$ 920,671	\$ 1,178,986

Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

11. CAPITAL MANAGEMENT

The company's objective when managing capital is to maintain adequate levels of funding to support development of its exploration projects, to expand regional exploration activities within Niger and to maintain corporate and administrative functions. The company considers its capital to be equity, which is comprised of share capital, contributed surplus, reserve for warrants, reserve for share based payments, accumulated deficit and accumulated other comprehensive loss, which at March 31, 2011 was \$929,310 (December 31, 2010 - \$1,245,917). The company manages its capital structure in an effort to provide sufficient funding for its development projects. Funds are primarily secured through equity capital raised by way of private placements. There can be no assurances that the company will be able to continue raising equity capital in this manner. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the company's management to sustain future development of the business. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the company, is reasonable. There have been no changes in the company's approach to capital management since the year-end. The company is not subject to externally imposed capital requirements.

(Stated in \$CAD)
(Unaudited)

13. RELATED PARTY TRANSACTIONS

The company has transacted with related parties pursuant to service arrangements in the ordinary course of business. These transactions were recorded at the exchange amount as agreed between the related parties and included the following:

- (a) Starting in January, 2011, the company paid \$6,500 per month (total of \$19,500 for the quarter) to Grove Capital Group Ltd., a company controlled by an officer and director, for management and administrative services. These services were previously provided by Southern Andes Energy Inc. at a time when the companies shared common management and office premises.

14. COMMITMENT

The company is committed to spend a minimum of US\$300,000 per concession before November 30, 2008 (US\$2,400,000 for the eight concessions). For the periods ending November 30, 2009 and 2010, the annual expenditures are increased to US\$500,000 and US\$1,325,000 respectively per concession (US\$4,000,000 and US\$10,600,000 for the eight concessions). The concession licenses have since been extended to August 31, 2012. To date, the company has spent approximately \$ 6,120,000 (excluding pre-operational expenditures) on the eight Niger concessions.

The company has encountered many delays during the execution of its Niger project due to events or circumstances beyond the company's control. The government of Niger has acknowledged these delays as "force majeure" and has pledged to grant the company an extension to its current contract to compensate for the lost time. The company is in process to make the necessary applications to get the extension formalized.

In addition, the company has agreed to make three time cash payments to the government for the purpose of training Niger nationals equivalent to US\$10,000 per concession or US\$ 80,000 for its eight concessions as part of minimum spending commitments.

15. SUBSEQUENT EVENT

In May, 2011, the company completed a private placement of 20,000,000 shares for \$0.0075 per share for total consideration of \$150,000.

(Unaudited)

16. FIRST TIME ADOPTION OF IFRS (SEE SCHEDULES 1 TO 7 ATTACHED)

As stated in Summary of Significant Accounting Policies (note 2(a)), these are the company's first interim consolidated financial statements prepared in accordance with IFRS.

The policies set out in the Summary of Significant Accounting Policies section have been applied in preparing the interim consolidated financial statements for the period ended March 31, 2011, the comparative information presented in these financial statements for the period ended December 31, 2010 and in the preparation of an opening IFRS balance sheet at January 1, 2010 (the company's date of transition).

Under IFRS 1 'First time Adoption of International Financial Reporting Standards', the IFRS are applied retrospectively at the transition date with all adjustments to assets and liabilities as stated under GAAP taken to retained earnings unless certain exemptions are applied. The company has followed the recommendations in IFRS-1 'First-time adoption of IFRS', in preparing its transitional statements. IFRS-1 provides specific one-time choices and mandates specific one-time exceptions with respect to first-time adoption of IFRS.

((I) Choices available at first-time adoption IFRS that the company has adopted include:

- (a) Property and equipment: IFRS 1 provides a choice between measuring property and equipment at its fair value at the date of transition and using those amounts as deemed cost or using the historical valuation under the prior GAAP. The company has decided to continue to apply the cost model for property and equipment and has not restated property and equipment to fair value under IFRS. The historical bases under Canadian GAAP have been designated as the deemed cost under IFRS at Transition Date.
- (b) Foreign exchange: Retrospective application of IFRS would require recalculation of cumulative currency translation differences in accordance with IAS 21, The Effects of Changes in Foreign Exchange Rates, from the date a subsidiary or associate was formed or acquired. Alternatively, IFRS 1 permits cumulative translation gains and losses to be reset to zero at the transition date of January 1, 2010. The company has elected to reset all cumulative translation gains and losses to zero in opening retained earnings at January 1, 2010.
- (c) Share-based payments: IFRS 2, Share Based Payments, permits the application of that standard only to equity instruments granted after November 7, 2002 that had not vested by January 1, 2010. As permitted, the company has applied IFRS 2 for all equity instruments granted after November 7, 2002 that had not vested by January 1, 2010.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

- (d) Mining properties: IFRS 6 permits entities to continue to use their existing accounting policies for exploration and evaluation assets. The company will take an exemption provided by IFRS 6.7 in developing its accounting policies and will apply IAS 8.10 as required by IFRS 6.6. As a result of this policy choice, the company is required to expense all of its previously capitalized exploration and evaluation expenditures at the transition date (see also note 2(d)) and Schedule 1). The company will not continue to capitalize exploration expenditures and will adopt a policy choice where all exploration and acquisition costs of unproven resources are expensed as it believes that this policy results in information that is:
- (i) Relevant to the economic decision-making needs of users; and
 - (ii) Reliable, in that the financial statements: (i) represent faithfully the financial position, financial performance and cash flows of the entity; (ii) reflect the economic substance of transactions, other events and conditions, and not merely the legal form; (iii) are neutral, i.e. free from bias; (iv) are prudent; and (v) are complete in all material respects.
- (e) e) Business combinations: IFRS 3 allows its requirements to be applied from the transition date

(II) Explanatory notes to the following IFRS reconciliations (see Schedules 1 to 7 attached) are as follows:

- (a) *Under Canadian GAAP* – Prior to 2011, the company used the policy to defer the cost of mineral properties and their related exploration and development costs until the properties are placed into production, sold or abandoned. These costs would be amortized over the estimated useful life of the properties following the commencement of production. Cost includes both the cash consideration as well as the fair market value of any securities issued on the acquisition of mineral properties. Properties acquired under option agreements or joint ventures, whereby payments were made at the sole discretion of the company, were recorded in the accounts at such time as the payments are made. The proceeds from property options granted reduced the cost of the related property and any excess over cost is applied to income.

Under IFRS – Acquisition, exploration and evaluation expenditures for each property can be expensed as incurred, unless such costs are expected to be recovered through successful development and exploration of the property or, alternatively, by its sale. All mining property expenditures capitalized up to December 31, 2009 have been charged to retained earnings as at January 1, 2010.

- (b) Under IFRS, the results and financial position of all the subsidiaries that have a functional currency different from the presentation currency are translated into the presentation currency as follows: assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet, income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and all resulting exchange differences are recognized as a separate component of equity.

HOMELAND URANIUM INC.
Notes to Interim Consolidated Financial Statements
Three Month Periods Ended March 31, 2011 and 2010
(Stated in \$CAD)
(Unaudited)

- (c) *Under Canadian GAAP* – Prior to 2011, the Company recorded the value of share based payments and warrants issued to contributed surplus.

Under IFRS – IFRS requires an entity to present for each component of equity, a reconciliation between the carrying amount at the beginning and end of the period, separately disclosing each change. IFRS requires a separate disclosure of the value that relates to "Reserves for warrants", "Reserves for share based payments" and any other component of equity.
